News Notes

Minneapolis, Jan.---The University of Minnesota and all other educational institutions in the country will have to raise their sights on all estimates of the number of veterans of World War II who will be entering educational institutions, national educational authorities have informed officers of the university. Specific numbers that will enter any one institution must be estimated, but two factors are at work. Continuance of the draft for the time being at least, is increasing the total number of those who eventually will be eligible under the G.I. bill and Rehabilitation program; also the percentages of those eligible who express an intention of going to college is steadily rising. The overall figure of veterans has been raised once from 14,000,000 to 16,000,000 and some now believe it will reach 18,000,000.

\*\*\*\*\*

Seek Intensive  
Classroom Use

A special committee has been appointed at the University of Minnesota to survey classroom space available in view of the rapid increase in attendance that has become apparent. On top of increases in the regular civilian attendance, the veterans are increasing steadily the need for classroom space. Meanwhile, it is seen that new construction will be no solution for several years, as no plans can be laid until the next legislature acts, and construction will have to be accomplished after that. The university is, therefore, turning to a fuller and more efficient use of its present facilities for the time being. Greater numbers of late afternoon classes, classes at the noon hour, and possibly, evening use of classrooms by regular daytime classes are seen as possible constructive moves.

Lot Establishes  
Home Priority

Using an army helmet as a "goldfish bowl", President J. L. Morrill of

MTR  
N47  
8 AA-P

the University of Minnesota last week drew lots to establish priority of married veterans for the trailer living quarters which are beginning to arrive at the university. Order of priority was established for 314 married veterans, divided into four classes. Minnesota men with children will be fixed up first, then Minnesota married men without children. When these have been provided with quarters, outstate married veterans with children will be accommodated, then outstate married veterans without children. The trailers are not yet ready for occupancy but the order of preference in which they will be allotted when ready has now been fixed.

'U' Introduces  
Marriage Study

A marriage course, in which the factors leading to a successful marriage will be considered from a scientific point of view, has been created in the University of Minnesota's College of Science, Literature and the Arts in its department of general studies. The course will be offered to members of the freshman and sophomore classes rather than to advanced students on the theory that the younger students will be less likely to have made any commitments of their affections through engagements and will therefore be more likely to profit from what they learn. The course follows the lines of those already offered in several hundred American colleges and universities and is therefore an innovation only in that it has not been offered heretofore at the University of Minnesota.

V-12 Course is Extended

Navy V-12 programs at the University of Minnesota, except those in medicine and dentistry, will be continued until July 1, it has become known, following action by Congress in the closing days of its session to appropriate funds for that extension. Otherwise V-12 training, mostly in engineering at Minnesota, would have been concluded between February 15 and March 20. Meanwhile, however, numbers enrolled at Minnesota in V-12 will be reduced by graduation at the termination of each navy term.

ARMY, NAVY VETS  
RUSHING TO 'U'

Minneapolis, Jan.---Rapid demobilization of veterans and the fact that more of them are seeking a college education than had been anticipated were reasons given last week for the fact that the University of Minnesota leaped in a single bound from a wartime level of registration to practically the pre-war peak.

As winter quarter registration neared its end Dr. William S. Carlson, University of Minnesota director of admissions, estimated that final reports would show approximately 15,500 full-time men and women enrolled in the university. Of these, he said, approximately 14,630 will be civilian students and 900 students being taught on contract for the army and navy.

The 14,820 now reported are made up, he said, of 13,920 regularly enrolled, an increase of 68 percent over the number in college last year at this time, and the 900 contract military students. At the corresponding date last winter enrollment was 8299 civilians and perhaps 2,000 contract students.

Biggest gains over a year ago are 287 percent in the Institute of Technology, 229 percent in the Law School, 219 percent in the School of Business Administration, 128 percent in Pharmacy, 80 percent in the General College, 73 percent in the College of Science, Literature and the Arts and 58 percent in Agriculture, Forestry and Home Economics.

In terms of actual students the College of Science, Literature and the Arts is up 2193, Institute of Technology, 1639, General College, 401, and in the entire university a gain of 5621 students above the winter quarter of 1945. Gain over the fall quarter just past is 37 percent, Dr. Carlson said.

Will Confer On  
Chronic Drinking

State bar, police and probation officials, officers of county and state medical societies, and of the Alano Society (Alcoholics Anonymous) are among the many who will take part in an Institute on Chronic Alcoholism that will be held in the University of Minnesota's Center for Continuation Study February 21, 22 and 23. J. M. Nolte, general extension director, is in charge of arrangements. Detailed program has not yet been arranged.

Top Physicist Back at 'U'

Professor John T. Tate, distinguished University of Minnesota physicist and former dean of the College of Science, Literature and the Arts, has returned from more than three years of wartime service and resumed his teaching in the department of physics.

Dr. Tate has been doing investigations in physics for the Office of Scientific Research and Development, which oversaw most of the war related scientific investigation of the recent period.

While on leave he requested that when he returned he be relieved of the duties of dean of the college. The board of regents thereupon elected him as research professor of physics.

Morrill to Address Editors

Dr. J. L. Morrill, president of the University of Minnesota, who has done much toward making friends for the university since he came to that position last July 1, will be principal speaker at the annual banquet of the Minnesota Editorial Association during its convention in St. Paul this week. The dinner will be at 6:30 p.m. Friday, January 18, in the Lowry hotel. Dr. Morrill has appeared at one or two district gatherings but this will be his first appearance before the membership of the association as a whole.

INAUGURATION  
OF PRES. MORRILL  
TO BE IN APRIL

Minneapolis, January----April 23, 24 and 25 have been set by the University of Minnesota as dates for the formal inaugural ceremonies for Dr. James Lewis Morrill, new president, which will be attended by distinguished educators from this country, Canada and other nations.

Preliminary announcement of plans was made by Dean Henry Schmitz, College of Agriculture, Forestry and Home Economics, who is serving as chairman of the inaugural committee in the absence of Dean Theodore C. Blegen, who is lecturing in California.

The last full-form inauguration of a University of Minnesota president took place May 13 and 14, 1921, when the late President Lotus Delta Coffman, fifth president, was inducted. Dr. Morrill is the eighth president of Minnesota.

"The crisis of mankind, or the urgent educational tasks of the university in our time" will be the subject of the several meetings, which will consist of educational conferences Tuesday and Wednesday and the actual inauguration Thursday, the 25th, in Northrop Memorial Auditorium. Guests and faculty will attend the inauguration in academic dress and it will provide the most colorful affair in the university's history.

"It is the hope of the committee that the most important and significant educational meetings ever held in the north central area may be arranged in connection with the inauguration," Dr. Schmitz said in a letter to the faculty, advising them of progress in the plans. "The committee on program is arranging to get as speakers some of the outstanding scholars of the world."

University  
Enrollment at  
All Time High

While registration was still going on in at least two colleges, the University of Minnesota last week reached an enrollment of 14,870 regular and approximately 900 army and navy students for a grand total slightly greater than had ever been attending the institution before.

Meanwhile word came from Washington that Minnesota's 5,500 registration of war veterans was the largest in the nation. Officials pointed out, however, that many colleges are on the semester system rather than the quarter basis, meaning that they will not be opened to the incoming flood of mid-winter students until some time in February. Minnesota has already received this influx.

Definitely at an all-time high was the College of Science, Literature and the Arts, with an enrollment of 5582 students, and the Institute of Technology with 2293. The Law School jumped in enrollment from 67 to 221, up 230 percent. Overall gain for the entire institution was 75 percent over the same time a year ago and 41 percent over last fall. Of 5494 veterans enrolled 4895 were under the G.I. bill and 509 under the rehabilitation program for the war disabled.

May Trace  
Feeble-minded  
To New Cause

A certain amount of feeble-mindedness not now explained may be due to an incompatibility of blood types between the father and the mother, according to a report by the Dight Foundation of the University of Minnesota. If what is called the "rh" factor in the blood is positive in the father and negative in the mother, this danger, not yet finally accepted by science, may exist, says Dr. Clarence P. Oliver of the foundation. It had already been shown and accepted that a certain amount of anemia, jaundice and still-birth of infants results from this incompatibility. The type is named "rh" after the rhesus monkey, a primate, like man, which was used in early experiments. Dr. Oliver concludes from existing evidence that this is an added reason why young people contemplating marriage and desiring perfect children, should have their blood tested and typed before marrying.

State Bankers

To Meet at

University

Minneapolis, Jan.----Bankers, members of the University of Minnesota faculty, agricultural advisers and other representatives of education, business and finance will take part in the Seventh Annual Bankers Conference at the University of Minnesota, February 11 through 13. Meetings will be in the Center for Continuation Study.

Trend of urban and rural land values will hold a prominent place in the discussions on the first day when Thomas S. Maple, Minneapolis mortgage banker, will speak on urban values while farm land values will be considered by Austin A. Dowell, professor of agricultural economics at University Farm.

Consumer credit, which promises to return to an important part in the domestic economy now that the war is over, will be discussed the same day by Walter W. French, deputy manager of the American Bankers association. Dr. Arthur R. Upgren professor of economics in the University of Minnesota and associate editorial editor of the Minneapolis Star-Journal will speak on international trade.

Postwar prospects for agriculture will be discussed Tuesday by O. B. Jesness, agricultural economist at the University of Minnesota and member of the advisory board of the Land Grant College association. At these meetings also, bank deposits, government debt and interest rates will be the subject of a symposium by G. Sydney Houston, vice president of the First Service corporation, St. Paul, John K. Langum, vice president of the Federal Reserve bank of Chicago and Paul W. McCracken, research director of the Minneapolis Federal Reserve bank.

Two speakers will discuss service to veterans under the G.I. bill of rights at the closing sessions Wednesday, when also the afternoon will be devoted to a seminar on income tax laws and procedures, headed by Professor Henry Rottschaefer of the University of Minnesota Law School.

Says Programs  
For Fitness  
Not Supported

Dr. Carl L. Nordly, professor of physical education and athletics at the University of Minnesota, declares this state needs a comprehensive state and community organization to fill the unmet needs of children and adults in respect to physical fitness. The Minnesota educator has gained national recognition for his work in the field of community recreation.

Dr. Nordly participated in the recent meeting of the College Physical Education Association in St. Louis. He was particularly impressed by the interest manifested by the St. Louis Junior Chamber of Commerce in promoting physical fitness programs.

"Junior Chambers of Commerce throughout the nation are setting a splendid example in assisting expansion of programs of health, physical education, and community recreation," he said.

"Other organizations such as the American Legion and National Congress of Parents and Teachers have similar objectives but their efforts, alone, are inadequate. There is still a widespread unmet need among children, youths, and adults because of inadequate funds to pay for leadership, facilities, and equipment.

"We must recognize the fact that institutes, conferences, and discussions involving only professional groups are inadequate. We still have a tremendous job to do in cultivating enthusiasm, and rallying the support of state and community," Nordly declared.

Old Society Gives to 'U'

The American Philosophical Society, oldest scientific and cultural body in the United States, which was founded by Benjamin Franklin, has made a gift of \$1,000. to the University of Minnesota for support of research work in astronomy by Dr. Willem J. Luyten. The university is expected to match the grant for a period of one year.

Rusts Change to  
Meet Changes in  
Wheat Varieties

Minneapolis, Feb.----No matter what type of wheat one plants, it seems that eventually a new type of rust develops to attack and in varying degrees damage it, Dr. E. C. Stakman, famous plant pathologist of the University of Minnesota, told a gathering of scientists on the university campus.

Every change in crops and every change in crop varieties grown creates its own dangers, he said, and while a new variety may temporarily prove resistant to certain fungus forms, the fungi themselves change and adapt themselves to the new "hosts", he pointed out.

"New plant diseases may become old and old ones may become new because of changes in cropping systems", Stakman said. "The expansion of the corn belt far northward in the Upper Mississippi basin through the breeding of early varieties, is an agricultural epic of progress, but it has increased the danger of head blight or scab on wheat and barley because the scab fungus can multiply rapidly on corn and live through the winter abundantly on corn stalks and stubble. Soybeans brought with them disease problems unknown in the United States before this very useful plant immigrant became established. As new varieties of crop plants have replaced poorer ones, the relative importance of diseases often has changed, also."

Dr. Stakman said that about 1,000 collections of rusted wheat are examined yearly by his department, which requires planting, inoculating and incubating about half a million plants, on which notes are taken. Fungus races which are in much evidence one year will be replaced another year by other races, with the result that predictions of the rust-resistant qualities of certain varieties are extremely hard to make.

Dr. Stakman for many years has made an annual spring tour to the southwest and Mexico to study the types of rust most in evidence there, because these are likely to be transported by high winds into the wheat producing regions of this area.

## 'U' Attendance

### Reaches New Top

Final registration figures for the University of Minnesota's winter quarter, announced by Dr. William S. Carlson, dean of admissions, show that two enrollment records were established. One was an increase of 77 percent in enrollment of regular full-time students over the corresponding period of the year before. This record probably will never be beaten, as the higher base established by the greater number of students will decrease the percentage gain in subsequent statistics.

The other record occurred when the university, for the first time, recorded more than 16,000 students in residence at a given time.

Overall collegiate enrollment was 16,079 of whom 15,440 were regular college students and 639 were in "contract courses" being taught for the army and navy. Examples of these students are V-12 men in engineering courses under the navy's program and army men in the Japanese language and area courses. The latter group was somewhat smaller than a year ago, so that while the percentage gain in regular students was 77 percent the gain in the grand total was 66 percent.

With 5625 students the College of Science, Literature and the Arts fell only a little short of being twice as large as it was a year ago while the Institute of Technology, with 2265 students, came within a few of having four times as many enrolled as were in its courses in January 1945. Business administration, with 453 students, had slightly over three times as many as it had had the year before. The Graduate School gained 625 students to bring its total to 1523 for an increase of 70 percent. Agriculture, Forestry and Home Economics, now with 1069 students, rose 63 percent and the College of Education, with 994, rose 40 percent. The General College, rising in enrollment from 528 to 918, had an increase of 74 percent.

VETERANS' NEEDS  
URGENT PROBLEM  
IN DEMOCRACY

Minneapolis, February----The crisis in veterans education, widely manifested by the action of many colleges in restricting admissions, is a crisis in American democracy, President J. L. Morrill of the University of Minnesota said in an address on "General Education and the College of the Future."

"Realistic response to growing social needs is the historical explanation of the size and greatness of state universities in America," he said. "At the moment the flood tide of a new social need is awash at the gates of the campus in the demand of veterans for higher education. Will and can the states, with the indispensable larger aid of the federal government, enable the state universities to meet this need?"

"Housing is only half the bottle neck," Dr. Morrill went on. "Shortages of staff and salaries, space and facilities, within another six months will be equally acute. Even now the great state universities of the middle west, the largest strongholds of democratic education, are being driven to close their doors except to veterans of their own states, for lack of housing, finance and facilities. This is both unfair to the veterans and a denial of the generous intention of the people expressed in the G I Bill of rights and the Rehabilitation program.

"The pressure of veterans for vocational and professional education," said President Morrill, "threatens dangerously so to overwhelm the state universities as to distract their funds and faculties from upper level scholarship and research. There is frankly the danger that commendable public, patriotic appreciation of the veterans' short-range needs may have that political effect in Congress and state legislatures, with disastrous results.

"The veterans' crisis", he reiterated, "is a crisis in American democracy. It is a test of our faith in education as the surest safeguard not only of individual opportunity but of democracy itself."

Demand Grows  
For Women Leaders  
In Recreation

The increasing interest of communities, churches, schools, civic organizations, summer camps, and hospitals in recreational activities which women can direct is reaching such proportions that the department of physical education for women at the University of Minnesota is being deluged with requests for its graduates.

"Even with the emergency play-leader's course we inaugurated early in the war we cannot meet the demand," said Gertrude M. Baker, director of the department.

"When it became evident several years ago that physical education graduates would be too few to fill the needs of these various groups, we instituted the Play Leader's Laboratory as an extension course," Miss Baker said.

"From 75 to 85 students each year have received special diplomas following completion of this course, still we are unable to fill the requests."

The Play Leader's Laboratory course is a unique innovation of the University of Minnesota. Its members are students from many different colleges at the University who are interested in recreational leadership. It is a one-quarter course consisting of 18 hours of class and laboratory work, all at night. No credit is given. The "graduates" get a typewritten "diploma" signed by the instructors.

The participating instructors are Hilma Berglund, art education; Hazel Nohavec, music education; Gertrude Vaile of the sociology department; and Alice Dietz of the Minneapolis Park Board. Miss Berglund conducts sections on the crafts. Miss Nohavec instructs in group singing. Miss Vaile presents the group work instruction.

This course has been so successful that, in many cases, reports Miss Baker, students have been offered attractive positions before completing class work.

Will Discuss  
Cancer Knowledge

"Cancer education" looking to familiarizing the public with the deadliness of cancer, its prevalence and increase, the importance of early diagnosis and treatment and such other facts that it can be cured if discovered early enough and properly treated, will be the subject of an institute February 14, 15 and 16 at the Continuation Center of the University of Minnesota.

The Minnesota Cancer Society, of which the executive secretary is Mrs. S. E. Linsley, will cooperate with the university in staging this annual institute. Dr. William A. O'Brien of the University of Minnesota, president of the state society, announced the institute also will cover such topics as duties of members of the Cancer Field Army, reports on researches related to cancer, and the annual campaign of the Minnesota Cancer Society.

Instrumentalists  
Play in Concert

When the University of Minnesota Concert Orchestra journeyed to New Ulm Tuesday, February 12, Lincoln's birthday, to give afternoon and evening concerts in the high school auditorium the following students were among those who played: Juliemarie Andreen, COKATO, cello; James Bridges, MOORHEAD, cello; Francis Clarfield, DULUTH, flute; John Daugherty, APPLETON, trumpet; Merlis East, DULUTH, violin; Jeul Eide, CROOKSTON, viola; Mary Louise Hadler, INTERNATIONAL FALLS, violin; Gloria Johnston, VIRGINIA, bassoon; Gordon Kerns, ALEXANDRIA, string bass; Carol Kilstofte, WINONA, violin; Virginia Montgomery, FARIBAULT, flute; Charles Morrell, VIRGINIA, bass; Elaine J. Olson, WINDOM, violin; Tom Nee, ALBERT LEA, French horn; Orville Olson, ST. CLOUD, clarinet; Dorothy Ostman, MOORHEAD, Bassoon; Esther Pankow, WELLS, violin; Dora Partanen, VIRGINIA, violin; Helen Robinson, MOORHEAD, violin; Merle Stone, CROOKSTON, violin; Shirley Stone, CROOKSTON, viola; Eileen Weyer, BLUE EARTH, violin; Yolanda Vecchi, HIBBING, violin; Louise Yoerg, HOPKINS, viola, and Sara Zien, DULUTH, violin. The orchestra was conducted at both concerts by Professor Paul M. Oberg, chairman of the department of music.

'U' RELEASES  
YEARLY REPORT  
ON FINANCES

Minneapolis, Feb.----University of Minnesota's finances for the year ending June 30, 1945 were reported this week by William T. Middlebrook, vice-president for business administration who issued a balance sheet showing income of \$17,735,806.23 balanced against "expenditures, transfers and adjustments" of \$16,727,151.51 plus a reserve of \$1,000,000. which the legislature specified the university should retain for use during the present fiscal year. There remained an unencumbered balance at year's end of \$8,634.72.

Principal item of outgo was that of \$7,653,366.39 for instruction and research, of which \$1,027,348.59 was spent on war training programs of the armed forces. This overall item included also instruction and research in University Hospitals, the summer session, the General Extension Division and Agricultural Extension and the schools and experiment stations for agriculture.

Physical plant operations on all campuses cost \$928,868.70 and physical plant extensions, \$675,558.49.

University administration, at \$348,230.95, fell just under two percent of the total budget.

Largest items of outlay, next to instruction and research, were for self-supporting service enterprises and revolving funds, totalling \$3,390,438.34, and expenditures for trust fund purposes of \$2,208,632.54. The service enterprises are such things as dormitories, cafeterias, printing department, army and navy housing and feeding, and the like. General university costs were given as \$710,331.55 and the expenses of intercollegiate athletics as \$201,185.94. This includes outlay on intercollegiate athletics and that part of the cost of physical education defrayed from athletic receipts. Among "transfers and adjustments" was a sum of \$40,000. for redemption of certificates on Coffman Memorial Union; \$45,000. depreciation charge on account of downtown property owned by the university, and, among other items, an increase of \$1,443,652.90 in outstanding obligations and allotments.

Largest single source of income for the University of Minnesota was the state, which provided \$4,817,400., or just over 27 percent of the total. State payments to the university were made up of \$3,890,000. as the legislative maintenance appropriation for the year; \$254,268.71 as the yield of the 23/100 annual millage tax; \$245,000. as the state's share for care of indigent patients in University of Minnesota Hospitals, and \$428,132.12 in appropriations to finance the various researches and projects for which the legislature at each session makes special appropriations.

Another 12 percent of the institution's income came from the federal government, which provided \$752,632.29 under various acts calling for federal aid to agricultural and engineering education and \$1,308,490.04 for instruction and research in connection with the armed forces and the war effort in science.

The permanent university fund, made up of endowments received from severance of natural resources on university lands and through the occupational tax yielded income of \$463,220.81 and the so-called swamp land fund, also a land grant asset, yielded \$74,147.13.

The four remaining sources of University of Minnesota income were: from student fees and other receipts, including counties' share of cost of indigent patients in the hospitals, \$3,215,360.19; income of self-supporting service enterprises and revolving funds, \$3,910,625.12; income from trust funds, including gifts and additions thereto, \$2,918,881.79; income from intercollegiate athletics, \$264,015.69. The free balance carried into the year as of July 1, 1944 had been \$11,032.34.

