CHAROLAIS JOURNAL ADVERTISING POLICY: Advertising material for any month's issue must be received in the offices of the *Charolais Journal*, 11700 NW Plaza Circle, Kansas City, MO 64153, by the 25th of the second month preceding the month of publication, i.e., Dec. 25 for the February issue. Full camera-ready advertising copy or full-screened negatives will be accepted until the 1st of the month prior to publication provided notification of copy size, shape, color and other specifications are received by the 25th of the second month prior to the month of publication. If a proof is required, copy must be received by the 20th of the second month prior to publication, i.e., June 20 for the August issue. No copy can be altered or changed, except for typographical error, after the 1st of the month of publication. Any ad copy changes that must be made after the 1st of the month will be assessed a 10% additional space charge. All dates and times are herein applicable at the office of the CHAROLAIS JOURNAL, 11700 NW Plaza Circle, Kansas City, MO 64153. *Charolais Journal* (ISSN 0191-5444) is published monthly, except June and July which are combined issues, by CHAROLAIS PUBLICATIONS INC., 11700 NW Plaza Circle, Kansas City, MO 64153. Subscriptions: U.S. - \$75; U.S. First Class - \$100; Canada - \$125; Foreign - \$125. Single Copies - \$7, including postage. For AICA members, \$20 of annual dues to AICA are applicable to subscriptions for *Charolais Journal*. Periodicals postage paid at Kansas City, MO 64153, and additional mailing offices. Standard postage paid at Jefferson City, Mo. POSTMASTER: Send address changes to: CHAROLAIS JOURNAL, 11700 NW Plaza Circle, Kansas City, MO 64153.

# Where Style...Meets Performance

"DeBruycker bulls are simply the best bulls for my bottom line! My DeBruycker sired calves increase my weaning weights every year. The calves also have the genetic package to be the BEST feedlot calves. DeBruycker's have done an outstanding job creating thick-butted, wide-back bulls that calve well, have good temperaments, and produce top quality, uniform calves. My 2013 DeBruycker Charolais sired steer calves weaned at 838 lbs; they outweighed my black steer calves by 100 lbs."

# CHAROLAIS

VIEWPOINT

J. Neil Orth, Executive Vice President

## How Many Ways Can We Tell Our Story

Immediate Opportunity

Amazing isn't an overly dramatic description of the many communication methods available to us these days. It's easy to drill right down to how it affects AICA communicate with our members.

The Internet has provided one of the most important, cost effective mass communication tools in modern history. The Internet has enabled email, websites, Twitter, Facebook, YouTube, Instagram, as well as a long list of other communication vehicles. Many applications are simple downloads to your smart phone, tablet or computer. A small fee may be attached to others.

Sites such as Skype, GoToMeeting or AnyMeeting are websites offering services to enable audio and video type meetings with anyone anywhere in

Harrold, S.D. and the photo was of the entire Thomas crew. This single post was viewed by 11,508 people! Other posts have been viewed by 1,000 to 5,000 individuals. The cost to AICA was \$0.00—no postage, no paper, and the information was distributed immediately as it occurred.

We are currently using Facebook as an immediate opportunity to report the results of spring sales across the country. It's rather difficult to conceive the fact that between Internet auctions and tools such as Facebook, Twitter and texting, the world can know the results of your sale as soon as the gavel falls on the last head and before the cattle are loaded out!

Another salient point is the fact we can measure the message. We know

*“We can measure the message, we know because we have tracking information to show us the messages that are of greater interest to our viewers.”*

the world and at a price point much less than conventional teleconferencing. Doodle is an Internet based scheduling application that enables anyone to organize a meeting with an unlimited numbers of participants.

The AICA Facebook page “went live” a year ago. At the time, we weren't exactly sure how we would use Facebook. We weren't sure if we could develop our page as a communication tool and take advantage of a service that has more users than the populations of several small countries. A year later we have 844 “followers” and that number changes daily. We have followers with alerts on their devices that let them know about every post immediately

Our Facebook followers are all around the world. In fact, some comment in their native languages! Unlike conventional communication, we know if our message is getting seen. In fact, because of the sharing capabilities of Facebook, the AICA posts are being seen by many more than the 844 followers. For instance, on January 20, we posted a photo of the Premier Breeder and winner of the Challenge Trophy. The award was presented to Thomas Ranch,

because we have tracking information to show us the messages that are of greater interest to our viewers. This information, along with the analytics we gather monthly on our web traffic, enables unprecedented abilities to quantify the value of our media expenditures.

In reality, we are at the very beginning of using all the available electronic tools and devices in a marketing scheme. It's likely many of us, depending upon our age and generation, are simply downright annoyed by most of this stuff! However, it's also likely many registered and commercial producers will log in, register, bid and buy cattle online this spring. It's also likely that prior to logging onto an Internet bidding site, a producer will have watched several videos of the sale offering on a site such as YouTube, sorted data on a breed association website, or viewed an online catalog.

We are at a marketing juncture that is as exciting and has as much promise as the invention of the light bulb. We can communicate in real time to a receptive audience during an unprecedented era in the beef industry. It doesn't get much better than that!

### **Dues Reminder**

2014 dues are now due— \$100 active member, \$25 junior. Online passwords will not work until 2014 dues are paid.

### **Female Inventories in the Mail**

All active and junior members should have received their 2014 Female Inventory in the mail. As in years past, there are 3 different performance programs to enroll females in. The WHR program is \$14 per female and includes a free registration and transfer on the calf born in 2014. EPDs are available on unregistered calves. In the PPR program, females are enrolled at no charge, fees are paid on the calves as they are registered and transferred depending on age. EPDs are not available on unregistered calves. For these programs, enrollment forms must be submitted by April 1st to avoid additional fees. The third program, Registration Only, is for members that want only a registration paper. Performance data will not be entered and EPDs will print on your papers only if they are available.

### **Enroll Females Online**

Enrollment is available online. Click into “my inventory” to get started. Members using the online program do not need to return the paper enrollment forms.

### **2014 Dams of Distinction Announced**

Sterling and Diamond Dams of Distinction for 2014 are listed on our website. Find a link on the homepage. The AICA's dam of distinction program recognizes dams that have consistently weaned calves with above average weaning weights and have been regular producers with 380 days or less calving intervals.

## **American-International Charolais Association**

The AICA is the official registry for Charolais and Charbray cattle in the United States. Charolais cattle were first brought to the U.S. in 1936. In 1957, the American Charolais Breeders Association and the International Charolais Breeders Association merged forming the present AICA. Membership in the AICA is obtainable when the applicant has ownership in at least one animal, and has paid the initial membership fee of \$125. AICA annual dues are \$100.

**Record your 2014 born calves.  
Year letter for 2014 is B.**

Record your 2014 born calves using AICA's online system. Add the data as the calves are born; continue to update the records as you add weaning and yearling data. Register the calves at any time by just adding the name. 2014 year letter is B.

**AI Sires**

AI sires used "out of herd" must be DNA tested before calves can be registered. Check the bull's record to make sure the DNA work has been done before submitting registration papers. AICA rules require signatures on bulls you do not own. Signatures can be submitted on-line, fax, mail or e-mail.

**Dispose of Animals**

Dispose of animals you no longer have by using the online system. The disposal button is at the bottom of the "Quick Look" screen. DO NOT dispose of bulls still being used, regardless of their status. DO NOT dispose of animals you are selling with papers.

