PRO-AV CATALOGUE 2020 - 2021

About Vogel's

What began as a personal quest for perfection has evolved into an internationally successful company that manufactures a highly distinctive range of mounts and support systems for audio and video equipment. Vogel's products combine versatile functionality and robust performance with sleek design. Since 1973, Vogel's solutions have been based on the talent and commitment of people who care passionately about the products they create and the customers who use them. Since developing the world's first loudspeaker mount in 1973, we have produced a steady stream of award-winning solutions that make people's lives more enjoyable.

Quality is one of our most important criteria. That's why our products meet the strictest industry norms for quality and safety. We only use premium materials of the highest quality. All products for the professional market are tested to bear at least 5 times the indicated load.

Our products stand out because of our eye for detail when it comes to design. You will find Vogel's everywhere: not only in living rooms, bedrooms and kitchens, but also in major airports, shopping centers, restaurants, hotels, football stadiums and hospitals. All products are developed to provide an extra dimension of personal comfort for today and tomorrow.

The Quality Signature

There is a big difference between buying a mount or stand and choosing a Vogel's. Choosing a Vogel's is something else altogether. It means you don't simply want to mount a device to save space or keep it from falling on the ground. It signifies you are not just looking for a piece of metal you want to hide behind a nicely designed TV, interactive tablet or high-end projector, but a smart solution that is just as much beautifully designed as it is functional. A product that carries a device, protects it and is easy to install. A stage for the entertainment or experience each device promises to deliver.

Thoughtfully crafted, a Vogel's solution guarantees these five elements that define The Quality Signature:

- Ease-of-use
- Design
- Innovation
- Reliability
- Ease-of-installation

Quality guaranteed

TÜV NORD
The TÜV NORD label is an additional confirmation that Vogel's products are safe. All Vogel's products for the consumer market and the professional market are tested thoroughly, so they meet the strict requirements of this certification agency. TÜV NORD is an independent certification authority for products and manufacturing processes. They carry out independent quality and safety tests and are recognized globally as the label of excellent quality.

Almost all Vogel's products carry the TÜV NORD label. Vogel’s has this voluntary certification carried out as additional proof that its products are safe. Part of this process is an accelerated sustainability test. All certified products for professional use are tested to carry at least five times the indicated weight without collapsing (deformation is possible). Certified products for consumer use are tested to carry at least three times the indicated weight.

Fischer fixing systems
Professionals around the world trust the innovative products, materials and services by Fischer for mounting solutions. We have chosen the Fischer wall plugs because of their great expertise and proven solidity. This is reflected in the high quality of their products and possibilities for different wall types.

Pro-AV Mount Advisor

Find the exact solution you need
Vogel's has developed the Pro-AV Mount Advisor. The product range of Vogel's consists of an extensive number of (modular) products. It is possible to compose a solution for nearly every application.

It will help you to quickly find the correct solution for your installation. In a few steps you can find the exact solution you need. With the Pro-AV Mount Advisor you will save a lot of time! It's a great help for everybody looking for the perfect Vogel's solution.

Once you have your configuration complete, send it as a PDF file by e-mail to a customer, a colleague or to your Vogel's contact. Check out the Pro-AV Mount Advisor on the Vogel's website **vogels.com/pro-avmountadvisor**.

So many mounting options, unlimited solutions…
Configure your solution in just a few easy steps!

Connect-it modular concept

Limited components, unlimited possibilities

Vogel's Connect-it modular concept consists of a complete range of universal ceiling-, wall- and floor solutions for all kind of displays.

The modularity of Connect-it is unique. With only a few standard components you can create solutions for almost every situation. From basic, single display solutions to more complex, multiple display solutions such as back-to-back, side-by-side, floor to ceiling and even all kind of video walls.

Universal display interface for multiple solutions

The modular display interface consists of two separate components: an interface bar and a set of two display interface strips. The interface bar is for the horizontal display fitment and the display interface strips are for the vertical fitment. The combination of bars and strips creates the perfect fitment for any display. Whether you require a ceiling solution, a wall solution, a floor solution or a video wall solution, a Connect-it display interface is needed.