Necessity of maintaining certain reserves for expenditures not possible during wartime, such as the reconditioning of buildings, a reserve for the payment of salaries of faculty members returning unexpectedly from war service and the like, explained, according to Mr. Middlebrook, the existence of the \$1,000,000. special fund which the 1945 legislature specified should be carried and applied to operating costs in the current fiscal year, 1945-'46.

'U' To Explore  
Basic Factors  
In Home Crisis

Minneapolis, February----Using as its instrument a series of conferences which will bring in typical people from every field of endeavor involved in the construction of homes, the University of Minnesota will make an effort to get at the basic reasons and the truly inward obstacles that have led the nation to the overall housing crisis that now confronts it.

Julius M. Nolte, director of the General Extension Division, said the first conference will be held March 7, 8 and 9 in the Center for Continuation Study. Dates of the other two have not been set, but they will follow at normal intervals.

"We are not having these conferences to examine temporary relief measures through pre-fabricated structures, trailers or rush jobs," Nolte said.

"We want to canvass the entire housing problem with people who know about all of its various aspects and thus determine how the nation has come out where it has, or rather, has failed to come out."

Contractors, real estate men, home financing people, men from such fields as plumbing, carpentering, lumber production, lumber fabrication, such as sash and door concerns, and people from all branches of material production will be invited. Also asked to take part will be persons from the more theoretical side, economists, city planners, research specialists in housing and men from federal and state agencies.

"We shall explore the subject beyond the temporary", Nolte said.

Some of the less tangible factors in housing such as the development and protection of desirable neighborhoods, adjustment of the home to the neighborhood, relation of land cost to total home cost and the like, will be explored in the second conference. The third will be devoted to a consideration of the farm dwelling. It will probably be held at University Farm.

'U' Limits  
Out-State Entries

Enrollment of students from outside the state of Minnesota will be on a strictly limited basis this spring at the University of Minnesota. Limitation applies to all but the Graduate School.

Following consultation with the Administrative Committee of the University Senate, President J. L. Morrill issued a statement of policy to govern limitation of student admissions during the spring quarter of this year and on an experimental basis.

This action was in line with authority granted him for doing so at a meeting of the Board of Regents February 15. The board also requested that he proceed to formulate such a policy.

Dr. Morrill's statement said:

"No non-resident undergraduate college student will be accepted for admission to the University of Minnesota for the spring quarter, 1946, with the following provisos:

" 1. That students previously enrolled at the university during any regular academic year in other than War Training courses, and students who are sons or daughters of former students of the university will be admitted.

" 2. That on recommendation of the dean of the college involved and with the approval of the president, students, especially veterans, may be admitted when there are special and reciprocal educational reasons for doing so, with the understanding that preference will be given to students living in the area which is economically and educationally related to Minnesota."

President Morrill pointed out that examination of applications for admission probably would show certain cases in which it would be wise to make carefully chosen exceptions and said that the policy to be evolved in making these exceptions will be one of the experimental values derived from administration of the program.

Those Planning  
To Enter 'U'  
Should Act Now

Minneapolis, March----The large number of new students, especially veterans, who are known to be planning to enter the University of Minnesota at the opening of the spring quarter were appealed to this week to complete all preliminaries of admission at once. Purpose of the appeal is to avoid the crush that took place at the opening of the winter quarter when university enrollment leaped from around 11,000 to over 16,000.

"Students should complete the formalities of admission at once and can do so by mail, after which the actual registration in courses, physical exams and the like can be taken care of with ease on the three days of formal registration, March 28, 29 and 30," said Dr. William S. Carlson, dean of admissions. "Many of the students of whom I am speaking have written in for the necessary forms and have these in their possession," he said. "If they will complete them and return them, either in person or by mail, there will be no problem at the opening of the quarter."

Dean Carlson noted that the number of veterans who have told the Bureau of Veterans Affairs they plan to enter the university is very much larger than the number who have taken the matter up in any way with the office of admissions.

The appeal is made only to students not now in the university, as other procedures govern registration of students currently enrolled. It is made, also, only to Minnesota students, as there are restrictions on admission of students from outside the state.

Dean Carlson went on to state that recent action of the university in limiting admissions applies only to students from outside Minnesota and need not concern men and women whose legal domicile is Minnesota. Neither is admission to the Graduate School affected as the limitation applies only to undergraduates.

Schoolmen's Week  
Set for Mid-April

A late Easter this year throws the spring vacation of the public schools to the week of April 14-20, with the result that Schoolmen's Week, the annual, big get-together of Minnesota school people at the University of Minnesota, will be conducted over the four days, April 15-18. Plans for the activities of the week are now approximately complete, Dean Wesley E. Peik, stated.

School executives, including superintendents, principals, supervisors of instruction and the like, subject groups, such as teachers of mathematics or English, and many educational organizations, among these the Minnesota Council of School Executives, will be among the units that will take part in Schoolmen's Week.

Visiting speakers for the yearly short course for superintendents and principals will be Dr. Harold Benjamin, formerly at Minnesota, now of the United States Office of Education; Dr. Paul Mort, distinguished educational authority of Ohio State University; Dr. Hollis L. Caswell of Columbia University and Dr. Paul Leonard of San Francisco State Teachers College.

Helps Towns Book Entertainers

Clifford W. Menz, singer and concert manager, a graduate of the University of Minnesota in the class of 1933, has joined the university's department of concerts and lectures as community program adviser. He will direct the work of supplying speakers and musical attractions to Minnesota cities and towns outside the twin cities and helping them manage concert and lecture courses. Menz was widely known for his tenor singing while a student and has since had a professional career in New York. Since 1940 he has also been in concert management. His plans call for furthering the work of booking throughout Minnesota entertainers who are engaged by the university.

Mothers Day

Set on Campus

For May 11th

Minneapolis, March----One of the year's most attractive events, Mothers Day, will be reestablished at the University of Minnesota this spring and mothers of all students will be invited to attend and take part in the affair on Saturday, May 11.

Before wartime transportation and food service problem led to the temporary abandonment of Mothers Day, as many as 2000 mothers visited the campus some years and up to 1200 were served at the Mothers Day dinner in Coffman Memorial Union.

All the usual events of former Mothers Days will be included in the program this spring according to E. B. Pierce, chairman of the committee on university functions, which will direct the event.

Mothers will register upon arrival, hundreds of them will be entertained at luncheons by sororities and other social organizations and in the afternoon they will be guests at a musical event in Northrop Memorial Auditorium.

The Mothers Day dinner in the ballroom of Coffman Memorial Union will be the day's principal event. Speakers will be a representative of the mothers group, the president of the All-University Student Council, soon to be elected, and President J. L. Morrill.

Coming as it does at a time in the spring when the campus is at its most beautiful and the weather often at its best, Mothers Day has been a favorite time for the mothers of students to visit the campus and see how their sons and daughters "live and learn". Reestablishment of the day should effectively increase the understanding of parents for the university and strengthen the bond between them and the institution, President Morrill believes.

F.N.5

Special Release on  
University of Minnesota Inauguration..

Minn. Hist. Soc.  
MAR 15 1946

Dr. James Lewis Morrill will be inaugurated eighth president of the University of Minnesota in ceremonies on the campus April 23, 24 and 25.

Outstanding figures in American educational, cultural and religious life will be speakers at two days of educational conferences that will precede the actual inauguration Thursday, April 25 at 11 a.m.

"The crisis of mankind: The urgent, educational tasks of the university in our time" will be the overall theme of the conferences.

Among the speakers will be President James B. Conant of Harvard, President Edmund Ezra Day of Cornell, President George B. Stoddard of the University of Illinois, Bishop G. Bromley Oxnam, president of the Federal Council of Churches of Christ in America, United States Senator Wayne L. Morse of Oregon, Dr. Harlow Shapley, director of the Harvard Observatory, President George N. Shuster of Hunter College, Gov. Edward J. Thye of Minnesota, Louis S. Headley, St. Paul banker, Fred B. Snyder, chairman of the University of Minnesota Board of Regents and, at the inaugural, President Morrill. President Day will be the visiting inaugural speaker.

Before coming to Minnesota last July, Dr. Morrill was president of the University of Wyoming and before that had been vice-president and alumni secretary of Ohio State University.

'U' HEAD NAMES

BASES OF PEACE

Minneapolis, March---There must be a "concurrence" of three basic conditions if we are to have "even a reasonably satisfactory peace", President Howard L. Bevis of Ohio State University told 530 University of Minnesota graduates at commencement exercises ending the winter quarter.

These are, in effect, reasonable physical well-being, an economic philosophy of plenty, which, said he, we have not yet really acquired, and a moral basis of peace based on our idea rather than the totalitarian idea, our idea being "whatsoever ye would that men should do to you, do ye even so unto them."

"Satisfaction of our material requirements centers in the powers of science", said Dr. Bevis. "Science is our modern frontier. After each preceding war a western frontier provided recovery. This time the frontier is the laboratory."

He stated two items concerning our economic philosophy. "We must really acquire the philosophy of plenty. For longer than we like to think we have acted as if we believed we could increase shares by limiting the whole. We know that we can't."

"Also," said he, "I stress the philosophy of individual incentive and enterprise. I shall not elaborate my belief, though I have it, that the large pot will only be filled by individual effort. And such effort must be motivated by individual incentive. To effect large production by collective motivation requires war or the threat of it. All dictatorships attest this fact."

Totalitarian thinking, said he, rested on the theory that "good" is nonsense. "Our idea," he said, "rests upon the principle that however great the disparity of individual qualities there is an ultimate sovereignty of individual life; that in his right to live and to control the events of his own life, each person is the equal of every other. From this sovereignty arises the dignity of human personality, a dignity surrounding the small as well as the great. This principle supports the law for which we fought the war--'Whatsoever ye would that men should do to you, do ye even so unto them.' "

'U' Offers  
Free Service  
To Communities

A wholly new service available to municipalities and boards of education has been created by the University of Minnesota through appointment of an expert community adviser on community recreation programs. He will work as a member of the department of physical education and athletics, and his services will be provided free of charge to communities seeking advice on such points in a recreation program as general organization, administration, leadership, facilities, financing and the like.

In announcing the new service, Frank McCormick, department director, called attention to the fact that Minnesota has in his department the only four-year curriculum for the training of recreation leaders in the United States. Professor Edwin Haislet directs this program.

Gerald B. Fitzgerald, a graduate of Notre Dame university with a graduate degree from the University of Minnesota, has been named recreation consultant to fill this position. He has had wide experience in recreation, starting with service as summer playground director in St. Paul in 1928. He has taught in several colleges and universities including the leadership training program at the University of Minnesota. During the war he was for four years a recreation director with the USO.

Cooperative Votes Fellowships

Two annual fellowships of \$1,000. each to be bestowed on University of Minnesota graduate students for study particularly in agricultural and consumer economics have been created by the Midland Cooperative Wholesale, headquarters of which are in Minneapolis. In a letter to the Board of Regents, A.J. Smaby, general manager, said: "The whole cooperative movement will gain by the enrichment and strengthening of leadership which we hope these scholarships will develop. We look forward to this new relationship with the University of Minnesota and sincerely hope that this effort will reflect to the public interest of the entire area.

Dean Richard L. Kozelka of the School of Business Administration, in which the work of these students will center, said "The two graduate fellowships awarded by the Midland Cooperative Wholesale are evidence of its alertness in two serious postwar economic problems, the need for sound management and the need for training young people for the junior executive ranks. The enthusiasm of the cooperative movement must be coupled with the best principles of business organization and efficient management if it is to make its maximum contribution to economic and social welfare. We are glad to join with Midland in creating these educational opportunities each year for two able young people who might otherwise fall short of the fullest development of their talents. We hope that the generosity of Midland will be more than repaid by these additions to the ranks of cooperative management."

Report Advises  
How to Better  
School Teaching

Minneapolis, April----A study of the school teachers in a typical Minnesota community that has significance for other similar and smaller places, just released by the University of Minnesota's committee on the community basis for postwar planning, is "The teaching Staff and postwar education in Red Wing."

Written by Dean Wesley E. Peik of the university's College of Education, it is one in a series of Red Wing studies of which three have appeared. Issued at the same time as the present study of teachers are two others, "Red Wing churches during the war" and "Art in Red Wing", the latter by Laurence Schmeckebier, professor of fine arts at Minnesota.

The Red Wing study of school personnel strongly emphasizes that direct steps must be taken to get and to hold better teachers in such a school system as Red Wing's. Annual salary increases of from \$75. to \$100. a year for the first five years to a beginning teacher are recommended. Teachers in the elementary schools should have a college degree and those in the high school a master's degree, with an appropriate salary differential, says Dean Peik.

He strongly urges that the community "accept" its teachers and see to it that they have a satisfactory social and personal life if they are to be held in their positions.

Employment of outstanding married teachers should be continued if they can make satisfactory arrangements for help at home, says the report.

A policy is recommended of "employing the best available candidates for every position without either discriminating against or favoring hometown residents".

Among other recommendations are employment of additional supervisory and guidance staff and of an assistant high school principal to devote time to supervision of instruction and curriculum development.

Increase in the number of men on the high school staff is urged.

University

Summer School

Plans Told

Because most of its veteran students, who at present make up over a third of total enrollment, are expected to stay in college the year around, the University of Minnesota expects to have by far the biggest summer session attendance in its history, according to the director, Prof. T. A. H. Teeter. Veterans draw educational benefits only when in college, and in addition, are in a hurry.

Nevertheless the usual special program, particularly for public school teachers, will be offered on the regular scale and every provision made to care for the regular clientele of the summer sessions, Mr. Teeter said.

The first summer term will run from June 17 to July 27 and the second term from July 30 to August 31, enabling teachers to return home in time for the opening of public schools the day after Labor Day.

Undergraduate students from outside Minnesota will be subject to the same admission restrictions in summer as during the rest of the year. Preliminary consideration will be given the applications of veterans from states adjacent to Minnesota who are in the upper 25 percent of their high school class or have a "B" average in another college from which they wish to transfer.

"Workshop" courses, so popular with teachers, will be conducted in several fields, among them, curriculum planning, group and individual guidance in high schools, childhood education and development, music education, play production and rural education. The summer session also will continue the workshop in higher education which has been carried on over several years past as a cooperative venture of a group of colleges in the North Central Association of Colleges and Secondary Schools.

An extended special program of subjects in the field of American studies, in which a number of well known visiting faculty members will teach, will be a summer session feature.

There's Art

In Your Town

"U" Man Assures

Minneapolis, April----That every Minnesota community has in it some worth-while art if the residents will only take the trouble to seek it out and recognize it is the thesis of Professor Laurence Schmeckebier of the University of Minnesota, whose pamphlet, "Art in Red Wing", is another in the series of studies of that more or less typical Minnesota community financed by the Graduate School of the University. The booklet is the sixth in a series entitled "The community basis for postwar planning."

"The works of art may be any of several things," says Dr. Schmeckebier. "They may be private residences, or business buildings. They may be bridges or other public works. They may be paintings or decorations in a home or the interior architecture of a clinic or other professional office."

Many items of true artistic worth in one's own town are destroyed in the reconstruction or remodeling of buildings, says this writer, who advises that when an artistic structure must be remodeled, the original artistic idea be adhered to. Preferable to grafting a new and conflicting type on an old would be tearing the structure down and building a new one.

"Art must have conviction," said Schmeckebier. "A war statue should be either "for" war or "against" war. That was one of the troubles with our civil war statues. Too much of the artist's energy was spent on mere decoration. The message of the piece was non-committal."

Small communities often produce good artists, but seldom support them, or are even able to do so, with the result that they leave and do their work in some more populous center, the Red Wing study points out. Its author expresses a hope that more and more such artists will find support in their own communities, either by industrial or private employers or purchasers of their work.

Procession  
At 'U' Inaugural  
To Be Colorful

Hundreds of colleges, universities and learned societies in this country and some from abroad will be represented by delegates in the colorful academic procession that will be an outstanding feature of the inauguration of Dr. J. L. Morrill as president of the University of Minnesota, Thursday, April 25. Dean Theodore C. Blegen, committee chairman says details are nearing completion.

Scores of the delegates will come from the home campuses of the institutions they represent, while many other institutions will be represented by graduates who are residents of Minnesota.

The delegates will march from Coffman Memorial Union to Northrop Memorial Auditorium, wearing the colorful robes and hoods of their professions and institutions.

The actual inaugural ceremony will begin at 10:30 a.m. in the auditorium. Gov. Edward J. Thye will speak for the state; President Edmund Ezra Day of Cornell University for American educational institutions; the Hon. Fred B. Snyder, chairman of the Board of Regents, will speak and induct Dr. Morrill, who will then deliver his inaugural address. The invocation will be delivered by the Most Rev. John Gregory Murray, archbishop of St. Paul. The Very Rev. Dr. J. A. Aasgaard, president of the Norwegian Lutheran Church of America, will pronounce the benediction.

Educational conferences centering on the topic, "The urgent educational tasks of the university in our time" will be conducted Tuesday afternoon, April 23, and Wednesday morning and afternoon, April 24. Speakers will include outstanding university presidents, scientists and citizens.

Dr. Morrill is the University of Minnesota's eighth president.

'U' at New Enrollment Peak

As the spring quarter opened, the University of Minnesota last week had more than 16,700 students enrolled. Among the total were over 8,000 veterans, attending under the G-I Bill of Rights or as rehabilitations students. The veterans numbered more than the entire number of students, men, women and graduate students, who were in attendance the spring quarter last year.

A release on the Inauguration of  
the eighth President of the  
University of Minnesota

For Monday P.M. Release  
Minn. Hist. Soc.  
APR 22 1946

\*LD 3329  
f.N5

Minneapolis, April 21: Three days of special events at the University of Minnesota that will culminate Thursday morning with the inauguration of Dr. J. L. Morrill as eighth president of that institution will start tomorrow (Tuesday) afternoon with the first of a series of educational conferences that will bring figures of major national importance to the campus.

Nearly three hundred colleges and universities and ninety national learned and scientific societies will be represented by delegates, who will march in caps and gowns of universities all over the world in the academic procession preceding the actual inauguration Thursday.

Dr. Morrill will be inducted into office by Fred B. Snyder of Minneapolis, chairman of the Board of Regents, who also performed that ceremony at the last formal inauguration of a Minnesota president, that of the late Lotus Delta Coffman in 1921. Other speakers in this ceremony in Northrop Memorial Auditorium will be Gov. Edward J. Thye, Edmund Ezra Day, president of Cornell University, Ithaca N. Y., and Dr. Morrill, who will deliver his inaugural address entitled "A profession of faith."

Covering three half days and one evening between tomorrow noon and Wednesday night, the educational conferences will be addressed by Bishop G. Bromley Oxnam, president of the Federal Council of Churches of Christ in America; Winfield W. Riefler, of the Institute for Advanced Study, Princeton, N. J.; Sen. Wayne Lyman Morse of Oregon, Dr. Harlow Shapley, famous scientist and director of the Harvard College Observatory; George D. Stoddard, commissioner of education of the state of New York and president-elect of the University of Illinois; Louis S. Headley, president of the First Trust company, St. Paul, Minn; James B. Conant, president of

Harvard university and George N. Shuster, president of Hunter College, New York City.

There will be dinners Tuesday and Wednesday evenings, at the first of which speakers will be Frederick Hovde, one-time Minnesota football star, now president of Purdue; George F. Zook, Washington, D.C., president of the American Council on Education, and Charles J. Turck, president of Macalester College, St. Paul.

A distinguished Minnesota Alumnus, Dr. Raymond B. Allen, dean of the University of Illinois College of Medicine in Chicago, who is president elect of the University of Washington, will speak for alumni at the dinner Wednesday night in Coffman Memorial Union. President John C. West of the University of North Dakota will speak for the National Association of State Universities; Dr. Conrad Elvehjem, University of Wisconsin, for the Association of Land Grant Colleges; Pres. Bernhard Christensen of Augsburg College, Minneapolis for the Minnesota Association of Colleges. Speakers will also represent the student body and the faculty.

Among foreign institutions to be represented will be the University of Edinburgh and, in England, the University of Durham, together with those of Liege, Belgium, and Copenhagen. Fuad University, Egypt, will be represented by Dr. H. A. ElTobgy (right) Washington, D.C., director of the Egyptian Education Office in America.

Dr. Morrill took office as president last July 1, following retirement of Dr. Walter C. Coffey. No formal inauguration was conducted for President Coffey when he took office in 1941, because of the war.

UNIVERSITY OF MINNESOTA  
NEWS SERVICE

STATE  
DAILIES  
SERVICE

Mothers Day will be a full-scale performance again this year at the University of Minnesota on Saturday, May 11. During three war years mothers were invited to the campus but the annual dinner and special events were omitted.

After visiting sons and daughters, going to classes and dormitories and attending a musical entertainment in Northrop Auditorium in the afternoon, the mothers will attend dinner in the ballroom of Coffman Union at 5:30 p.m.

Principal speaker will be President J. L. Morrill, who will discuss the current situation at the university and tell his plans for the institution's future. Speaking for the mothers will be Mrs. E. H. Rehder of Red Wing, whose daughter, Mary Jane Rehder is a star student and member of the Union Board of Governors. Miss Gerry Stoner of St. Paul, in her capacity as president of the Associated Women Students, will speak for the student body. E. B. Pierce, chairman of the committee on university functions, will be toastmaster and Paul M. Oberg, music department head, song leader.

It is expected that more than 1,000 mothers of students will attend the dinner and twice that number visit the campus.

Cap and Gown

Day Set at 'U'

Minneapolis, May----An event of special significance at the University of Minnesota will be Cap and Gown Day, Thursday, May 16, when senior students put on the academic cap and gown for the first time, signalling the approach of the end of college days.

Election to honor societies, award of prizes, scholarships and the like and announcement of the names of those who have maintained high averages through the various college classes are part of the ceremonies of the day.

