# Housing Land Audit 2018 – Executive Summary

The Housing Land Audit illustrates the scale and characteristics of the housing land supply in Aberdeen City and Aberdeenshire. It is used to determine if there is sufficient land available for housing development and also to inform the planning of future infrastructure such as roads, schools and drainage.

The audit is undertaken annually by Aberdeen City and Aberdeenshire Councils in consultation with a wide range of stakeholders. It has a base date of 1<sup>st</sup> January 2018 and lists sites which are allocated for housing in the local development plan or have planning consent for housing development. Recent and anticipated completions are recorded for each site.

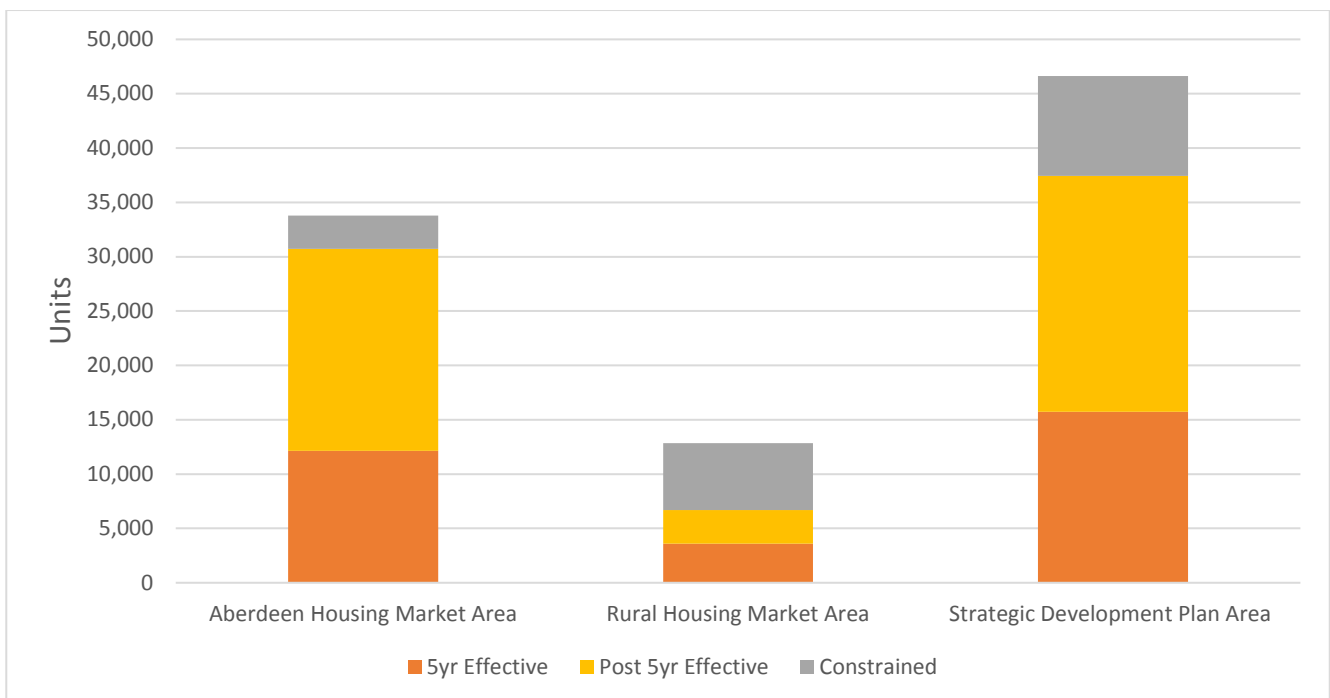

Sites which are, or are expected to become available for development are classed as **effective**. If there are currently issues such as access or marketability problems preventing sites coming forward they are classed as **constrained**. More detail on these definitions can be found in Appendix 2.

The five year effective land supply (measured in housing units) is compared against the housing requirement set out in the [Strategic Development Plan](#) to determine whether there is sufficient land available for housing in each of the two housing market areas – the Aberdeen Housing Market Area, which includes Aberdeen City, and the Rural Housing Market Area. Each housing market area (HMA) should have a minimum of five year's worth of effective land.

## 2018 Housing Land Supply

Figure 1 shows that in the Aberdeen HMA there continues to be a much higher proportion of effective land than in the Rural HMA where many sites are constrained, primarily by marketability.

*Figure 1 Status of Housing Land Supply by Housing Market Area*

## Land Supply and Housing Requirement

Table 1 shows that there is more than five year's worth of effective housing land available in both housing market areas when measured against the housing requirement in the Strategic Development Plan with 8.1 yrs in the Aberdeen HMA and 5.6 yrs in the Rural HMA.