- Connect-it wall
- Connect-it ceiling
- Connect-it floor

Connect-it wall

Connect-it wall
Connect-it wall consists of two separate components: a display interface bar and a set of two display interface strips.

Display interface bar
The interface bar is for the horizontal display fitment and the display interface strips are for the vertical fitment. The interface bar is available in eight different lengths from 290 to 3315 mm.

Display interface strips
The two display interface strips determine the height of the interface and are available in five different lengths from 295 to 1130 mm.

Connect-it ceiling

Connect-it ceiling
Depending on the situation you choose the right ceiling plate and required pole length. The modular display interface can be selected based on the fitment of your display. With the standard Connect-it components it is also possible to create a diversity of multiple display solutions; back-to-back, side-by-side, etc. All of this including the well-known ease-of-installation features.

PUC 21/24 Series
When you need a ceiling solution (single display) for small- to medium-sized displays you can choose the PUC 21 or PUC 24 Series.

PUC 25 Series
When you are in need of a ceiling solution for medium- to large-sized displays and you want to create a diversity of multiple displays: back-to-back or side-by-side, etc. then choose the PUC 25 Series.

PUC 29 Series
Do you want to built a video wall or you need a ceiling solution for large- to XL–sized displays then choose the PUC 29 Series.

PUC 21 Series

Small- to medium-sized displays
The PUC 21 Series is part of the modular Connect-it system with which you can create a ceiling solution. The ceiling plate allows you to install the mount to any flat ceiling. The round shape of the poles makes the PUC 21 Series perfectly suitable for suspended ceilings. The poles are equipped with a CIS® cable management system, which ensures that all cables are concealed.

Display mounting
For small VESA sizes up to 200x200 mm, there are two special display interfaces with a step-by-step tilt function (see page 27). These interfaces are also compatible with the PUC 24 Series poles .

Key features
- Quick and easy to install
- Aluminium, easy to cut to length
- TÜV-5 certified
- Compatible with projector mounts PPC 1500/2500 (see page 137)

PUC 21 Series contains:
- Ceiling plates for flat ceilings
- Poles (three lengths)
- Small display interfaces
- Accessories

PUC 24 Series

Small- to medium-sized displays
The PUC 24 Series is part of the modular Connect-it system with which you can create a ceiling solution for small- to medium-sized displays.

Thanks to its round shape and the 360° turn function, a suspended ceiling can also be completed quickly and professionally. The tilt function in the ceiling plate ensures that the support can also be mounted to inclined ceilings. All existing Connect-it accessories can be used with the PUC 24 Series. The innovative nut channel now makes it easy to add accessories after installation. The PUC 24 Series is also equipped with a CIS® cable management system that allows you to quickly and easily take cables out of sight.

The PUC 24 poles are available in two different colours and four lengths. The lengths are easy to shorten.

Display mounting
For small VESA sizes, Vogel's has developed two special display interfaces with a step-by-step tilt function. For large VESA sizes, it is possible to use the conventional display interface bars and display interface strips from the modular Connect-it system (see page 10-17).

Key features
- Quick and easy to install
- Strong and flexible options for use
- Add accessories after installation
- Stylish and innovative design
- TÜV-5 certified

PUC 24 Series contains:
- Ceiling plate and truss adapter
- Poles (four lengths)
- Small display interfaces
- Display interface bars and strips
- Accessories
- PUC 24 ceiling kits

PUC 25 Series

Medium- to large-sized displays
The PUC 25 Series is part of the modular Connect-it system with which you can create a ceiling solution for medium- to large-sized displays.

The poles of the PUC 25 Series are equipped with a multiple cable inlay system with which you can quickly and simply ensure that all cables are hidden. The pole is made of aluminium and therefore, it can simply be cut at the required length.

Multiple displays can easily be installed back-to-back, on top of each other or next to each other.

Combine this pole with one of the Connect-it ceiling plates, Connect-it display interface bar and Connect-it interface strips (see page 10-17) for a complete ceiling solution.

Key features
- CIS® cable management
- Aluminium, easy to cut to length
- Multiple display mounting
- Safety end cap included

PUC 25 Series contains:
- Ceiling plates
- Poles (three lengths)
- Display interface bars and strips
- Accessories
- PUC 25 ceiling kits

Connect-it floor

Trolleys and floor stands
Flexibility is the key feature of the Connect-it trolleys and floor stands, from a basic single to any imaginable multiple solution.