Students will assemble at given points on the campus and fall into line behind the university band, marching over a traditional course, across the oak knoll and into Northrop Memorial Auditorium for the exercises, which come in the morning.

They will hear President J. L. Morrill, recently inaugurated as eighth head of the university, who will deliver the Cap and Gown Day address.

The traditional planting of a tree for the new president will be an event of Cap and Gown Day at 3 p.m. Senior students in cap and gown will plant a "buckeye" tree in honor of President Morrill, who comes from Ohio, the Buckeye state. The buckeye is better known in this area as horse-chestnut.

Planting of presidential trees was started at the time of President Lotus D. Coffman's inauguration in 1921, at which time trees commemorating the first four presidents were also planted. Subsequently trees have been planted honoring Presidents Ferd and Coffey. For the latter a Kentucky coffee tree was planted.

President Morrill will make brief remarks at the tree planting.

### To Improve 'U' Radio

The University of Minnesota's radio station, KUOM, which reaches most points in Minnesota, is negotiating with the Federal Communications Commission for a new wave length, one purpose of the change being to obtain full daytime privileges and another, to oblige Station WCAL, St. Olaf College, which would like full daylight time on the length the two now share. Both broadcast on 770. The university's radio committee is also giving careful consideration to the possibility it may ask for an FM wavelength for additional broadcasting.

### To Head 'U' of Delaware

Dr. William S. Carlson, dean of admissions at the University of Minnesota, has been elected president of the University of Delaware and will take up his duties there late this summer. Dr. Carlson, who made a name for himself as an arctic explorer while at the University of Michigan, before coming to Minnesota, served with the army air forces throughout the war, his duties having to do largely with the study of the northern air routes. At war's end he was placed on reserve with rank of full colonel.

### Weather Cooperates at Inaugural

Not only was the weather perfect for the inaugural procession of some 500 persons wearing the colorful robes and hoods of universities all over the world at the inauguration of Dr. J. L. Morrill as president of the University of Minnesota, but nature produced a special treat. The warm spring brought out the leaves of campus trees and bushes a full 12 days ahead of the normal time, adding greatly to the beauty of the campus and providing an attractive background for the parade. In Minneapolis the leaves usually come out about May 9. The inauguration was on April 25.

\*\*\*\*\*

One college at the University of Minnesota, that of Science, Literature and the Arts, now has about the number of students that were registered in the entire institution before the First World War. More than 6,000 are enrolled in "S.L. & A".

Graduation

At 'U' Set

For June 14

Minneapolis, May---As the regular college year draws to a close, plans for the University of Minnesota's annual June Commencement ceremonies were announced.

About 1,000 students will receive diplomas starting at 8:15 p.m. Friday, June 14 during the traditional open-air exercises in Memorial Stadium. In case of rain the commencement will be transferred to Northrop Memorial Auditorium on a restricted attendance basis for which two tickets each will be distributed to graduates in advance.

The annual baccalaureate sermon will be delivered the preceding Sunday, June 9, at 11 a.m. in Northrop Memorial Auditorium. The speaker will be the Rev. William Shattuck Abernathy, a graduate of the University of Minnesota in the Class of 1896. His return to the campus will be on the 50th anniversary of his graduation. He formerly was pastor of Calvary church, Washington, D. C.

Alumni Day will be Thursday, June 13, the day before commencement, and the annual alumni dinner in Coffman Memorial Union will be served at 6 p.m. that evening. Many classes will hold reunions, most of them at Thursday noon luncheons. In accordance with custom, the classes central to the festivities will be those out of college 25 years and 50 years, namely, the classes of 1921 and 1896. The Ninety-sixers will hold a reunion dinner the preceding evening, Wednesday, in the Curtis Hotel.

As has been customary for a number of years, the Minnesota Alumnae Club, composed of women graduates, will entertain all in attendance who have been out of college for 50 years or more at a luncheon Thursday noon.

E. B. Pierce, secretary of the General Alumni Association, will have general oversight of the Alumni Day affairs.

President J. L. Merrill is expected to address the dinner.

Big Summer  
Seen for 'U'

The big enrollment of veterans at the University of Minnesota may raise this year's summer session attendance to second place among American universities, summer session officials foresaw as its opening approached. Columbia University has for many years conducted the largest among summer sessions.

Most of the 8,000 veterans who are in college are expected to remain during the summer terms, both because they are eager to complete their studies and because they receive their federal aid only while actually attending. The latter circumstance makes attendance practically compulsory for most of these students.

First term registration will come on Monday and Tuesday, June 17 and 18, three days after the June commencement. The term will run through July 27th. Second summer session registration will be on July 29, Monday.

Strike Stops  
Student Paper

The University of Minnesota is now without a student newspaper for the first time in over 24 years, The Minnesota Daily having been shut down by the printers' strike in Minneapolis. The last time The Daily failed to appear was in the spring of 1923 when it failed to make ends meet under the financial system then in vogue. Subsequently the students petitioned the Board of Regents to establish a "blanket tax" of 50 cents per quarter, paid by all students, for which they have The Daily distributed to them in the campus postoffice.

When in operation The Daily also prints the university's "Official Daily Bulletin", containing those notices of events and regulations for knowledge of which both faculty and students are held responsible. In return for this service, the university pays for distribution of the paper to all university offices. The other source of income of The Minnesota Daily is, of course, advertising.

Many students who receive small salaries while working on the paper are suffering a reduction of income during the strike. On some days a one-page mimeographed sheet is now being produced.

## 'U' ANNOUNCES

### BLANKET RAISE

Faced with mounting losses of faculty and staff due to salary competition from industry and other educational institutions, the Board of Regents of the University of Minnesota today voted an "across the board" increase to both its teaching and its civil service staffs. The increases will be effective July 1, at the start of the next fiscal year.

In summary the board's action, announced by President J. L. Morrill, was as follows: Members of the teaching staff, except teaching assistants, will receive a 10 percent increase on any salary up to \$3,000, plus five percent on salary beyond \$3,000, subject to a maximum increase of \$400. Teaching assistants are increased from \$155. to \$175. per month.

Civil service employees (non-academic) in general, will be advanced during the coming year one increment beyond the normal increases. The additional increment will amount to from \$6. to \$14. per month according to the individual's classification.

These increases, which are in addition to individual increases that have been given or promised, will add about \$365,000. to the general university budget, exclusive of payments to certain types of workers paid out of special funds.

Dr. Morrill's statement in announcing the rise said in part: "Our objective was to do everything possible to assist the civil service and teaching staff members in meeting the increasing cost of living to the maximum extent possible under the financial limitations of the university. It seemed to us desirable university policy to put all available funds not otherwise allocated, including those derived from the Veterans Administration and from increased student enrollment, into salary increases rather than into new enterprises or staff expansion beyond the minimum required to handle increased enrollment."

~~U.S. Arctic~~

~~Report to~~

~~Broadcast~~

William S. Carlson, Dean of Admissions and Records at the University of Minnesota, will be heard over KUOM, University of Minnesota radio station, on Thursday, May 23, from 11:30 a.m. to 12:15 p.m., discussing "Northward to Now." Dean Carlson, who will take over new duties as president of the University of Delaware on July 1, has long been associated with research in Arctic regions. During the war, as a colonel in the Army of the United States, he conducted several surveys resulting in the establishment of airline routes in the Far North.

## Sound Controls

### America's Need

Minneapolis, May----The achievement of sound social controls--sound for all concerned--as against political absolutism will be the test of American common sense and freedom, President J. L. Morrill of the University of Minnesota told the Minnesota State Medical Society, meeting in St. Paul.

America, above all nations, said he, has developed the capacity to make progressive adjustments to great changes, and this ability offers the hope and opportunity of American leadership in the postwar world.

"We are struggling to reappraise the meaning and the limits of freedom in a changing society," Dr. Morrill said. "This reappraisal must be made upon such issues as the preservation of free and voluntary enterprise versus the draft toward a managed economy, the right to strike versus the public interest, the extent of governmental intervention and responsibility in the areas of social welfare and individual security."

Dr. Morrill praised the state's medical profession, saying "the high prestige and leadership of Minnesota medical practice, training and research is nationally known and respected. It is the product of partnership between the profession and the university's Medical School--and this constructive alliance offers even brighter hope for the future."

### See Big Summer School

The largest summer session in the history of the University of Minnesota will begin immediately after June commencement, with registration June 17 and 18 and classes starting the 19th. About 15,000 are expected to attend, including perhaps as many as 7500 veterans. The usual large numbers of public school teachers who go to the summer sessions for refresher courses are expected to attend as before the war.

'U' Expands

News Service

Extension of the public relations activities of the University of Minnesota by the addition of two new workers who will handle the news of the campus was announced by Malcolm M. Willey, vice-president for academic administration.

Mr. William T. Harris, Jr. will assume the general news direction. Now on terminal leave as a lieutenant colonel, army air forces, Mr. Harris is a graduate of the University of Minnesota in journalism, Class of 1932 and served as a teaching assistant in journalism for one year. He was president of Sigma Delta Chi, professional journalistic fraternity, and won the Sigma Delta Chi scholarship award in 1932. For seven years from 1934 to 1941 he was employed by the Mankato Free Press and was news editor of that publication when called to active duty in the army, where he served as an intelligence officer. He is a resident of St. Paul.

Miss Janet Salisbury, formerly of The Minneapolis Daily Times, joins the staff to specialize in individual stories about students to be sent to their home town papers. Miss Salisbury is also a graduate of the School of Journalism, Class of 1931. As a student she was president of Theta Sigma Phi, professional journalistic sorority and was a member of the Board in Control of Publications.

T. E. Steward, who has handled most of the university news in addition to publishing Minnesota Chats, The Calendar of Events and other periodicals, will become university editor. Preparation of the president's report and possibly of a new campus organ for faculty and staff distribution, will be added to his duties, Mr. Willey said.

Piano, violin, cello and vocal solos will be given by 13 University of Minnesota seniors of the department of music in a recital, with University of Minnesota Symphony orchestra accompaniment, tonight at 8:15 p.m. in Northrop Memorial auditorium. Dr. Paul Oberg, chairman of the music department, will direct the concert, for which there will be no admission charge.

The program will be as follows:

- |                                     |  |
|-------------------------------------|--|
| Dorothy Chamberlin<br>Crosby, Minn. | - Beethoven 3. Minor Piano Concerto<br>First Movement                    |

May 27, 1945

President James L. Morrill of the University of Minnesota presented <sup>the</sup> King Gustav scholarship awards to two Minneapolis students last week on behalf of the National Hillel Foundation. Co-winners of the 1945 award, chosen for their contributions to inter-faith understanding on the campus, are Kathryn A. Roth, 4100 Humboldt Av. S., and Jean J. Clark, 3846 Colfax Av. N., who will share the \$300 scholarship equally.

Named in honor of the king of Sweden for his humanitarian work during World War II in aiding thousands of Danish Jews to escape from Denmark to Sweden, the scholarship was established in 1943 and is given only at the University of Minnesota. A similar scholarship, honoring King Haakon of Norway for his courage in defying the Nazis to assist refugees from tyranny, is given at the University of Wisconsin by the Hillel Foundation.

Both winners of the King Gustav award participated prominently in planning the programs for Religious Emphasis Week and Brotherhood Week on the campus this year. Miss Roth is president of the Student Council of Religions, made up of representatives of all faiths and denominations, and is active in Newman club, Catholic students' group. Miss Clark is president of the University YWCA. Miss Marcia Edwards, assistant dean of the college of education, headed the award committee.

Present at the award ceremony in President Morrill's office were Rabbi Norman E. Frimer, director of Hillel Foundation at the university; Miss Betty Ann Calmenson, student president of Hillel Foundation; Malcolm M. Willey, academic vice president of the university; <sup>Edmund</sup> ~~Edward~~ G. Williamson, dean of students; William L. Nunn, director of university relations; Miss Edwards and members of the award committee.

May 29, 1946

A young British woman botanist, Dr. ~~Emma~~ <sup>Verona</sup> H. Conway, who left her post as lecturer in botany at the University of Sheffield, England, to drive an ambulance in London during the years of the blitz, will arrive at the University of Minnesota in mid-July to do graduate work research work on an international fellowship.

Miss Conway, winner of the first Virginia C. Gildersleeve International Fellowship, named in honor of the dean of Barnard college, New York City, will conduct research studies on peat and the vegetation associated with it in the University of Minnesota botany department under direction of Dr. William S. Cooper, professor of botany.

She previously studied at Minnesota on a fellowship in 1938, teaching at the Lake Itasca summer school of the botany department, but left to return to England when her country entered the war that fall. Throughout the war years she postponed her research studies in favor of direct participation in the war emergency.

The Gildersleeve grant is one of seven international fellowships financed from a fund of \$40,000 raised by the New York City branch of the American Association of University Women to provide opportunity for women of other countries to study in the United States during the school year of 1946-47. The fellowship awarded Miss Conway was named in recognition of Dean Gildersleeve's efforts to better international relations.

Milton W. DeFuy, manager of the University of Minnesota printing department for 25 years, was honored with a citation and gift presented yesterday by university faculty and administrative personnel, headed by ~~University~~ President James L. Merrill and Vice Presidents Malcolm M. Willey and W. T. Middlebrook. Mr. DeFuy will ~~retire June 30~~ retire June 30 ~~and expects to leave the city later in the summer to make his home near ~~the west coast.~~~~ ~~on the west coast.~~ He joined the university staff in 1915, becoming head of the printing and mimeographing department six years later.

NOTE TO EDITORS: This story is a refutation  
of a damaging rumor and we would  
appreciate its publication.  
THE UNIVERSITY OF MINNESOTA.

'U' to Accept

All Applicants

From Minnesota

Minneapolis, June----All restrictions on admission to the University of Minnesota apply to non-residents of the state only and no restrictions have ever been applied to applicants who are residents of Minnesota, William S. Carlson, dean of admissions announced again this week.

"The rumor has spread that restrictions have been applied to Minnesota residents, and I think it important that the truth be presented," Carlson said.

"Young people who are Minnesota residents are admitted on the same basis they always have been and no change is even contemplated."

He pointed out that in some Minnesota communities it has been reported that a student must be in the upper ten percent of his high school class to be admitted. Actually, graduation from an accredited high school is all that is required.

"This error arose from someone's having mis-read our rules on admission of students from outside Minnesota", he explained. "We offer some special privileges to students from other states that are in the same "economic area" as Minnesota. North and South Dakota and Montana are examples. From these areas we consider admission of veterans in the upper 25 percent of their high school class or have a B average in college work taken elsewhere, and of non-veterans who are in the upper ten percent in high school or have a B average in college work taken elsewhere. By mistake the last mentioned fact seems to have been mis-interpreted as applying to Minnesotans."

Dean Carlson explained that the error was started by a twin city recruiting sergeant who was using the argument that "you can't get into the University of Minnesota anyway and might as well join up."

"The university administration is going to take care of all applicants from the state of Minnesota,"he concluded "and of many from nearby states to boot."

'U' Army, Navy  
Units Ready

Both army and navy ROTC units will again be in full swing at the University of Minnesota next fall, but for both units exact terms and conditions of operation will depend on the national defense act to be passed by the United States Congress, the act often referred to as the "merger bill".

The army has had no "advanced" ROTC unit for two years as all of the advanced students were called into the army as officers. Also, with most of the younger male students drafted, there was too small a group in "basic" drill to provide a reservoir of advanced students. Prior to the war Minnesota army ROTC units were in coast artillery, signal corps and medicine. Application has been made by the university for adding several new branches of training, including engineering and infantry, but final disposition has not been made by the war department. It has also been requested that the advanced quota, now small, be enlarged.

For two years past, admission to the navy's ROTC has been granted almost exclusively to veterans returning to the campus after service with the fleet. While announcement has not been made, it is now considered likely that civilian freshmen will be included among eligibles when the new procedures are established.

The Navy, even more than the Army, will find it necessary to depend in large part on college ROTCs for future officers for the much enlarged fleet, as no one has any idea that a large enough quota can be trained at the United States Naval Academy, Annapolis, Md.

Summers Made 'U' Dean

Robert E. Summers, professor of mechanical engineering, has been appointed dean of admissions and records, University of Minnesota, succeeding Dean William S. Carlson, who will go to Wilmington, Del., as president of the University of Delaware. A graduate of Washington State College and a teacher there and elsewhere before coming to Minnesota, Dean Summers served during the war as coordinator of the naval training program on the University of Minnesota campus. He was given the rank of lieutenant in the Naval Reserve, which he retains now with inactive status.

**FOUNDER RETIRING**

**EDITOR RETIRES**

**AT MINNESOTA U.**

Milton W. DeFuy, editor and publisher of the Deming Graphic from 1908 to 1915, retired May 31 in Minneapolis where he has been manager of the University of Minnesota's printing department for the last 25 years.

After selling the Graphic in 1915 to Clyde Earl Nix, Mr. DeFuy sold printers' supplies and equipment. While attempting to sell a paper cutter to the University of Minnesota printing department, he wound up by selling himself a job in that department 21 years ago. Six years later, he became department manager.

Mr. DeFuy, who is 69, and Mrs. DeFuy plan to move to Oregon this summer. They also hope to be able to visit Deming this summer to see old friends, but due to Mrs. DeFuy's ill health, they may not be able to make the trip.

Reactivation of the advanced course in the Reserve Officers' Training Corps, discontinued in 1944, at the University of Minnesota, was announced today by Lt. Col. W.A. Campbell, acting professor of military science and tactics. The advanced course of two years, successful completion of which leads to a commission in the Officers' Reserve Corps, will be resumed at the opening of the fall quarter.

Enrollment in the advanced course is limited to 48 students, nine of whom will receive Signal Corps training and must be electrical engineering students, and 39 of whom will receive Coast Artillery Corps training. Applications for enrollment in the limited course are now being taken at in Room 106, Armory.

To qualify for advanced R.O.T.C., students must have at least two years remaining in their university courses, they must be between 19 and 28 years old, physically qualified and able to make a score of at least 110 in the Army Ground Forces general classification test. They must have had one year of military service or have completed the basic R.O.T.C. course either at the University of Minnesota or some other university or have completed a combination of one year of the basic R.O.T.C. course and six months' military service.

The advanced course carries three academic credits per quarter and nets each student enrolled a monthly allowance of approximately \$20. There are indications that this amount may be increased substantially in the near future, according to Col. Campbell.

June 4, 1946

Thirty-two new members were admitted to Sigma Xi, honorary scientific society, at a dinner in the Campus club, Coffman Memorial union, last night, marking the fiftieth anniversary of the establishment of the University of Minnesota chapter.

Dr. Ralph E. Montross was installed president to succeed Dr. Lee I. Smith, chief of the division of organic chemistry at the university, who gave the principal address. Other new officers are Dr. Gaylord W. Anderson, vice president; Dr. Martin H. Knapka, secretary-treasurer; Dr. Bryce L. Crawford, Jr., Dr. Alfred C. Kier and Dr. Wesley V. Spink, board of electors, and Dr. Leo G. Rigler, symposium committee.

New members, chosen on a basis of their scientific research, are Neal R. Anderson, Charles F. Bentley, Arthur Lloyd Brown, Raymond E. Brown, Shi-Jen Chiao, Jacques E. Chipault, Ellis F. Darley, Ady E. Da Silva, Wilson E. Fosta, Ronald J. Glodhill, Wendell H. Hall, Martin Hamig, Alfred S. Holt, Nancy Ju-Shan Hsu, Jeanne Kohnen, Norman Krotzsch, L. Mayer Jones, David J. Kohnen, Hans A. Lillevik, Sidney P. Marshall, David W. Melander, Mary Lee Mueckling, Charles A. Nagler, Howard B. Peto, Glenn M. Roe, V. Lorraine Schneider, Charles D. Stahlberg, Cyril S. Stahlberg, E. W. Wiedala, Fui Yano, David H. Williams and Gayt T. Wilson.

Appointment of Malcolm N. Miller, vice president for outside administration of the University of Minnesota, to a Social Science Research Council committee to study organizations for research in the social sciences was announced today by President James L. Bevelill of the university.

The appointment was made by Dr. Donald Young of New York, executive director of the Social Science Research Council. Serving with Dr. Miller on the committee will be Dr. Louis Muth of the University of Chicago, Dr. Gordon Mackenzie of the University of North Carolina, Dr. Frederick S. Mills of Columbia university, Dr. Stanley J. Cook of Harvard university and Dr. Donald E. Wilson of the GSA. The first meeting of this committee will be held in New York June 8-10, and Dr. Miller will attend.

"There is a great need," Dr. Young stated in appointing this committee, "for a thorough re-study of the types of organizations which have been established in the universities and elsewhere to facilitate social science research, of the problems that have been encountered and of the effect upon the development and improvement of research in the social sciences."

The University of Minnesota will confer an advanced degree, master of arts, upon Paul Elmer Anderson, son of Dr. George H. Anderson of St. James, at commencement exercises to be held in Memorial stadium on the university campus Friday evening, June 14.

Dr. James I. Morrill, president of the university, will deliver the commencement address and will present diplomas to some 1,200 students. Masters' degrees will be awarded to approximately 60 graduate students, and doctor of philosophy degrees to 20 students.

Mr. Anderson received a bachelor of arts degree, cum laude, in 1940 from Gustavus Adolphus college in St. Peter.

Lawrence A. Marsden, who wrote ATTACK TRANSPORT, to be published on June 12, comes from Luverne, Minnesota. We should get some news stories about this in the Luverne papers and in other papers in the southwestern part of the state.

A gift copy of the book is being sent to each member of the crew of the U.S.S. DOYEN, and Duscha should be tipped off that one of the crew is a St. Paul boy. Miss MacDonald has the list of crew members.

