Collection 2019/20

# WMF Professional cutlery collections.

## The right accompaniment for any look.

**A**s a prominent detail of a well-laid table, cutlery underlines the individual character of your catering concept – either through discreet understatement or striking visual form.

The choice of cutlery is always based on your establishment's architecture, interior design and menu: whether refined, rustic, Mediterranean, minimalist or avant-garde. Whatever your style, you'll find the right forms, colors and structures in the diverse cutlery range from WMF Professional.

When creating a new collection, the WMF designers always seek to achieve a harmonious unity of aesthetics, feel and function. After all, it is not just the look that defines high-quality cutlery – it also needs to feel right in your hand, to be robust and durable. During the development process, we also consider current trends and feedback from our customers which has resulted in the creation of a diverse portfolio over the decades.

**W**hether you have opted for a modern style or a more traditional one, what matters is that your cutlery can stand up to scrutiny from even your most discerning guests. To pass this test, you can rely on three letters that have been synonymous with an uncompromising approach to quality since 1853: WMF.

# WMF firstglass

Tradition. Design. Competence.

No other product can match perfect glass as a showcase for something special. Perfect quality and the finest finish are immediately obvious to the touch. Not even the tiniest imperfection mars the view of the inside. The effects are not created by glass as a material, but by the fine reflections and the smooth, curved shapes. Beautifully framing its contents, the WMF firstglass will show off any beverage to its best advantage.

This ambition means to us a lead-free crystal glass with an appropriate shape and brilliance to serve the finest wines. Highly break-resistant and dishwasher-safe, this robust glass is designed to withstand the tough demands of everyday catering use. It is made seamlessly in a single piece, with no join between the stem and the bowl.

# WMF firstglass

Elegance. Style. Strength.

# Fine aromas for all occasions.

At the breakfast buffet, in the coffee break at a conference or at afternoon tea: nothing beats steaming, aromatic coffee or tea – as it is when freshly brewed. But how can delicious hot drinks retain their aroma and stay at the optimum temperature? In the vacuum jug, drinks can be kept hot and aromatic for up to twelve hours, making for an enjoyable drink all day long.

### A carafe that lasts forever

The Juwel vacuum carafe from alfi is considered synonymous for timeless design like no other. In celebration of the 100th anniversary of this legendary classic, Juwel is presenting itself in top form - in a frosted and high-gloss polished stainless steel design. The style icon, which through the ages has remained almost unchanged, now meets one of the most imperishable and durable materials. Visually, stainless steel underscores the elegant understatement of the vacuum carafe and at the same time is robust and resilient. Toxin free for healthy indulgence, completely recyclable, stainless and especially hygienic: with Juwel made of stainless steel, alfi is making a clear commitment towards Quality Made in Germany. The high-quality surface remains permanently beautiful, just as it was on day one, because of its durable and easy-to-clean design.

# WMF CHANGE Chafing Dishes

*Silver plated version available*

## Handle without care.

With thermal insulated handles and fully retractable lids the Change Chafing Dish is a must have in any Hospitality Operation. With its integral condensation return technology, water marks on the table are now a thing of the past. The lids swing outside the pivot point around the fuel can holder (or hot plate) and pass completely underneath the canisters making the dishes accessible from all sides.

## Opens at the lightest touch.

A model of ergonomics in practice, a special cable guide allows the lid to open easily even when an electric heating element is in use. Smooth-acting, stepless brakes keep the movement of the lid optimally slow. For totally convenient opening, closing and stopping. All models, except the Manhattan, are stackable to save space.

## the LEDlight unit for the light mood you choose.

Light plays an important role in presenting a buffet successfully. The little LEDlight unit conjures up subtle lighting islands on the table to create a really special atmosphere at the buffet.

How does it work? It's simple. The dimmable LEDlight unit, powered by a battery, is placed in the frame and subtly lights from underneath. There is a remote control for easy adjustment of the colour and brightness. Optional accessories: LEDlight adapter made of translucent plastic, for another, great lighting effect along the inserts. Available in four sizes to fit the frame.
