

PERSEVERANCE CONQUERS

TEMPLE UNIVERSITY

136th Commencement

THURSDAY, MAY 11, 2023

Welcome

Congratulations! Today we celebrate you. I am proud to join those who supported you on your Temple journey to reach this milestone.

For many of you, the global pandemic meant that this was not the college experience you expected. Nevertheless, in the true Temple spirit of “Perseverance Conquers,” you found new ways to live and learn, and never faltered in your determination to pursue your academic goals. The lessons you learned and your relentless drive served you well during your time with us and will guide you throughout your careers and your lives.

Your achievements inspire us. You have taught us much about how to transcend boundaries of time and space to communicate, learn, create and build community.

Now it is your turn to make your mark on our world. Do so with the same energy you have shown us during your years at Temple. As you ascend to new heights and build a caring, resourceful, and respectful community for future generations, please remember to reach back and bring along your fellow Owls. I end where I began; today we celebrate you, and wish you well as you chart the future phases of your life.

Sincerely,

JoAnne A. Epps

Commencement Notes

Academic Ceremony and Regalia

PROCESSION

The academic procession is a vestige of medievalism in modern university life. The somber gowns and colorful hoods are similar to those worn by scholars and church men as early as the 12th century. The garb had an element of utility. The robes were warm; the hoods could be drawn up to protect against drafts in unheated buildings.

Traditionally, the hood's silk lining was the color of the university, and the color of the bordering velvet indicated the special area of study, still used today. White represents arts, letters and humanities; dark blue, philosophy; light blue, education; yellow, science; brown, fine arts; mustard, business; purple, law; dark green, medicine; lilac, dentistry; olive, pharmacy; pink, music; orange, engineering; citron, social work; and sea foam, podiatry. The color of the tassels on the "mortar boards" or caps of the candidates for degrees corresponds to the velvet borders of the hoods.

Gowns representing the bachelor's, master's and doctoral degrees vary in style. The bachelor's gown has long pointed sleeves; the master's gown, longer, narrow closed sleeves, which extend below the knees; the doctoral gown, with full bell-shaped sleeves and three bars of velvet, opens in the front with wide velvet bands in either black or the color indicating the area of study.

Stoles and sashes represent a student's affiliation with an organization or group such as student-athletes, study abroad, international, Greek organizations, and other student service or academic organizations.

Cords are worn by students who excel academically and are reserved for Latin Honors, university honors, and other honors programs and honor societies.

The tassel on the mortar board is customarily worn on the right side before the degrees are conferred and shifted to the left at the moment the degrees are awarded.

Leaving the Ceremony

To avoid excessive congestion when leaving the Liacouras Center, guests in sections 102–104 and 112–114 should use the 15th Street exit; guests in sections 105–111 should exit through the Main Lobby onto Broad Street.

To ensure everyone's safety and reduce overcrowding, please refrain from taking photos near the Broad Street exit of the Liacouras Center. Here are alternative locations.

1. Liacouras Walk between Norris Street and Polett Walk;
2. Founder's Garden between 13th Street and Liacouras Walk;
3. Bell Tower on Polett Walk between 12th and 13th streets; and
4. Park Mall between Cecil B. Moore and Montgomery streets.

Honors and Distinction Symbols

*** summa cum laude	+ distinction in major
** magna cum laude	++ distinction in double major
* cum laude	

THE CHAIN OF OFFICE AND THE MEDALLION

The chain of office and the medallion are symbols of the office worn by the president on official and ceremonial occasions. The front of the medallion bears a replica of the official seal of the college, which includes the university's name and date of incorporation, a Greek temple, and the motto "Perseverantia Vincit" (Perseverance Conquers). The back of the medallion bears an image of Temple University founder Russell H. Conwell, along with the words "Knowledge with Honor" and "Wisdom Through Diligence." The chain is imprinted with symbols representing the university's original schools and colleges.

THE MACE

Used only on formal academic occasions, the academic mace symbolizes the authority invested in the president by the school's governing body. The mace is an integral part of the Commencement exercises when students are invested in degrees by the lawful authority of the university. It is carried in procession immediately before the president. The mace serves as a symbol of the academic quest for truth and wisdom and represents the unity and aspirations of the collegial community.