Creating a video conferencing trolley or stand is easy with the standard components and the wide range of accessories. With Connect-it floor you can create your own custom set-up. The length of the pole in combination with the weight and VESA of the display lead to the perfect Connect-it floor solution.

With each solution don't forget to order an interface bar and display interface strips, which depend on the screen size (see page 10-17).

Key features
- Flexible modular system
- Multiple display mounting
- Modular display interface for a perfect fit
- Extensive cable space

Floor solution Series contains:
- Floor plates
- Trolley frames
- Poles (PUC 27 Series)
- Display interface bars and -strips
- Accessories
- Connect-it floor kits

Floor solutions

How to choose the correct floor solution?

- Choose floor stand or trolley
- Choose length of the pole
- Check the weight of your display
- Length of the pole in combination with the weight of the display determine the size of the foot plate or trolley frame

See overview for your perfect solution:

Universal video wall solutions

A new revolution
Vogel's always keeps pushing the boundaries of video wall mounting solutions. The complete range of universal video wall solutions of our existing Connect-it system, is expanded with applications for LCD video walls - in terms of size, position, mobility and flexibility.

In addition, we can also offer solutions for LED tiles, for a futureproof standard. This universal and modular concept excels in quality and ease of installation. And being Vogel's, it also looks great of course.

Height, width and quality
A minimal number of linkable components can be combined to create a mounting solution for all sizes of video walls. Vogel's existing Connect-it interface bars and display strips are the basis for any LCD video wall mounting solution. In addition we have dedicated strip sets for mounting LED tiles as well. The unique connectable uprights allow video walls to ascend to great heights.

With this revolution, we open up an entirely new level of showing your content. Whether you need a ceiling, floor-to-wall, floor-to-ceiling, free-standing, back-to-back, fixed or mobile solution, installation is clear and simple. One system for a host of applications, which is as durable as it is versatile, and with easy access for maintenance.

LED video walls

Wall mount supports for LED video walls
LED video wall technology is increasingly being used in public places. The reason for this is the improvement of LED tile quality and the endless opportunities for expanding a video wall without bezels.

Improved technology
The pixel pitches are becoming smaller and smaller, leading to substantial improvements in the image quality of LED video walls. Even at a close range, the image remains sharp and clear.

LED video wall mount supports
The number of LED tiles that can be connected to each other is endless, meaning that there is no standard size for a video wall anymore. As far as mounting options are concerned, no (VESA) standardization set has (yet) been adopted.

Vogel's closely follows the developments in the market and offers an up to date universal range of mounting options. As the universal LED video wall mounts are compatible with Connect-it, flat to the wall, ceiling and floor mounting options can be supplied.

Dedicated LED interfaces and bolts
Vogel's has dedicated PLA 82/PLA 83 LED interface accessories and PLA 81/PLA 87 LED mounting bolts for specific LED tiles available. Contact us for more information.

PFW 4000 Series

Maximum security in public places
A straightforward wall mount with the renowned Vogel's quality. A simple and affordable solution for installing displays in public spaces where supervision is limited. Displays can be locked in two ways for an optimal theft-prevention solution.

Attractive design and price
The 4000 Series offers a reliable Vogel's wall mount for displays from 10" to 80". The wall mounts ensure a completely flat wall installation and are available in fixed and tilting versions. The tilt function can be adjusted in steps, making higher mounted displays easy to see and read.

Always level
Specially shaped drill holes allow the position of the wall plate to be adjusted once it has been mounted to the wall. This ensures that the mount is always level. Everything you need for installation is supplied in the box, including high-quality mounting materials. This ensures that you have everything to hand.

Key features
- Tilt in steps 0°, 7°, 12° and 15°
- VESA max. 600x400 mm
- Fixed tilt position
- Autolock®
- Locking bar and padlock

PFW 6000 Series

The amazing 6000 Series heavy-duty wall mounts
Meet our 'next level' professional wall mounts. This series combines all we know about quality and ease-of- installation. For instance, post-installation levelling, self-centering screws and easy access for maintenance. All of this for displays up to 120" and max. 230 kg.

