

Our decontamination cabin range is meant to accompany you on every field of operation. Rapidly deployable, our cabins offer a safe, robust and mobile solution in case of pandemic diseases or chemical contamination. Our inflatable cabins are fitted with an in-built shower system which can be fed with clear water or water mixed with decontamination chemicals. Additional retention basins can also be used in conjunction with our shower systems.

Main Features:

- Clearly marked: Entry in red / Exit in green
- Two modes of inflation:
 - Electric Inflator
 - Compressed air cylinder (Pressure Reducing Valve)
- Standard couplings for water system connection.
- Optional Accessories:
 - Decontamination brush
 - Decontamination pistol
- All cabins are provided with the following items:
 - repair kit
 - hand-pump
 - pegs and hammer
 - transport bag
 - manual.

DECON CABIN DC100

The smallest cabin of the range.

Inflatable decontamination shower-cabin, rubber frame, shower space with colour coded entrance and exit, integrated basin, Inflated with electric inflator or compressed air cylinder.

Set up in 25 secs.

Material:

Frame: Rubber

Curtain: Airtex800 (exclusive shower strip)

Dimensions:

Length: 180cm, Width: 180cm, Height: 250cm,

Weight: 45kg

Connection Type: Geka

Part no.: 6-AFW113D

DECON CABIN DC150

The smallest cabin of the range which also includes a basin. Inflatable decontamination shower-cabin, rubber frame, shower space with colour coded entrance and exit, integrated basin and extended basin, Inflated with electric inflator or compressed air cylinder.

Set up in 30 secs.

Material:

Frame: Rubber

Curtain: Airtex800 (exclusive shower strip)

Dimensions:

Length: 380cm, Width: 200cm, Height: 250cm,

Weight: 50kg

Connection Type: Geka

Part no.: 6-AFW112A

DECON CABIN DC160

An inflatable shower cabin, consisting of a PVC frame, a shower space and a pre-decontamination basin. Inflated with electric inflator or compressed air cylinder.

Fitted with transparent window panel with gloves for external help

Set up in 35 secs.

Material:

Frame: PVC

Curtain: Airtex800 (exclusive shower strip)

Dimensions:

Length: 380cm, Width: 200cm, Height: 260cm,

Weight: 60kg

Connection Type: Storz

Part no.: 6-AFW112AG

DECON CABIN DC200

Inflatable decontamination shower-cabin with rubber frame, shower space with colour coded entrance and exit and integrated basin.

Inflated with electric inflator or compressed air cylinder.

Set up in 35 secs.

Material:

Frame: Rubber

Curtain: Airtex800 (exclusive shower strip)

Dimensions:

Length: 250cm, Width: 250cm, Height: 270cm,

Weight: 55kg

Connection Type: Geka

Part no.: 6-AFW113A

DECON CABIN DC300

Inflatable decontamination shower-cabin with rubber frame, shower space with colour coded entrance and exit and integrated basin.

Inflated with electric inflator or compressed air cylinder.

Set up in 40 secs.

Material:

Frame: Rubber

Curtain: Airtex800 (exclusive shower strip)

Dimensions:

Length: 450cm, Width: 250cm, Height: 270cm,

Weight: 65kg

Connection Type: Geka

Part no.: 6-AFW113B

DECON CABIN DC400

Double inflatable decontamination shower-cabin with rubber frame, shower space with colour coded entrance and exit and integrated basin.

Inflated with electric inflator or compressed air cylinder.

Set up in 50 secs.

Material:

Frame: Rubber

Curtain: Airtex800 (exclusive shower strip)

Dimensions:

Length: 450cm, Width: 250cm, Height: 270cm,

Weight: 69kg

Connection Type: Geka

Part no.: 6-AFW113C

DECONTAMINATION CABINS

LOSBERGER DE BOER

Rev.0 – 03/05/19 - We reserve the right to change specifications of products without prior notice

DECON CABIN DC450

Double inflatable decontamination shower-cabin with 2 colour coded entrances and exits, rubber frame, integrated basin and extended basin.
Inflated with electric inflator or compressed air cylinder.
Set up in 30 secs.

Material:

Frame: Rubber

Curtain: Airtex800 (exclusive shower strip)

Dimensions:

Length: 450cm, Width: 480cm, Height: 270cm,

Weight: 75kg

Connection Type: Geka

Part no.: 6-AFW113E

DECON CABIN DC420

Double Inflatable decontamination shower-cabin with 2 colour coded entrances and exits, rubber frame, integrated basin.
Inflated with electric inflator or compressed air cylinder.
Set up in 50 secs.

Material:

Frame: Rubber

Curtain: Airtex800 (exclusive shower strip)

Dimensions:

Length: 450cm, Width: 250cm, Height: 270cm,

Weight: 69kg

Connection Type: Geka

Part no.: 6-AFW113CD

Please note:

Rubber is a material that does not allow penetration from chemical agents. Unlike PVC, contaminants cannot migrate into it. This means PVC frame decontamination cabins (DC 160) should be reserved for non-chemical decontamination projects.