**CharolaisUSA.com Advertising and Marketing Opportunities**

The AICA website (www.charolaisusa.com) offers a variety of online advertising opportunities. Banner ads can be linked directly to your website or sale catalog. The ads are \$250 per month or \$200 for two weeks for advertisers in the *Charolais Journal* or *Charolais Edge*. The general banner ad rate is \$400 per month. Normally, the ads will be put on the website within 2 days after submission.

Want to reach your customers directly? E-mail blasts are now offered to drop your advertisement straight into the inbox of thousands! E-mail blasts work great for upcoming sales or any ad that runs in the *Charolais Journal*. E-mail blasts can be linked directly to your website or sale catalog. E-mail blasts are \$250 each for advertisers in the *Charolais Journal* or *Charolais Edge*. The general e-mail blast rate is \$400 each.

CharolaisUSA.com advertising packages are available for those advertising in the *Charolais Journal* or *Charolais Edge*. Promote your sale with a 1 month banner ad and 1 e-mail blast for \$400.

The *Charolais Journal* is now offering more services to sale booklet advertisers. Not only is the *Charolais Journal* an excellent spot to promote your sale, but sale booklets are now online! Easily accessible on the AICA website, check out the sales coming near you.

## 50K Database

### Work Together!

AICA continues to build a database of 50K genotypes and request breeders submit tissue samples on sires with an accuracy value of .35 for weaning weight and higher. There are many sires which meet these standards and would be useful to this breed wide project but semen may not be available. In these cases hair and/or blood samples would work as well. Keep this in mind this year as you prepare to turn herd bulls out and you have the opportunity to gather these tissue samples.

As we continue to work on genomic enhanced EPD we must remember that genomic accuracies are dependent on EPD accuracies of the training populations. In this case the training population is the Charolais database.

Genomic enhanced EPD will allow for an increase in the accuracy of selection on younger bulls and heifers, thereby increasing the accuracy of selection for those traits where genomic EPD are available. The more complete the AICA performance database, the more accurate our selection will be through the use of these tools.

Performance reporting starts with breeding and calving records. Making sure we have the correct breeding information recorded is important so that the performance of every calf is credited to the correct sire and dam. This is followed with recording of calving and weaning information, including that we make sure we get the pasture codes recorded correctly so that accurate contemporary groups can be formed during the genetic evaluation process.

Perhaps one of the most overlooked opportunities to record performance data is for yearling calves. By recording yearling weights, scrotal measurements and ultrasound data we can greatly increase the accuracy of EPD for those traits in our genetic evaluation.

Improvements in technology will continue to allow for better prediction tools for genetic merit in the future. And as in the past it's a working relationship between breeders, the association, research and science.

CJ

# POUNDS PAY.

Science, technology and data are key to discovering sires genetically capable of adding pounds of quality beef to a calf crop. Proving young bulls through rigorous competition quantifies a sire's genotypic and phenotypic capacity to make changes through improved performance.

# JUNIOR

VIEWPOINT

Jaid Runft, At-Large Director

## Get to Know Your Director!

Interviewed by Chelsea Woodcock, Secretary

**H**ello fellow Charolais members, my name is Jaid Runft and I'm currently an At-Large Director residing in Area 3. I'm a senior at Pike Valley High school, where I'm actively involved with my FFA, currently serving as President, as well as other school organizations. I am a four letterman in volleyball and basketball. I was on the three time state volleyball team. This past year, I was named All League first team and All State second team. My free time is spent in the barn working my calves or at my part-time job.

**Q:** *When was your first Charolais Junior National and what was that experience like?*

**A:** My first Junior National, that I can remember, was in Wichita Falls, Texas in 2000. I was too young to show but you are never too young to go and "help". My first Junior National actually showing was in 2003. I haven't missed a Junior National since! It was humid and hot days in Tupelo, Mississippi and I was the little girl in the ring struggling and fighting with an oversized heifer. I will never forget the feeling of being surrounded by people that share the same passion for the breed and the love of the juniors. Everyone wanted to know who you were and to help you every chance they got.

**Q:** *Can you give some words of advice to our new members about the AIJCA and Charolais Junior Nationals?*

**A:** A word of advice for new members about the AIJCA and Junior Nationals is to not limit yourself! You may know that you're good at one thing, but how do you know you're not great at another? Being adventurous and trying new events at Junior Nationals opens doors to skills you never thought you had before.

**Q:** *You are a multi-sport athlete, how has that prepared you for being on the AIJCA Junior Board?*

**A:** Being a multi-sport athlete has taught me that you can't win by yourself. I'm a team player. I would much rather work in a group than alone. I learned quickly that each member relies on another in some way, shape or form. This has helped me to the highest degree being on the Junior Board. Without one another, we as a team wouldn't be able to accomplish as much as we do throughout the year.

**Q:** *What are five words that come to mind, when you think Charolais?*

**A:** What five words come to mind when thinking of Charolais: performance, power, productive, practical and efficient. Charolais are performance driven and with today's cattle prices there's never been such a premium for fast growing genetics. Power, our great breed has been known as muscle source for commercial cattlemen. Productive, Charolais continue to prove to be a fertile, easy fleshing, good footed source of stock with added longevity. Practical, with input costs at record high it's never been more important to have cattle survive with low inputs and generate higher premiums. Efficient,

commercial cattlemen and feedlot owners are asking for our smoky, butterscotch, and grey baldy calves; knowing the hybrid vigor and efficiency they will benefit from.

**Q:** *Junior Nationals is being held in Hutchinson, Kan. As your home state, what are you looking forward to most?*

**A:** In July, the annual Junior Nationals will be coming to my home state just down the road from me in Hutchinson, Kan. I'm anxious to see what the Midwest can attract, not only from the cattle standpoint but the junior aspect as well. In 2005, the first time it was in Hutchinson, I thought the barn was going to explode (of course I was only 10 years old) with how many people participated not only in the show ring but in all the activities and contests. I can only imagine what it is going to be like 9 years later. I was a young member then enjoying all that was going on. I am now going to be on the other end, not only enjoying it all, but I am part of the team putting this great event on and can't wait to make more memories and friends.

**Q:** *What are some of the lessons that you have learned in the show ring?*

**A:** Everyone has had a bad show day, but there's always a lesson to be learned in the ring. Respect and graciousness are only two of the many characteristics I've grasped in my years of showing. To always be respectful to the other in front and behind me in the line-up. I treat others how I would want to be treated in the ring. Being gracious is keeping composure until I'm completely out of the ring. No matter how far deep I get in class, I don't let it get to me until I reach the stalls. Shaking hands with the judge before I leave the ring and congratulating the class competitors is a routine I've become accustomed to. Inside the ring, it is a competition but once you exit they are still your friends and family; that will always be more important because there is nothing they wouldn't do for you or you for them. Showing cattle is like having another family to me!

**Q:** *You were a mentor at Junrio Nationals, is there anyone that has acted as a mentor for you?*

**A:** The last two years I've been a part of the Mentor/Mentee program at Junior Nationals. It made me realize how much the younger junior members truly do look up to us. The sense of impacting a junior's life in a special way is definitely rewarding as a mentor. Growing up I've always looked up to my older brother Cody. He taught me to work hard because it gets you respect. Whenever I have an unsuccessful show day, he tells me to give it time because my hard work will pay off. These words haven't let me down yet! He believes in me in and outside of the show ring and never gives up on me when I'm at my lowest. Cody has influenced my life in many ways and shaped me into the person I am today. I want to be able to do the same for another junior. **CJ**

Dear Friends,

It is our pleasure to welcome you to the Third Annual Satterfield Charolais & Angus Annual Production Sale. First, we would like to thank the Charolais breeders and commercial cattlemen who attended and selected cattle from us the last two years and welcome new cattlemen to this year's sale. We are excited about the offering we have for you this year and feel that it is the best set of cattle from top to bottom we have ever offered. The cattle offered in this sale are Breed Leading Genetics that can benefit any and all sizes of cattle operations. We have emphasized calving ease, maternal traits, carcass merit, and superior growth and performance.