The design of the 6000 Series is both robust and elegant. There are several models available as fixed wall mount or tilting up to 15°. In addition, all types have an easy accessible integrated lock. As always with Vogel's, these wall mounts come with a 5-year material and manufacturing error warranty.

Key features
- Easy levelling and installation
- Horizontal levelling (post-installation)
- Self-centering display bolts
- Easy accessible integrated lock
- Locked service position
- Tilt function up to 15°
- TÜV certified

XXL wall mounts

For heavy weight displays up to 227 kg
When mounting a display that is heavier or bigger than average, you must be certain to use the correct mounting system. Vogel's offers a range of display wall mounts for displays of different weight classes, which are also handy for positioning in a recess or corner.

The heavy-weights among wall mounts
Robust yet flexible that is what the XXL Series offers in this range of display wall mounts. And each with its own specific features. The heaviest displays can still be turned and tilted easily and can even be rotated from landscape to portrait perspective in one simple movement.

Installation facilitated
All you need for installation is supplied in the box, ensuring that you have everything to hand. The mounting materials are of the highest quality. Not only are the wall mounts suitable for the heaviest displays, the mounting materials are also specially selected for this purpose.

Pop-out video wall mounts

Pop-out video wall mounts
Pop-out video wall mounts are making installation and service of video walls very easy. By just gently pressing on the display the spring loaded mechanism will be released and will push the display forward. The unique top-adjustable display mounting strips provide alignment along the x, y and z axis to ensure that all displays can be exactly leveled and aligned. Beside the pop-out mechanism the tilt service position is creating even more space to install and service any display.

Key features
- Spring-loaded display pop-out mechanism
- Audible click sound confirms the display is pushed-in correctly
- Top-adjustable display mounting strips to align and level all displays in a video wall
- Custom spacers for most displays, saving drastically on installation time

Medical wall mounts

Stylish wall mount for every TV
Vogel's offers a healthcare solution with the medical mounts. With these Vogel's medical mounts you will be able to mount a display to the wall in order to give the patient the best possible AV experience.

The medical mount can be easily adjusted in height and depth. In addition it is possible to turn and tilt the screen. With these features you can create the ideal viewing angle. This will reduce the chance on neck and back complaints. It is possible to keep the cables out of sight in the arm. An anti-septic powder coating assists in controlling the spread of diseases.

Medical wall mounts
These wall mounts have four pivot points and are suitable for screens up to 29" (74 cm). The weight capacity of the product is 1-4 or 3-8 kg. The wall mount is suitable for screens that meet VESA hole patterns of 75x75 or 100x100 mm. Tablets can be installed by using our attractive TabLock® enclosures.

Key features
- Gas spring supported arm
- Anti-sceptic powder coating
- Internal cable management
- Ergonomic design
- TÜV certified

Motorized display trolleys

Motorized trolleys
Interactive displays are very popular for education and business use. For different users the height needs to be adjusted and as interactive displays can be quite heavy, a motorized trolley or wall mount proves to be a perfect solution. Vogel's motorized trolleys are available in two versions. A basic version with an optional PC holder and a version with a stylish cabinet for PC and cable storage.

Display mounting
In order to mount a display to your motorized solution you simply choose the appropriate Vogel's Connect-it interface bar (PFB 34xx) and display strips (PFS 32xx) to create the perfect fit (see page 10-17).

Key features
- Adjustable in height up to 65 cm
- Ample storage space for AV equipment
- Solid construction
- Suitable for heavy displays

Motorized display wall mount

Motorized display wall mount
Interactive displays mounted to a wall need height adjustment to comply with users of different heights, especially in education but also for business use. As interactive displays are heavy, the Vogel's PFWE 7150 is a stylish and ergonomic solution. This motorized wall mount can be installed directly to the wall. For weaker walls there are optional wall mount supports.

Display mounting
In order to mount a display to your motorized solution you simply choose the appropriate Vogel's Connect-it interface bar (PFB 34xx) and display strips (PFS 32xx) to create the perfect fit (see page 10-17).