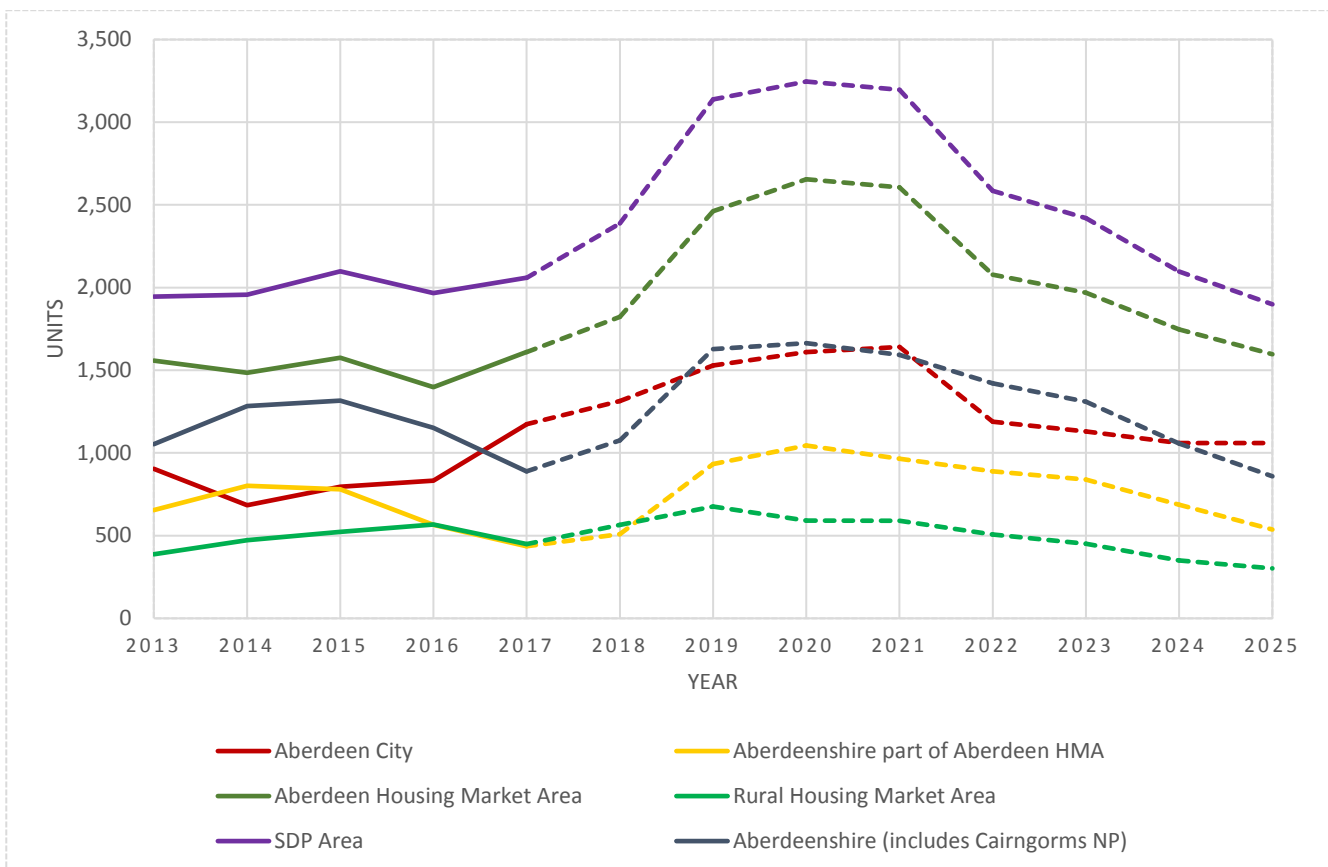

Table 1 Land Supply and Housing Requirement 2018

Housing Market Area	SDP Housing Requirement 2017-2021	Five Year Effective Supply 2017	Number of Years Supply
Aberdeen HMA	7,509	12,142	8.1
Rural HMA	3,206	3,597	5.6

## Housing Completions

Figure 2 shows completions for each of the local authority areas and housing market areas. Annual completions in the Aberdeen HMA are expected to increase over the next few years, due mainly to continued progress on local development plan sites, particularly in Aberdeen City. Completions in the Aberdeenshire part of the Aberdeen HMA have fallen recently, reflecting the more difficult market situation, but there are signs that the market is picking up again now and completions are expected to increase again in the next few years. In the Rural HMA, completions tend to average around 500 units per annum and this is expected to continue.

# 1. Introduction

## 1.1 Purpose of Audit

- 1.1.1 The housing land audit illustrates the scale and characteristics of the current housing land supply in Aberdeen City and Aberdeenshire. It explains the background to the identification of the land supply and the way in which it is determined. It then reviews the main characteristics of the current supply and gives details of each site. The base date of the Housing Land Audit is 1 January 2018.
- 1.1.2 The report has been produced using Scottish Government guidance contained within [Planning Advice Note 2/2010 Affordable Housing and Housing Land Audits](#), which sets out the criteria for the inclusion of sites in the audit, and gives guidance on determining the status of these sites.

## 1.2 Preparation of Audit

- 1.2.1 The statement of land supply in Aberdeen City and Aberdeenshire is the result of systematic preparation and consultation, the main elements of which are:

**Regular Monitoring:** The existing land supply is kept up to date during the year by regular monitoring. The information kept under review includes house completions, permissions granted and new allocations. The base date for the audit is taken to be 1st January every year to allow direct comparisons between individual years.

**Housebuilders Survey:** Developers, landowners and agents are contacted each year to confirm the details held on housing sites and give anticipated development rates. In addition, they are asked to identify any relevant constraints on development and give details of what action is being taken to bring sites forward. The Scottish Government (Housing Investment Division) is also asked at this stage for information about their development funding programme for affordable housing.