The Charolais and Angus bulls selling are a powerful, high quality set that cover all the bases. If you are looking for a calving ease, growth, or keep replacement heifers, there is something for everyone. The Charolais female division of the sale is equally impressive. Once again we are completely dispersing our 6-year-old Charolais cows, nothing held back. We feel like they are in their prime and offer many years of production. Most will have progeny in the bull division and will have calves at side. The balance of the female offering consists of proven donor and donor prospects, bred heifers, open heifers and show heifer prospects. In each division we have included some of our top replacement females making this our deepest offering ever!

We would like to invite you to join us, the Jedlickas and Reinharts at the farm in Evening Shade, Arkansas. Come have a complimentary lunch by Corkey's BBQ and look through this exciting offering.

If you would like to view the offering before the sale or we can help in any way, please give us a call.

Thanks  
Mark

### Trucking for Bulls:

Free trucking within 200-mile radius of sale location or \$50 deducted per lot for all bulls picked up sale day.

### Lunch:

A complimentary lunch will be served by Corkey's BBQ sale day starting at 11 a.m.

### Health:

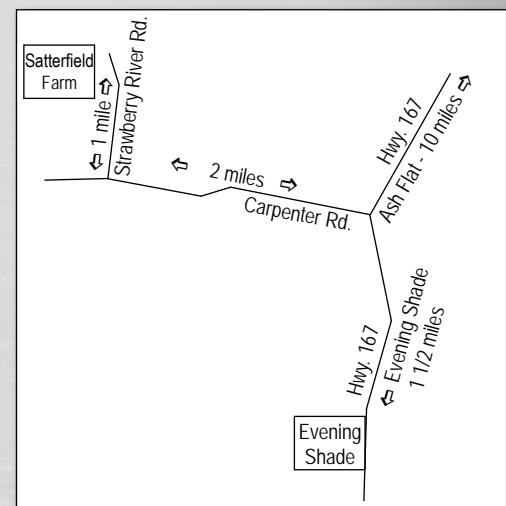

All cattle will sell with proper health certificates for in-state and out-of-state shipment.

### Insurance:

Insurance will be available on sale day at the settlement desk.

### Semen Tests:

All older bulls will have passed a semen test by sale day and all yearling bulls are guaranteed to pass or already have passed.

The Satterfield's purchased Bridger during the 2010 Lindskov-Thiel Bull Sale where he was the high-selling bull at \$21,000. They wanted a bull to take them to the next level and he has more than accomplished that. His performance numbers are outstanding, his dam's performance heritage continues the legacy and he has passed that extra weight on to his offspring. His daughters udders are another positive trait we are excited to see. Bridger's sire LT Easy Blend excels on the AICA Sire Summary as the #22 MCE Trait Leader and the #7 Marbling EPD sire of the breed.

This is the bull Mark brought back from the 2011 L-T Bull Sale for a purchase price of \$18,000 and he has been the Satterfield's go to pasture sire. There is more positive performance data again, along with some impressive carcass figures that he puts on the table. His Ribeye Area Ratio as a yearling was 110 and his Intermuscular Fat ratio was 106. Journeyman's grand sire LT Western Edge also adds Trait Leader number's being the #19 sire for Maternal Milk and is the #16 Multiple Trait Leader.

The Satterfield's couldn't quite bring Ledger home from the 2011 Lindskov-Thiel Bull Sale when he went through the ring at \$105,000, but that didn't stop Mark from using some semen to his benefit. This will be the first offering of his progeny in this sale and all in attendance will be impressed. His dam's performance is without doubt again more solid numbers on which to build. He is the most popular sire in the breed today. Ledger is the #14 Multiple Trait Leader and the #24 Weaning Weight Trait Leader of the breed and the youngest sire on the top 25 Trait Leaders!

Pro-Line was our first purchase of the famed Lindskov-Thiel genetics and certainly the reason the Satterfield's kept returning to South Dakota to build their program around those elite bloodlines. They brought him home for \$13,000 in 2008 and have never been disappointed with the influence he has had on their herd. He was the start of improving the weaning and yearling performance in the Satterfield herd. His sire LT Easy Pro was born in 2001 and is recognized as one of our breed's solid AICA Trait Leaders; he is the #2 sire of the breed for Marbling EPD and the #5 sire for Milk EPD.

There are calves on the ground out of this former show bull for the Satterfield's and J & S Ranch. The Jedlicka's used this powerful son of the senior herd sire at Satterfield's on some heifers with great calving results, ask Mike and Dale about them. They also used this bull on some of their fall calving cows that sell in this sale. He will be Trich tested by sale date. **Selling 2/3 interest and full possession. Consigned by J & S Ranch and Satterfield Charolais.**

This bulls three full brothers born in the spring 2012 were heavily bid upon in last year's sale as yearlings selling for \$5,500, \$5,000 and \$4,000. Two more yearling full brothers also sell this year as Lots 24 and 25. He came in a little light at weaning from a recipient dam that didn't milk to well, but has really come on since. He looks to be an easy calving bull with his 60 lbs. birth weight and -0.8 Birth EPD. His full brother's weaning weights last year were 715 lbs., 723 lbs., and 781 lbs., so the performance is there.

These two yearling ET's had three full brothers sell in last year's bull sale with an average adjusted weaning weight of 740 lbs. These bulls just didn't get handled properly while on their recipient dams. You know the genetics are there, those three brothers averaged \$4,833 last year. Their dam M205 is a full sister to Baldridge Sweetheart 62H and goes back to the dam of many time Multiple Trait Leader Baldridge Fasttrack 82F. Their maternal sister is the featured open heifer in this sale, Lot 63.

A lot birth weight, big, powerful bull. It will be hard to find a stouter Angus bull with this low of a birth weight this spring. Maternal brothers have sold to Melton Cattle Co. & James Witt. His dam has never weaned a calf under 800 lbs. and is headed to the Satterfield donor pen after she calves again.

Eight (8) flush mates from the \$160,000 Connealy Forward and SydGen Drusilla 6885! Drusilla is one of the best uddered cows we have ever owned, and we have some great uddered cows! She is a daughter of the \$48,000 DD Pride 211 5175 and is a maternal sister to the \$52,000 Woodlawn Charge On 14. This is a real opportunity to put some bulls genetically mated the same together. The bulls without birth weights were raised in Dale Whitaker's recipient herd, but buy with confidence in them, the other 4 bulls from the same flush averaged 75 lbs. at birth. The Forward sons have always been popular and these bulls will be no different.

*AM, NH & CA Tested Free or No Carrier Ancestors on all Angus Bulls.*

### Due to calve before sale day to LT Journeyman 0123 P

One only needs to gaze at this picture a little bit to get the whole idea! They didn't know if they could get her clipped for pictures because she was almost too wide to fit through the Silencer Chute!

**Selling 1/2 embryo interest or double your bid and take 100% ownership.** If the buyer elects to take all of her, then the Satterfield's will retain one (1) successful flush of at least seven (7) frozen embryos, all at the buyers convenience. This proven donor dam has been flushed three (3) times for an average of 13 quality embryos per flush. These three flushes resulted in this number of embryos each flush; 12, 13, 14!