To society editors, Mpls. Star-Journal, Mpls Daily Times & St. Paul Dispatch

Dr. Henry A. Hixson, of Coral Gables, Fla., professor emeritus of physics at the University of Minnesota, has returned to Minneapolis to attend the fiftieth reunion of his university class of 1896 next week. Dr. Hixson will be chairman of the class celebration, which will extend over two days.

Festivities will start with a dinner Wednesday night at the Curtis hotel. The class will be honored, along with alumni of any other classes, at the "old grads" luncheon to be given Thursday noon in Coffman Memorial union by the University of Minnesota Alumni club. That night the class of '96 will be honor guests at the general alumni dinner and program in Coffman union.

Hosts at the dinner Thursday night will be the class of 1921, the 25-year group, whose chairman will be David W. Bronson, Minneapolis. President James L. Merrill will welcome the alumni and Dr. George A. Mari, St. Paul, president of the General Alumni association, will preside.

Many of the quinquennial, or five year, classes have slated individual functions for Thursday in addition to the general dinner. Luncheons will be given in various dining rooms of the union by the classes of 1901, 1906, 1911, 1916, 1921 and 1926, and a coffee hour is scheduled for 4:30 p.m. in the Men's lounge by the class of 1931.

W.B.W.

The exciting story of a Navy ship and the men who lived with her for 27 months is told in the book, "Attack Transport" by Lieutenant Commander Lawrence A. Marsden, son of Mrs. Carrie E. Marsden of Luverne, which was published Wednesday (June 12) by the University of Minnesota Press.

Commander Marsden was a lieutenant when he wrote the book and just recently has been promoted to the rank of lieutenant commander. His wife is the former Millicent Snyder of Jackson, Minn.

The ship of which Commander Marsden writes is the U.S.S. Boyen, the Navy's first attack transport designed to carry invasion troops up to the beaches and to evacuate casualties. The Boyen's Pacific career carried her more than 100,000 miles and into the action at Kiska, Tarawa, Saipan, Guam, Leyte, Luzon and Iwo Jima. Her only battle scar after two years of extremely dangerous "workhorse" duty was a single shell hole in her boom.

"Attack Transport" is a naval officer's answer to the oft-repeated question: "How was it out there?" Sixteen pages of official Navy photographs are included in the book.

Commander Marsden was supply officer of the Boyen and now is serving as editor of the monthly newsletter of the Navy Supply Corps Bureau of Supplies and Accounts in Washington, D.C.

Captain H.H. Von Heinburg, commander of the cruiser U.S.S. St. Paul during World War II, will address the University of Minnesota's Naval ROTC and V-12 graduates at the Navy commissioning exercises to be held in Northrop auditorium on the University campus at 8:30 p.m. Friday.

The commissioning ceremony will be <sup>the</sup> last of such exercises at the University of Minnesota in the Navy's program for training enlisted personnel for commissioned status. This program provided a large number of wartime commissioned officers for the Navy. Hereafter, the Navy will train university students in naval science for reserve commissions on a basis similar to the pre-war training program.

Commissions as ensigns in the United States Naval Reserve will be awarded to 110 enlisted men Friday, and a commission as second lieutenant in the United States Marine Corps Reserve will be awarded to one enlisted man. These new officers <sup>are being</sup> will be placed on active duty for one year. *at their own request.* An additional 43 men who have completed their Naval training at the university will be sent to separation centers and will receive commissions as ensigns in the United States Naval Reserve later by mail following their separation from the service. These men will be placed on inactive duty.

The oath of office is being administered to these new officers prior to the university commencement exercises Friday evening so that they may appear at the commencement program in their officers' uniforms.

Captain Von Heinburg will represent Vice Admiral G.B. Murray, USN, commandant of the Fifth Naval District, Chicago, at the commissioning exercises.

During World War II, Captain Von Heinburg was chief of staff for such important landing operations as those at Salerno (8th Amphibious Force) and Normandy (11th Amphibious Force). He also commanded the cruiser U.S.S. St. Paul and the U.S.S. Salamonic. At present he is assistant chief of staff for operations and services in the Ninth Naval District.

Born in Cecil, Wis., Captain Von Heinburg attended the public schools at Marinette, Wis. He was graduated from the U.S. Naval Academy in 1919. He was captain of the Navy football team in 1917, and captain of the academy's baseball team in 1918.

Following are the men who will be commissioned Friday as ensigns in the Naval Reserve and who will be assigned to active duty with the Navy for one year:

Vernon John Alt, Cuba City, Wis.  
Allen Newman Anderson, Union, Mont.  
Wilford Dean Anderson, Mason City, Iowa  
Robert Paul Anthony, East Canton, Ohio  
John Dale Aungst, Portland, Oregon  
Robert Tolman Avery, Oakland, Calif.

NEWS SERVICE  
FOR IMMEDIATE RELEASE

To Rochester Post-Bulletin

Minneapolis, June - Joyce Egan, daughter of Lincoln G. Egan of Rochester, has been chosen on a basis of her high scholarship to serve as a marshal at the University of Minnesota commencement exercises Friday evening, June 14, in Memorial stadium.

Two juniors from each college are named for this honor by the deans of the respective colleges, who select the students who are highest ranking in academic standing.

Carbed in maroon and gold caps and gowns, the marshals carry banners designating the different colleges and lead the various groups of candidates for degrees up to the stage to receive their diplomas.

FOR IMMEDIATE RELEASE

*To East Mpls Argus*

The first peacetime June commencement of the University of Minnesota in five years will be conducted Friday at 8:15 p.m. in Memorial stadium, or, in case of rain, at E Northrop Memorial auditorium. President James L. Morrill will preside at the exercises, in which more than 1,300 diplomas will be awarded, including approximately 100 graduate degrees. The ~~high~~<sup>high</sup> degree, doctor of philosophy, will be conferred upon 19 persons.

Leading the procession of candidates for degrees, grouped according to colleges, will be student marshals, chosen from the junior class on a basis of their high scholarship. Wearing maroon and gold caps and gowns and carrying the banners designating the various colleges, these students will include Saburo Aisawa, Raphael F. Aronson, Dorothy Baker, Arthur F. Ballett, John A. Bauman, Edith Berglund, William Bryngelson, Jack L. Caldwell, Martha F. Corey, Joyce Egan, Vernon Feshager, William E. A. Gualtieri, Margaret N. Jacobson, Joyce A. Johnson, Francis J. Kripps, Ila Berg Langguth, Richard C. Maxwell, Patricia A. Meyer, Barbara J. Nordstrom, M. Jane Peterson, Ronald E. Flude, Jeanne Stageberg, Dorothy Titt and May J. Weissner.

Dr. John Walker Powell, lecturer emeritus of the university, will give the invocation and Dr. Morrill will speak briefly before the conferring of degrees.

The University band, directed by Gerald R. Prescott, will play for the colorful procession of faculty and graduates in academic costume.

Assignment to the University of Minnesota as professor of military science and tactics was in the nature of a homecoming for Colonel Richard A. Ericson, son of Mr. and Mrs. L. R. Ericson of Two Harbors. Colonel Ericson, who was born in Duluth, recently returned to the university which he attended as a student from 1913 through 1915, and where he taught as an instructor in the military science department from 1929 to 1936. He now heads that department.

Colonel Ericson received an appointment to the United States Military Academy at West Point in 1916, and was graduated and commissioned in November 1918. He was sent to Europe to serve with the Army of Occupation and participated in the Polish Relief Expedition. He later served tours of duty in Panama and Hawaii, and two tours of duty with the War Department General Staff in Washington, D. C. From 1924 to 1928, he was assigned to West Point as an instructor in mathematics.

At the outbreak of World War II, Colonel Ericson was on duty in the G-3 division of the War Department General Staff in Washington. He later served in anti-aircraft training camps including Camp Davis, S. C., and Camp Haan, California. He spent 13 months in the southwest Pacific participating in the New Guinea and Leyte operations. Following his service in the Pacific, he returned to general staff duty in Washington serving with the operations division. From this assignment he was transferred to the University of Minnesota.

A graduate of 50 years ago returned to the University of Minnesota yesterday to urge seniors of the class of 1966 to learn to understand other people to prevent future war, and offered a practical scheme to promote Russian-American understanding.

The Rev. William B. Abernethy, retired pastor of Galvany Baptist church, Washington, D. C., in the two-hour address at Northrop Memorial Auditorium Friday morning, proposed an exchange of 10,000 Americans from all walks of life for 10,000 Russians, similarly chosen.

Send 10,000 of our people <sup>for a</sup> to Russia to live <sup>for a</sup> ~~one~~ year, and let the Russians send the same number <sup>for the same period.</sup> to it again the next year, and the work, he suggested, "It might cost as much as the prosecution of a war for a single day, but it would be worth it. Our troubles with Russia would be over! We would understand them and they would understand us."

"Have faith in yourselves, your fellow men, and, above all, in God". Dr. Abernethy advised the graduates. "The most hopeful thing today is the attitude of our young people, who refuse to be discouraged in the face of all the gloom over the future of the world."

President James L. Kerrill, introducing the speaker, called religion a tremendous hope in the world because of its universality. The Rev. George P. Ganger assisted in the service and Miss Harjorie Kott, graduating senior, sang a solo. Graduates attended in cap and gown, marching in procession from the campus mall, with hundreds of parents and friends as guests at the ceremony.

Dr. Abernethy, who grew up in Minneapolis, introduced himself as a bad case of nostalgia as he visited the campus he left in 1916. He was unable to remain in the city for the golden anniversary celebration of his class on Thursday at the university and left last night to return east.

Dean Charles M. Rogers of the University of Minnesota college of pharmacy and Mrs. Rogers will be hosts at a dinner at the Midland Hills Country club tomorrow evening in honor of Professor and Mrs. Gustav Bachman, 5124 Thomas Av. S. Guests will be faculty members from the college of pharmacy and their wives.

Professor Bachman, who has been on the pharmacy staff for 44 years, will retire as a professor emeritus ~~September~~ June 15. He is a graduate of the university and joined the faculty in 1902 after two years of teaching at Macalester college.

During the summer Dr. and Mrs. Bachman plan to visit their son-in-law and daughter, Mr. and Mrs. Wallace Petri, Fond-du-Lac, Wis., and their son and daughter-in-law, Mr. and Mrs. Charles Edgar Bachman, Chicago. Later in the year they contemplate a trip to Mexico.

'U' GROUP TO DIG  
IN OLD INDIAN  
SITES IN STATE

Minneapolis, June----What was life in Minnesota like 500 or 600 years ago? Ancient Indian campsites and burial mounds in the state will be excavated this summer by a University of Minnesota archeological group in an effort to learn more about the way of life of those people who occupied Minnesota lands long before the arrival of the white man.

Headed by Dr. Lloyd A. Wilford, archeologist at the university, the expedition of men students will leave the campus June 17, for an extensive trip through the state to sites of ancient villages and burial mounds. The trip will be the first since the summer of 1941, the war having interrupted the university's archeological field work.

The expedition will work in the upper Minnesota river valley near Lac qui Parle and Granite Falls, in the Red River Valley near Twin Valley, and in the Cannon river valley near Red Wing and also in the vicinity of Spring Valley. The group will travel by truck and sleep in tents.

Dr. Wilford plans to study several types of Indian cultures which existed in the state from 200 to 600 years ago. Some of these Indian groups had highly-developed agricultural civilizations, according to Dr. Wilford, while others were in primitive stages of civilization. The university group, through the excavation of the ruins of villages and camp sites, the study of the pottery, arrowheads and implements found in the excavations and by the study of forms of burial found in the exhumation of burial mounds, expects to learn much about ancient Minnesota people.

Urge Veterans  
To Register  
Soon for 'U'

Minneapolis, June -- Since half of the anticipated fall enrollment of 21,000 to 22,000 students at the University of Minnesota will be veterans, early action on the part of veterans hoping to attend the state university is urged by Curtis E. Avery, the university's director of veteran affairs. Those intending to enroll should get their high school credentials as early as possible this summer, he advised, and should consult the university veterans' bureau for admission applications.

Already 1,500 veterans have been interviewed at the bureau and have signified their intention of starting classes at the university in the fall.

At present approximately 9,000 veterans are studying on the Minnesota campus, and they turned in an enviable academic record. Fewer veterans than non-veterans are dropped for scholastic reasons, Mr. Avery pointed out.

Housing may present something of a problem for married veterans, but the university hopes to take care of every former serviceman who wants to get his education there. Additional trailers, quonset huts and pre-fabricated houses are being added to the existing Como Avenue University Village, a settlement provided exclusively for married veterans. If no further shortages of materials develop, it is expected that 910 veterans and their families will be housed there in time to "sit down for Thanksgiving dinner", as one official said. Of veterans now attending the university, 31 per cent are married.

'U' Will Award

Diplomas to 1300

Minneapolis, June - Parents of graduating students and alumni of all classes of the University of Minnesota are campus visitors this week to attend commencement and reunion festivities Thursday and Friday, June 13 and 14.

President James L. Morrill will give the address and present diplomas to more than 1,300 students at the commencement ceremony Friday at 8:15 p.m. in Memorial stadium. Included will be approximately 80 students receiving advanced masters' or doctors' degrees.

Highlight of the alumni reunion was to be a dinner Thursday night in Coffman Memorial union, with the 50-year class of 1896 as honor guests and the 25-year class of 1921 as hosts. One of the oldest alumni expected was Fred B. Snyder, class of 1881, chairman of the university's board of regents. Many of the classes planned luncheons or teas in Coffman union to precede the general dinner, and the honor class of '96 had a special dinner at the Curtis hotel Wednesday night, June 12.

Dr. Morrill will receive a diploma himself on June 17, when the University of Wyoming presents him with an honorary doctor of law degree. He was president of Wyoming university before coming to Minnesota last summer.

Two army veterans in their first year back at the University of Minnesota this week won prizes in history which have not been awarded since 1941 because no student's work had been judged worthy of the distinction during that time, Professor A. G. Ery, chairman of the history department, announced.

Winners of the Class of 1889 history prize, Robert Carl Johnson, 1501 Madison St. N. E., Minneapolis, senior, and Robert A. Kross, 993 Cane Place, St. Paul, graduate student, will receive \$100 each. The awards are given for original essays on historical subjects. Mr. Johnson wrote on the Holy Land and Mr. Kross did an article on old maps, illustrated with his own photography.

Walter L. Stockwell of Fargo, N. D., is life president of the class of 1889, which first gave the history prize in 1891 and has made 40 awards since then. The prize was established to honor Professor Henry Pratt Judson of the history department at Minnesota, who later became president of the University of Chicago.

Albert E. White, professor emeritus of the university's history department, headed the committee on awards, which also included Professor G. N. C. Ross of St. Thomas College, St. Paul, and Mrs. Ruth Anderson Bordin of Minneapolis.

Discontinued during the war, a full-scale Reserve Officers' Training Corps program will be resumed next fall at the University of Minnesota, it was announced today by Col. Richard A. Ericson, director of the University's military department.

The University's ROTC program will consist of an elementary course and an advanced course, the latter including a summer camp session and leading to a reserve army commission. Training in two branches of the service, the Signal Corps and Anti-Aircraft Artillery, will be offered in the advanced course. The elementary course will be a course in military subjects of a general nature applicable to the Army as a whole and will consist of three hours of formal instruction per week for two school years. Elementary course students will receive a monetary allowance equal to the value of the Army ration or approximately \$20 per month and will be furnished a service type uniform.

Previously, elementary or basic ROTC students received no allowance. Three credits will be granted by the University for each year of the course.

To be eligible for the elementary course, a student must be enrolled in the University, physically qualified, a citizen of the United States, over 14 years of age and must have at least two years of college remaining in which to complete the course.

Specialized instruction in either Signal Corps or Anti-Aircraft Artillery training five hours per week for two school years will be offered in the advanced course. In addition, an eight-week specialized summer camp will be held at the end of the first year of the course.

Three credits per quarter will be granted by the undergraduate colleges for successful completion of advanced course subjects. Completion of the advanced course plus four years of college work will qualify the student for a commission as a second lieutenant in the Officers' Reserve corps in the branch in which he specialized.

Advanced course students will receive approximately \$57 per month allowance but will be required to purchase their own uniforms.

To be eligible for the advanced course, a student must meet the same basic requirements as for the elementary course. Credit for the elementary course also is required. One year of actual military service may be substituted for one year of the elementary course, but a student must have at least one year of the elementary training no matter how much military service he has had in order to qualify for the advanced program.

In the advanced course, Signal Corps training will be open only to electrical engineering students, while Anti-Aircraft Artillery training will be restricted to students having had courses in college algebra and trigonometry.

Col. Ericson pointed out today that a veteran enrolled at the University who has had at least one year of military service may enroll in the second year of the elementary course, complete the elementary and advanced courses and receive approximately \$1,200 in allowances for the three school years. Students are not in the Army while taking military courses at the University, Col. Ericson emphasized, and they are not required to go on active duty at upon completion of their advanced course except in case of national emergency.

Registrations for both the elementary and advanced ROTC courses is now open at the University Armory and will continue throughout the summer. Quotas limiting the enrollment in both the elementary and advanced courses have not yet been set by the War Department, according to Col. Ericson, but are expected soon. He advised that students interested in enrolling in ROTC register at the University Armory as soon as possible.

written by a Minnesota man, "Attack Transport," the sailing tale of a Navy ship and of the men who lived with her for twenty-seven war months, was published today (June 15) by the University of Minnesota Press.

The author is Lieutenant Commander Lawrence A. Harnden, son of Mrs. Garrie B. Harnden of Lawrence, who served as supply officer of the U.S.S. Inyan, the Navy's first attack transport designed to carry invasion troops up to the beaches and to organize casualties.

The Inyan's Pacific career carried her more than 100,000 miles and into action at Eliza, Suruan, Saljan, Sam, Lajtha, Luman and Iwo Jima. After two years of extremely dangerous "workshop" duty, she returned with a single shell hole in her bow as her only battle scar.

Harnden, who recently was promoted to the rank of lieutenant commander, is in the supply corps of the Navy and at present is editing the monthly newspaper of the Bureau of Supplies and Accounts in Washington.

In addition to Harnden, the Inyan's crew included twenty-five Minnesota men. Ten of these men are from the Twin Cities. They are from St. Paul: Richard James Olmson, 511 Van Horn Ave.; Earl Albert Hublin, Jr., 609 Webster Hwy; Lawrence Solha, 625 Burlington; and Robert H. Swenson, 724 W. Minneapolis from Minneapolis: John Henry Johnson, 2010 Donald Ave.; Arvid Leslie Swedell, 2029 40th Ave.; Ernest Edward Hall, 2020 19th Ave. So.; Gerald John Webster, 1828 North 4th St.; William Andre Zimmerman, 2012 Pleasant Ave. and Donald Merrill Hansen, 2020 Grand Ave. So.

Mrs. Alice Felt Tyler, associate professor of history at the University of Minnesota, will receive the honorary degree, doctor of humane letters, from Knox college, Galesburg, Ill., on Monday. Mrs. Tyler, author of *Freedom's Ferment*, published by the University of Minnesota Press, and several other books, is a graduate of Knox college. She was accompanied to Galesburg this week by Mrs. Roy G. Blakey of Minneapolis, a trustee of the college.

*to release Fri noon June 14 -  
A list also attached*

Dr. Walter J. Breckenridge, whose appointment as director of the Minnesota Museum of Natural History to succeed the late Dr. Thomas S. Roberts was confirmed June 14 by the University of Minnesota board of regents, has been on the museum staff for 20 years, working closely with Dr. Roberts to develop the museum which is familiar to thousands of school children and their parents, as well as university students. With the appointment as director, Dr. Breckenridge is given the rank of associate professor.

A native of Brooklyn, Iowa, Dr. Breckenridge joined the museum staff as preparator of exhibits in 1926 upon his graduation from the University of Iowa. He later became curator of natural history, the title he has held up to the present. He has done graduate work in zoology, botany and geology at the University of Minnesota for master's and doctor's degrees.

The new director has done extensive field work in wildlife study, including a trip to the Hudson bay region, and is the author of numerous articles and the University of Minnesota Press volume on Reptiles and Amphibians. He is 43 and, with his wife and three children, lives on wooded acreage north of Minneapolis on the Mississippi river, where, he says, his children are learning something about natural history. Mrs. Breckenridge, a University of Minnesota graduate, is active in work of the Minnesota Home Economics association.

The present museum building which Dr. Breckenridge helped Dr. Roberts bring to completion in 1940 was built with funds provided by James E. Bell of Minneapolis, supplemented by the Federal Public Works Administration. It is the outgrowth of a museum started on the campus in 1875 under Dr. William Watts Folwell.

Exhibits are now chiefly devoted to birds and animals of Minnesota, shown in life-like scenes that reproduce their natural surroundings. Dr. Breckenridge plans to add similar displays of fish as the next major development of the museum collection. He also proposes closer coordination of the museum with class work in various science departments on the campus. Services to the public, such as tours of the museum for school children and lectures and movies in the museum's theater, will be continued.

June 14

An agreement paving the way for closer cooperation between the Minnesota Department of Conservation and the University of Minnesota Agricultural Experiment Station in the promotion of wildlife and fisheries research and training of personnel was approved today (Friday) by the University Board of Regents. The move was hailed by conservation leaders as an important step expanding Minnesota's work in fisheries and wildlife management and seeking through research solutions for the more troublesome conservation problems.

Specifically, the agreement calls for exchange of personnel and a close working relationship between the Division of Game and Fish and the Division of Entomology and Economic Zoology which is a part of the University Department of Agriculture. The objectives are:

To promote both research and teaching at the University with the participation and support of the Department of Conservation.

To make possible exchange of personnel.

To create opportunities for practical training in fisheries and wildlife management of students who would be available for working with the Conservation Department and other conservation organizations.