Josh Shapiro

GOVERNOR OF PENNSYLVANIA

Josh grew up in Pennsylvania, watching his parents serve their community — his father was a pediatrician, and his mother was an educator. Their example inspired Josh to enter into public service, and from a young age Josh recognized that standing up for others was how he wanted to spend his career.

After marrying his high school sweetheart Lori and welcoming their first child, Josh returned to his hometown and successfully ran for state representative. As representative, Josh helped write and pass some of the toughest ethics laws in state history. His work earned him a reputation as a rare public servant willing to take on the status quo—“a blast of oxygen in the smoke-choked back rooms of quid-pro-quo Harrisburg.”

Then, as chair of the Board of Commissioners in Montgomery County, Pennsylvania’s third-largest, Josh led a fiscal and ethical turnaround. Before he took office, Montgomery County had a \$10 million budget deficit and an underfunded pension for county employees. Josh put the county back on solid financial footing, took early steps to combat the heroin epidemic, helped the first LGBTQ+ couples in Pennsylvania marry, and fired Wall Street money managers to save taxpayers and retirees millions. In 2016, Josh successfully ran to be Pennsylvania’s attorney general. As attorney general, he has restored integrity to an office badly in need of reform and taken on big fights for the people. He has proven to Pennsylvanians he can bring people together to solve tough problems, and is unafraid to enforce the law without fear or favor.

Josh exposed the Catholic Church’s decades-long cover up of child sexual abuse, identifying 301 predator priests and thousands of victims—and spurring investigations across the United States. He forced an agreement between two of the commonwealth’s largest insurance companies, protecting health care access for 2 million Pennsylvanians, and he has repeatedly gone to court to defend Pennsylvanians’ reproductive rights and a woman’s right to choose. He has held more than 90 public officials, Republicans and Democrats alike, accountable for breaking the law. Working with law enforcement partners at the local, state and federal level, he’s arrested thousands of mid- and high-level drug dealers while getting thousands of illegal guns off our streets. During the 2020 presidential election, Josh protected the right to vote and defended Pennsylvania’s election result, winning in court dozens of times before and after Election Day. He continues to call out the dangerous lies that undermine our democracy and provide steady, strong, and competent leadership to protect voting rights in Pennsylvania.

In January 2021, Josh was sworn in for his second term as attorney general. He’s arrested more than 6,000 drug dealers while investigating and suing pharmaceutical companies and the CEOs who knowingly perpetuated the crisis to line their own pockets. He’s standing up for everyday consumers, seniors who’ve been scammed and students preyed upon by private lenders by obtaining over \$328 million in relief to Pennsylvanians who have been ripped off. He is leading on criminal justice reform, bringing activists and law enforcement together to launch a new statewide police misconduct database, taking on employers who steal from Pennsylvania workers.

In November 2022, Josh made history as the highest vote-getter in Pennsylvania gubernatorial history. Alongside his running mate Austin Davis, Josh is ready to work with every Pennsylvanian to move our commonwealth forward.

Josh and Lori live in Montgomery County with their three school-age sons, and their eldest daughter attends the University of Pittsburgh.

Charles Tsan-Jian Chen

DOCTOR OF SCIENCE, HONORIS CAUSA

Charles Tsan-Jian Chen, a citizen of Taiwan, Republic of China, is a world leader and entrepreneur in the biotech industry with more than four decades of experiences and accomplishments in developing, producing and implementing forefront vaccine and diagnostic technologies benefiting human and animal health. He is the founder and CEO of the publicly listed Medigen Vaccine Biologics Corp. and the privately owned Sweitzer Biotech Co. of Taiwan. He is also a major investor of Taiwan Bio Therapeutics Inc., a company dedicated to regenerative medicine and cell therapy.

Medigen Vaccine Biologics Corp, (MVC), in collaboration with the U.S. National Institute of Health and Dynavax Co. of California, successfully developed a COVID-19 subunit vaccine that has been received by millions of people in Taiwan and several other countries around the world.

The MVC COVID-19 vaccine, because of its excellent immunogenicity, safety profile and stability at elevated temperatures, is the first vaccine that was selected by the World Health Organization's Solidarity Program for worldwide clinical trial and applications. In addition to COVID-19 and human influenza, MVC has also successfully developed the first vaccine for 2-month-old babies against EV71, a virus that infects millions of toddlers worldwide each year.

Schweitzer Biotech Co. has focused on the prevention of animal diseases, especially those affecting livestock, poultry and aquatic animals. It is a world leader in the development of in-field PCR-based diagnostic technologies and advanced animal vaccines.