She is a full sister to the ABS Multi Trait Leader WC Big Ben 9036, a 2014 AICA Sire Summary Trait Leader for Calving Ease, Birth Weight and Multiple Traits! She was the "choice of the sisters" in Wright Charolais' consignment to the 2010 National Charolais Sale. This deep, broody and powerful and still calved before her second birthday on January 8, 2011 with a heifer calf that sold to Rathmourne Charolais in Michigan. Her next calf was on February 7, 2012 a bull calf that sold to Lindskov Ranch in South Dakota and then it was into the embryo program.

Co-owned with Reinhart Charolais, Charles & Nathan Reinhart, Paragould, Ark.

She has worked her way into becoming a donor at Satterfield Charolais as well as the next owner. The opportunity to buy a female of this quality and performance doesn't come around everyday and only because the Satterfield's are selling all of their six year olds does she sell! The Satterfield's will retain one successful flush at the buyer's convenience.

This donor prospect has produced three natural heifer calves, which the last two were the number 2 ranked adjusted weaning weight heifers in the entire calf crop, both at over 700 lbs. each. Two daughters have been retained in the herd to carry on and one was sold to Raintree Charolais. This powerful, good uddered female ranks near the top of the breed for the following EPD's; top 1% for Mtntl, top 2% for Milk, top 4% for REA & Marbling and top 6% for both weaning and yearling weight.

Her pedigree goes back to some of the great maternal cow lines and sires of our breed. Check this powerhouse female out, she is good.

Extended-Release Injectable Parasiticide  
5% Sterile Solution  
NADA 141-327, Approved by FDA for subcutaneous injection  
For the Treatment and Control of Internal and External  
Parasites of Cattle on Pasture with Persistent Effectiveness

**CAUTION:** Federal law restricts this drug to use by or on the order of a licensed veterinarian.

**INDICATIONS FOR USE**

LONGRANGE, when administered at the recommended dose volume of 1 mL per 110 lb (50 kg) body weight, is effective in the treatment and control of 20 species and stages of internal and external parasites of cattle:

Gastrointestinal Roundworms	Lungworms
<i>Cooperia oncophora</i> – Adults and L <sub>1</sub>	<i>Dictyoaulax viviparus</i> – Adults
<i>Cooperia punctata</i> – Adults and L <sub>1</sub>	
<i>Cooperia sumabada</i> – Adults and L <sub>1</sub>	<b>Grubs</b>
<i>Haemonchus placei</i> – Adults	<i>Hypoderma bovis</i>
<i>Desophagostomum radiatum</i> – Adults	
<i>Ostertagia lyrata</i> – Adults	<b>Mites</b>
<i>Ostertagia ostertagi</i> – Adults, L <sub>1</sub> , and inhibited L <sub>1</sub>	<i>Sarcoptes scabiei</i> var. <i>bovis</i>
<i>Trichostrongylus axei</i> – Adults and L <sub>1</sub>	
<i>Trichostrongylus colubriformis</i> – Adults	

Parasites	Durations of Persistent Effectiveness
<b>Gastrointestinal Roundworms</b>	
<i>Cooperia oncophora</i>	100 days
<i>Cooperia punctata</i>	100 days
<i>Haemonchus placei</i>	120 days
<i>Desophagostomum radiatum</i>	120 days
<i>Ostertagia lyrata</i>	120 days
<i>Ostertagia ostertagi</i>	120 days
<i>Trichostrongylus axei</i>	100 days
<b>Lungworms</b>	
<i>Dictyoaulax viviparus</i>	150 days

**DOSEAGE AND ADMINISTRATION**

LONGRANGE® (eprinomectin) should be given only by subcutaneous injection in front of the shoulder at the recommended dosage level of 1 mg eprinomectin per kg body weight (1 mL per 110 lb body weight).

**WARNINGS AND PRECAUTIONS**

**Withdrawal Periods and Residue Warnings**

Animals intended for human consumption must not be slaughtered within 48 days of the last treatment.

This drug product is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. A withdrawal period has not been established for pre-ruminating calves. Do not use in calves to be processed for veal.

**Animal Safety Warnings and Precautions**

The product is likely to cause tissue damage at the site of injection, including possible granulomas and necrosis. These reactions have disappeared without treatment. Local tissue reaction may result in trim loss of edible tissue at slaughter.

Observe cattle for injection site reactions. If injection site reactions are suspected, consult your veterinarian. This product is not for intravenous or intramuscular use. Protect product from light. LONGRANGE® (eprinomectin) has been developed specifically for use in cattle only. This product should not be used in other animal species.

**When to Treat Cattle with Grubs**

LONGRANGE effectively controls all stages of cattle grubs. However, proper timing of treatment is important. For the most effective results, cattle should be treated as soon as possible after the end of the heel fly (warble fly) season.

**Environmental Hazards**

Not for use in cattle managed in feedlots or under intensive rotational grazing because the environmental impact has not been evaluated for these scenarios.

**Other Warnings:** Underdosing and/or subtherapeutic concentrations of extended-release anthelmintic products may encourage the development of parasite resistance. It is recommended that parasite resistance be monitored following the use of any anthelmintic with the use of a fecal egg count reduction test program.

**TARGET ANIMAL SAFETY**

Clinical studies have demonstrated the wide margin of safety of LONGRANGE® (eprinomectin). Overdosing at 3 to 5 times the recommended dose resulted in a statistically significant reduction in average weight gain when compared to the group tested at label dose. Treatment-related lesions observed in most cattle administered the product included swelling, hyperemia, or necrosis in the subcutaneous tissue of the skin. The administration of LONGRANGE at 3 times the recommended therapeutic dose had no adverse reproductive effects on beef cows at all stages of breeding or pregnancy or on their calves.

Not for use in bulls, as reproductive safety testing has not been conducted in males intended for breeding or actively breeding. Not for use in calves less than 3 months of age because safety testing has not been conducted in calves less than 3 months of age.

**STORAGE**

Store at 77° F (25° C) with excursions between 59° and 86° F (15° and 30° C). Protect from light.

Made in Canada.

Manufactured for Merial Limited, Duluth, GA, USA.

# WITH SEASON-LONG CONTROL,

**YOUR CATTLE** *will look so good* **THE NEIGHBORS WILL STARE.**

See the difference with 100 to 150 days of parasite control in one convenient dose.<sup>1</sup>

LONGRANGE® (eprinomectin) is the first extended-release injection that gives you 100 to 150 days of parasite control in a single treatment.<sup>1,2</sup> LONGRANGE takes out even tough-to-kill worms.<sup>3</sup> Unique THERAPHASE™ Technology allows

LONGRANGE to work for an extended period and then quickly leaves the animal's system. The short amount of time at sub-therapeutic concentrations helps ensure LONGRANGE doesn't select for resistance any more than current dewormers, making it an effective and responsible choice.<sup>4,5</sup>

See the difference in your herd's performance this season. **Talk to your veterinarian** about 100 to 150 days of parasite control in a single dose with **prescription LONGRANGE.**<sup>1,2</sup>

Available in 500 mL, 250 mL and 50 mL bottles.  
Administer subcutaneously at 1 mL/110 lbs.

For more information, visit [theLONGRANGElook.com](http://theLONGRANGElook.com)

**IMPORTANT SAFETY INFORMATION:** Do not treat within 48 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows, or in veal calves. Post-injection site damage (e.g., granulomas, necrosis) can occur. These reactions have disappeared without treatment.