Key features
- Stylish high-end design
- Adjustable in height up to 65 cm
- Ergonomic design
- Suitable for heavy displays

Motorized touch table

Supporting interactivity in every aspect
Whether it is a museum, trade fair or a university, the touch table allows you to show your content at its best. Vogel's touch table is designed to be used by multiple people at the same time. When you use the standup position, the touch table is perfect for presentations. If the display is completely flat, you have an immersive surface to draw and interact with its content. Thanks to its lift and tilt actuators there will always be an ergonomic and comfortable position to interact with it.

The table features a cabinet with ample space for a PC. The cabinet is lockable so you can be sure your electronics are safe.

Key features
- Adjustable in height up to 500 mm (center display: 800-1300 mm)
- Ample storage space for AV equipment
- Solid construction

Video conferencing

Furniture specially designed for video conferencing
In situations where people heavily depend on video conferencing, a professional solution is an absolute necessity. It is not just choosing the right equipment that is important; the right set-up also needs careful consideration. Standard TV furniture is simply not sufficient. The design and styling of Vogel's video conferencing furniture take the equipment's storage and connection options into account. It offers full installation of display and equipment in one stylish piece of furniture.

Attention to design and detail
Vogel's supplies various models of video conferencing furniture, each with its own specific features. What they all have in common is their superior finish and quality. The storage cabinets are easy accessible (from the front and/or rear) and offer ample space for AV equipment.

Display mounting
In order to mount one or two displays, you choose a Connect-it interface bar and display interface strips to create the perfect fit (see page10-17).

Mount your camera and speaker
Easily mount a camera/speaker onto the furniture with a holder (see page 52).

Video conferencing speakers

Amplified video conferencing speakers
Good sound quality is critical if you want to have a productive video conference. However, it is not easy to find. Most video conferencing systems focus on video, with a good or even excellent display and camera. But their speakers are often nothing more than a small table unit with low audio quality.
Vogel's developed a unique range of speakers, specially designed for video conferencing. Our speakers give you a truly high-quality voice audio experience to match the video quality.

Natural sound
The core of the loudspeaker is the built-in Digital Sound Processor (DSP), which makes the speaker sound like your video conferencing partners are actually in the room with you. Nearly all traditional loudspeakers are optimized for music reproduction. In contrast, our speakers with a DSP are tuned for natural-sounding speech. Even the positioning of your video conferencing partners is clear due to the stereo setup.
The Vogel's video conferencing speakers are available in several sizes, optimized for smaller and larger rooms.

Camera/speaker holder
Easily mount your speaker with the camera/speaker holder (see page 52).

Solution for OMN-D Series

Claim customers attention
There is always a tough competition in claiming the attention of customers passing by stores. As well as there is a need for effective customer communication inside the store. It forces businesses to make the right choice of displays on which to show their message both outside and inside the store. Samsung developed the ideal solution with a double-sided display, the Samsung OM46N-D & OM55N-D.

Vogel's created a retail display mount exclusively designed for the Samsung's OMN-D Series double sided displays, for both 46" and 55" sizes, to maximize this dual communication display.

Ideal solution for both ceiling and floor
Vogel's PFFC 4655 can be used to mount OM46N-D or OM55N-D. With this solution, Vogel's offers the best way to mount this display with just one product. This new retail display mounting solution includes a ceiling mount, floor mount and floor-to-ceiling mount option to suit the possibilities and preferences of the store where it is to be installed.

Mount without drilling
There are times when it is not possible to drill holes in the ceiling or floor, or you simply want the option to easily relocate the device at any time. For these cases, Vogel's also has a special base available, which does not require any drilling.

Key features
- Easy and quick installation
- Lightweight aluminium profiles
- Cable management system

Trolleys and stands

Superb quality and design
The series of AV trolleys are designed to provide maximum communication power or design integration. The trolley needs to be combined with the Connect-it interface bars and display interface strips.

To create a complete video conferencing solution use the Vogel's camera/speaker holders and speakers (see page 52/111).

Display mounting
In order to mount one or two displays, you choose the display interface bar and strips to create the perfect fit (see page 10-17).