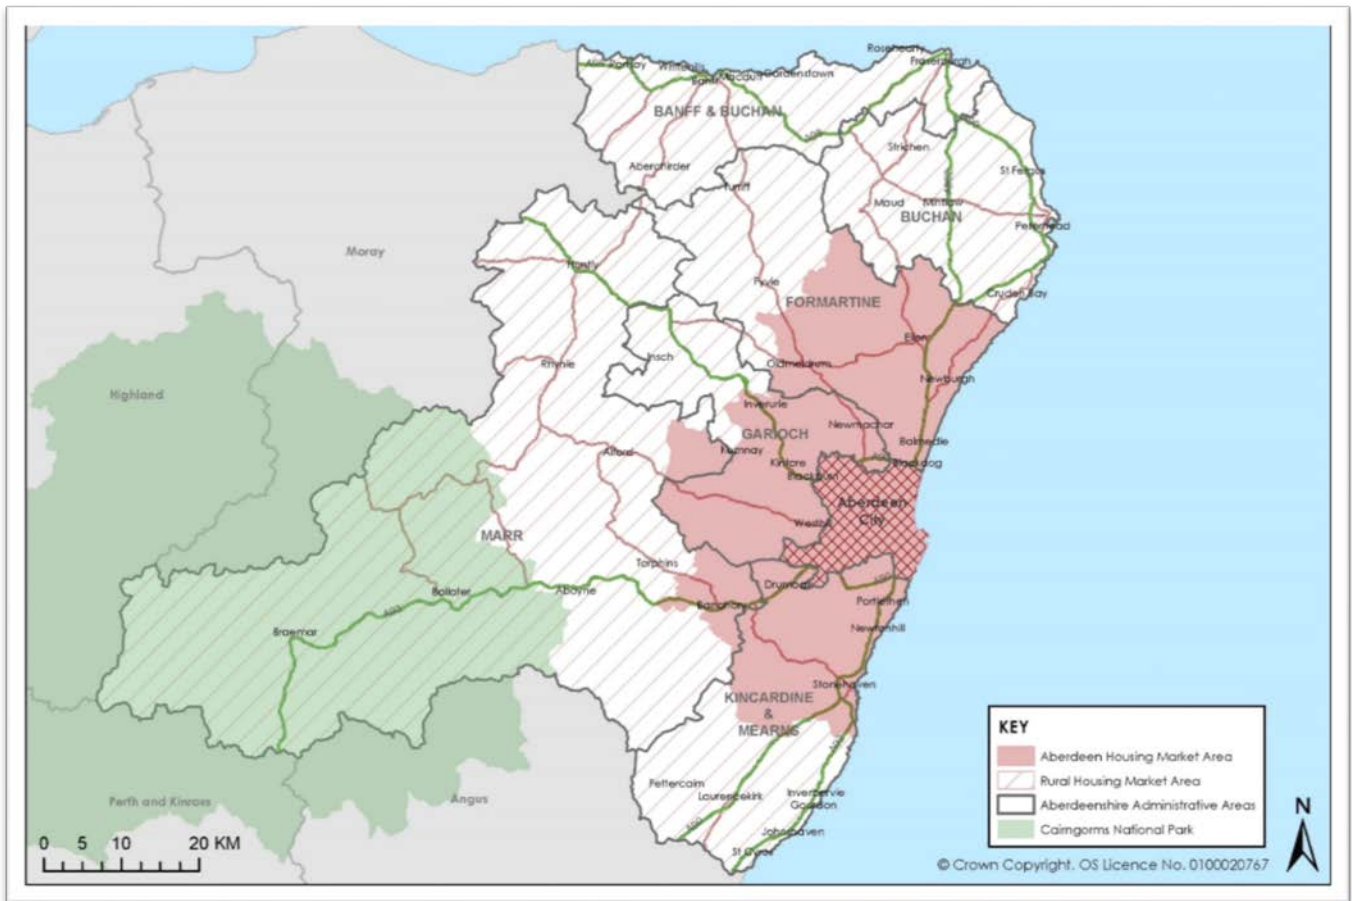

**Consultation on Draft Land Supply:** The information is consolidated to produce a draft statement of land supply. This draft is made available on the Aberdeenshire Council and Aberdeen City Council websites for consultation and notification is sent to Homes for Scotland, Scottish Government (Housing Investment Division), Scottish Environment Protection Agency (SEPA), Scottish Water, Scottish Natural Heritage (SNH), and a number of large and small developers. Once all responses to the draft have been received and analysed by the two Councils, a meeting is held with consultees with a view to producing an agreed statement of the land supply situation.

**Publication of Final Report:** The finalised audit is reported to the June meeting of the Strategic Development Planning Authority and is then published on both Council's websites and in hard copy.

## 1.3 Housing Market Areas

- 1.3.1 The housing land audit is divided up by Housing Market Area. The Aberdeen Housing Market Area (AHMA) includes Aberdeen City and the part of Aberdeenshire which forms roughly a 20 mile radius of the City boundary. The Rural Housing Market Area (RHMA) takes in the rest of Aberdeenshire excluding the part that falls within the Cairngorms National Park (CNP). Sites in the CNP are listed separately with a summary in Chapter 7. Figure 3 shows the housing market areas.

Figure 3 Map of Aberdeen City, Aberdeenshire and Housing Market Areas

## 1.4 Land Supply Definitions

- 1.4.1 Three categories of land are identified in the audit.
- 1.4.2 The **Established** Housing Land Supply includes sites allocated for housing in the Local Development Plan, unallocated sites with a current planning consent, the remaining capacity of sites under construction, and other sites with agreed potential for development. Within the Established Supply, sites may be classed as effective or constrained.
- 1.4.3 The **Effective** supply includes all sites which do not have identified constraints and are therefore expected to be available for housing development. The Five Year Effective Supply consists of the total number of units which are expected to come forward within five years of the base date of the audit and includes an estimate of the likely contribution on small sites of less than five units. This total is the figure used to measure the adequacy of the land supply for Strategic Development Plan monitoring purposes. Units on effective sites which are programmed beyond the five year period fall into the Post Five Year Effective Supply.
- 1.4.4 The **Constrained** Housing Land Supply consists of those sites or parts of sites which have problems preventing development starting within five years from the base date of the audit.