Mr. Chen received his BS degree in psychology from National Taiwan University in 1974. He has since self-taught to become an expert in vaccine and diagnostic technologies for human and animal diseases. He has co-authored dozens of scholarly papers in top journals such as *The Lancet* and *Clinical Infectious Diseases*. In 2015, he was appointed a Distinguished Adjunct Professor of Biotechnology in the Biology Department of Temple University. He was a Chair Professor of Industry-Academia Collaboration at National Yangming Chiaotung University, one of the top universities in Taiwan.

In addition to being a board member of the Fu-Jen Catholic University Hospital in Taiwan, he is also the founding charter president of the Taipei Mingde Rotary Club, and in 1997-1998 he was elected the deputy governor of District 3480 of the International Rotary Club.

The honorary degree will be conferred at the College of Science and Technology ceremony on May 12, 2023 at 1:30 p.m. in the Liacouras Center.

Honorary Degree Recipient

Joyce K. Salzberg, CLA '69, CPH '79

DOCTOR OF HUMANE LETTERS, HONORIS CAUSA

As a first-generation college graduate, social worker, entrepreneur and philanthropist, Joyce K. Salzberg embodies Temple's mission of opportunity, engagement and discovery. Her work has enabled hundreds of thousands of families to live meaningfully through developmental interventions and therapy services.

Ms. Salzberg grew up in the Logan neighborhood of Philadelphia. Her father was a bus mechanic and her mother raised her family. She majored in Religion at Temple University and came back for her Masters in Social Work.

After 13 years (1979-1992) at the United Cerebral Palsy of North Jersey, Inc, Joyce K. Salzberg co-founded Sunny Days. At the time, this was one of the first early intervention service organizations that was privately owned with a model focused on direct-to-consumer services. She was a pioneer to diagnosis and provided therapy in the safe and comforting environment of a client's home. Previous to this, most intervention services were scheduled and conducted at a treatment center, a foreign environment which can be aversive to proper treatment. Under Ms. Salzberg's leadership, Sunny Days has grown to be one of the nation's largest early intervention and autism service providers with over one million sessions per year to developmentally delayed children and adults. Notably, Sunny Days is a rare example of a social services business reaching national scale without the investment / oversight of private equity, allowing Joyce to remain client-centric without the demands of other financial stakeholders.

Ms. Salzberg chairs New Jersey's State Interagency Coordinating Council (SICC). The SICC creates a forum for the entire early intervention community to share ideas and assist in improving the services offered to young children with disabilities.

Beyond her professional focus and personal commitment to Temple, she is a member of C200, a powerful community of the most successful women in business, united in the purpose of helping advance women's leadership in business.

Ms. Salzberg has been a consistent volunteer and supporter of her alma mater. As a dual Owl, she won the Gallery of Success in 2012 and was admitted into the League for Entrepreneurial Women of Temple University Hall of Fame two years later. In 2013, she joined CLA's Board of Visitors. After CLA's Board of Visitors adopted committees to align with its strategic plan, Ms. Salzberg became chair of its professional development committee and has provided strategic planning insights and advising to the Dean on both the programmatic scope and benchmarks for success.

Beyond her advisory and philanthropy, she lectures on campus whenever given the opportunity. She most often encourages students to understand how their skills, values and interests can align with meaningful careers. She is quick to note the importance of understanding one's ability to make a social impact through the private, for-profit sector.

The honorary degree will be conferred at the College of Liberal Arts undergraduate ceremony on May 10, 2023 at 9:30 a.m. in the Liacouras Center.

**Audience please stand, if you are able.*

Doctor of Philosophy

MAY 2023

Alkhansaa A. Abuhashim

Computer and Information Science. *Improving Smart Contracts Management and Designs for Blockchain Systems.*

Jumanah Sameer Alshehri

Computer and Information Science. *Jointly Mining News and User-Generated Content: Machine Learning and Information and Social Network Perspective.*

Alexandra M. Bacon

Chemistry. *Bis[hydrotris(1-pyrazolyl) borate] Complexes: Investigating Titanium(II) Metal Centers as Fuel Atoms in Energetic Materials & Iron(II)-Mediated Reactions with Solvents and Oxygen.*

Suyash Bajpai

Physics. *Transient Optical Nonlinearities Engendered by Femtosecond Laser Filamentation in Gases.*

Mark L. Berns

Biology-Neuroscience. *Functional Analysis of Residues on Profilin 1 that are Modulated by Wint Signaling.*

Pradeep Bhetwal

Physics. *Investigating the Density-Corrected SCAN using Water Clusters and Chemical Reaction Barrier Height.*

Thomas Raymond Boller Jr.