# WHERE HAS ALL THE POWER GONE?

The current fad has been to take some of the performance out of the performance breeds. We haven't changed. We have always selected for moderate birth weight, high performance cattle with superior carcass traits, cattle that will make money for you, the cow/calf producer, the feedlot and the beef processor.

**New date

## Offering 160 Bulls

**85 Charolais**

**65 Salers X Angus Optimizers**

### Featuring:

- 30 sons and grandsons of Tenacious, great Leptin and tenderness genetics and perennial crowd favorites
- 18 red factor purebred Charolais bulls, 9 sired by Clyde
- Our first sons of Key's Jaxson and they are awesome - deep and thick and easy doing. 15 top performance, outcross bulls.
- 18 Black and red Charolais sons of our Optimizer cows, lots of power here, could be our best group yet.
- Several top outcross herd sire prospects.

**Key's Masterati 53A** is a powerful son of our new herd sire, Key's Jaxson 200Y, who combines Bronco and Peugeot on his top side and is linebred to the Cagwin Farms Australian based Frontline bull on the bottom side. This free moving February yearling is long bodied, straight topped and extremely attractive.

**Key's Turbine 149A** was our top weaning bull calf out of 128 contemporaries with an adjusted 205 of 890#. This Specialist son is out of a powerful McHenry daughter that goes back to the Lucy cow family that has produced so many good ones. You can't stand to look at some performance bulls - look at Turbine, you'll like him.

Our entire Denver pen sells.

Here's a double red purebred Clyde son out of a Mastercard cow that goes back to Buddy Cobb breeding on the dam's side. He's deep ribbed, big topped with excellent scrotal development and a dog gentle disposition, gaining 4.63 #/day.

# 45<sup>th</sup> CHAROLAIS National Show

Great weather and near record crowds welcomed Charolais breeders from across the United States, Canada, Mexico and Australia to the 108th National Western Stock Show for the 45th National Show and 35th National Sale.

The Charolais weekend kicked off on January 18 with a highly competitive National Pen Show that saw entries from 7 states. An active and spirited crowd saw a record setting average for the 35th National Sale on January 19.

A great crowd of Charolais breeders and cattlemen gathered ringside January 20 for the 45th National Show that saw entries from 21 states shown in the historic Stadium Arena.

The success of the National Charolais events truly represented the celebration of western traditions by the National Western Stock Show.

## National Show Dedicatee: Stan Cross, Cameron, Texas

Back row, from left: Larry Lehman, AICA President; Stan Cross, Larry Ludeke; David Dickerson; J. Neil Orth, AICA Executive Vice President. Front row, from left: Grandsons, Mason and Shawn Leifeste.

In October of 1949 my dad and I, at 9 years old, loaded my Hereford steer in a boxcar in Waynoka, Oklahoma. We got into the caboose and headed to the American Royal in Kansas City and well, the rest is history.

After high school, I went to Oklahoma A&M (now Oklahoma State) and worked and lived in the sheep barn and made 25 cents an hour. My heart was never really into school and I just wanted to show cattle. Soon after, I left school in 1960 and went to work at Northwood Shorthorn Farms near Chicago, Illinois. I remember the day I left Northwood. I stopped to get gas outside of Chicago. While filling up, a man told me President Kennedy had just been shot.

After coming home in 1964, I married Mary Joyce. Mary Joyce and I moved to Douglass, Kansas, and went to work as herdsman for Lauright Charolais. At that time, I had never seen a Charolais up close. We traveled and showed a lot that first year. We had Grand Champion female at Chicago at the International Show. After Lauright's dispersed, I went to work for Jim Price in Oklahoma. In 1970, I decided to branch out on my own and I started a fitting service. In 1972, I went into partnership with Buford Cloyd. We showed in over 20 states. In 1973, Buford and I were awarded Co-Herdsman of the Year. We continued with our fitting service and had lots of success.

Mary Joyce and I had three children, Shannon, Shawn and Samantha who loved to show and loved the Charolais breed just as much as I did. All three children exhibited champions at Oklahoma City, and Tulsa State Fair multiple times. My youngest, Samantha, is married to Alan Leifeste, owner of Leifeste Cattle Service, and both are very active in showing Charolais and other breeds. Mary Joyce and I are blessed with

3 grandchildren. Mason, 8; Shawn, 5; and Landree, 1 year. The kiddos are slowly growing their purebred herd and also have a heavily influenced Charolais club calf herd as well.

The breed has come a long way from when I first started a long time ago. People used to ask me all the time what exactly is a Charolais? And now, you better have some Charolais in the show steer if you want to win a major steer show these days.

In the forty-seven years I've been associated with Charolais, they have become a dominant breed. Thanks to the foresight of great breeders, commercial cattlemen, the association and all those working hard to make it so.

The last six years before retiring in September of 2012, I worked as herdsman for Bar J Charolais in Liverpool, Texas. I've enjoyed watching them become successful in the show ring and proud for all they have accomplished with the help of my son-in-law and daughter as they exhibit the Bar J cattle. (Bar J won the coveted AICA Challenge Trophy at the 44th National Show in Ft. Worth.)

It's a great bred and I've been proud to be a small part of it. If the good Lord is willing and I'm still vertical, I'm looking forward to taking my oldest grandson, Mason, to his first Charolais Junior National in Hutchinson, Kansas next summer.

You can always look back and think about what you might have done different...but I know one thing, I wouldn't trade my Charolais experience for anything. Thank you for this great honor. I consider it one of my highest achievements.

*Editor's Note — as told by Stan Cross*

## Herdsman of the Year

Derek Ridder (center) with previous herdsman Jason Hankins and Jeannine Doughty.

## 2014 American-International Charolais Association names Ridder as Herdsman of the Year **Derek Ridder, Hermann, Mo.**

The 45th National Charolais Show Herdsman of the Year, Derek Ridder, Hermann, Mo., knows the value of hard work, much of which attributes to his time in the Charolais business.

“Several years ago when my father Dale was making more time to farm and teach school, I jumped in to start expanding our Charolais herd,” Ridder said. “Charolais cattle were something we both enjoyed, and it was as good of a time as any to expand our herd.”

Starting from the ground up, he grew Ridder Farms Charolais into a well-respected, and admired set of cattle in the industry. An evolution Ridder has enjoyed as he watches his own cattle improve year after year, and also watches similar industry-wide herd improvements.

“Charolais cattle have changed as much or more for the better as any breed going,” Ridder continued. “We’re currently concentrating on our embryo transplant program and focusing on bettering the top end of our genetics. In terms of numbers, we’d like to stay around 100 purebred cows and work on growing our commercial herd even more.”

By putting the right genetics to work with his cattle, Ridder hopes to continue to do his part to be a progressive member of the Charolais breed.

“We want to develop a moderate framed, sound and functional female herd with eye appeal that can be put to work for anyone,” Ridder said. “Of course, we are always excited when our cattle excel in the showing, but we are growing cattle

to be most productive in the pasture.”

Ridder’s wisdom and enthusiasm for the breed, was recognized in Denver, Colo., when his name was announced over the loud speaker as the 2014 Herdsman for the Year.

“We were getting packed up to head home at the end of the bull show when we decided to go watch the championship drive,” Ridder said. “It was surprising to hear them call my name for the Herdsman Award. It was a really gratifying experience for your peers and people that you work with every day to vote you for something like this.”

With too many industry mentors to list, Ridder knows that he has been fortunate to work with some of the best in the business.

“The custom fitting business taught me a lot of about the purebred show world,” Ridder said. “Not only that, I was able to work with and befriend so many great cattlemen that I still look up to today. Having some of the same people that have taken the time to help me learn and improve to vote me as Herdsman of the Year made this year’s National Western Stock Show a pretty unforgettable experience.”

