MBA IN-A-DAY FOR LAWYERS (*Intermediate and Advance Course Offerings*) You went to law school. You may not have gone to business school. Having the capability to understand business and financial concepts is a real advantage. The most effective in-house attorneys understand not only the breadth of legal issues facing their companies, but also recognize the importance of how those issues can influence strategic business decisions. Having a business mindset allows in-house attorneys to be better business partners. This MBA In-a-Day for Lawyers is customized to deliver an advanced session of “business for the non-business professional” by engaging in dialogue and discussing concepts around financial statements, valuation, financing, and M&A. The goal of this session is to help in-house attorneys become more comfortable with concepts to allow them to engage in deeper conversations and increase collaboration with key stakeholders. The program will also feature an opportunity for you to apply what you have learned using a short case study that will be completed in breakout groups.