Chemistry. *Polyketone Synthesis, Post-Polymerization Functionalization and Per-and Polyfluorinated Alkyl Substance Adsorption.*

Melanie Leigh Cardona

Physics. *Measuring the Neutron Spin Asymmetry A_{1n} in the Valence Quark Region in Hall C at Jefferson Lab.*

Christopher Joseph Cocuzza

Physics. *Exploring Hadron Structure Through Monte-Carlo Fits and Model Calculations.*

Venkata Swaroopa Datta Devulapalli

Chemistry. *The Chemistry of Metal Oxyhydroxides and their 3D Porous Hybrid for the Capture, Transport and Degradation of Toxic Chemicals.*

Ryan P. Gasbarro

Biology. *Climate Change Effects on Cold-Water Coral Reefs and their Associated Communities.*

Md Shafiqul Islam

Chemistry. *Studying Cyclization Reactions to Explore Site-Selective N-Terminal Cysteine Conjugation, Peptide Stapling and Histone Deacetylase (HDAC) Substrates.*

Rose Kaplan-Kelly

Mathematics. *Right-Angled Links in Thickened Surfaces.*

Alexander Lucaci

Bioinformatics. *The Role of Complex Evolutionary Dynamics in Molecular Sequence Analysis.*

Carl E. Lundell

Chemistry. *Synthesis of Non-Toxic Double Base Propellant Burn Additives.*

Bijoya Mandal

Chemistry. *Understanding Aqueous/Mineral Oxide Interfaces using Ultrafast Nonlinear Vibrational Spectroscopy and Dynamics of IR Probe Molecules.*

Francisco McGee

Bioinformatics. *Generative AI & Bioinformatics: Insights & Explorations in the Protein Sequence-Structure-Function Continuum.*

Natalia Y. Molina Vazquez

Chemistry. *Probing Nanoscale Electrochemical Processes on Single Gold Nanoparticles Using Optical Microscopy.*

Joseph W. Monaghan

Chemistry. *Optical Approaches to Study Nanoscale Processes.*

Rebekah Mae Palmer

Mathematics. *Canonical quaternion algebra of the Whitehead Link Complement.*

Lu Pang

Computer and Information Science. *Intelligent Methods for Data Management: Prediction, Migration, and Generation.*

Gina Ginevra Pope

Geoscience. *Stormwater Management Practice Monitoring Using Long-Term Time Lapse Electrical Resistivity Tomography and Soil Sensors: Implications for Design, Maintenance, and Soil Moisture Monitoring.*

Pavana Pradeep Kumar

Computer and Information Science. *Mult-Party Collaboration in Edge Computing Systems.*

Molly Marilyn Joanna Schools

Biology. *Evolution, Systematics, Biogeography, and Conservation of Neotropical Forest Lizards.*

Saibal Singh

Chemistry. *Exploration and Mechanistic Study of Weakly Coordinating Anions under Thermal and Photochemical Conditions for Selective Transformations of C-C Multiple Bonds.*

Laura A. Sonnenberg

Chemistry. *Novel Adiponitrile-Based Cocrystalline Solid State Electrolytes for Lithium-Ion Batteries.*

Marija Stanojevic

Computer and Information Science. *Domain Adaptation Applications to Complex High-Dimensional Target Data.*

Mark Phillip Tingey

Biology. *The Application of Single-Point Edge-Excitation Sub-Diffraction Microscopy for the Study of Macromolecular Transport.*

Andrew Todd VanKuren

Biology. *Phagotrophic Phytoflagellates Across Ecosystems: Their Functional Role in the Southern Ocean and Mid-Atlantic Vernal Pools.*

Andres Vazquez-Lopez

Chemistry. *Hypervalent Iodine-Mediated Heterocyclic Group Transfer Reactions to Oxidative Olefin Difunctionalization.*

Mark James Walker

Biology. *Resource Competition and Soft Selection in *Sabatia Angularis**

Scott Witte

Chemistry. *Investigating How to Endonuclease MutL α is Activated and Signals in DNA Mismatch Repair.*