The American-International Charolais Association (AICA) congratulates Derek Ridder on his achievement as the 2014 AICA Herdsman of the Year.

## Neighbors HELPING Neighbors

*When the times get tough, the tough get going*

*Brent & Nancy Thiel, Lindskov-Thiel Ranch, Isabel, S.D.*

When the forecast for the Atlas Blizzard was predicted to roar through western South Dakota last October, Brent Thiel of Lindskov-Thiel Ranch, considered himself one of the lucky ones.

“We had a bad feeling when they were talking about rain followed by heavy snow so early in the season,” Thiel said. “Fortunately, we were able to move all of our cattle to winter pastures before the storm hit.”

Even though the worst of the storm was further west of the ranch, neighbors and fellow ranchers in close proximity were devastated by the weather. In just three days, the storm took an unimaginable financial and emotional toll on ranching families and animals across the region. A toll that would not easily be forgotten, and even worse, not easily rebuilt.

Just days before the storm, entries were closing for the National Charolais sale in Denver, Colo. As with any other year, Thiel selected one of their best heifers to put in the sale.

“At the time, it was no different than picking a female like we would any other year,” Thiel said. “We wanted a female with merit that was representative of our genetics to put in the National Sale and for that reason we chose LT Brenda’s Hope 3019.”

Excellent genetics is something the Lindskov-Thiel Ranch has come to be recognized for in the Charolais business, and it was of no surprise to many that she would come to be one of the highest selling females in the sale.

“LT Brenda’s Hope 3019 is one of the best heifers that we have ever offered in the National Sale,” Thiel said.

LT Brenda’s Hope 3019 comes from a long line of maternal power in the well-established Brenda cow family. Lindskov-Thiel’s confidence in this cow-family is rooted in the 32 females presently in their herd that each go back to the original “Brenda.”

“Her dam is a two year old with a bright future,” Thiel continued. “She has the highest udder score in her age group with a baby-doll temperament and pedigree of lasting worth.”

LT Brenda’s Hope 3019 not only looked the part for carrying on a future similar to her mother’s, she acted the part as well. What’s more, the Thiel family decided to donate the proceeds from her sale to the Rancher’s Relief Fund to shed light on the future for someone else affected by the storm.

### The Ranchers Relief Fund

The South Dakota Rancher Relief Fund (RRF) was established on Oct. 8, 2013 by the S.D. Stockgrowers Association, S.D. Cattlemen’s Association and S.D. Sheepgrowers Association. The fund provided support and relief assistance to those in the agriculture industry impacted by the blizzard.

“With approximately 600 applicants reporting losses of roughly 43,000 head of cattle, sheep and horses, we recognize the financial assistance from the Rancher Relief Fund will not come close to fully reimbursing the ranchers that suffered devastating losses. However, we know every little bit helps in the wake of the historic storm,” said Bob Fortune, S.D. Stockgrowers Association President. Once learning of the Rancher Relief Fund, developed to aid in the cleanup and rebuilding efforts of area ranches, the Thiel family was certain that LT Brenda’s Hope was one way they could help the state rebuild from the winter lashing of winter storm Atlas. Their 2014 National Sale entry was just one way they could continue the South Dakota time-honored tradition of neighbors helping neighbors, he said.

“Over the years, there are countless neighbors, cattlemen and ranchers that have stepped up to help us whenever they could and we wanted to repay the favor,” Thiel said. “It may be a big state, but in the grand scheme of things it is a really small community of ranchers.”

When sale day rolled around and LT Brenda’s Hope walked into the sale ring, it was only fitting that a fellow South Dakota would be the high bidder, with all proceeds going directly to the Rancher’s Relief Fund.

“John Proehl from Parkston, South Dakota bought the heifer,” Thiel said. “It was exciting to see a progressive breeder like John take her home, and at the same time, exciting to be donating back to such a good cause.”

To date, the Rancher’s Relief Fund is approaching the \$3.5 million dollar mark and growing. Donations continue to pour in from all 50 states and multiple foreign countries. And while all losses from the storm may never be recovered, the storm tells an amazing story of neighbors helping neighbors.

For answers to frequently asked questions or for more information on the Rancher Relief Fund, please visit [www.ranchersrelief.org](http://www.ranchersrelief.org).

# 35th

# National Sale Results

Charolais breeders and cattlemen from coast to coast, Canada and Mexico filled the National Western Beef Palace Auction Arena for the record breaking 35th National Charolais Sale.

Twenty seven buyers from 14 states made selections and established a record National Sale average and gross.

Hubert Cattle Sales, Greg and Brenda Hubert, Oakley, Kan., managed the sale. The auctioneer was Rob Nord, Clinton, Ill. The 35th National Sale Committee was chaired by Lee Eaton, Lindsay, Mont. Committee members were Derry Wright, Richmond, Mo.; John Chism, Winchester, Ky.; Larry Ludeke, Liverpool, Texas; and Bob Tibbs, Havre de Grace, Md.

## LT Gold Blend 0315 P

M791619 • DOB: 03/31/2010  
 BW: 89 lbs. AWW/R: 896 lbs./119 AYW/R: 1,430 lbs./107  
 EPDs: BW -0.3 WW 27 YW 37 M 5 TM 19 SC 0.8 REA 0.07 MARB 0.09

**Sired by the heavily used LT Easy Blend 5125 Polled and out of the AICA Dam of Distinction, LT Marla 4904 Polled who offers a +23 Milk EPD.**

LT Gold Blend is a working herd sire producing cattle that will work for our customers. Sure he's got good hair but more importantly he's a meatwagon. Gold Blend's performance matches his EPDs. He's easy calving - Ryan Honeyman has used him on his heifers with great results. Gold Blend's bull calves have bred-in growability! His calves are topping the performance charts. We are especially excited about Gold Blend's ability to pass down some pretty impressive carcass numbers, indexing 160 for IMF. And Gold Blend's daughters are now coming into production showing a shorter gestation and like Gold Blend's dam (LT Marla 490) they are well-equipped to raise top calves. Gold Blend passes on his tremendous smoothness and calving ease to his offspring, while adding performance, conformation and gentle disposition.

Order your GOLD BLEND semen today! \$25/straw; \$35 signing

First GOLD BLEND daughter to calve. Subzero weather, no assistance, excellent milk - Good set of milking equipment!

## His Sons Perform...

REA ranked #4 out of 60

Long, straight, deep, stout!

NEWS NOTES

## **Odden Charolais Ranch, Colome, S.D. awarded 2014 AICA Seedstock Producer of the Year**

The American-International Charolais Association recognized Odden Charolais Ranch, Brian Odden and Family Colome, South Dakota as the 2014 AICA Seedstock Producer of the Year at the 45th National Charolais Show, Denver, Colo. on January 20, 2014.

The Oddens have spent a lifetime building their Charolais operation to provide bulls that meet the demand of the backbone of the beef cattle industry, the progressive cattleman. Natives of Lake Preston, South Dakota, the Oddens made a difficult decision in 2008 to move to Colome after continuously struggling with flooding on over half of their ranch. With the move, they continued toward their goal of learning how to manage the operation according to what Mother Nature provides by raising easier fleshing cattle and adjusting stocking rates.

Odden contributes their best measurement of success to their returning customers. One of his customers has bought nearly 1,000 bulls from Odden Charolais Ranch over the last 24 years, sight unseen. The Odden family contributes this success towards their collection of performance data and customer service. By collecting 100 day gains and utilizing rigorous culling practices, customers are provided the best performance and quality in a uniform group that will compliment their cow herd.