- 1.4.5 In summary, the Established Supply is calculated by adding together the Effective Supply (5 Yr), the Effective Supply (Post 5 Yr) and the Constrained Supply.
- 1.4.6 Appendix 2 lists all the sites which currently make up the housing land supply. It gives details of each site including the number of units remaining at the base date of the audit and how many are effective and constrained. It also provides recent and anticipated completions for each site. Only sites of five or more units are listed. Figures for small sites are given in Table 9 and Table 10.
- 1.4.7 Maps and further detail on the sites listed in the Housing Land Audit can be found online at

## 2. Background to Housing Land Audit 2018

### 2.1 2018 Draft Housing Land Audit Consultation

- 2.1.1 Responses to the draft audit were received from Homes for Scotland, Stewart Milne Homes, Emac Planning (for Kirkwood Homes and Polmuir Properties Ltd), Scottish Environmental Protection Agency (SEPA), Scottish Water, Case Consulting, Turnberry, Scotia Homes, Lippe Architects and Churchill Homes.
- 2.1.2 A meeting was held on 10 May 2018 to discuss outstanding issues and move towards an agreed position on audit sites. It was attended by a number of housebuilders and agents (representing Stewart Milne Homes, Cala Homes, Case Consulting, Emac Planning), a representative for Homes for Scotland, officers of the two Councils and the Strategic Development Planning Authority, and an independent Chair. Some general issues relating to the audit were discussed at the meeting and there was detailed discussion on individual sites in a range of locations. Further comments were received from Barratt Homes (North) prior to the completion of the HLA publication.

### 2.2 2017 Local Development Plans

- 2.2.1 Aberdeen City and Aberdeenshire both adopted new Local Development Plans in 2017. Changes to housing allocations in the new plans have therefore been reflected in this audit.

## 3. Established Housing Land Supply

### 3.1 Established Housing Land Supply

3.1.1 The Established Housing Land Supply for the Aberdeen City and Shire Strategic Development Plan Area and the housing market areas is shown in Table 2.

*Table 2 Established Housing Land Supply 2017 and 2018*

Area	2017	2018	Change
Aberdeen City	20,489	20,884	2%
Aberdeenshire (part)	12,007	12,387	3%
Small Sites AHMA	508	518	2%
<b>Aberdeen Housing Market Area</b>	<b>33,004</b>	<b>33,789</b>	<b>2%</b>
Aberdeenshire RHMA	12,459	12,177	-2%
Small Sites RHMA	676	668	-1%
<b>Rural Housing Market Area</b>	<b>13,135</b>	<b>12,845</b>	<b>-2%</b>
<b>Strategic Development Plan Area</b>	<b>46,139</b>	<b>46,634</b>	<b>1%</b>

3.1.2 The Established Housing Land Supply in the Strategic Development Plan Area is 46,634 units and has remained largely unchanged, with a small net increase of 1% since 2017.

3.1.3 Sites which no longer appear in the audit because they were completed in 2017 or have been removed for other reasons are listed in Appendix 3.

### 3.2 Greenfield / Brownfield Land

3.2.1 Table 3 shows the relative proportions of the Established Supply which are located on greenfield and brownfield land.

*Table 3 Proportion of Established Land Supply on Greenfield and Brownfield Land*

Area	Greenfield	Brownfield
Aberdeen City	82%	18%
Aberdeenshire (part)	92%	8%
Aberdeen Housing Market Area	86%	14%
Rural Housing Market Area	90%	10%
Strategic Development Plan Area	87%	13%

3.2.2 In Aberdeenshire, in both housing market areas, there has been little change and the majority of housing land continues to be on greenfield sites. In previous years the majority of housing land in Aberdeen City had been on brownfield sites, but with the large greenfield allocations in the Aberdeen Local Development Plan there is now a higher proportion of greenfield sites.

## 4. Constrained Housing Land Supply

### 4.1 Constrained Housing Land Supply

- 4.1.1 The Constrained Housing Land Supply for the Aberdeen City and Shire Strategic Development Plan Area and the housing market areas is shown in Table 4.

*Table 4 Constrained Housing Land Supply 2017 and 2018*

Area	2017	2018	Change
Aberdeen City	2,915	1,955	-33%
Aberdeenshire (part)	1,020	1,088	7%
<b>Aberdeen Housing Market Area</b>	<b>3,935</b>	<b>3,043</b>	<b>-23%</b>
Rural Housing Market Area	6,063	6,140	1%
<b>Strategic Development Plan Area</b>	<b>9,998</b>	<b>9,183</b>	<b>-8%</b>

- 4.1.2 A total of 9,183 units are constrained in the Strategic Development Plan Area in 2018, a net decrease of 8% since 2017. In the AHMA there was a considerable change with a 33% decrease in Aberdeen City. This is largely a reflection of large sites coming forward in the medium term. In Aberdeenshire there has been a relatively small increase of 7%, due to a variety of issues relating to ownership, marketability and funding affecting a small number of sites.
- 4.1.3 In the RHMA there was a slight increase of 1% in the constrained supply as more sites were also affected by ownership and marketability issues, and it remains high at 6,140 units. The RHMA is particularly affected by low demand in some parts of the area which, in combination with a generous supply of land, means that many rural sites are not currently expected to come forward in the short to medium term.