The Division of Game and Fish has agreed as a part of the plan to offer seasonal employment to qualified students and thereby help them complete their training through practical on-the-job experience. It also offers to provide research materials of a biological nature to support the work of graduate students conducting their research in wildlife channels.

"These helps will be of great value in supporting the teaching program at University Farm," says C. E. Mickel, chief in the division of entomology and economic zoology. "I believe this plan for close cooperation between the state department and the University will make possible better training of personnel for fisheries and wildlife management."

Chester S. Wilson, commissioner of conservation, commented: "The State Conservation Department welcomes the opportunity to cooperate with the University in this arrangement, which will not only give practical direction to wildlife research and instruction work at the University but will at the same time make directly available to the conservation department the results of progressive scientific developments in this field, thereby advancing most effectively the entire wildlife conservation program."

As its part in the agreement, the University will materially expand its courses in fisheries and wildlife as well as maintain supporting courses in biology. The University will also administer and supervise any graduate fellowships or assistantships that will be made available in the field and direct the work as far as practicable into channels which have the greatest significance in the Minnesota conservation program.

At University Farm the wildlife work is being carried out under the immediate direction of William H. Marshall, associate professor of entomology and economic zoology. Under the plan Dr. Marshall's services will be made available on a part-time basis to the Minnesota Department of Conservation. Dr. Lloyd L. Smith, Jr., supervisor of the Bureau of Fisheries Research, will be appointed a member of the University staff on a part-time basis with the rank of associate professor and will have charge of the new courses in fisheries. These courses at University Farm will be closely integrated

with the work in fisheries and aquatic biology now being given  
by Dr. Samuel Eddy of the University Department of Zoology.

Re: *social service*

John G. Klundak, 2648 Hennepin Av., Minneapolis, <sup>Minnesota</sup> ~~Palmer~~ assistant regional director of the Social Security Board, was named associate director of the school of social work at the University of Minnesota by the board of regents today. He will succeed Miss Gertrude Valle, who will retire this month.

Mr. Klundak did social service work in various capacities in several western states before coming to Minneapolis in 1948 with the Social Security Board. He directed community social services in Salt Lake City for six years and worked with the Colorado and Utah state public welfare departments. A native of Oregon, he is 39, married and has two children. He has degrees from the Universities of Utah and Denver.

Also appointed from outside the teaching profession to school of social work staff is Mrs. Lyndell B. Scott of Minneapolis, named assistant professor in charge of courses in case work and family service. She has been director of home services for Hennepin county chapter, Agrarian Aid Cross, for the past year and one-half and during the war served with the Travelers Aid society and the USO in the north and east. She studied at the University of Nebraska, Western Reserve university, Duluth college and the University of Chicago, and has done diversified social service work in Nebraska and Illinois.

A galaxy of stars will arrive at the University of Minnesota this week to serve as visiting instructors in the summer session's Program in Agronomy Studies, an inter-departmental series of courses emphasizing American literature, history, fine arts, philosophy and social science.

Well-known writers joining the faculty for the first summer session, which starts Wednesday, will include James F. Farrell, author of *Barnard Clara*, magazine writer, critic and study Louisa and *A Note on Literary Criticism*; Alfred Kazin, author of *On Native Grounds*, and Spurling A. Brown, who is the first Negro appointed as a lecturer at the University. Mr. Brown, an associate professor of English at Howard University, is editor of *The Negro Caravan* and author of *The Negro in American Fiction*. He will teach courses in American literature and *The Negro in American Literature*.

Headliners for the second summer session, which starts July 30, are J. Frank Dobie, professor of English at the University of Texas and author of *Coronado's Children* and *A Texas in England*, and Denis W. Brogan, professor of political science at Cambridge University, England, and author of *The American Character*, *The English People* and *Governments of the People*.

Others who will come for the first session are Arthur Bestor, associate professor of history, Stanford University; ~~Washington State College~~; ~~Washington State College~~; ~~Washington State College~~; Claudius G. Johnson, director of political science department, Washington State College; William H. Kilpatrick, emeritus professor, Teachers' College, Columbia University; Herbert W. Schneider, philosophy professor, Columbia University; Louis B. Wright, director, Huntington Library, San Marino, Calif.; and <sup>George V.</sup> William Ferguson, executive editor, *Winnipeg Free Press*.

Additional second session guest lecturers will be W. Turrentine Jackson, history professor, Iowa State College, and Richard E. Shryock, history professor, University of Pennsylvania.

~~Besides the visiting instructors the following~~

add summer session

~~CONFIDENTIAL~~

For one course, Contemporary American Literature, six  
instructors will lecture, one week each. These will include Merton Zabel, June  
19; August Derleth, June 24; Walter B. Havighurst, July 1; Paul Eagle, July 8;  
James T. Farrell, July 15, and Eric Bentley, July 22. Zabel is chairman of English  
department, Loyola university, Chicago, and a literary critic, editor and poet;  
Derleth is known for his prolific regional writing of Wisconsin; Havighurst is  
professor of English at Miami university, Oxford, Ohio, and author of The Long Ships  
Passing, The Homeward Course, The Winds of Spring and other volumes; Eagle is a poet,  
novelist  
and lecturer on poetry at the University of Iowa; Farrell's latest novel is Bernard  
Glare and in some of his other well known works including are Stone Legion, A Note on  
Literary Criticism and Collected Short Stories; Bentley is assistant professor of  
English at University of Minnesota and specialist in drama.

First permanently endowed professorship at the University of Minnesota has been awarded by the board of regents, which today named Dr. Gaylord W. Anderson, director of the school of public health, as Mayo professor of public health. In effect, the grant, provided by the Mayo foundation in honor of Dr. ~~William~~ <sup>William</sup> and Charles Mayo, makes possible the addition of one professor to the public ~~health~~ <sup>health</sup> faculty. The Mayo professorship will be assigned regularly to the director of the school.

Only other endowed professorship at the university is the George Chase Christian professorship in cancer research, now held by Dr. John J. Bittner, director of the division of cancer biology, but this is not a permanent grant.

Dr. Anderson returned to the university faculty last winter after serving as a colonel in charge of medical intelligence in the office of the surgeon general, Washington, D. C., since July, 1942. He recently was elected secretary-treasurer of the Association of Schools of Public Health.

He joined the university staff in 1937 in what was then designated as the department of preventive medicine and public health, renamed in 1944 the school of public health. Previously he had been with the Massachusetts state health department.

Though ~~born~~ educated in the east, Dr. Anderson is the son of a former University of Minnesota professor, Frank M. Anderson, who taught history at Minnesota for 20 years and is now a professor emeritus of Dartmouth college. Dr. Anderson's home is at 2361 Tolwell St., St. Paul.

*For release June 15, 1946*

The University of Minnesota's 1946-47 budget, approved Friday by the Board of Regents, provides for the allotment of substantially all funds available to the University including approximately \$1,900,000 in anticipated new additional income, \$1,734,000 of which represents tuition income from new students. Included in tuition estimates is the income expected for approximately 7,500 veterans as full-time students under the G.I. bill of rights.

Dr. J.L. Morrill, president of the University, in announcing the provisions of the budget today commented that the Regents and he are aware that the 1946-47 budget is perhaps the tightest budget in the history of the University.

"The University," Dr. Morrill stated, "has most carefully considered all of the demands made upon it as the result of the great increase in student enrollment. We have not been able, with available funds, to meet real needs for salary increases and for additional staff. We have, however, at some risk of facing an operational deficit, placed all available funds into maintaining the present high level of academic ~~competency~~ competency that the University has enjoyed for many years.

"The 1946-47 budget reflects the desire on the part of the Regents to maintain at our State University scholars and scientists of proved ability as well as to maintain the open door of democratic educational opportunities for all of the youth of Minnesota," the University president explained.

In general, the budget provides for the instruction of approximately 18,000 students, with the distribution of funds among the several colleges based on 1946 spring quarter enrollments. Also provided are the usual substantial allotments for research.

(MORE)

Approximately \$600,000 is allocated in the budget to meet the salary adjustments of the academic and civil service staffs, while approximately \$1,200,000 has been allocated to pay the salaries of additional staff members required to meet the unprecedented increase in enrollment and the salaries of staff members returning from academic and civil service leaves. Supplies, expense and equipment allotments are increased by approximately \$100,000 in the new budget.

Highlights of the 1946-47 budget provisions are:

1. Reinstatement of salaries of all staff members on leave.
2. Elimination of all salary charges to war training courses.
3. Continuance of recurring commitments occasioned by the sharp increase in enrollment and made since the preparation and approval of the 1945-46 printed budget.
4. Employment of additional academic and civil service staff members to meet the increase in student enrollment insofar as funds permit.
5. The usual salary increment for the civil service staff plus an additional increment in a majority of the staff salaries.
6. Salary adjustments for the academic staff on an "across the board" basis in terms of a 10 per cent increase on the first \$3,000 of salary and 5 per cent on the next \$2,000, together with individual merit increases in some instances.
7. Increased supply and expense allotments on the basis of more students and higher instructional and supply costs.

First in a series of free public lectures offered at the University of Minnesota by guest instructors who are here to teach in the Program in American Studies will be given Wednesday at 8 p.m. in the Museum of Natural History auditorium by Arthur E. Boster of the history faculty at Stanford University, Palo Alto, Calif.

Mr. Boster will speak on American Studies, giving a survey of what is being done by scholars and writers throughout the country in the field of American culture. Author of numerous articles on cultural history of the United States and on adult education, Mr. Boster taught at Yale and Columbia universities before going to Stanford.

Six talks are scheduled on successive Wednesdays at the same time and place by the committee on American Studies for the University's summer session under direction of Professor Francis McDevell. Each lecture will be broadcast by University radio station KUOM at 4 p.m., one hour after delivery.

Naval Commander William M. McGovern, now on inactive duty after four years of service which included a recent 'round the world air trip, will speak on *The World We Face* at the first summer session convocation of the University of Minnesota Thursday, June 20, at 11 a.m. in Northrop Memorial auditorium.

The naval officer, in civilian life a professor of political science at Northwestern university, interviewed such figures as Lord Mountbatten, Viceroy Lord Wavell, General Pat Hurley and Chiang Kai-Shek on his recent air trip for the government. During the war he served as Naval and Office of Strategic Services representative with the Joint Chiefs of Staff and the Combined Chiefs of Staff.

Born in New York, McGovern studied at a monastery in Japan in his youth and became a Buddhist priest. He is the author of numerous books on the Far East and South America, including a volume on Japanese grammar, and he speaks 12 languages.

Minneapolis, June - The Rev. Dominic Keller, C.S.B., of St. John's University, Collegeville, Minn., national authority on the Gregorian chant, will be a guest instructor on the faculty of the University of Minnesota department of music during the first summer session, which opens Wednesday.

Father Keller will teach a course in Gregorian chant and also will join the faculty for a ~~three-day~~ short course, the third annual Church Music Institute, slated for June 25 through 28 at the Center for Continuation Study on the University campus. This course, especially planned for ministers and choir directors of churches throughout Minnesota, will be sponsored by the University's music department and the Twin City Choirmasters' association.

After finishing his teaching at the University of Minnesota this summer, Father Keller will teach at the Montana State university, Missoula, Mont. He has studied and visited at famous centers of liturgical life and music in Europe and has taught chant in various schools and religious houses throughout Canada and the United States.

June Graduates

Urged to Study

Nursing at 'U'

Minneapolis, June----Trained nurses are needed now even more than during the war, Dr. William A. O'Brien, University of Minnesota director of post graduate medical education, declared this week in appealing to high school graduates to consider nursing as a profession.

"We will need more than 1,000 student nurses for fall enrollment in classes at the university", Dr. O'Brien said. "Also, we must have more graduate nurses for duty in our hospitals."

The University will admit for enrollment in the nursing school high school graduates who meet certain requirements, and in addition will take college students who have completed five quarters of work in other departments, Miss Katherine J. Densford, school of nursing director, announced.

"Nursing is a particularly appropriate field for girls recently discharged from the WAC, WAVES or other military service", Miss Densford suggested.

It is estimated that 40,000 more nurses are needed in this country for the postwar battle against disease. Opportunities are offered in public health, federal services, hospitals, industry, teaching and specialties, with special need in tuberculosis and psychiatric nursing, federal surveys show.

'U' Press Publishes Book

By State Naval Officer

Written by Lieutenant Commander Lawrence A. Marsden of Luverne, the book, "Attack Transport," a true story of a Navy ship and the men who lived with her for 27 months of Pacific warfare, has just been published by the University of Minnesota Press. The ship of which Commander Marsden writes is the U.S.S. Doyen, the Navy's first attack transport designed to carry invasion troops up to the enemy-held beaches and to evacuate casualties. Marsden, who was graduated from the University of Minnesota in 1941, is now on duty with the Navy in Washington, D.C.

Church Music

Course Slated

At University

Minneapolis, June \_\_\_\_ New ideas and techniques for the music in their church services will be offered ministers and choir directors of churches throughout the state in a short course at the University of Minnesota, the third annual Church Music Institute, scheduled for June 25 through 28.

Sessions to be conducted at the Center for Continuation Study on the campus will include actual choir training demonstrations, as well as lectures. The University music faculty will be joined by several visiting instructors, headed by Henry Veld, director of choral instruction at Augustana Lutheran College and Theological seminary, Rock Island, Ill., who will have charge of the entire program.

Other guest teachers will be Alfred V. Frankenstein, lecturer at Mills college, Oakland, Calif., and music critic of the San Francisco Chronicle; the Rev. Dominic Keller of St. John's college, Collegeville, Minn., authority on the Gregorian chant, and Roy A. Schuessler, choral director of Evanston Township High school, Evanston, Ill. Among University music faculty participants will be Professor Paul M. Oberg, Dr. Robert W. Winslow, Professor Earle Killeen, Professor Arthur B. Jennings and Edward Berryman.

Some dormitory accommodations for out-of-town registrants will be available at the Continuation center, but the limited space will be assigned in order of applications received. Sessions will be mainly in the afternoon and evening. At the end of the course certificates of attendance will be given all who attend 90 per cent of the meetings.

Two young Costa Ricans will leave the University of Minnesota campus next week for Syracuse university, Syracuse, N. Y., where one of them, Miss Margarita Castro, will direct the Spanish House for a six week summer session starting July 1. Miss Castro, instructor in Spanish at the University of Minnesota, will be accompanied by Miss Clemencia Picado, 16, daughter of Teachers Picado, president of Costa Rica, and Senora Picado.

Miss Picado was graduated last week from University High school and will enroll for the summer session at Syracuse university, but will return in the fall to study at the University of Minnesota. She came to the United States last fall, studying for a short time at Catholic High school in Winona before entering University High school.

Miss Castro came to the University of Minnesota several years ago as an undergraduate and served for three years on the staff of the Spanish Institute, conducted during summer sessions by the romance language department. The Institute, in which students lived and studied together, speaking only Spanish, will not be held this summer because adequate housing facilities were not available.

A new wage survey, the first since 1944, will be made of salaries of civil service employees at the University of Minnesota as a result of action taken by the University's board of regents, W. T. Middlebrook, vice president in charge of business administration, announced today.

Public Administration Service of Chicago, a non-profit organization serving government agencies, will be asked to make the analysis. The survey is needed as a basis for requests to the legislature in regard to civil service, or non-academic, salaries, Middlebrook explained.

"The basic wage survey at the University was made in 1944, and, while the existing wage schedule carries provisions for meeting the increases in the cost of living, both the basic wage and the cost of living adjustment should be re-examined in the light of going wage rates, especially in the Twin City area, where the vast majority of the University staff is recruited and employed", Middlebrook said.

Discontinued during the war, a full-scale Reserve Officers' Training Corps program will be resumed next fall at the University of Minnesota, it was announced today by Col. Richard A. Ericson, director of the University's military department.

The University's ROTC program will consist of an elementary course and an advanced course, the latter including a summer camp session and leading to a reserve army commission. Training in two branches of the service, Signal Corps and Anti-Aircraft Artillery, will be offered in the advanced course.

The elementary course will be a course in military subjects of a general nature applicable to the army as a whole and will consist of three hours of formal instruction per week for two school years. Elementary course students will receive a monetary allowance equal to the value of the army ration or approximately \$20 per month and will be furnished a service type uniform. Previously, elementary or basic ROTC students received no allowance. Three credits will be granted by the University for each year of the course.

To be eligible for the elementary course, a student must be enrolled in the University, physically qualified, a citizen of the United States, over 14 years of age and must have at least two years of college remaining in which to complete the course.

Specialized instruction in either Signal Corps or Anti-Aircraft Artillery training five hours per week for two school years will be offered in the advanced course. In addition, an eight-week specialized summer camp will be held at the end of the first year of the course.

(more)

Three credits per quarter will be granted by the undergraduate colleges for successful completion of advanced course subjects. Completion of the advanced course plus four years of college work will qualify the student for a commission as a second lieutenant in the Officers' Reserve corps in the branch in which he specialized.

Advanced course students will receive approximately \$57 per month allowance but will be required to purchase their own uniforms.

To be eligible for the advanced course, a student must meet the same basic requirements as for the elementary course. Credit for the elementary course also is required. One year of actual military service may be substituted for one year of the elementary course, but a student must have at least one year of elementary training no matter how much military service he has had in order to qualify for the advanced program.

In the advanced course, Signal Corps training will be open only to electrical engineering students, while Anti-Aircraft Artillery training will be restricted to students having had courses in college algebra and trigonometry.

Col. Eriksen pointed out today that a veteran enrolled at the University who has had at least one year of military service may enroll in the second year of the elementary course, complete the elementary and advanced courses and receive approximately \$1,200 in allowances for the three school years. Students are not in the army while taking military courses at the University, Col. Eriksen emphasized, and they are not required to go on active duty upon completion of the advanced course except in case of national emergency.

Registration for both the elementary and advanced ROTC courses is now open at the University Armory and will continue throughout the summer. Quotas limiting the enrollment in both the elementary and advanced courses have not yet been set by the War Department, according to Col. Eriksen, but are expected soon. He advised that students interested in enrolling in ROTC register at the University Armory as soon as possible.

For Release 12 noon June 19th.

With the postwar world weighing the merits of a worldwide federation of nations, a group of University of Minnesota political scientists, headed by Professor William Anderson, will beam the spotlight of intensive research for the next five years on the operation of a federal system of government in its relation to other agencies of government. The State of Minnesota will serve as the laboratory for this study in intergovernmental relations.

Dr. J. L. Morrill, president of the University, today announced that the Rockefeller Foundation has made a grant of \$72,700 to finance the University's research program in intergovernmental relations in Minnesota. Assisting Professor Anderson will be Edward Weidner, instructor in the University's political science department, and a staff of research assistants.

Emphasizing the "fact-finding" rather than "fault-finding" nature of the project, Anderson explained today that the study will be aimed at making recommendations for ultimate improvement of intergovernmental relations.

"There is much unexplored territory in this field," Anderson stated, "and we expect that our work will throw more light than we have ever had before on just how a federal system of government operates.

"With the increase of governmental activities, national, state and local, in recent decades, the relations between national and state governments, interstate relations, state-local relations and national-local relations, have undergone profound and wide-ranging alterations.

"All governments have become more interdependent in their financing and in the rendering of services," continued Anderson. "At the same time,

(more)

new tensions have been created over numerous issues, and the feelings expressed against what is called 'centralization' in Washington have become, if anything, stronger than they were several decades ago.

"We all know that the problems of intergovernmental relations have been with us from the beginning of the nation's independence, but it is perfectly clear that the relations are fluid rather than fixed and static. Changes take place in them more rapidly than we are aware.

"The period since 1929, with a major depression and a world war of unprecedented proportions, has seen many far-reaching changes. Everyone in government and public administration from the President, the Congress and the Supreme Court down to the officers of the smallest governmental units are aware of some parts of the changes that have taken place. It is probable," Anderson added, "that no one has any conception of the extent of the modifications."

Highlights among the topics to be studied by the University of Minnesota political scientists are the following:

1. As a result of recent changes in intergovernmental relations are the public services being rendered more or less efficiently than in the past? More or less economically?

2. Is there a real and measurable decline of local self-government within the state? Is the state getting weaker or stronger?

3. What methods of intergovernmental cooperation have proved most successful? What specific legislative and administrative techniques do they call for?

4. Does interstate cooperation hold out any promise of making action by the national government less necessary than in the past?

5. What is the present balance of forces among pressure groups and what is the state of public opinion on the subject of intergovernmental relations?

6. Is the trend in government toward centralization or toward decentralization? Are some phases of government tending toward centralization and others toward decentralization?

(more)

### 3---Intergovernmental Research

This research project in intergovernmental relations is designed as a pilot study for a single, fairly typical state, according to Anderson, and Minnesota is considered a "typical" state. Emphasis will be placed upon certain of the major functions of government such as: public health, social security and public welfare measures, public education, public works, law enforcement, conservation of resources, finance and government regulation of labor and labor organizations and government services to labor. Each of these major phases of government will be studied in a wide sampling of Minnesota communities, and a different sampling will be used for each phase. The communities to be used in the study have not yet been selected, according to Anderson.

Several organizations interested in the functions of government have conducted or are now sponsoring related studies in this field, Anderson pointed out, but the University of Minnesota project will be the most comprehensive examination of intergovernmental relations undertaken to date. One such project is now being carried on at Mankato by the Council on Intergovernmental Relations, of which the chairman is Harold D. Smith, director of the budget of United States.

Author of several books on government, Anderson has been chairman of the University's political science department since 1927, and has been a member of the University faculty for 30 years. Graduated from the University in 1913, he received his master's degree and doctor of philosophy degree from Harvard university in 1914 and 1917 respectively.

The University of Minnesota has taken two major steps to supplement its recent action to provide housing for new and present faculty and staff members, it was disclosed today by Dr. J. L. Merrill, University president. Creation of a staff housing bureau and the purchase of 30 lots in Southeast Minneapolis for re-sale as housing to faculty and staff members were the latest moves by the University to meet the staff housing crisis.