Siyu Wu

Chemistry. *3D Reconstruction of the Alloying Process of AuAg Nanoparticles by Small-Angle X-ray Scattering.*

Jordan Zehr

Bioinformatics. *Natural Selection Analyses of Tropism Shifts in Coronaviruses.*

DECEMBER 2022

Salsabil A. Abou-Hatab

Chemistry. *Uncovering the Radiative and Non-Radiative Decay Pathways of N-Cyanoindole Fluorescent Probes in Aqueous Solution.*

Hawra Ali Albukhaytan

Biology. *PurA Sensitizes Cells to Toxicity Induced by Oxidative Stress.*

Nima Asadi

Computer and Information Science. *Machine Learning Algorithms for Pattern Discovery in Spatio-Temporal Data with Application to Brain Imaging Analysis.*

Ashis Kumar Chanda

Computer and Information Science. *Novel Data Mining Algorithms for Analysis of Electronic Health Records.*

Shuo Jia

Physics. *Charge Symmetry Violation Quark Distributions via Precise Measurement of π^+/π^- Ratios in Semi-Inclusive Deep Inelastic Scattering.*

Aaron D. Kaplan

Physics. *Construction of First-Principles Density Functional Approximations and Their Applications to Materials.*

Mushir Ul Hasan Kolathingal Thodika

Chemistry. *Development and Benchmarking of Non-Hermitian*

Methods for Negative Ion Resonances.

Ruonan Li

Physics. *Measurement of the Generalized Polarizabilities of The Proton in Virtual Compton Scattering.*

Wenjie Liu

Computer and Information Science. *Optimizing Memory Systems for High Efficiency in Computing Clusters.*

Shiqi Ruan

Physics. *Improving the Accuracy of Density Functional Approximations: Self-Interaction Correction and Random Phase Approximation.*

Elizabeth Lonsdale Tucker

Biology. *Multi-Functional Foot Use While Running Across Complex Terrain.*

Heng Wang

Chemistry. *Developing P-Stereogenic Phosphine Ligand for Transition Metal Catalyzed Asymmetric Hydrogenation.*

Qilin Wei

Chemistry. *Synthesis and Optical Properties of Ultrafine Metal Nanoparticles on Dielectric Antenna Particles.*

AUGUST 2022

Phillip Todd Arndt

Physics. *High Resolution Spectroscopy Study of the Rubidium Dimer.*

Hexin Bai

Computer and Information Science. *Graph Neural Network and Its Applications.*

April L. Bialas

Chemistry. *From Excitons to Excimers: Understanding the Steady-State Absorption and Photoluminescence Features of Perylene Diimide Dyes.*

Benjamin Dongbin Choi

Mathematics. *One-Cusped Congruence Subgroups of $SO(d,1;Z)$.*

Shah Tanvir-Ur-Rahman Chowdhury

Physics. *Density Functional Theory: Van Der Waals Corrections, Symmetry-Sphericity and Machine Learning.*

Yubin Duan

Computer and Information Science. *Accelerating DNN Inference and Training in Distributed Systems.*

Rajpreet Kaur Gulati

Computer and Information Science. *Magnetic Induction Communication in Challenging Environments.*

Matthew Hurley

Chemistry. *Advancing Simulation Methods for Molecular Design and Drug Discovery.*

Nicholas Anthony Huron

Biology. *Building Frameworks for Understanding Invasions and Extinctions*

for Biodiversity Science.

Xiao Peng

Biology. *Nuclear Translocation of Gasdermin D (GSDMD) Sensitizes Chemotherapy Through Inhibiting PARP-1 in Colorectal Cancer.*

James M. Rosado

Mathematics. *Ultrastructural Neuronal Modeling of Calcium Dynamics Under Transcranial Magnetic Stimulation.*

Jeng-Yuan Tsai

Physics. *Symmetry-Enabled Discovery of Quantum Defects in Two-Dimensional Materials.*

Ruiyu Wang

Chemistry. *Understanding Aqueous Solutions at Alpha-Alumina Surfaces Using Molecular Dynamics Simulations.*

Tong Wu

Chemistry. *Influence of Environmental Factors on Molecular Transport Through Bacterial Membranes.*

JUNE 2022

Abrar Sulaiman Alrumayh

Computer and Information Science. *Improving the Privacy, Usability, and Context-Awareness of Smart Speakers.*

Taylor Marie Keller

Chemistry. *Synthesis of Coordination Complexes and the Use of X-Ray Diffraction Data Towards the Development of Refinement of Occupancy of Spherical Atoms (ROSA), A New Approach for the Determination of Partial Atomic Charges.*

Aniruddha Maiti

Computer and Information Science. *Spatial Regularization for Analysis of Text and Epidemiological Data.*

A Message from the Temple University Alumni Association

To the Class of 2023,

Congratulations!