### 4.2 Analysis of Constraints

- 4.2.1 Table 5 and Table 6 show the breakdown of constraints for each of the two housing market areas. Please note that the total of the number of units given does not equal the number of units in the Constrained Supply as some sites have more than one constraint and therefore will be counted twice. Similarly, percentages do not sum to 100%.

#### *Aberdeen Housing Market Area*

- 4.2.2 The main constraint in the Aberdeen HMA is ownership with 56% of constrained units being affected by this issue. The majority of the ownership constrained units are on sites owned by Aberdeen City Council which cannot be deemed effective until they are on a programme of land disposal, according to the criteria in PAN2/2010. The number of constrained sites in the Aberdeenshire part of the Aberdeen HMA remains relatively low, with the main issues being infrastructure (such as a need for road improvements),

and ownership, where owners are unwilling to put some sites forward for development in current market conditions.

*Table 5 Constraint Analysis, Aberdeen Housing Market Area*

Constraint	No. of Sites	No. of Units	% of Constrained Units
Contamination	1	29	1%
Funding	1	35	1%
Infrastructure	4	576	19%
Land Use	2	530	17%
Marketability	11	116	4%
Other	3	549	18%
Ownership	17	1,705	56%
Physical	4	91	3%

### *Rural Housing Market Area*

- 4.2.3 In the Rural HMA, limited demand and a generous supply of land means that marketability is the most significant constraint with 62% of constrained units being affected by this issue. Lack of infrastructure or difficulty in providing it is also an important constraint affecting 35% of units and is closely related to the marketability issue. In many cases, infrastructure could be provided if there was sufficient demand to make that investment financially viable for developers in terms of house sales. 26% of constrained units have a physical constraint - this is often a problem with providing access to the site or it may be affected by flooding.

Table 6 Constraint Analysis, Rural Housing Market Area

Constraint	No. of Sites	No. of Units	% of Constrained Units
Contamination	1	300	5%
Funding	3	72	1%
Infrastructure	15	2,155	35%
Land Use	2	12	<1%
Marketability	64	3,781	62%
Other	1	5	<1%
Ownership	40	767	13%
Physical	16	1,592	26%

### 4.3 Constrained Sites and Completions

- 4.3.1 In Appendix 2, constrained units are listed as a total rather than being programmed by year. This does not prevent them from coming forward earlier if constraints are resolved. It simply means that as at 1 January 2018 we did not have sufficient information to determine when that might happen.
- 4.3.2 Appendix 4 lists all constrained sites, the nature of the constraint and, where known, the likely timescale for removal of the constraint. In reality it is very difficult to do this for most sites with any accuracy, and for a number of sites the information is unknown.
- 4.3.3 Some of these sites have been constrained for many years and these are highlighted in Appendix 4 as long term constrained. Long term constrained sites are defined as those sites that have been in the Audit for over 10 years and are currently constrained. Within the Strategic Development Plan Area there are 9,183 constrained units in total of which 1,971 (21%) are classed as long term constrained. The vast majority of these (1,871) are in the Rural HMA.

## 5. Effective Housing Land Supply

### 5.1 Five Year Effective Housing Land Supply

5.1.1 The five year Effective Housing Land Supply for the Aberdeen City and Shire Strategic Plan Area and the housing market areas is shown in Table 7.

*Table 7 Five Year Effective Housing Land Supply 2017 and 2018*

Area	2017	2018	Change
Aberdeen City	6,469	7,283	13%
Aberdeenshire (part)	3,776	4,341	15%
Small Sites AHMA	508	518	2%
<b>Aberdeen Housing Market Area</b>	<b>10,753</b>	<b>12,142</b>	<b>13%</b>
Aberdeenshire RHMA	2,929	2,929	0%
Small Sites RHMA	676	668	-1%
<b>Rural Housing Market Area</b>	<b>3,605</b>	<b>3,597</b>	<b>0%</b>
<b>Strategic Development Plan Area</b>	<b>14,358</b>	<b>15,739</b>	<b>10%</b>

5.1.2 The five year Effective Supply in the Strategic Development Plan Area is 15,739 units, an increase of 10% since last year.

5.1.3 In the AHMA there was an overall increase of 13%. In several locations in both Aberdeenshire and Aberdeen City the number of units contributing to the five year supply has increased as some larger allocated sites have progressed.

5.1.4 The Rural HMA remains steady and there has been no significant change in the five year effective supply this year.

5.1.5 77% of the Effective Supply is located in the Aberdeen HMA with 61% of the effective units within the Aberdeen HMA being located within Aberdeen City. Within the Strategic Development Plan Area as a whole, 47% of effective units are located within Aberdeen City and 53% in Aberdeenshire.

## 5.2 Post Five Year Effective Supply

5.2.1 Table 8 shows the total number of units on effective sites which are expected to be built beyond the five year period for each housing market area and gives a comparison with 2017.

*Table 8 Effective Units Programmed Beyond Year 5 in 2017 and 2018*

Area	2017	2018	Change
Aberdeen City	11,105	11,637	5%
Aberdeenshire (part)	7,211	6,958	-4%
<b>Aberdeen Housing Market Area</b>	<b>18,316</b>	<b>18,595</b>	<b>2%</b>
Rural Housing Market Area	3,467	3,108	-10%
<b>Strategic Development Plan Area</b>	<b>21,783</b>	<b>21,703</b>	<b>0%</b>

5.2.2 Since 2017 there has been little net change in the number of effective units programmed beyond the first five years from the base date of the audit (2023 onwards), and there remains a high number of effective units that could potentially come forward sooner if market conditions improve and build rates are increased. In the RHMA, some units which had been programmed in the post five year period are now regarded as constrained by marketability which has led to a decrease in the total for this area.