Earlier in June, the University set aside 37 apartment units in Thatcher Hall on the Fair campus as well as 48 pre-fabricated houses on the University's temporary housing site at Como and 29th Avenue Southeast, Minneapolis, for faculty housing for the school year 1946-47. Previously, Thatcher Hall has been occupied by married graduate students. This was the first time the University had acted to provide faculty housing.

Today, Dr. Merrill reported that the Board of Regents has authorized the establishment of a staff housing bureau to assist staff members in finding homes and apartments to rent in the Twin City area. Assistance also will be to faculty members who desire to purchase or build homes. This assistance will include advice and counsel in architectural plans, financing, and construction. John Volden, who has been resident manager of University Village on Como Avenue, has been named director of the new agency.

For some time, Dr. Merrill explained today, the University senate committee on housing, headed by Dr. F. Stuart Chapin of the department of sociology, has been making a study of housing needs of staff members.

## **2 University Housing**

Commenting on the establishment of the staff housing bureau, Dr. Chapin stated today, "I think this is the most practical way the University can assist its staff and faculty members in finding housing."

Details of the University's purchase of 30 building lots for re-sale to staff members who desire to erect homes were announced by S. T. Middlebrook, vice president in charge of business administration. Middlebrook reported that the lots, purchase of which has been authorized by the Board of Regents, are in the area bounded by Elm and Fairmount streets and 19th and 21st avenues, Southeast. Middlebrook described this step as a distinct aid to members of the University staff who are contemplating the construction of homes.

Volden, director of the new staff housing bureau, will work with staff members who desire to purchase these lots from the University as homesteads.

Concern over the mushroom growth of unqualified vocational advisers selling their services to veterans and other young people was voiced today by Dr. C. Gilbert Wrenn, University of Minnesota educational psychology professor, elected president of the National Vocational Guidance Association this month.

"There has been a tremendous increase in the number of pseudo-guidance agencies all over the country, charging substantial fees for small services," Dr. Wrenn warned. "They are fleecing the veterans and high school students at an enormous rate".

The guidance association, made up of 3,800 members, chiefly school and college personnel workers, will expose fakers wherever possible, Dr. Wrenn said. He recently returned to the University faculty after several years of naval duty and was named to two other professional posts this month, vice president of the American College Personnel Association and vice president of the Council of Guidance and Personnel Associations.

First concert on the University of Minnesota summer session's recreational program will be given by the Pre Arte Quartet of the University of Wisconsin Monday at 8:30 p.m. in Northrop Memorial auditorium.

The quartet, founded 32 years ago in Belgium, is composed of Germain Prevost, violist, one of the organizers; Rudolf Keliach, first violinist; Ernst Friedlander, cellist, and Albert Rabier, second violinist.

The group has been ~~amng~~ engaged, since 1940, as associate members of the faculty at Wisconsin. Their concert Monday will include selections by Beethoven, Ravel and Schumann.

*Released by:  
Roy Jones  
L.R. Lunden  
6/21/46*

Construction of four 10-unit apartment houses in University Village on Como avenue this summer is proposed by the University of Minnesota, if conditions permit, as the initial step in a project designed to alleviate the acute shortage of housing for ~~many~~ married veteran students, especially those with children. The ~~four~~ apartments will be built at Como avenue and 27th street, SE, on the block set aside in the "village" for multiple housing, and are expected to cost approximately \$255,000.

In addition to the 40 dwelling units proposed for erection this summer, the University is planning to build other apartment units later providing housing for another 240 families. Some of these later buildings may be of a design different from that of the first group.

The University has not yet asked for bids on the first four buildings. Roy Jones, professor of architecture and University advisory architect, stated Saturday explaining that early construction of the proposed apartments is subject to the current uncertainties involved in obtaining materials.

Each of the first four apartment buildings consists of one two-story section containing eight two-room apartments, and two one-story wings, each a three-room apartment. The two-room apartments will include a combination dining room, living room and kitchen, ~~and~~ one bedroom and a bath. The three-room apartments will have the combination room, two bedrooms and a bath. Entrance to each apartment will be from an open porch.

## 2-University Apartments

The buildings will be of semi-fireproof construction, according to Jones. The cross walls supporting the second floor and roof, will be of concrete blocks, while the side walls will be of wood studding and wood siding. Joists supporting the roof will be of wood. The first floor will be of concrete laid on the ground, and the second floor will be of steel bar joists and concrete. Each building will have a community laundry in a partial basement. Heat will be provided by individual gas heaters in each ~~dwelling~~ apartment.

Jones stated that the total cost of the apartments, including furniture, utilities, landscaping, walks and drives and ~~architectural~~ fees, is expected to run approximately ~~\$4,500~~<sup>\$6,380</sup> per dwelling unit. This figure is based on ~~the~~<sup>June</sup> 1 construction costs. Rents for the apartments have not yet been established. Architects for the project are Wagnay, Tinsler and Setter of Minneapolis, and the landscape architects are Morell and Nichols also of Minneapolis.

MORRILL HEADS  
VETERINARIANS'  
TRAINING STUDY

Minneapolis, June----Dr. J. L. Morrill, president of the University of Minnesota, has been appointed chairman of a National Research Council group established to study the problem of providing training in veterinary medicine for young men in states, such as Minnesota, which have no veterinary colleges.

With the marked increase in demand for veterinary education before and particularly since the war, most of the nation's 10 veterinary colleges, being tax-supported, have confined their admissions largely to their own states. Should this situation continue, it is expected to lead to a concentration of veterinarians in some areas and entirely inadequate veterinary service in other parts of the country.

The problem of livestock disease control and eradication for the protection of one of the chief food sources of this country, Dr. Morrill pointed out, demands adequate veterinary service in every community to insure the early diagnosis of disease and the application of adequate control measures.

Although the University of Minnesota has a department of veterinary medicine, headed by Dr. Willard L. Boyd, this department offers only general training to agriculture students and a "pre-veterinary" course and does not provide a full course in veterinary medicine. Minnesota has approximately 400 practicing veterinarians, and, according to Dr. R. L. West, state veterinarian, there is a current need for almost 200 more.

The 10 veterinary colleges in the country are at the following institutions: Alabama Polytechnic institute, Auburn, Ala.; Colorado State college, Ft. Collins, Colo.; Cornell university, Ithaca, N. Y.; Iowa State college, Ames, Ia.; Kansas State college, Manhattan, Kans.; Michigan State college, E. Lansing, Mich.; Ohio State university, Columbus, O.; University of Pennsylvania, Philadelphia, Pa.; Agricultural and Mechanical College of Texas, College Station, Texas; and Washington State college, Pullman, Wash.

'U' Enrollment

Swelled to New

Record by Vets

Minneapolis, June----Veterans attending college under the GI and Rehabilitation bills have swelled the University of Minnesota summer school enrollment this year to 11,305 students, highest summer registration in the history of the University. Students in the agricultural courses have increased 234 per cent over last summer, and 73 per cent of these are veterans. For the first summer session which opened June 19, there are 504 farm campus students, including 367 former servicemen.

Predictions are that late registrations will bring the total first session enrollment close to 12,000. Veterans account for 62 per cent or 7,033 of the entire student body. They make up almost all of the enrollment, or 93 per cent, in the Institute of Technology, in which the engineering courses are given. Though enrollment in the law school is much smaller, veterans constitute the majority of students in this college also, with 90 per cent.

Other fields favored by the former GIs are business administration, 88 per cent of the summer enrollment, and science, literature and the arts, which includes many pre-professional courses, 67 per cent.

Only three colleges, dentistry, nursing and dental hygiene, showed a drop from last summer. This summer's enrollment is one and one-half times larger than last year, when 4,398 students were on the campus for the first summer term.

A second summer session will be conducted at the University from July 30 through August 31.

Mint Culture in  
State Practical,  
'U' Tests Show

Minneapolis, June---Mint plants, much in demand for food and drug manufacturing uses, can be grown successfully on Minnesota's waste peat lands, providing many state farmers an additional source of revenue, an experiment being conducted by the University of Minnesota college of pharmacy shows.

Charles H. Rogers, dean of the college, disclosed that such plants as spearmint, peppermint and horse mint will survive the state's severe winter climate. This was demonstrated in two experimental plantings started last summer at Grand Rapids and Excelsior.

At each location, one-eighth acre was planted last year, and the acreage is doubled this year. In order to promote growth, the first crop was not harvested, but quality of the plants was tested and found to meet all U.S. drug standards.

Professor Earl B. Fischer, who is directing the experiment, explained the mint plants do particularly well on alkaline peat soil. Fertilizers are needed, he said, but further research is necessary to determine the best combinations of fertilizing chemicals.

"There is a continued increase in the demand for mint oils", Dean Rogers said. "It is the favorite flavor for adults, surveys show."

A mint crop can show substantial profit, the dean pointed out, since the estimated potential yield is 30 pounds of mint oils per acre, and prices for these oils range from \$2.25 to \$7 per pound. At present, the bulk of the mint crop in this country is produced in Michigan and Indiana, but Minnesota has approximately 700,000 acres of peat land, much of which could be devoted to mint crops.

College faculty problems, with special reference to salary trends, will be discussed at a meeting of administrative and faculty representatives of institutions of higher learning July 2 and 3 at the University of Chicago.

Two University of Minnesota officials, Malcolm M. Willey, vice president, and Russell M. Cooper, assistant dean of the junior college, will participate, Mr. Willey speaking on faculty housing and welfare services and Mr. Cooper on the promotion of professional progress among faculty members.

The meeting is the twenty-fourth annual Institute for Administrative Officers of Higher Institutions. Invitations have been sent to teachers and administrative officers of universities, liberal arts colleges, junior colleges, teachers' colleges and technical institutes throughout the country.

A symposium on recent readjustments of faculty salaries will be conducted at the July 3 session by A. J. Brumbaugh, vice president of the American Council on Education.

*A Contribution*

Twenty-nine evening classes in subjects ranging from interior decorating to economics are being conducted at the University of Minnesota this summer for a record enrollment of 850 students. The high attendance is credited in part to veterans, 163 of whom are studying in night courses according to Huntington Miller, program director for the extension division.

This is the fourth year the University's extension division has offered night school classes during the summer. Instituted in 1942, they were given for three successive years but were not offered last summer.

The classes opened this month to continue for eight weeks until August 5. Most popular are French and German courses for graduate students working on advanced degrees. Several hobby courses, such as photography, modern art and "piano playing for pleasure", and recreational classes including golf and swimming are given. Some are non-credit courses, but where academic credit is given, it equals that of a regular University quarter.

Marie Osmena, daughter of Sergio Osmena, president of the Philippine Commonwealth, will address a summer session convocation of the University of Minnesota Thursday at 11 a.m. in Northrop Memorial Auditorium.

Miss Osmena's lecture will be on the subject, "The Story of My Father and His People". She was with her father in this country during the war years and served as his official hostess in Washington.

The petite Filipino miss had been studying languages and music in Europe before the war and escaped from Poland on the eve of the German invasion. She was about to leave the United States by plane for Manila on the day of Pearl Harbor. She is one of a family of 10 children, all the rest of whom were in the Philippines throughout the war.

Horace E. Read, 2279 Hoyt Avenue, St. Paul, law professor at the University of Minnesota, has been awarded the Order of the British Empire by the Canadian government in recognition of his service as a commander in the Royal Canadian Navy.

The citation from the Canadian Department of National Defense accompanying the decoration commends Professor Read for his achievement in directing a complete revision of Canada's naval regulations. He was in the service from August, 1943, to October, 1945.

Professor Read, an air force pilot in World War I, commanded the Minnesota wing of the Civil Air Patrol for two years before entering the Canadian naval service. He has been on the faculty of the University law school for the past 12 years.

A Russian-born artist noted in the east for his mystical paintings, Raymond Breinin, is a guest lecturer on the summer art education faculty at the University of Minnesota for the first summer session, and John Hood, artist in residence at the University, has just ended a one-man show in New York City which won the accolades of many eastern critics.

Breinin is teaching and also doing painting while on the campus. He formerly was associated with the University of Illinois. He designed the settings and costumes for the ballet, *Undertow*, and painted the murals in the Pump Room at the Ambassador Hotel, Chicago.

Hood's exhibit of 24 wood and ceramic sculptures was displayed the first three weeks in June at the Associated American Artists gallery in New York. He has been on the University staff for two years and also is on the faculty for the first summer session.

Eighty-eight works from the Abbott collection of paintings of army medicine will be displayed at the University Gallery in Northrop Memorial Auditorium July 1 through 24. These pictures, done by 12 artists commissioned by the Abbott Laboratories of North Chicago, Ill., depict many phases of army medical work in all theaters of war as well as in training centers and hospitals of this country. A number of the artists were under fire in the Pacific and European theaters of war while recording the scenes on canvas.

Of the 12 artists represented in the collection, one is a woman, Marion Greenwood, who has portrayed various medical techniques used in reconditioning casualties. The other artists are John Stuart Curry, Lawrence Beall Smith, Fred Shane, Manuel Telagian, Ernest Fiane, Joseph Hirsch, Franklin Boggs, Howard Saar, Robert Benney, Francis Criss, and Peter Blume.

In addition to the Abbott collection, a group of 14 naval paintings by Gordon Grant, commissioned by John B. Hawley, Jr., will be shown during the same period. The paintings are of various types of naval ships used in the war.

A comprehensive analysis of a Minnesota daily newspaper, the Red Wing Republican Eagle, has just been published by the University of Minnesota Press as the ninth in a series of booklets on a general study of Red Wing under the title, The Community Basis for Postwar Planning. Authors of the new publication are Professors Ralph G. Hafziger and Thomas F. Barnhart, both of the University's school of journalism faculty. Hafziger contributed a survey of the news content and readership of the Eagle, and Barnhart analyzed management problems.

The Red Wing project was undertaken with a view to investigating how a typical Minnesota community fared during the war and what the future may hold for it. Supported by a grant from the University's graduate school, the study was made by a group of University deans and professors from various colleges with Roland E. Vaile, economics and marketing professor, as chairman and coordinator.

A total of 11 booklets presenting facts and conclusions established in the survey will complete the publications series, the final two to be issued by fall. These include studies of the schools, economics, social service aspects, churches, food habits, art and public health of the town. Findings will be summarized by Professor Vaile in a pamphlet on The Post War Challenge.

Minneapolis, July -- Donald Pryer, principal of the Stillwater Junior High school, is attending the University of Minnesota summer sessions, taking graduate courses in education. The work will be credited toward a master's degree.

Registration at the University this summer, totaling 12,500 for the first session, is the highest ever recorded for summer school on the campus. The high enrollment is due in part to the large number of veterans, 7,334, who are continuing their studies through the summer.

All but three colleges show increased registration, running as high as 600 per cent in some instances. Largest single college enrollment is science, literature and the arts, with 4,061.

Designation of two new deans and a new chief of a major department and 90 additional promotions in rank of members of the University of Minnesota's academic staff were announced today by Dr. J. L. Morrill, president of the University, following approval by the Regents. The two deanships replace previous directorships.

Elevated to the rank of dean are Horace T. Morse, named dean of the general college, and Julius M. Nolte, advanced to the post of dean of the <sup>general</sup> extension division. Morse, who also holds the rank of professor, previously has headed the general college in the capacity of director. Nolte, whose promotion from associate professor to professor also was announced today, has been director of the <sup>general</sup> extension division since 1943.

Named to head the department of electrical engineering is Prof. Henry E. Härtig who succeeds Prof. John M. Bryant, professor emeritus of electrical engineering, who retired recently as head of the department.

Included among the major promotions are the following: Alfred L. Vaughan, an associate professor of physical science, to be assistant dean of the general college; George M. Damon, clinical professor of dentistry, to be assistant dean of the school of dentistry; Ruth Harrington, associate professor of nursing, to be assistant director of the school of nursing; Louis F. Keller, professor in the department of physical education, to be assistant director of that department; and Theodore S. Weir to be assistant superintendent of the University's fruit breeding farm at Excelsior with the academic rank of associate professor of horticulture. The first four named in this group will retain their present academic rank. Weir's rank of associate professor is an advancement from assistant professor.

Also promoted in academic rank are the following faculty members of the University: Botany: Rolla W. Tryon, Jr., lecturer to assistant professor and curator of herbarium; English: Mary Turpie and Arnold S. Stein, instructor to assistant professor; German: Fred Genschmer, lecturer to assistant professor; history: David H. Willson, associate professor to professor; journalism: W. Edwin Emery, Jr., lecturer to assistant professor; philosophy: Mary J. Shaw, assistant professor to associate professor; physics: John H. Williams, associate professor to professor; Edward L. Hill, associate professor to professor; political science: Benjamin E. Lippincott, associate professor to professor; Herbert McClosky, instructor to assistant professor; geology and mineralogy: Margaret Skillman and Michael W. Feniak, teaching assistant to instructor.

Psychology: Elmer R. John, teaching assistant to instructor; romance languages: Herbert E. Clefton, assistant professor to associate professor; Eleanor Hoilan, teaching assistant to instructor; sociology: Joseph Schneider, instructor to assistant professor; school of social work: Anne F. Fenlason, associate professor to professor; Magnus Olson and Kenneth L. Osterud, instructor to assistant professor; aeronautical engineering: Carvin L. Von Eschen, associate professor to professor; hydraulics laboratory: John F. Ripken, instructor to assistant professor.

Drawing and descriptive geometry: Henry C. T. Eggers, associate professor to professor; Orrin W. Potter, assistant professor to associate professor; Lloyd J. Quaid, instructor to assistant professor; electrical engineering: John H. Kuhlman, associate professor to professor; mathematics and mechanics: Hugh L. Turrittin, assistant professor to associate professor; mechanical engineering: Richard C. Jordan, associate professor and assistant department head to professor and assistant department head; Fulton Holby, assistant professor to associate professor; Otis M. Larsen, instructor to assistant professor; chemistry: Richard T. Arnold, associate professor to professor; Edward J. Meehan, assistant professor to associate professor; mines and metallurgy: Charles A. Nagler, instructor to assistant professor.

Agricultural economics: E. Fred Koller, associate professor to professor; Truman Nodland, instructor to assistant professor; agricultural engineering: John Strait, instructor to assistant professor; agronomy and plant genetics: Ernest Rinke, assistant professor to associate professor; dairy husbandry: Thor W. Gullickson, assistant professor to associate professor.

Home economics: Kathleen M. Jeary, instructor to assistant professor; plant pathology and botany: Raymond H. Landon, instructor to assistant professor; rhetoric: James I. Brown, instructor to assistant professor; physical training: Joseph A. Nowotny, instructor to assistant professor; school of agriculture, University farm: Elmer Johnson, instructor to assistant professor; Northwest School and Station, Crookston: Harry W. Soderburg, Erwin N. Reiersgard and Orrin C. Turnquist, instructor to assistant professor; West Central School and Experiment Station, Morris: Edwin J. Volden, instructor to assistant professor; Alex B. Polfe, instructing preceptor to instructor; agricultural extension: Dennis M. Ryan, assistant professor extension agricultural engineer to associate professor agricultural engineer.

College of Medical Sciences: anatomy: J. Francis Hartmann and R. Dorothy Sundberg, instructor to assistant professor; division of internal medicine: Wesley W. Spink, associate professor to professor; division of otolaryngology: Jerome A. Hilger and Robert E. Priest, clinical instructor to clinical assistant professor; physiology: Nathan Lifson, assistant professor to associate professor; physiological chemistry: Wallace D. Armstrong, professor to professor and department head; Cyrus P. Barnum, assistant professor to associate professor.

School of public health: Gaylord W. Anderson, professor and department head to Mayo professor of public health and director of the school; Ruth B. Freeman, director of public health nursing and associate professor to director of public health nursing and professor; laboratory of physiological hygiene: Olaf Mickelson, assistant professor to associate professor; division of general surgery: Richard L. Varco, assistant professor to associate professor.

University Promotions - 4

Division of neurology: Abe B. Baker, associate professor to associate professor and director; University of Minnesota hospitals: Ray M. Amberg, superintendent to superintendent and professor; X-ray department: Harold O. Peterson, clinical assistant professor to clinical associate professor.

Institute of child welfare, parental education: Dale B. Harris, assistant professor to associate professor; Harold C. Wittich, clinical associate professor to professor; Dorothea Radusch, clinical assistant professor to clinical associate professor; college of pharmacy: Taito Soine, assistant professor to associate professor; Ragnar Almin, instructor to assistant professor; summer session: Thomas A. H. Teeter, associate professor and director to professor and director.

College of Education: Marcia Edwards, associate professor and assistant dean to professor and assistant dean; Willis E. Dugan, director of student personnel and assistant professor to director of student personnel and associate professor; art education: Marie Lien, assistant professor to associate professor; Clifton Cayne, instructor to lecturer; school of business administration: Francis M. Boddy, associate professor to professor; Herbert E. Miller, assistant professor to associate professor; library instruction: Donald E. Stout, assistant professor to associate professor.

General college of the university: Cornelia T. Williams, counselor and assistant professor to associate professor and counselor; Virginia M. Kivits and Geraldine Graves, teaching assistant to instructor; physical education: Edwin L. Haislet, assistant professor to associate professor; Dallas Ward and Phil Brain, instructor to assistant professor; Lloyd Boyce, instructor to instructor-trainer and swimming coach; students' health service, medical: Myron M. Weaver, assistant dean, assistant professor and physician to assistant dean, associate professor and physician.

OUTLINES

HARTIG

Prof. Henry E. Hartig, 3840 Lake Curve avenue, Robbinsdale, has been named head of the department of electrical engineering at the University of Minnesota, it was announced today. He has been a member of the University faculty for 27 years, first in the drawing and mathematics departments, and, since 1938, in the electrical engineering department where he has directed graduate student work.