The Odden family has shown cattle on the Hill and in the Yards in Denver since 1970. In 2006, Odden Charolais Ranch was recognized as the National Western Stock Show's longest continuous Charolais exhibitor. The Oddens have exhibited cattle in Louisville, Kansas City, Houston, Billings, Canada and across South Dakota. Brian shares, "Our long term goal is to simply expand our business and ranch size so that both our boys, Adam and Andrew, can come home full-time and add another generation to our Charolais history."

**2014 AICA Seedstock Producer of the Year- Odden Charolais Ranch**

## **Dean Odden & Sons, Ree Heights, S.D. named 2014 AICA Environmental Stewardship Award Recipient**

The American-International Charolais Association presented Dean Odden & Sons the 2014 AICA Environmental Stewardship Award at the 45th National Charolais Pen Show in the Yards, Denver, Colo. on January 18, 2014.

Dean's father believed in rotational grazing and taught him the importance of taking care of the land. He has carried this philosophy with him and observed other practices to make the best use of natural resources. Dean says, "It has become evident that an increase in productivity and protecting the resources go hand in hand."

After college while living in Lake Preston, South Dakota on the family ranch, Dean was instrumental in planning, installing and operating a rotational grazing system that received the Excellence in Grazing Management award from the Society for Range Management. With ranch struggles caused by nearby Lake Thompson, Dean and his wife Susi relocated their family to Ree Heights.

Since at Ree Heights, Dean has developed water and fencing to help manage the grazing to enhance the resources. These practices earned the ranch the Soil and Water Stewardship award from the Hand County Conservation District.

The Odden family has designed and built a conservation plan specifically for the better management of livestock and resources on the ranch. Dean states, "Improved fences and watering systems have made us a better neighbor. Many neighbors have observed our system and implement similar practices on their farms or ranches." Dean and Susi's three sons, Matthew, Joseph and Christopher have all gained Dean's respect of the land and continue to implement new practices to enhance their environment.

**2014 AICA Environmental Stewardship Award Recipient - Dean Odden & Sons**  
(l to r) AICA President Larry Lehman, Dean Odden, Susi Odden, Matthew Odden, Noah Odden, Miss Charolais USA Taylor Husz, AICA Executive Vice President J. Neil Orth

## **American International Junior Charolais Foundation's Scholarship Program**

The two mechanisms in place today to increase the Foundation, are as follows:

- (a) A minimum donation of \$1,000 to the American International Junior Charolais Foundation will allow the donor to name a scholarship to be awarded at the next Junior National;
- (b) A minimum donation of \$20,000 to the American International Junior Charolais Foundation will allow the donor to name a scholarship which will become endowed after a period of one year.

***Donations of any size  
are encouraged at all  
times.***

***Please send donations to:***

AIJCF  
11700 NW Plaza Circle  
Kansas City, MO 64153

***AIJCF Scholarship  
Application Deadline is  
April 30, 2014!***

# Beef Cattle Genetic Evaluations

NCERA-199 leadership, coordination, research, and outreach have helped maximize adoption and minimize costs of innovative tools and strategies for beef cattle genetic evaluations and breeding.

**T**he North Central Regional Association (NCRA) of Agricultural Experiment Station Directors is one of four regional associations with responsibility for facilitating cooperation of regional and national research. The research is supported in part by the Multistate Research Fund (MRF), which is a federal appropriation authorized by the Hatch Act. Additional support comes from other federal programs as well as state and private sources. The research program focuses on regional priorities that are identified and developed jointly by State Agricultural Experiment Station (SAES) Directors, Departmental Chairs and participating scientists.

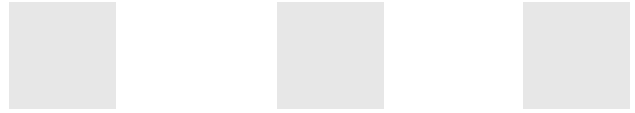

The NCERA-199 is a committee under the NCRA represented by researchers and industry which is specifically focused on issues regarding the Implementation and Strategies for National Beef Cattle Genetic Evaluation.

## **Who cares and why?**

The production of high quality, healthy, and affordable beef begins by identifying the best animals for breeding. Improving cattle genetics through selective breeding can lead to animals that gain weight faster, produce more desirable meat, and are more tolerant of pests, diseases, and stressful environmental conditions. Breeders and producers need ways to evaluate the genetic merits of cattle and predict the traits and performance of their offspring. In the U.S., National Cattle Evaluation (NCE) programs are the main avenue for collecting, analyzing, and distributing genetic information. However, many breed associations find it difficult to fund NCE programs. Furthermore, when genetic evaluations are done through specific breed associations and independent breeders, it is difficult to establish broadly accepted breeding goals or adopt new approaches and technologies industry-wide. The research supporting these programs also tends to be disjointed, leading to overlapping studies and research gaps. All of these limitations make it difficult to adapt breeding practices to changes in beef production and marketing practices. Uncoordinated, inefficient NCE programs could reduce the economic viability, international competitiveness, and sustainability of U.S. beef cattle producers, leaving consumers without the affordable beef products they desire.

*NCERA-199 has provided the beef industry with predictions of the heritability of certain traits and diseases in cattle. This information has influenced the selection of bulls for breeding and increased the competitiveness and marketing opportunities for bulls, semen, and embryos with certain genetic traits.*

## **What has the project done so far?**

NCERA-199 has facilitated research and exchange of information about National Cattle Evaluation programs. A major focus of NCERA-199 research has been improving methods for evaluating beef cattle genetics and selecting animals for breeding. Scientists have identified economically important traits and have developed tools for predicting whether the offspring of a certain animal will be below or above average for a certain trait. In addition, researchers have designed and distributed software that enables producers to compare bulls from different breeds and crossbred bulls to each other. NCERA-199 scientists have also developed new statistical methods and computing techniques and have helped standardize how results from genetic evaluations are presented to the beef cattle industry. Moreover, they have found new ways to quickly and easily disseminate this information, including a free web-based platform for analyzing genomic data. NCERA-199 researchers and Extension professionals have served as leaders and speakers at workshops and symposiums for breed as the National Cattlemen's Beef Association and Beef Improvement Federation. Other outreach efforts such as the "Brown Bagger Series: Beef Genetics from Molecular to Management" have been delivered online and via teleconferences. NCERA-199 has also contributed to online curriculum for graduate programs, offering students at universities across the U.S. the opportunity to engage in cattle genetics and breeding coursework.

## **What research is still needed?**

Researchers must continue to develop genetic predictions for a wide portfolio of economically important traits. In particular, research efforts must include methods for combining genomic information, pedigree, and performance data for multiple trait, multiple breed evaluations. Future research must also attempt to expand NCE methods to incorporate data from a greater variety of breeds, production systems, and marketing strategies.

## **Want to know more?**

Administrative Advisor:

Maynard Hogberg (hogberg@iastate.edu)

*This project was supported, in part, through USDA's National Institute of Food and Agriculture by the Multistate Research Fund (MRF) established in 1998 by the Agricultural Research, Extension, and Education Reform Act (an amendment to the Hatch Act of 1888) to encourage and enhance multistate, multidisciplinary research on critical issues that have a national or regional priority. Additional funds were provided by contracts and grants to participating scientists. For more information, visit <http://ncra.info/>.*

*Based on article compiled by Sara Delheimer*

# Impact Statements

*By enabling beef cattle genetics research and coordinating the spread of and access to new data, tools, and techniques, NCERA-199 has:*

- Given breeders a wider portfolio of evaluated traits to consider, providing more ways to improve herd genetics.
- Made it possible to do genetic evaluations more often, helping ensure that breeding selections are informed and successful.
- Increased adoption of breeding strategies that produce cattle that are hardier in certain environments and production systems and more valuable in certain marketing systems.
- Increased global competitiveness and marketing opportunities for producers of cattle, cattle semen, and embryos.
- Improved training and education in the area of beef cattle genetics across the U.S.
- Advanced statistical methods that can be used in genetics research avenues outside the beef cattle industry.