## 5.3 Small Sites

5.3.1 The housing land audit focuses on sites with a capacity of five or more units. In addition, there are many smaller sites which can be developed for housing, including conversions and sub-division of existing residential properties, and this forms an important component of the effective housing land supply, particularly in rural areas.

5.3.2 The small sites figures are based on an analysis of completions over the past five years. This is in line with Scottish Government guidance, which recognises the practical difficulties in identifying individual small sites and suggests the use of an aggregated figure. Small sites completions in the part of the Cairngorms National Park Authority within Aberdeenshire have been excluded.

Table 9 Completions on Small Sites 2013-2017

Year	Aberdeen City	Abshire part of AHMA	AHMA	RHMA
2013	32	45	77	116
2014	23	70	93	123
2015	39	69	108	124
2016	40	93	133	170
2017	34	73	107	135
<b>5 Year Total</b>	<b>168</b>	<b>350</b>	<b>518</b>	<b>668</b>
<b>5 Year Average</b>	<b>34</b>	<b>70</b>	<b>104</b>	<b>134</b>

5.3.3 Table 9 shows annual completions on small sites for each area. The contribution of small sites to the five year effective supply is therefore the average figure for each of the housing market areas multiplied by five years to give the totals highlighted above.

## 5.4 Completions

- 5.4.1 Figure 4 below shows actual and anticipated completions for each of the local authority areas and housing market areas. Annual completions in the Aberdeen HMA are expected to increase over the next few years, due mainly to continued progress on local development plan sites, particularly in Aberdeen City. Completions in the Aberdeenshire part of the Aberdeen HMA have fallen recently, reflecting the more difficult market situation at present, but there are signs that the market is picking up again now and completions are expected to increase again in the next few years. In the Rural HMA, completions tend to average around 500 units per annum and this is expected to continue.
- 5.4.2 Completions always appear highest in the first five years after the base date of the audit then appear to tail off. This is really a reflection of greater uncertainty in the medium to long term which leads to more conservative estimates. In reality, completion levels tend to be maintained rather than decreasing and this can be seen as the audit is rolled forward each year. Future completions are also supplemented by the contribution from small sites and windfall sites. More detail on completions can be found in Appendix 1.

Figure 4 Actual and Anticipated Housing Completions by Area 2013-2025

## 6. Housing Requirement and Five Year Effective Supply

### 6.1 Housing Requirement and Five Year Effective Supply

6.1.1 The [Aberdeen City and Shire Strategic Development Plan](#) sets out the housing requirement for each housing market area. In order to demonstrate that there is a five year supply, the number of effective units must be greater than or equal to the housing requirement for the five year period concerned.

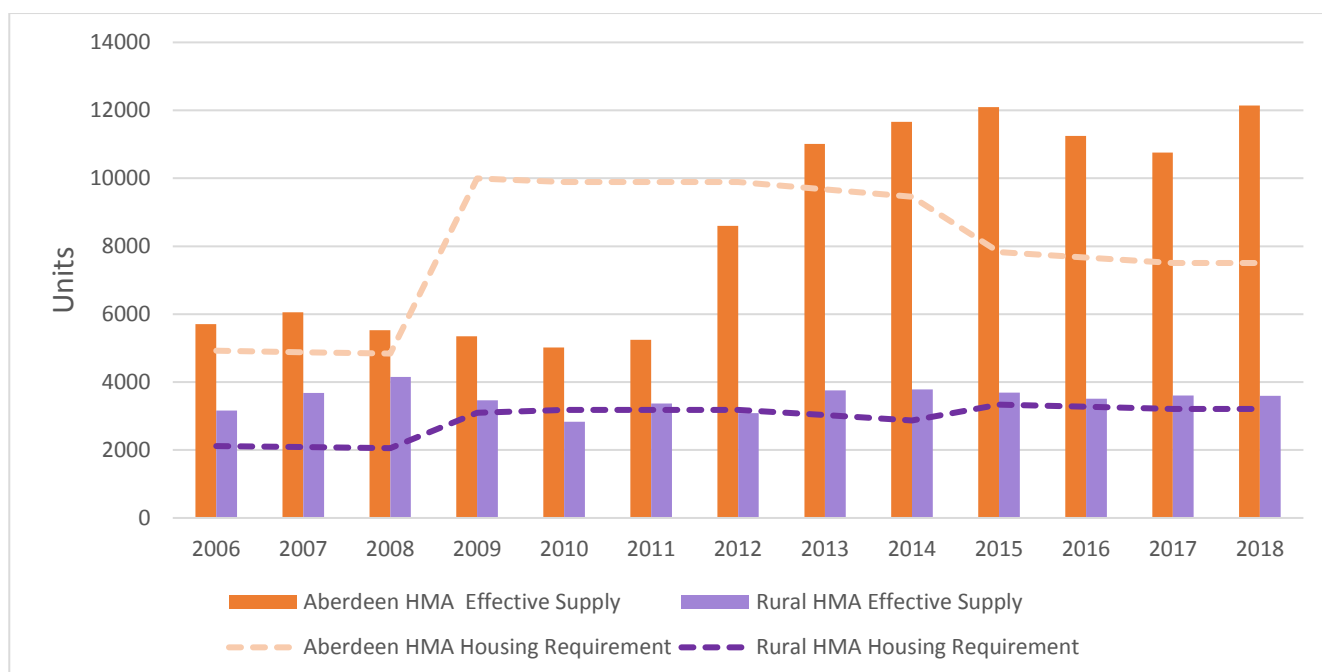

6.1.2 Table 10 shows that there is above five years supply in both housing market areas.

*Table 10 Housing Requirement and Effective Supply 2018*

Housing Market Area	SDP Housing Requirement 2018-2022	Five Year Effective Supply 2018	No. of Years Supply
AHMA	7,509	12,142	8.1
RHMA	3,206	3,597	5.6

6.1.3 Figure 5 shows the trend in the Five Year Effective Supply for both the housing market areas over the past ten years and compares it to the SDP Housing Requirement.