We are excited to welcome you to the Temple University Alumni Association (TUAA). Owls are members of an unbreakable community, and we want you to know that as you step out into the world, you are not alone. There are over 360,000 fellow Owls worldwide excited to see you take flight.

Your time at Temple is what has made you into someone that is able to shape their own future, but as you prepare to leave the nest, we are also here to help. We encourage you to take advantage of the numerous benefits and resources available to you, post-graduation:

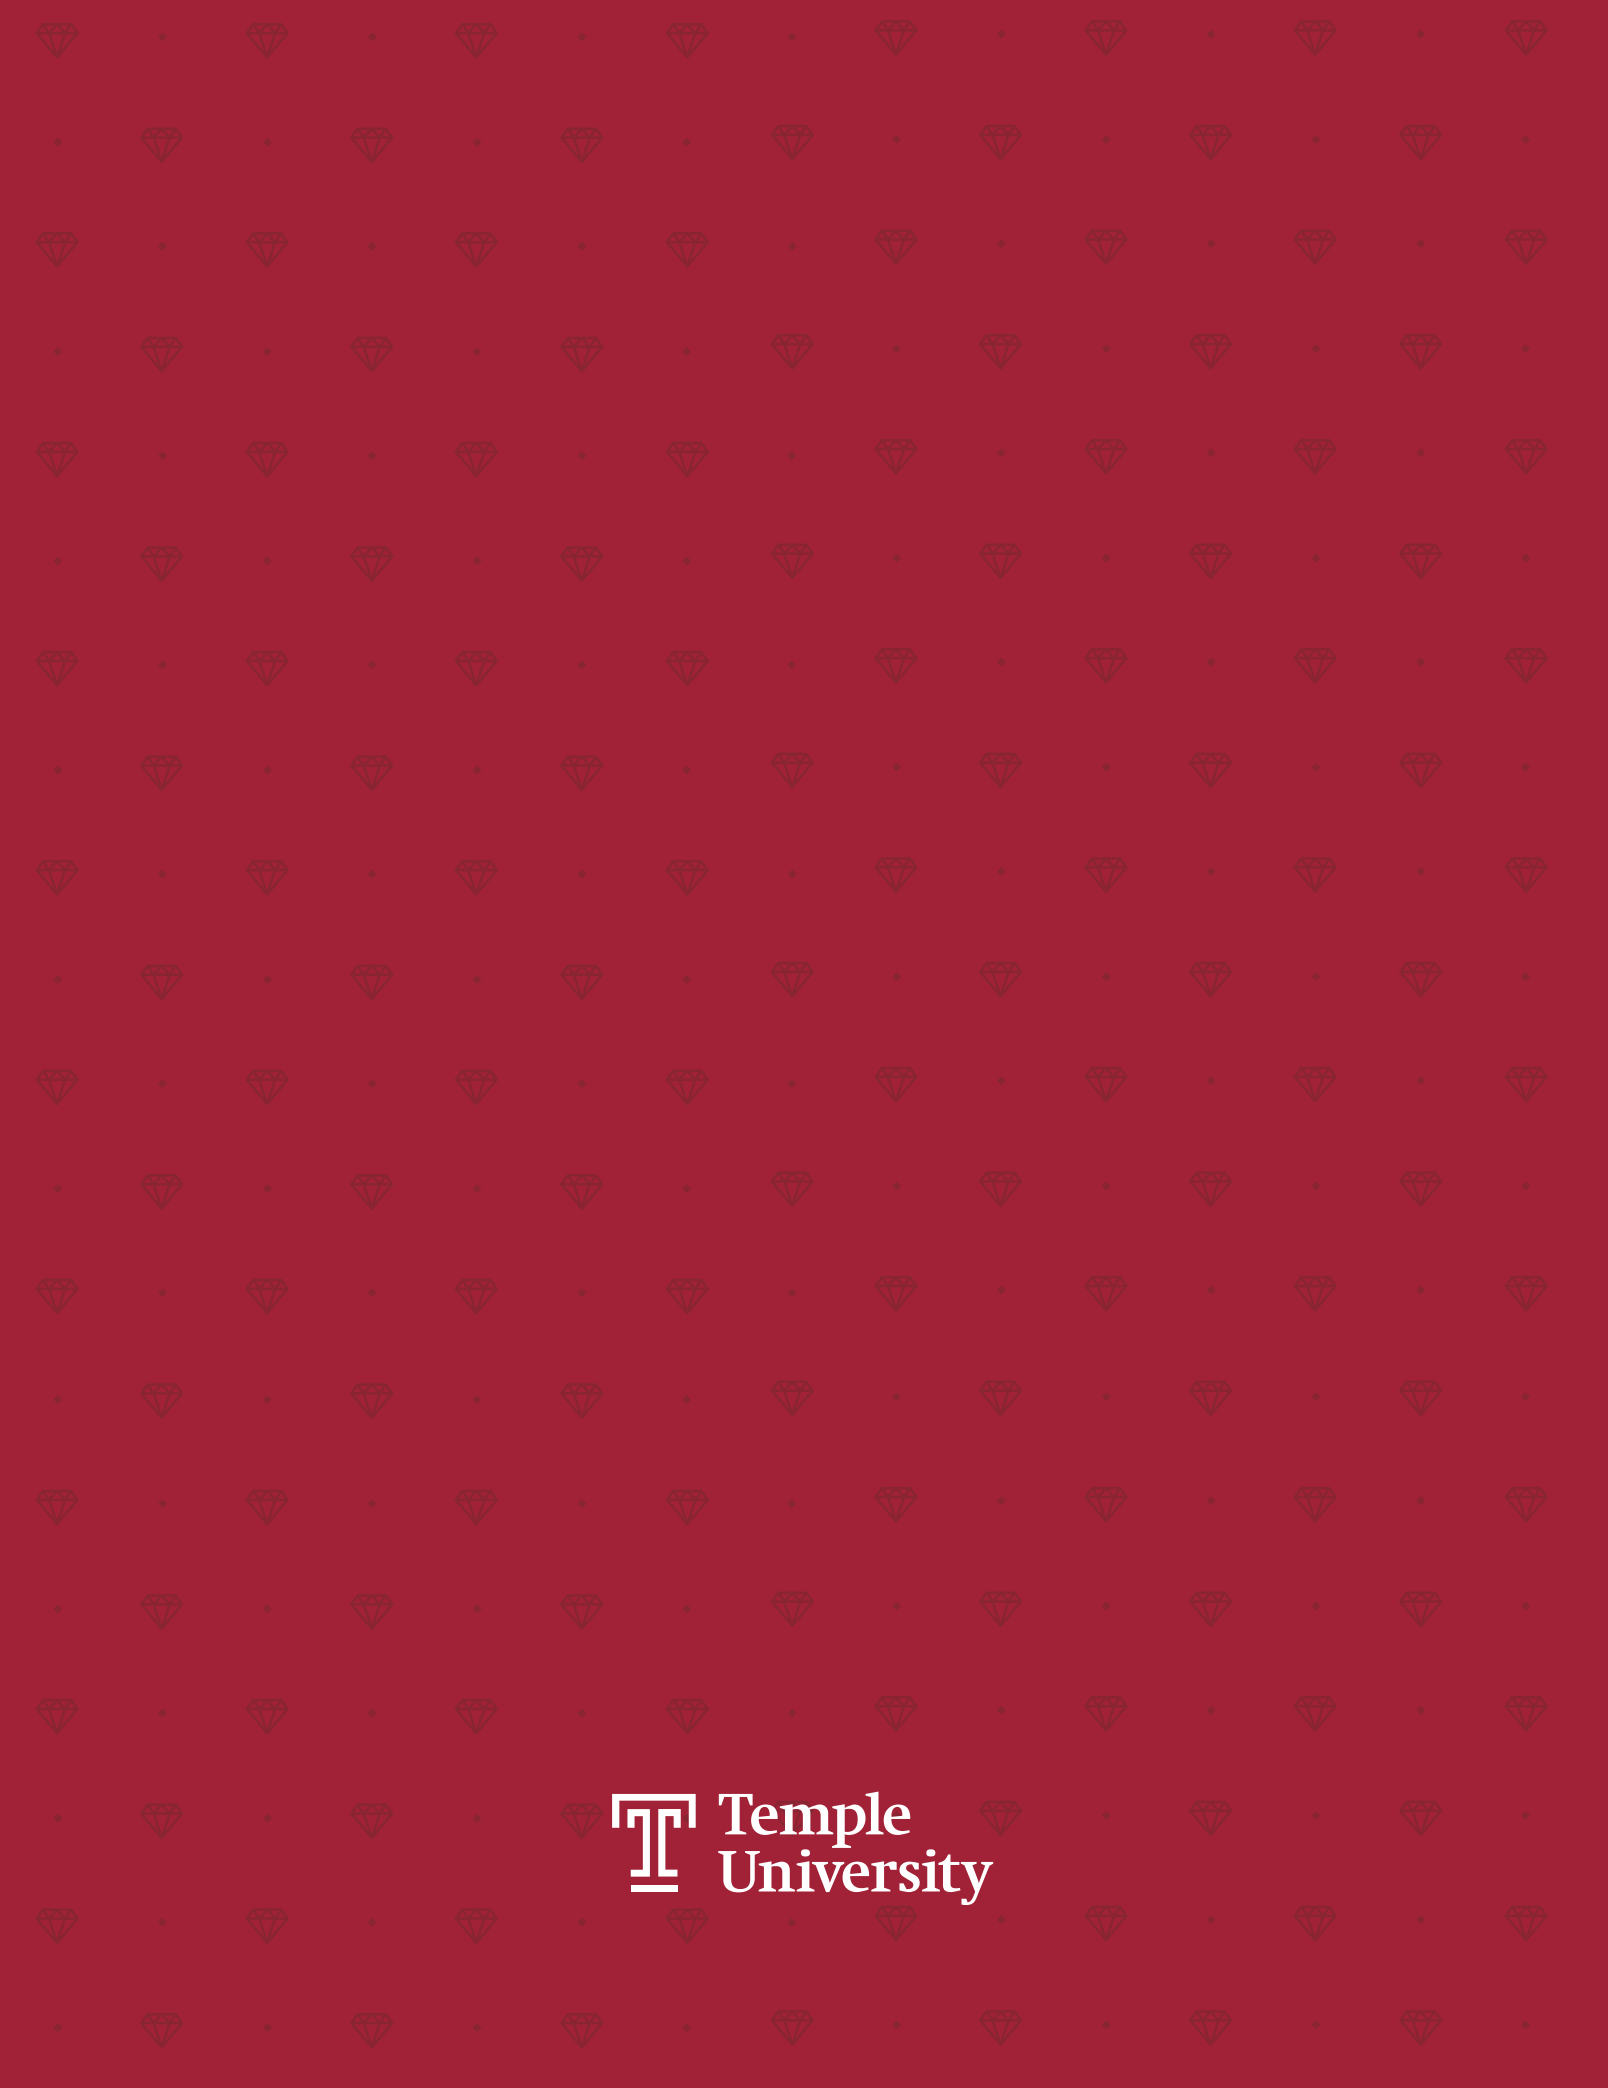

- **Temple Professional Network (TPN):** TPN is here to support your career growth, offering alumni career resources for any stage of your career. Find networking tools, optimize your resume, search for jobs, prep for interviews, and more.
- **Affinity networks:** Affinity networks are alumni groups convened around self-identified personal affinities, common interests, and shared university experiences. The Temple University Black Alumni Alliance (TUBAA) and Temple Women's Network (TWN) work to connect their respective constituents to one another and back to the university through events, community service, communication and philanthropy.
- **Regional network:** Owls are everywhere! There are Temple alumni across the country and across the globe for you to connect with through events and other channels.
- **Temple University Young Alumni:** Programs, events, and resources for alumni under 30 years old.
- **Schools and colleges:** Each school and college has its own Alumni Association and unique ways to engage its alumni.
- **Special events:** Join us for Homecoming, Temple Made Days, volunteer opportunities and more.

Visit alumni.temple.edu to learn more about all the resources, information, and engagement opportunities—both in person and online—we offer to connect and serve our alumni and university community.

You are a valued member of the Temple Made community and we wish you the very best of luck as you begin this next phase of your Temple journey.

Go Owls!