Professor Hartig holds a doctorate from the University of Minnesota and also did his undergraduate work at the University. His undergraduate studies were temporarily interrupted by army service in World War I. During World War II, on leave from the University, he worked with the Office of Scientific Research and Development on the development of submarine detection and location devices for the navy. He returned to the University in September 1945.

OUTLINES

MORSE

Horace T. Morse, 1933 James avenue, south, Minneapolis, has been named dean of the general college of the University of Minnesota, it was announced today. A graduate of the University with summa cum laude honors, Dean Morse also received his master's and doctor's degrees from the University. After teaching for several years in a junior college at Ironwood, Mich., he returned to the University in 1936, as an instructor in the college of education and director of the teacher placement bureau.

He subsequently became assistant to the dean of the graduate school, and, in 1940, he was named assistant director of the general college, which offers a two-year liberal arts study program. During the last year, he has served as director of this college, a position which has now been re-designated as a deanship. He is a native of Minneapolis.

OUTLINES

NOLTE

Julius M. Nolte of Wayzata was designated dean of the University of Minnesota general extension division in an announcement of academic staff promotions today. Dean Nolte, connected with the University in various capacities since 1922, has been associate professor and director of the extension division since 1943, and for the six previous years was director of the center for continuation study. <sup>His</sup> promotion to professor also was announced today.

A graduate of Yale university and a member of Phi Beta Kappa, Dean Nolte received a bachelor of law degree from the University of Minnesota in 1937. He is a native of Duluth and was in business there and on the extension division staff in Duluth before coming to the Twin Cities in 1935. For several years, he was connected with the Municipal Reference bureau at the University.

MINNEAPOLIS - - Appointment of J. Edward Gerald as professor of journalism in the University of Minnesota School of Journalism has been announced by the Board of Regents of the University.

Gerald has been associate professor in the University of Missouri School of Journalism since 1935, and a member of the staff there since 1929. He has had many years of experience in the daily and weekly newspaper fields and as a state press association manager.

A specialist in the weekly newspaper and newspaper management fields, Gerald served as manager of the Missouri Press Association from 1937 to 1941 and organized its Missouri Group and the sales department of the Missouri Associated Dailies. The association has 300 members and does an \$80,000 yearly business.

In 1928, after graduating from West Texas State Teachers College and receiving a Bachelor of Journalism degree at Missouri, he became a United Press staff correspondent in Denver. Subsequently he served as editor of the Canyon, Tex., News and as manager of the Warwick Printing Company plant until joining the Missouri staff. He was on the copy desk of the St. Louis Star-Times from 1936-37.

Gerald received an M. A. degree at Missouri in 1932, and pursued graduate studies at the University of Minnesota from 1943-45 as a candidate for the Ph. D. degree in political science. For the past two summers he was visiting associate professor of journalism at Minnesota.

At Missouri, he was acting dean of the School of Journalism in 1941, managing editor of the Omar D. Gray publications, and city editor and

(more)

Gerald Appointment -- 2

editorial page editor of the Columbia Missourian.

Gerald was elected to the board of directors of Newspaper Association ~~Managers~~, Inc., and is a member of Sigma Delta Chi, Kappa Tau Alpha, the American Association of Teachers of Journalism and the American Political Science Association.

He was editor of the Missouri Press News and the Bulletin of the Missouri Press Association from 1937-41, and is the author of numerous articles on country journalism, weekly newspaper advertising and circulation for technical journals.

\* \* \* \*

A second staff appointment in the University of Minnesota School of Journalism is that of Dr. Edwin Emery as assistant professor of journalism. He has been lecturer in journalism there during the past year.

Emery received his A. B. and Ph. D. degrees at University of California, where he taught journalism and history. He was staff correspondent for the United Press in San Francisco from 1943-45, serving as overnight editor, war desk editor and as acting bureau manager.

He also has worked for the San Francisco Examiner and as managing editor of California Monthly. He is the author of "History of the American Newspaper Publishers Association."

Dr. Leon H. Ellis of Princeton university will lecture for the University of Minnesota summer session Friday at 3 p.m. on American Diplomacy in the Far East. The talk, open to the public, will be given in the Museum of Natural History auditorium.

Dr. Ellis, a lecturer on the Far East in the school of public and international affairs at Princeton, spent many years in the Orient, first with the Chinese Maritime Customs service and later as a marketing assistant for the Standard Oil company in China. He joined the United States diplomatic corps in 1922, serving in China, Central America and Europe, and then was appointed to the Far Eastern division of the State Department in Washington.

Since 1933 Dr. Ellis has been on the faculty of various colleges, going to Princeton in 1944 from the University of Southern California, where he had been head of the department of world affairs.

*and of Montana and the Upper Peninsula of Michigan*  
Residents of states adjacent to Minnesota who desire to attend the University of Minnesota next fall and who are eligible for consideration for enrollment under existing regulations today were unhesitatingly requested to file their applications for admission prior to August 1.

R. E. Summers, dean of admission and records, explained that non-resident admissions are restricted to veterans from adjacent states who rank in the upper 25 per cent of their high school graduating classes and non-veterans who rank in the upper 10 per cent. Also eligible for consideration for admission are residents of adjacent states who have completed at least one year of college work provided they have a scholastic average of "B" or better.

Certain limited exceptions have been made to this ruling, Dean Summers added, to provide for the admission of sons and daughters of former students and of advanced students of unusual scholastic ability.

Restrictions placed on admission of non-resident applicants do not apply to residents of the State of Minnesota, Dean Summers pointed out.

Students at 'U'  
To Learn Flying  
In New Course

Minneapolis, July--Some 40 University of Minnesota students will literally fly through their studies this summer. The lucky ones are those taking flight training in a class newly organized by the aeronautical engineering department. This is the first time the University has offered instruction in actual flying, the plan having been approved recently by the board of regents.

Started in the first summer session, the complete course will consist of four University quarters of work and will lead to a certificate permitting the student to take the civil aeronautic administration's flight test for a private pilot's license. Tuition is set at \$100 per quarter. Training includes 12 hours of ground instruction and 10 hours flying time each quarter. Two academic credits are given for each quarter's work.

Flight training is conducted at the University airport with government-approved pilots from the American Aviation company as instructors. The training planes are light 65-horsepower aircraft rented from the same company.

John D. Akerman, head of the department of aeronautical engineering, mapped out the program, and Sam R. Hamilton, assistant professor in the department, is directing both the ground and flight training. To date, no women have registered for the maiden flight class. However, a number of University coeds have taken flying lessons privately and now hold pilots' licenses.

School Use of  
Native Clay for  
Crafts Studied

Minneapolis, July \_\_\_\_ School children in all parts of the state will go out on field trips to dig up clay and take it back to their classrooms to make pottery articles if the plans of a University of Minnesota staff member come true.

To promote the use of native clays as handicraft materials, Mrs. Ruth E. Lawrence, director of the University Gallery, will take a year's leave from her University position this summer to continue work on an experiment with Minnesota clays which she started three years ago. She already has done considerable testing of clay samples from 300 different localities in the state, determining the strength, shrinkage and chemical properties after baking to see which kinds are the best suited for hand-made articles.

With the aid of a grant from the University's graduate school research fund, Mrs. Lawrence will go to the Cranbrook Academy of Art, Bloomfield Hills, Mich., in the fall to learn about glazes, or finishes, which can be applied to the native Minnesota clay products. For the glazes, too, she is interested in developing natural materials to be found anywhere in the state, such as plant ashes, rather than the commercial substances used for this purpose.

Mrs. Lawrence plans to write a textbook on the results of her study to show teachers what can be done in this craft by simple processes without the expense of buying special equipment. She believes that any hobby or craft is most interesting to children if they find the raw materials themselves.

A one-week institute in American Studies, open to the public by payment of tuition, will be offered at the University of Minnesota July 15 through 20, with many of the visiting lecturers on the campus for the summer session serving as faculty, in addition to resident University faculty members.

Among guest teachers will be James T. Farrell, author; Sterling A. Brown, Howard university professor and editor; Herbert W. Schneider, Columbia university professor of philosophy; Alfred Kazin, writer and editor; Arthur Bestor, Stanford university history professor; George V. Ferguson, former executive editor of the Winnipeg Free Press, and Bertha Handlan of the University of Colorado English and education faculty.

Others on the short course faculty will be Tremaine McDowell, professor of English and chairman of the Program in American Studies; Theodore C. Blegen, dean of the graduate school; Alburey Castell, philosophy professor; Edgar B. Wesley, education professor, and Philip D. Jordan, assistant professor of history, all of the University of Minnesota faculty. Also Richard Carlson of the University High school staff, Meridel LeSueur, local author, and Lyman Newlin, manager of Minnesota Book store.

Classes will be conducted in the chapel of the Center for Continuation Study through the day, with special evening programs related to music and drama. The short course is planned for teachers and administrators concerned with American civilization as recorded in literature, the fine arts, history and the social sciences, and for individuals with special interest in the field, such as journalists, librarians, writers and social workers, in addition to the general public.

A tuition fee of \$10, plus registration fee of \$2, will be charged. Assisting Professor McDowell in planning the institute was a committee composed of Luella B. Cook, consultant in curriculum development, and Barbara Wright, supervisor of counselors, both of the Minneapolis public schools; Glenn Varner, director of secondary education, St. Paul public schools; J. M. Nolte, dean of the University's general extension division, and Dora V. Smith, education professor at the University.

Photographs dealing with war and peacetime housing in the United States, first exhibited in England and other foreign countries, will be displayed at the University of Minnesota gallery in Northrop Memorial auditorium July 5 through 26. The collection, titled The Lesson of War Housing, consists of approximately 50 enlarged photographs, drawings and plans, showing large-scale housing projects and community buildings.

Prepared by the Museum of Modern Art in New York, the exhibit has been revised in a new edition since its initial showing in London in 1944. The Office of War Information sponsored the British show and also sent duplicates to Australia and South Africa and the sections on building techniques and prefabrication to Russia.

Divided in three groups, the pictures show examples of pre-war, planned housing, types of shelter devised to meet crucial wartime needs, and lessons learned for future use about construction, job organization and land use.

In planning the display for this country, the Museum was guided by advice from the Royal Institute of British Architects.

The bronze star medal was presented Friday afternoon to C. Gilbert Wrenn, lieutenant commander, United States naval reserve, and professor of educational psychology at the University of Minnesota, for meritorious service as a personnel officer with the Pacific fleet in 1944 and 1945.

Captain Walter C. Holt, director of the Naval R.O.T.C. at the University, made the award in the Regent's room on the campus and read a citation accompanying the award from Vice Admiral O. C. Badger, United States navy.

Wrenn established new procedures for the selection and training of naval personnel and advised various commanders on personnel matters. He was attached to the staff of Commander Service Force, U. S. Pacific fleet, from February, 1944, to September, 1945, and served as personnel officer of the advanced base section.

feature story on  
Asthma Training Institute

Dr. Julio Cueva, Mexican physician specializing in allergy diseases at the General hospital in Mexico City, came to the University of Minnesota recently for ~~special~~ study, but, unlike most doctors, he is working in the botany department rather than in the school of medicine.

Dr. Cueva wanted to know more about plant ~~pollen~~ pollens and molds, which are the causes of human allergies, as any hayfever victim knows. Very few medical men have studied the problem from the botanical aspect of the plants which cause the disease, but Dr. Cueva has spent the past two months working under Dr. A. O. Dahl, associate professor of botany. His object has been to learn how to analyze the pollen problem in every area of Mexico, and he hopes to <sup>help</sup> carry out this task when he returns to his native country.

Asthma caused by allergy is very prevalent in Mexico, Dr. Cueva said, but no studies on just what pollens are the causative factors has been made outside the Mexico City ~~area~~ district. The need for such a survey is great, Dr. Cueva asserted.

The Mexican physician chose the University of Minnesota for his botany study on advice of Dr. F. W. Wittich of Minneapolis, who, through the American College of Allergists, has coordinated work of these medical specialists in the United States with those of Mexico.

Dr. Cueva plans to leave next week for Philadelphia for several months' study in allergy diseases at the University of Pennsylvania medical school before returning to Mexico.

An orchestral program consisting entirely of works of American composers will feature the University of Minnesota convocation Thursday at 11 a.m. in Northrop Memorial Auditorium. The concert will be a feature of the Program in American Studies at the University, which is sponsoring a number of lectures and other special events during the summer session.

Paul H. Oberg, chairman of the music department, will direct a 65-piece orchestra which will be made up of 45 players from the Minneapolis Symphony orchestra and 20 from the University Symphony orchestra.

Among the selections to be played will be "New Piece for String Orchestra" by Ross Lee Finney, University of Minnesota graduate and now a member of the music faculty at Smith college Northampton, Mass. The composition is dedicated to Dimitri Mitropoulos, conductor of the Minneapolis Symphony orchestra.

The program also will include "Gonny Overture on Negro Theme" by Henry Gilbert, "Romantic Symphony" by Howard Hanson, "Joe Clark Steps Out" by Charles Vardell, Jr., and "Outdoor Overture" by Aaron Copland.

Edward Stack, baritone, and Einar Krantz, pianist, will appear in concert at Northrop Memorial auditorium at the University of Minnesota Thursday, July 18, at 8:30 p.m., as one of the University's summer session entertainment events.

Stack won the annual audition of the Chicago Civic Opera company in 1936 and was cast for leading baritone roles the following season by the conductor, Giovanni Martinelli. Krantz, a former pupil of Radolf Ganz, was winner of the 1936 American Artists association concert. He will make his New York debut next season at Town Hall. Besides playing a group of piano solos, he will accompany the vocal soloist.

The program is as follows:

I

Invocazione Di Orfeo - - - - - Peri  
Au Pays - - - - - Helms  
L'Invitation Au Voyage - - - - - Duparc  
Erlkonig - - - - - Schubert

II

Intermezzo, Opus 118, Nos. 1 and 2 - - - - - Brahms  
Capriccio, Opus 116, No. 3 - - - - - Brahms  
Intermezzo, Opus 116 No. 6 - - - - - Brahms  
Rhapsody, Opus 79, No. 2 - - - - - Brahms

Laurence R. Lunden, comptroller of the University of Minnesota, will leave Wednesday for Washington, D. C., to represent the University at a conference on emergency problems in higher education, called by the American Council on Education.

Sessions Thursday through Saturday will be devoted to discussion of such immediate problems as enrollment, lack of facilities, veterans' education and use of government surplus property. Participants will include John R. Steelman, U. S. commissioner of education; General Omar Bradley, director of Veterans' Administration; Senator Mead of New York, Senator Fulbright of Arkansas and other legislators who are taking the lead in emergency housing and education bills.

A program of positive action to meet current crises in higher education will be drafted following discussion.

"U" Course Will  
Aid Orchestras  
In High Schools

An effort to help high schools throughout the state build up their orchestras, which were suspended in many localities during the war, is being made at the University of Minnesota this summer in a workshop program for high school music teachers. The workshop is an informal method of studying, in which actual practice in teaching is given and the teachers often play the role of pupils.

For the study of school music, 35 high school students from various towns in the state and the Northwest have been assembled on the campus to play in a summer orchestra. Gerald R. Prescott, University band director, in organizing the orchestra found a definite shortage of string instrument players in the high schools.

Most schools maintained their bands during the war in preference to orchestras, Prescott said, as the bands could be used for public appearances in wartime drives and at sports events. Now the teachers need help in ways to interest and develop young players of the orchestra instruments.

Boys and girls playing in the clinic orchestra have received private lessons on their instruments in addition to rehearsing as a group under the direction of George Dasch, conductor of the Chicago Businessmen's Symphony orchestra and a summer session instructor at the University.

Most of the teachers registered for the orchestra study also are taking part in a chorus workshop, in which they sing as a choral group themselves. At the conclusion of the first summer session, the end of July, they will broadcast a program over the University radio station KUOM. The chorus was organized by Robert W. Winslow, assistant professor in the University's music department, and receives instruction from several visiting teachers as well as members of the regular faculty.

## Water, Water, Everywhere?

### "U" Geologist Tells Why Not

Minneapolis, July --It is a known fact that a high percentage of the rain that falls on the earth seeps into the soil and then percolates into the rocks below the surface. If so, why isn't it possible to dig or drill a well anywhere in Minnesota and obtain an ample supply of water?

The answer to this question, according to Dr. George A. Thiel, chairman of the department of geology and mineralogy at the University of Minnesota, is found in the variation in the porosity of the different kinds of rocks and subsoils underlying the state.

Some rocks and subsoil deposits are very porous. That is, the pore spaces are sufficiently large so that water can flow through them freely. Other rocks and subsoils are far less porous. Generally speaking, the more porous the underlying material the more reliable source of ground water it is.

From the standpoint of the yield of ground water, Dr. Thiel explained, Minnesota may be divided into three major areas, each with its own water supply problems.

From St. Cloud northward to the Canadian boundary and westward to the Red River valley, the glacial drift rests on ancient crystalline rocks which have a porosity of less than 2 per cent. Over that entire area, the only reliable source of ground water is the glacial drift.

In many localities in this area these glacial deposits are composed of unsorted boulder clays which are very dense. Even if they are saturated with water, the flow is so slow that the yield of a well is small. In localities where layers of sand and gravel are interbedded with the clay, ample supplies of water are found in the coarser sand and gravel beds.

Most of the southwestern part of the state, from Swift and Kandiyohi

more

counties southward to the Iowa-Minnesota line, is underlaid by a series of sandstones and shales which occur under the glacial drift. These layers rest in turn on the granites and other crystalline rocks such as are exposed in the Minnesota valley near Granite Falls, Morton and Montevideo.

These sandstones yield water abundantly, but much of the water contains such high percentages of dissolved mineral salts that it is unfit for domestic and industrial use. Here again, the purest water occurs in the glacial drift.

The southeastern counties, from Wright county southward to Mankato and eastward to the Mississippi river, are over an area in which the rocks below the glacial drift contain layers of porous sandstones such as those exposed in the walls of the valleys of the Mississippi and St. Croix rivers. These sandstone layers have a porosity of from 20 to 35 per cent, and, where saturated with ground water, wells that penetrate them yield from 500 to 1,000 gallons per minute.

Structurally, these rocks form a broad trough-like structure, one margin of which crops out along the Mississippi valley and the other under the glacial drift in the counties to the north and south of Mankato. The Twin Cities area is a local, saucer-shaped basin at the north end of the larger trough-like structure. Because of these sub-surface formations, southeastern Minnesota is endowed with an exceptionally large supply of artesian water.

Faculty members of the University of Minnesota school of nursing and college of education gave a luncheon at Coffman Memorial union yesterday for Miss Mildred Tuttle, nursing consultant of the W. K. Kellogg foundation, Battle Creek, Mich., who spent the past two days at the University, surveying nursing education facilities. The Kellogg foundation is interested in allocating funds to aid nursing education.

JUL - 1946  
A. J. [unclear]

The new formula used by the Veterans' Administration in determining the tuition rates for the education of veterans will result in an increase of from one-third to one-half in the income of the University of Minnesota from veteran enrollment, W. T. Middlebrook, vice president of the University for business administration, announced Tuesday.

Up to January 1 of this year, the Veterans' Administration, under the G. I. Bill of Rights, paid the University the equivalent of non-resident tuition, or approximately \$160 per academic year, for each veteran enrolled. The new rate, Middlebrook explained, known as a "credit hour rate," is determined by dividing the total of instructional salaries paid by the University in the quarter by the total number of credit hours in the previous quarter.

Under this new tuition formula, the Veterans' Administration will pay the University approximately \$225 per academic year for each veteran enrolled. Instructional salaries at the University represent approximately two-thirds of the total education cost. Thus, under the new tuition formula, the University will receive from the Veterans' Administration about two thirds of the cost of educating each veteran. The remaining one-third of the cost must be borne by the state through legislative appropriations. Middlebrook added that the new tuition formula still gives the University a lower rate than most private colleges and universities receive from the Veterans' Administration.

At present, the credit hour rate at the University of Minnesota is approximately \$6. However, this rate, according to Middlebrook, is expected to drop as enrollment increases. Limited available funds for additional staff and limited funds for added classroom and laboratory space will result in larger classes and fewer instructors per student. This will result in a lower credit hour rate.

Thus, as the credit hour rate decreases, the Veterans' Administration will pay a lower tuition for each veteran student, and the state will have to bear a larger proportionate share of the over-all cost of his education.

The increase in income to the University from the hike in veteran tuition was taken into account when the budget was made up recently, Middlebrook explained. The added income anticipated from this source, he said, made it possible for the University to balance its budget for the coming year.

In the years ahead, the University's business administrator pointed out, as the veterans leave the campus and are replaced by regular students paying lower tuition rates and provided also that enrollment remains at its current high level as it is expected to do, the University will require larger appropriations from the state in order to balance its budget.

Veterans are assured by the revised G.I. bill that there will be no deduction of any tuition paid in their behalf by the Veterans' Administration from any bonus which the Congress may at some time grant them.

An invitation to anyone in the state having problems related to water or mineral resources to submit his questions to the Minnesota Geological Survey at the University of Minnesota was extended today by Dr. George M. Schwartz, new director of the survey.

"All queries concerning water supplies and the possible economic value of minerals found in the state will receive prompt and thorough attention," Dr. Schwartz stated. "Steps are being taken," he said, "to expand the survey and to improve its service to the people of the state." Dr. Schwartz, who succeeded Dr. Frank F. Groat as director of the Minnesota Geological Survey July 1, has been field geologist for the survey since 1921, and a member of the staff of the University's department of geology and mineralogy since 1921. He attained the rank of professor in 1944. Dr. Schwartz is the author of 90 published scientific articles and bulletins.

The Minnesota Geological Survey was founded by the state legislature in 1872, as a department of the University. Governor Horace Austin approved the act establishing the survey, and Newton H. Winchell served as the first director.