*Figure 5 Five Year Effective Supply and Housing Requirement 2006-2018*

- 6.1.4 Following the adoption of the Aberdeen City and Aberdeenshire Local Development Plans in early 2017, the Aberdeen AHMA effective supply in 2018 stands at 12,142 units and remains well in excess of the five year requirement. This is an increase from 2017 which had 10,753 units.
- 6.1.5 In the Rural HMA, the effective supply has remained steady since 2013 and now stands at 3,605 units in 2018, comfortably meeting the five year requirement. The extent of the five year effective supply in the Rural HMA is primarily limited by low demand in the market in much of the area which affects what can realistically be expected to come forward within five years. This is evidenced by the fact that the five year effective supply was at its highest at the peak of the market in 2008. More uncertain market conditions in recent years has meant a decrease in the number of units programmed for the five year period and as a result, only a small amount of the total land available appears in the five year effective supply. There are many more sites in the post five year effective supply (3,108 units) and also in the constrained supply where just over 2,600 units are constrained only by marketability and could potentially become effective if demand picks up.

## 6.2 Agreement on Effective Supply

- 6.2.1 An integral part of the process of preparing the Audit is consultation with representatives of the housebuilding industry and other interested parties in order to try to reach agreement on the Effective Supply. In 2018 agreement was reached on all the sites except two sites in Aberdeen City - Broadford Works (A/AC/R/578) and Pittodrie Stadium (A/AC/R/589).
- 6.2.2 The disagreement concerned the overall programming of both sites within the Five Year effective period. Due to the nature of both sites the construction start dates were deemed too optimistic. This was raised by one party following the annual HLA meeting. The agents that represent the sites are confident that the programming is accurate.

## 7. Cairngorms National Park Sites

### 7.1 Cairngorms National Park Sites

- 7.1.1 The area of Aberdeenshire which falls within the Cairngorms National Park (CNP) is not covered by the Aberdeen City and Shire Strategic Development Plan or the Aberdeenshire Local Development Plan. It is covered instead by the CNP Local Development Plan. Housing sites within the CNP therefore do not contribute towards the land supply totals for the Aberdeenshire Rural HMA.
- 7.1.2 Housing sites located within the CNP boundary are monitored in this Housing Land Audit on behalf of the National Park Authority. A summary is given in Table 11 below. In addition, full details of the sites are given separately at the end of Appendix 2 with completions by settlement available in Appendix 1.

## Constraint

Reason why the site is constrained. One or more reasons may be given. Sites are regarded as constrained if they **do not** meet the criteria set out in [PAN 2/2010](#) :

**Ownership:** the site is in the ownership or control of a party which can be expected to develop it or to release it for development. Where a site is in the ownership of a local authority or other public body, it should be included only where it is part of a programme of land sales;

**Physical:** the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective land supply;

**Contamination:** previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing;

**Deficit funding:** any public funding required to make residential development economically viable is committed by the public bodies concerned;

**Marketability:** the site, or a relevant part of it, can be developed to provide marketable housing;

**Infrastructure:** the site is either free of infrastructure constraints, or any required infrastructure can realistically be provided by the developer or another party to allow development;

**Land use:** housing is the sole preferred use of the land in planning terms or if housing is one of a range of possible uses

other factors such as ownership and marketability point to housing becoming a realistic option.

**Other:** the site is free from other constraints not covered by the categories above.

### **Total Capacity**

Total number of units on the site.

### **Remaining Capacity (1st Jan)**

Number of units still to be built as at 1 January of the audit year. Can also be referred to as the number of 'Established' units.

### **5 Yr Effective**

Number of units which are expected to be built within 5 years from the base date of the audit (1st January each year). To be considered effective, sites must meet the criteria listed above as set out in [PAN 2/2010](#).

The 5yr effective supply is used to determine if there is sufficient land for housing. The total number of units in the 5 yr effective supply is measured against the housing requirement set out in the [Strategic Development Plan](#). Each housing market area must have a minimum of five years worth of land based on this measure.

**Post 5yr Effective**

Units on effective sites which are expected to be built beyond the first 5 years.