Key features
- Stylish design
- Full cable management
- Suitable for video conferencing

Monitor mounts

Professional mounting with a monitor mount
By securing your computer monitor to a Vogel's monitor mount, not only do you save space on your desk, but you can also adjust the monitor's position to precisely match your personal preferences. Day after day! We offer a suitable monitor mount for every situation and budget. All mounts meet the strict quality requirements that Vogel's applies to her products.

Multiple mounting options
The Flexmount™ allows you to install any monitor mount in up to six different ways without having to purchase extra accessories: desk clamp, thru-desk, wall, grommet hole, side bolt and reverse wall.

Solid yet sophisticated
Vogel's mounts are designed for intensive, professional use without compromising on design.
The sophisticated appearance is suitable for any desk and interior.

Key features
- Flexible viewing height
- Movable arm for minimal space on your desk
- Tilt and rotate your monitor in any direction
- Ergonomic design
- Easy to install
- VESA 75x75, 100x100 mm

TabLock®

Professional enclosures for your tablet
More often, iPads or Android tablets can be found in public areas, such as airports, museums and showrooms. They are ideal for viewing video files, product information and for interactive communication.

In order to use a tablet in public, it needs a secure enclosure that gives accessibility for users, while simultaneously providing protection against theft or unauthorised use. Vogel's has developed the perfect tablet solution: TabLock®.

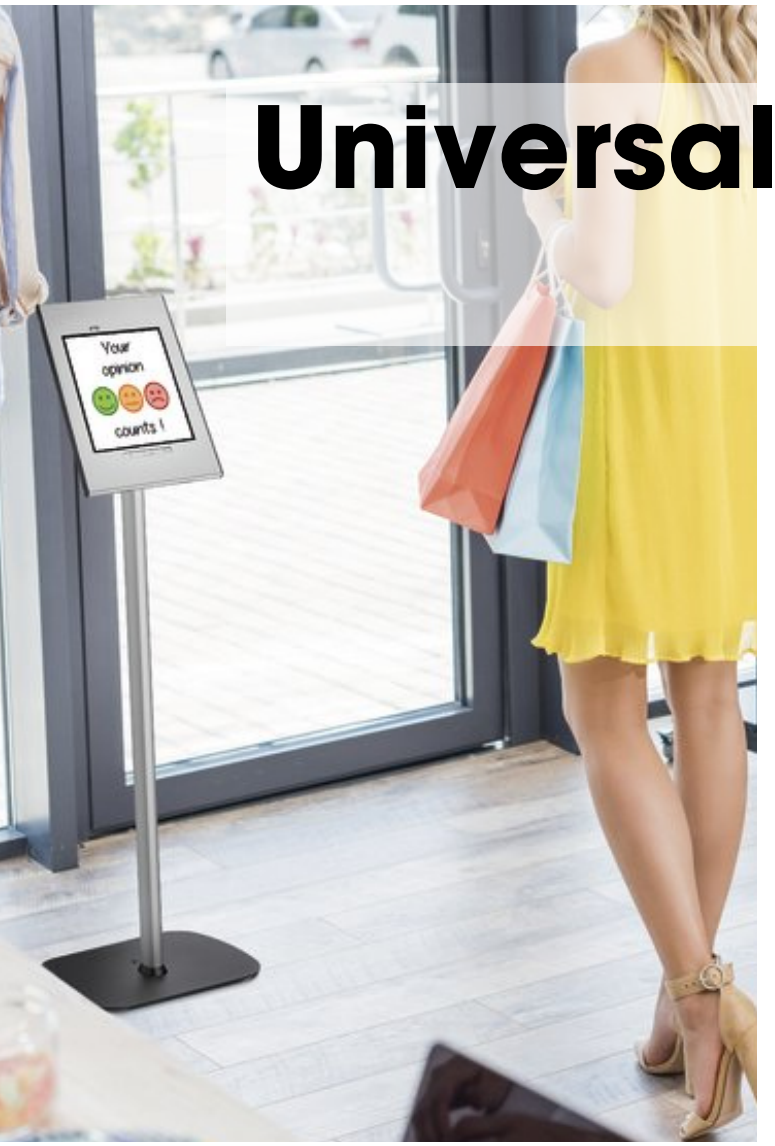
Several versions for iPad and Galaxy Tab
Most models of the Vogel's TabLock (Apple iPad and Samsung Galaxy Tab) have two versions. One version has an accessible home button, which allows users to close the current application and start another. The other version has the home button completely hidden. The pin-openings can be used to turn the tablet on or off, and to adjust the volume. The Lock & Key system, which is a unique locking mechanism within the TabLock, prevents theft but still gives quick access to the tablet.