# Factors Affecting Breeding Ability of Bulls

By Heather Smith Thomas

**T**here are many factors that play a role in fertility and breeding ability in bulls, including semen quality, soundness, desire to breed cows, etc. Many producers make sure that every bull passes a breeding soundness examination before putting him out with cows. Dr. Mike Sanderson, Professor of Epidemiology in Beef Production, Kansas State University says that these examinations are a great way to assess a bull's fertility and breeding soundness.

"We need to assess physical soundness, checking for lameness, and also assess his ability to mount a cow. Generally we don't assess mounting during the exam, but I always advise clients to make sure they watch the bulls, to know that they can indeed mount the cows," he says. If the bull has a structural problem, arthritis or any kind of lameness that makes it uncomfortable for him to mount, he may not breed.

"The bull could have perfectly good semen but won't breed very many cows. If a bull is very lame he may lie down a lot and fail to thermo-regulate the testes very well, and then the semen starts to show a change. But if it's not a serious lameness, the semen may be fine and the bull may simply not be very aggressive about breeding," he says.

"During the breeding soundness exam we palpate the testicles and make sure there is nothing wrong with them—that they feel normal and can freely move in the scrotum. We palpate the internal reproductive organs and make sure they seem to be ok. We also make sure the penis extends and that there is nothing wrong with it," says Sanderson. You want to be sure there are no adhesions from old injuries.

"We palpate to make sure there are no hematomas, which can sometimes cause enough adhesion that the bull cannot

extend the penis. If the injury has completely healed and the penis is able to extend and everything seems fine, we don't worry about an old injury, but we want to make sure that it can extend far enough that we know the bull can breed," he says.

"We not only check feet and legs for soundness, but also the eyes. Vision is a very important part of the bull's being able to identify sexually active groupings, of cattle," says Sanderson. Mounting activity can be seen from a distance, and the bull must be able to see this.

"If you have a valuable bull with a vision problem you could use him in a much smaller pasture with a few cows, but he would not do well out in a large pasture like on the range," says Sanderson.

"We also assess body condition score during our examination. Maintaining good fertility is a year-round process. Some people bring the bulls in 3 or 4 weeks before breeding season and get a breeding soundness exam, and then at the end of the breeding season they turn the bulls out and forget them. A lot can happen to them during that time; they can get too fat, or too thin, or develop lameness issues you won't notice if you are not watching them. It doesn't take a lot of management, but you need to make sure they have adequate nutrition and are in a good location during the winter. You want some shelter, even if it's just a windbreak or some willows where they can get out of a storm," he says.

If you are checking the bulls periodically you would know if any of them got sick, or developed a lameness problem or foot rot. This could be a factor for future fertility if the bull had a fever. "It helps to know these things, when the bull comes up for his breeding soundness exam. If there is something wrong,

*History of the bull and past records can be very helpful when assessing him for the next breeding season.*

and we have a good enough history we might know when the bull had a fever. We can then do a lot better job of predicting when the bull might be fertile again. These things can be very helpful, not just for the veterinarian to know what kind of prognosis to give, but for the producer to know if the bull will recover by breeding season or if they need to find another bull.” The sooner that decision can be made, the better.

“We measure scrotal circumference, because this is an important indication of how much sperm the bull will produce, and this may determine how many cows he can potentially breed. We can’t say that if he is a certain size we can put him on x number of cows, but the bigger the factory, the more potential he has. Research has also shown that scrotal circumference is also related to age of puberty in the bull’s daughters. Bulls with large scrotal circumference tend to have daughters that reach puberty sooner,” says Sanderson.

“If it’s a bull that we’ve tested multiple years for a producer, then we can also look back and see if the scrotal size has stayed the same. We can know when it starts to decline—when he may start to go downhill in fertility. Size can be influenced by how fat the bull is, but if we’ve kept all those records we can look back and say he is a little smaller this year, but his body condition score is a little bit lower, so if his semen still looks good, he’s probably ok. We need to weigh all the factors,” he says.

“We also look at semen motility and how well the sperm swim—and the percentage of sperm cells that are normal. We also need to know what kind of abnormalities we see. These can be difficult to interpret but sometimes they’ll give us clues about what might have happened in the past if this bull has a problem, and how likely he is to get over it—versus how likely it might be the beginning of the end for him, if his fertility is beginning to really drop,” says Sanderson.

History of the bull and past records can be very helpful when assessing him for the next breeding season. “All of those things, more than just the semen check, are very important. There are limitations to the breeding soundness exam and semen check because what we see is what the bull is producing today and that doesn’t tell us anything about what the bull will be producing tomorrow or next week,” he explains.

These exams have proven helpful and effective, however. “We are able to identify bulls that will not do well this breeding season and we can replace them, but it doesn’t guarantee that the bull who is in wonderful shape today will be fertile by the time breeding season starts or two weeks into it. Usually, however, if the bulls are ok today and you are watching them and pay attention, and nothing bad happens, they are probably going to be ok through the breeding season, but you have to monitor them,” he says.

“There is no substitute for watching the bulls and making sure they are breeding, that they can mount well and are actually doing their job. You also have to make sure a dominant bull is not keeping the younger ones from breeding cows. That can be a disaster if the dominant bull is also the one that is not very fertile,” says Sanderson.

“The bull may be sub-fertile—not as fertile as he needs to be, to be a productive and useful bull.” He’s not paying his way if he only sires a few calves—especially if he’s keeping the more timid bulls from breeding.

To make sure that bulls can do their best job, producers need to keep them in the right kind of shape and watch them closely to know what’s going on. “Bull management is not that expensive nor time consuming. It pays to spend a little time keeping track of the bulls to make sure they remain fertile as long as possible,” says Sanderson.

It’s also important to monitor what’s happening in the breeding pastures to know if bulls are actually doing their job. “Yearling bulls need fewer cows assigned to them because they may not be able to handle as many cows as an older bull. I’ve worked with producers and other veterinarians looking at herd infertility problems in which this is all it turned out to be. They had some pastures where they had too many cows with yearling bulls and these young bulls just couldn’t get it done,” he says.

“We rarely do libido tests on bulls. They are difficult to do and difficult to interpret. They are very time consuming and expensive, so we generally don’t do them,” he says. It’s up to the producer to make good initial decisions regarding how many cows should be put with each bull, and then to watch the bulls and know what’s going on, and make changes if necessary. There is no substitute for watching your cattle.

# LINDSKOV-THIEL BULLS...

*meeting industry demands head on*

When searching for your next herd bull, your selection criteria will not doubt include the traits that your commercial bull customers demand. Our focus on calf vigor, carcass merit and temperament translate into keeping your bull customers smiling. Consider what these and other Lindskov-Thiel herd sire prospects have to offer your future. More than just numbers and another pretty face, these bulls meet today's demands.

**PLEASE SEE PAGES 73 TO 76 IN THIS ISSUE FOR PHOTOS & MORE INFORMATION**