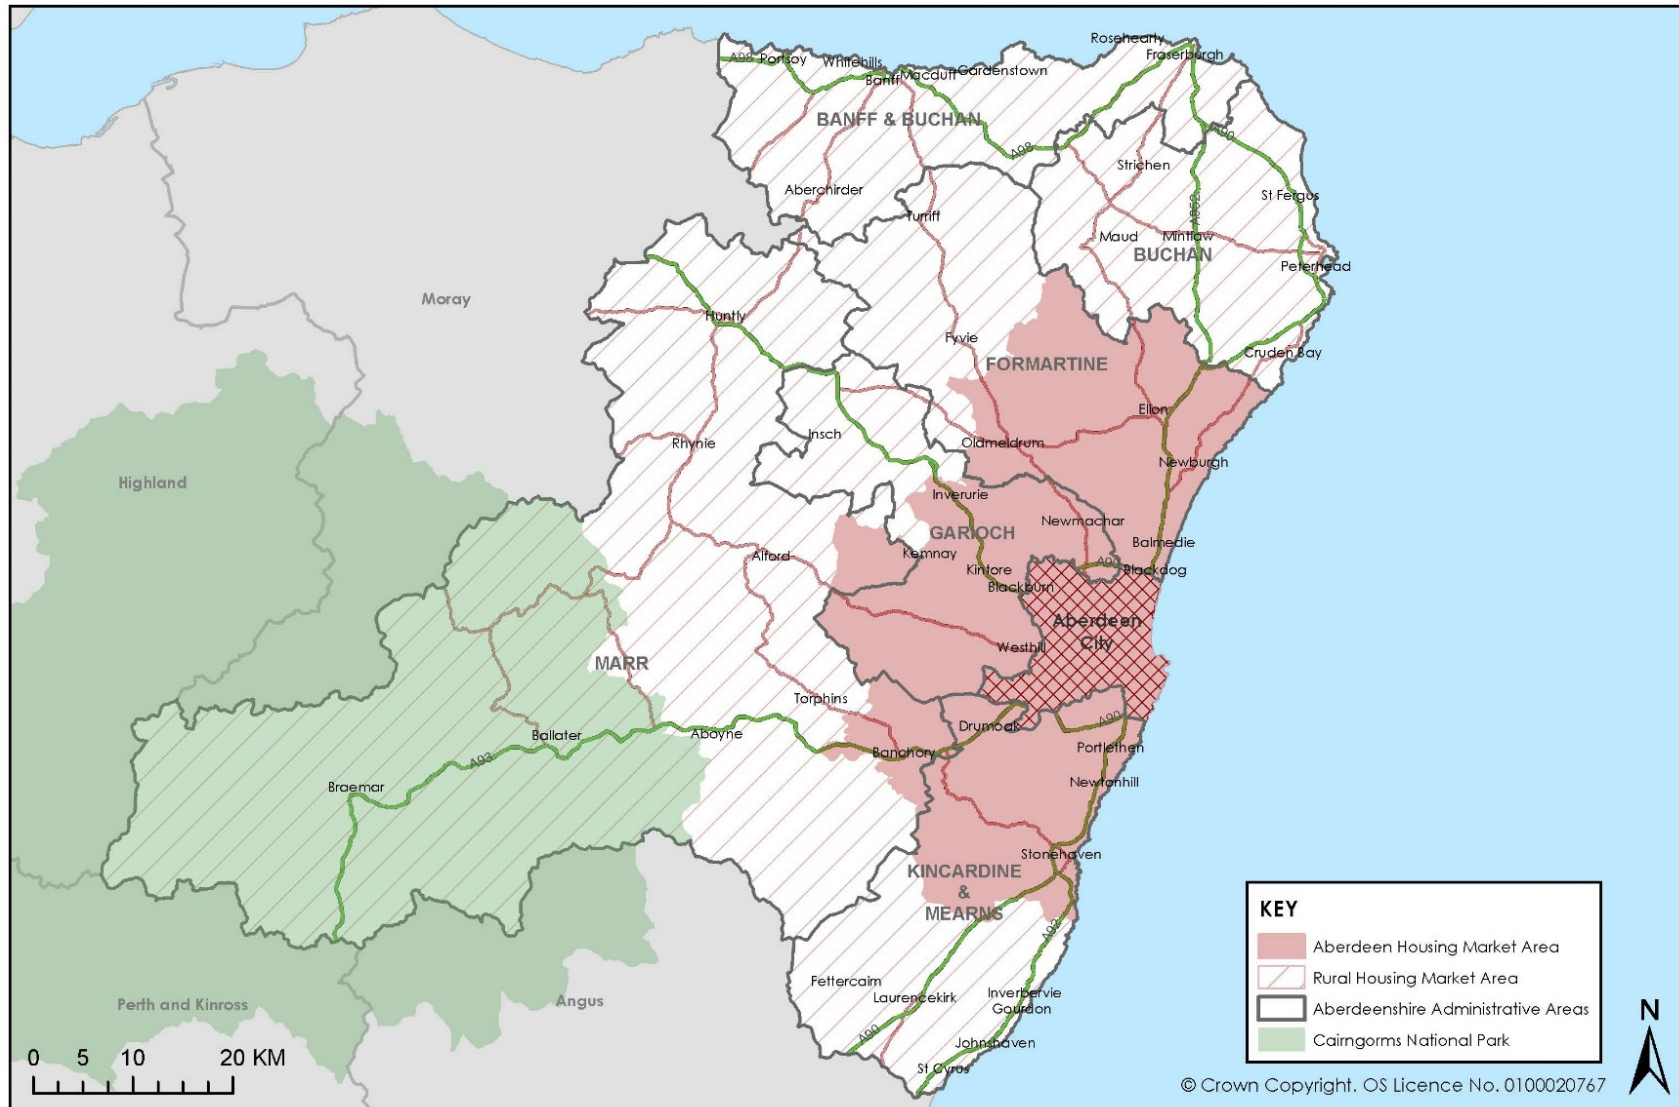

**Constrained**

Number of units which are not expected to come forward within 5 years because they have one or more constraints preventing development.

**Completions**

Actual and anticipated completions are shown from 2015 to 2025. Note that sites may have completions prior to 2015 which are not shown here. As a result, totalling the completions shown may not add up to the Total Capacity figure.