TabLock® for iPad and Galaxy Tab

Key features

- Theft preventing
- Quick and easy installation
- Internal cable management possible
- Pin holes for power and volume buttons to prevent unauthorized operation (depending on the model)
- Wifi, 3G/4G and bluetooth functionality are unimpeded
- Portrait or landscape position possible
- VESA 100x100 mm mounting holes for mounting the TabLock on all Vogel's VESA compatible mounts
- Direct wall mounting is possible

Check our website for latest models



Universal TabLock®

Universal tablet enclosure for your tablet

Tablets are great for providing information in public spaces, such as retail shops, museums, showrooms and exhibitions. However, they are easy to damage or steal, and there are so many different versions. Vogel's developed the Universal TabLock® enclosure to protect your tablet while still allowing access to the touch screen. Because of the universal design, the Universal TabLock is perfect for iPads, Galaxy Tabs and any other tablet up to 10 inch.

Sleek design and high-quality materials

A safe tablet enclosure does not have to be clunky and difficult to use. The sleek design of the Vogel's Universal TabLock fits in with the high-end image you want to provide for your customers. It is easy to install and use, and does not compromise the user experience. The Universal TabLock is made of high-quality materials: 3 mm steel and high-end aluminium. The enclosure can be mounted directly to the wall, or to any compatible Vogel's mounts. The top panel closes with a unique push-in lock, securing the tablet and preventing access to the mounting screws.

Colour your world

The Universal TabLock is meticulously designed to fit, secure and compliment iPad, Galaxy Tab and most other tablets up to 10 inch. Its sleek design fits with the high-end image you want to express. The beautiful anodized aluminium compliments that image. But truly expressing your brand with a secure tablet enclosure was impossible. Until now.

Vogel's offers four exciting ways to express your brand with the versatile TabLock: branding, wrapping, powder coating and anodizing. Each of these finishes offer a different look and feel.

Brand your world
Add your logo to your TabLock

Wrap your world
Wrap your TabLock with a unique design

Powder coat
Colour your TabLock with powder coating

Anodize your world
Provide your TabLock with a premium finish

Design your own TabLock online:
colouryourworldwithvogels.com

Lift systems

Projector ceiling lift systems
The PPL ceiling lift systems are the perfect solution for integrating projectors into ceilings in board rooms, home cinemas, auditoriums and conference halls. Not only is the projector neatly hidden, it is also theft delaying. The lifts run whisper quiet and offer two very easy and accurate adjustable positions: top and show. Having an adjustable top position has the advantage that the ceiling finishing kit can be perfectly aligned. And in some cases it is not needed to create a construction to fill up the internal spacing between structural and false ceiling. The motion of the PPL lift systems is triggered by a very reliable motor that moves the lift with an accuracy of less than one millimeter.

Key features
- Durable
- Product price ratio
- Easy to install
- Easy to control
- Lightweight and solid construction

Projector ceiling mounts

Vogel's offers a complete range of projector ceiling mounts. These projector mounts are especially designed for the latest generation projectors weighing up to 30 kg. The range includes basic projector ceiling mounts and height adjustable kits with telescopic poles.

Universal projector interface
All mounts come with a universal projector interface. This projector interface is equipped with fine-tune adjustability for precise alignment to the projection surface. Once aligned, the projector stays in position. Turning the unique friction ring will eliminate all play from the interface connections, making the mount a solid and very stable solution.

Height adjustable projector ceiling mount kits
The height adjustable projector ceiling mount kits can be used when the height of the ceiling is not known or when flexibility is required. These mounts come in three lengths offering variable height adjustment from 400 to 1350 mm. This range of projector ceiling mounts is suitable for mounting to flat and inclined ceilings up to 90°. The CIS® Cable Inlay System runs the full length of the pole and even allows for cable routing after installation. This inlay system offers sufficient space for all cables and enables you to hide these in a matter of seconds.