Three lectures, open to the public, will be given at the University of Minnesota next week under sponsorship of the Program in American Studies, with James T. Farrell, noted novelist who will arrive on the campus Sunday, giving the first talk, Wednesday at 3 p.m. in the Museum of Natural History Auditorium. Farrell's topic will be "Social Obligations of the Novelist."

Sterling A. Brown, associate professor of English at Howard University, Washington, D. C., will give the convocation address Thursday at 11 a.m. in Northrop Memorial Auditorium on "The Negro in American Culture."

George V. Ferguson, former executive editor of the Winnipeg Free Press, will speak Friday at 3 p.m. in Murphy hall auditorium on "The United States and Canada: The Entangling Alliance." Ferguson has been active in the Foreign Policy Association in the United States and Canada and recently published "The Aftermath of the War." He is teaching a course this summer at the University.

Farrell will teach a class next week on the campus for students registered in the American Studies program, which is under direction of Professor Tremaine McDowell. Brown has been teaching courses during the first summer term. He is known for his work in American literature and is the author of the "The Negro in American Fiction" and co-editor of "The Negro Caravan." He holds degrees from Williams College and Harvard University and was holder of a Guggenheim fellowship in 1937-38.

JUL 12 1946

SPECIAL TO THE ROCHESTER POST-BULLETIN

Minneapolis, July\_\_\_ - Three major appointments on the Mayo Foundation were made by the Regents of the University of Minnesota at their July meeting Friday. Appointed were: Dr. Smith Freeman as professor of physiological chemistry, Dr. Kendall Brooks Corbin as professor of neuroanatomy and Dr. Francis J. Braceland as professor of psychiatry.

Dr. Freeman comes to the Mayo Foundation from Northwestern university where he has served as a staff member since 1939, attaining the rank of professor in 1945. His undergraduate work was done at Park college, 1924-28, and he has received the following degrees from Northwestern university: master of science in biochemistry, 1930; doctor of philosophy in biochemistry, 1933; and doctor of medicine, 1938. He was a fellow of the National Research council 1933-34.

Appointed a fellow on the Mayo Foundation in April 1945, Dr. Corbin received his bachelor's degree from the University of California and his master's doctor of medicine degree from Stanford university in 1935. In 1934, he became instructor of anatomy at Stanford university and served there until 1938, when he went to the University of Tennessee as professor of microscopic anatomy.

Former dean of medicine at Loyola university, Dr. Braceland comes to the Foundation directly from the Marine Corps which he entered in 1942. He received his doctor of medicine degree from Jefferson Medical college in 1930. He served on the staff of the Jefferson Medical college hospital 1930 to 1932, and on the Pennsylvania hospital staff 1932 to 1935. Then followed a period of study abroad, both in Switzerland and in London. In 1936, he returned to the staff of the Pennsylvania hospital and the following year became dean of medicine at Loyola,

a position which he held until he entered the Marine Corps in 1942.

Dr. Freeman's appointment is effective September 1, while the appointments of Drs. Corbin and Bracciani became effective as of July 1. All three of the new appointees are married.

##

Minneapolis, July - W. Donald Oliver of Minneapolis, son of Mr. and Mrs. William R. Oliver, 163 Nevada Street, Dubuque, and philosophy instructor at the University of Minnesota, has received a Guggenheim fellowship for the year 1946-47 to write a book and has been granted leave by the University's board of regents. He and Mrs. Oliver will leave early in August to make their home in Stony Creek, Conn., for the coming year.

The fellowship was granted to enable Oliver to write a book on philosophy, "Theory of Order," on which he has done preliminary work for several years. A member of the University faculty for the past 10 years, Oliver served in the army air forces from 1942 to 1945 as an instructor in preflight courses. He returned to the University last fall.

A native of Dubuque, Oliver received bachelor of philosophy and doctor of philosophy degrees from the University of Wisconsin.

Sterling A. Brown, associate professor of English at Howard university, Washington, D. C., and summer lecturer at the University of Minnesota for the Program in American Studies, will give the University convocation address Thursday at 11 a.m. in Northrop Memorial auditorium on The Negro in American Culture.

Brown is the first Negro to hold a major appointment at the University of Minnesota. He is known for his work in American literature in the fields of Negro creative literature and the Negro character in American literature and culture. He is the author of "The Negro in American Fiction" and co-editor of "The Negro Caravan."

Born in Washington, D. C., Brown holds a bachelor's degree from Williams college and a master's from Harvard university. He taught at Virginia Theological Seminary and College, Lincoln university, Jefferson City, Mo., and Fisk university, Nashville, Tenn., before going to Howard university in 1929. He also has been visiting lecturer at several universities, including Vassar and New York university, and held a Guggenheim fellowship in 1937-38. He has also contributed studies to the American Council of Learned Societies and the Carnegie-Myrdal Study of the Negro in America.

Barnhart Given

Leave From 'U'

For News Study

Minneapolis, July---Thomas F. Barnhart, professor of journalism at the University of Minnesota, has been granted a leave of absence by the Board of Regents for the academic year 1946-47 to complete a study of small-town weekly newspapers in Minnesota and neighboring states and several other selected areas in the South and on the Atlantic Coast.

Barnhart, who will leave his duties at the University soon, will gather material for a book devoted to modern methods of editing small-town papers. He plans the book as a companion volume to his book on "Weekly Newspaper Management" published in 1935. Barnhart also is the author of "Newspaper Sales Promotion" published in 1939, and scores of articles on the newspaper profession.

Well-known among newsmen of Minnesota and the nation, Barnhart has appeared frequently on the programs of the National Editorial association, the Inland Daily Press association, the Minnesota Editorial association and numerous state press groups in various sections of the country.

For several years, he has served as program chairman of the Editors' Short Course sponsored annually by the University's Department of Agriculture and School of Journalism. An expert in newspaper typography, he has designed several award winning newspapers including the 1946 Ayer trophy winner, The Rochester (Minn.) Post-Bulletin, since joining the staff of the University of Minnesota's School of Journalism in 1931.

In his study of small-town weekly newspapers during his furlough, Barnhart said that he plans particular emphasis on news sources, news policies and procedures in news coverage of small-town and trade area activities.

"I'm headed back to the grass roots," Barnhart stated, "to enrich my acquaintance with the land, the people and the ways of small-town life."

Who's Who Lists

237 Members of

University Staff

Minneapolis, July----"Who's Who in America," the long-established guide-book of fame, has just issued a new volume which indicates, from its listings, that one way to become famous is to be a member of the University of Minnesota staff.

In the 1946-47 edition, the University of Minnesota reaches a new high for staff members listed, a total of 237 names appearing, 36 of them for the first time. Dr. James L. Morrill, president, and William T. Middlebrook, vice president in charge of business administration, are among the University officials who are in "Who's Who" for the first time this year.

The book is published every two years, and in the five volumes issued since 1938, the University's "famous people" have increased from 164 to the present record high of 237.

Most likely age for professors to become famous is around the half-century mark, apparently, as the average age of the 36 newly-listed University men is 51.4 years. Average age for all the entries from the University is 58.2 years.

Among the University's new entries are Dr. Lawrence R. Boies and Dr. Cecil J. Watson, department heads in the medical school; Miss Katharine J. Densford, director, school of nursing; T. A. H. Teeter, director of summer session and engineering professor; George a Thiel, geology department chairman; Paul M. Oberg, music department chairman, and J. William Buchta, physics department chairman.

Other new names from the University are Drs. Charles A. Aldrich, Edgar V. Allen, John J. Bittner, Walter M. Boothby, Charles D. Creevy, Arthur U. Desjardins, George B. Eusterman, Frederick A. Figl, Robert E. Fricke, Ernst Gellhorn, Ralph K. Ghormley, Harold C. Habein, Erling W. Hansen, Philip S. Hench, William R. Lovelace, II, William T. Peyton, John F. Pohl, James T. Priestly, Arthur H. Sanford, Wesley W. Spink and Carl W. Waldron. Also Ralph H. Brown, Alburey Castell, Clarence C. Ludwig, Charles E. Rogers, Raymond H. Shove and George B. Vold.

Colleges Draft

Emergency Plan

For Fall Load

Minneapolis, July\_\_\_ Preliminary measures aimed to make a college education possible for all of the 41,000 students expected to apply for admission to Minnesota colleges and universities in the fall were mapped out at a meeting of representatives of most of the higher education institutions of the state, held at the University of Minnesota Thursday, July 11.

Core of the plan adopted at the session, called by Dean M.Schweickhard, state commissioner of education, will be the establishment of a clearance center at the state department of education office for the referral of applicants from already-filled colleges to other colleges in the state which still have accommodations for additional students.

Surveys conducted by the Minnesota Association of Colleges and Universities show that teachers' and junior colleges in the state have the greatest room for enrollment expansion at this time, the University of Minnesota and most of the other four-year institutions having already expanded their capacities in greater proportion. The new plan will seek to channel applicants to the two-year colleges nearest their home towns for their first two years of work, with the prospect of later transferring to the colleges of their original choice. Teachers' colleges, it was emphasized, can offer courses desired by students who have no intention of becoming teachers.

An advisory committee named at the meeting to assist Schweickhard in setting up the referral office will consist of the executive committee of the Minnesota Association of Colleges and Universities, plus representatives of the University and the junior and teachers' colleges, with Dean T.R.McConnell of the University as chairman. This group also will devise a method of directing students to the "second choice" colleges with a satisfactory arrangement for adjustment of credits at the time of transfer to another institution.

The predicted enrollment of 41,000 college students in Minnesota next fall is 10,000 higher than the peak registration of 31,600 for any previous term in the state's colleges. Estimates indicate that at least 25,000 of the fall registrants will be veterans.

Extensive use of prefabricated housing for several communities in the south will be studied by Dr. F. Stuart Chapin, chairman of the University of Minnesota's sociology department and director of the school of social work, during a sabbatical furlough granted by the University's board of regents for next winter quarter.

Dr. Chapin will go to Knoxville, Tenn., to survey entire towns nearby which have been built by the Tennessee Valley Authority, using "prefabs" for all housing. He also will go to Dallas, Texas, to study suburban developments of ready-built houses.

"Prefabrication possibilities are best in the south, because of the mild climate," Dr. Chapin said, but workable ideas for adaptation to northern climates can be obtained from the experiments in the south, where this type of housing has made its greatest stride."

In addition to studying housing, Dr. Chapin will devote part of his leave to writing two projected books on social work, for which he has done for the past 10 years. One will be on statistical methods and the other on social organization.

Dr. Alice L. Shea, associate professor of social work at the University, has been given sabbatical leave for the fall quarter to study psychiatric social work in Chicago. Upon her return to the faculty, she will have charge of graduate courses in psychiatric social work.

Minneapolis, July - A grant of \$75,025 has been made by the Kevy department to the University of Minnesota for the purpose of financing basic research by University scientists in the field of nuclear or atomic physics, H. H. Willey, vice president of the University for academic administration, announced today.

Made through the Kevy's Office of Research and Invention, the grant is intended to provide for the intensive study of problems in the atomic field for one year in the laboratories of the University's physics department. Because of the long-range aspect of the project, it is anticipated that the work will be continued in succeeding years through further financial assistance from the Kevy.

Directing the atomic research project at the University will be Dr. John T. Tate, Dr. John H. Williams and Dr. Alfred O. G. Klav, all staff members of the physics department.

Dr. Tate is well known for his work on the perfection of submarine detection devices while connected with the Office for Scientific Research and Development during the war. Drs. Williams and Klav were associated during the war with the Manhattan District in the development of the atomic bomb. Dr. Klav obtained from his scientific studies in 1940, what he was the first to separate Uranium-235, a step essential to the later work which resulted in the atomic bomb.

"This project in nuclear research involves no direct military application," Dr. Tate stated today. "The Navy is taking a long-range view of the subject of nuclear physics and is developing a pool of pure research in the atomic field as well as  $\beta$  in all fundamentals of physics."

The study to be conducted in the University's laboratories will follow two major courses:

1. The scattering and interaction of fundamental particles, protons and neutrons, and the combination of those particles in the lighter elements, helium and hydrogen.

2. Separation of the isotopes of various elements in order to study their nuclear properties.

The University physicists emphasized that the work they will do under the Navy grant has no direct military application but rather will be devoted to pure research in the phenomena of nuclear or atomic physics. Through the employment of advanced instruments perfected during the war-years, the inventions of Dr. Hiser—they expect to pursue their studies into hitherto unexplored fields.

Chancellor George A. Selke of the University of Montana, former president of the St. Cloud State Teachers' college, will give the commencement address for the University of Minnesota first term summer session graduation Thursday at 8 p.m. in Northrop Memorial auditorium. Selke's topic will be "Problems of World Citizenship."

A graduate of the University of Minnesota, Selke taught for several years on the University faculty. He served as a captain in the army during World War II in England and at Salzburg, where he was cultural and educational director. He was Minnesota state director of the War Manpower commission in 1943, and director of the National Youth administration for Minnesota from 1935 to 1939.

A total of 195 degrees will be awarded at the commencement ceremony. Of these, 58 will be from the graduate school, which will give nine doctor of philosophy degrees and 49 master's degrees.

Final special event of the first term in the University of Minnesota summer session will be a talk on "The Real Mexico" by Glee Danson, Texas-born writer, who will speak Friday at 9 p.m. in the Museum of Natural History auditorium.

Mrs. Danson will describe the Mexican people and country of the Rio Grande Valley, where she grew up. She described the border life in her novel, "She Came to the Valley."

After growing up in the Texas border town of Mission, Mrs. Danson attended Southern Methodist university, where she was graduated at 18. She taught Spanish at Mission for two years, then married and settled in Lexington, Ky. She took her master's degree at the University of Kentucky and taught English there until 1942. She has studied at five different universities and traveled in Central and South America and Mexico.

'U' Registration

For Fall Term

To Start Aug. 1

Minneapolis, July - Under a new plan to be tried for the first time this summer, advance registration will be underway by August 1 at the University of Minnesota for all students planning to enroll for the fall quarter, which starts September 30.

The advance registration will, it is hoped, prevent the rush of thousands of students who otherwise would have to be registered in the one-week period prior to the opening of classes.

A predicted fall enrollment of over 21,000 makes it imperative both from the students' and the University's viewpoint for all students who can to come to the campus this summer and complete their registration, Dean R. E. Summers, director of admissions and records, emphasized.

New students should not come to the campus for registration until they have received their admission certificates indicating that their applications and credentials have been received and that they are accepted for entrance. The student entering for the first time should expect to spend two or three days on the campus to complete his registration. Those who have not yet made application should do so immediately.

By registering in August or early September, students can obtain their books and supplies early and can assure themselves of places in certain classes which are limited in size. Veterans, who will make up approximately half of the student body next year, are urged to register during the summer period. The University bureau of veterans affairs will continue in operation throughout the summer and will furnish purchase vouchers for books and other classroom needs as soon as veterans complete their registration.

The plan of early registration will help the University in determining its needs for instructors and classroom space for the fall quarter, Dean Summers also pointed out.

U. of M. Has

Given Only 21

Honor Degrees

Minneapolis, July\_ \_ \_ In the 21 years since the University of Minnesota first awarded an honorary degree in 1925, it has given exactly 21 such degrees, an average of one per year. The record contrasts sharply with the number given at other colleges in the country and is significant in the light of recent arguments on the practice.

The national average for all state and other public colleges in 1940 was one "free" degree to every 648 earned degrees. At Minnesota, the average for the 21-year period has been one honorary to every 2,834 regular degrees. In private colleges the ratio was one to 83 in 1940.

The late Dr. William Watts Folwell, first president of the University, was the first person to receive an honorary degree from Minnesota. The doctor of laws degree was conferred upon him in June, 1925, and no further honorary degrees were bestowed until 1931, when Dr. George E. Vincent, former University president, and the late Frank B. Kellogg were given doctor of laws degrees.

The list of those receiving honorary degrees since then includes Gratia Countryman, William J. Mayo, Charles H. Mayo, Elbert H. Carpenter, Ada Comstock, Sister Antonia McHugh, Henry Johnson, F. Melius Christansen, Frederick M. Eliot, Fred B. Snyder, Charles P. Berkey, Thomas S. Roberts, Louis B. Wilson, Dimitri Mitropoulos, Donald J. Cowling, Andrew Boss, Walter C. Coffey and Guy Stanton Ford. Dr. Coffey and Dr. Ford received the degrees during the inaugural ceremonies for President James L. Morrill last April.

UNIVERSITY OF MINNESOTA  
NEWS SERVICE  
July 23, 1946

THE UNIVERSITY OF MINNESOTA, MINNEAPOLIS, MINNESOTA

The University of Minnesota, now the second largest state university in the country, was founded February 13, 1851, when the State of Minnesota was still a territory. The territorial legislature specified that the University should be located on the banks of the Mississippi river near St. Anthony Falls in the Village of St. Anthony. St. Anthony is now the city of Minneapolis, a thriving metropolis of a half million people. Minneapolis and the adjacent city of St. Paul, the capital of the state, are popularly known as the Twin Cities, the Gateway to the Northwest. The main campus of the University is located in Minneapolis, and the farm campus in St. Paul.

Spring quarter (1946) attendance of fully matriculated degree students totaled 18,775 and included 9,000 veterans. Enrollment for the fall (1946) quarter is expected to aggregate 21,600 with approximately one-half that number consisting of veterans. In addition to the fully matriculated degree students, thousands of citizens of the state attend the innumerable short courses and extension courses held on both campuses and ranging from cancer control to bee keeping and fishing resort management. More than 50,000 persons received instruction from the University of Minnesota during the last academic year.

In a valiant effort to meet the housing needs of married veteran students, the University has established a settlement of trailers, quonset huts, and pre-fabricated houses on a site midway between the main campus and the farm campus, which has been named University Village. Proposed for construction in the village soon are several permanent type apartment buildings.

Directing the destinies of this great University of the Midwest is Dr. James Lewis Morrill, eighth president of the institution, whose formal inaugural ceremonies were held last April.

The official University song is "Hail! Minnesota," originally the class song of the Class of 1904, written by Truman E. Rickard, a member of that class. The song appealed so strongly to the student body that, by general consent, it soon became the University song. With one change in the words, "Hail! Minnesota" was made the state song at the last session of the legislature. Ranking also as favorites among the University of Minnesota songs are "The Minnesota Rouser" and Sousa's "Minnesota March."

Included in Minnesota's famous graduates are:

Harold E. Stassen, former governor of Minnesota, and delegate to the United Nations Conference.

Wayne L. Morse, United States Senator from Oregon.

Major General Leif J. Sverdrup, United States Army.

Major General John E. Dahlquist, United States Army.

more

Dr. Owen Wangensteen, internationally famous surgeon, head of the department of surgery at the University of Minnesota's school of medicine.

Frederick L. Hovde, president of Purdue university.

Dr. Raymond B. Allen, president of the University of Washington.

George A. Selke, chancellor of the University of Montana.

Henry Harmon, president of Drake university.

Gregg Sinclair, president of the University of Hawaii.

Herbert J. Burgstahler, president of Ohio Wesleyan university.

Alfred O. C. Nier, of atomic bomb fame, and University of Minnesota physicist.

Bernie Bierman, coach of the Golden Gophers, Minnesota football team.

Bronko Nagurski, football immortal and famous wrestler.

James Ford Bell, chairman of the board of directors of General Mills, Inc.

Minton M. Anderson, vice-president of the Aluminum Company of America.

Donald Campbell, president of the Chase National Bank, New York.

William B. Stout, automotive engineer and designer.

Max Shulman, author.

Maude Hart Lovelace, author.

Levon West (Ivan Dmitri), noted etcher and photographer.

Gale Sondergaard, motion picture actress.

Roman Bohnen, actor.

UNIVERSITY OF MINNESOTA

MINNEAPOLIS 14

Office of the Director of  
University Relations

July 24, 1946

To: Members of the University Committee on Public Relations

From: W. L. Nunn

Subject: Minutes of the special meeting of the University Committee on Public Relations, room 238 Administration Building, July 17.

The problem which was considered: On the morning of July 17 Mr. Robert Braun, of the Milton Biow Company (large New York advertising agency), and Mr. J. E. Stewart, of the Phillip Morris Cigarette Company, arrived on the campus to conduct a poll among the students for the purpose of determining the seven most popular songs. They were under the impression that an agreement had been reached between the University and the advertising agency for permission to conduct this poll. Upon learning that no permission had been granted, they telephoned the advertising agency, and the Director of Production of this agency telephoned the Director of University Relations and explained that the material desired was to be used in a musical salute to the University on a Phillip Morris program, N.B.C., 6:00 p.m. Mpls. time, Tuesday, July 30. The program would open with a brief statement about the University of Minnesota with particular reference to enrollment, resources, problems, outstanding graduates, etc. After this background material on the University, the seven popular song hits selected by the students would be played by the Phillip Morris orchestra. The program would close with the University of Minnesota song. It was explained that Columbia University, University of California, Boston University, Penn State, Ohio State, and the University of Minnesota had been selected. The problem before the Committee on University Relations was to determine whether or not university facilities could be used for a student poll, the results of which would form the meat of a commercial radio program.

After considerable discussion, the decision was to deny the advertising agency the use of University of Minnesota facilities for the poll.

After the meeting, the Director of University Relations met with Messrs. Braun and Stewart and explained the situation and the decision which had been reached. This decision had obviously been anticipated, and the representatives responsible for the radio program asked whether or not they could conduct the poll off the campus and if the University would object if the University song was played and the salute given. No objection was raised to this plan, and on July 19 such a poll was conducted off the campus.

The result is that the salute to the University of Minnesota will proceed as scheduled, with one exception. We will not now be able to write the background story about the University but can make suggestions. However, I am fairly confident that the background material used on this program will be substantially as furnished by us, copy attached.

An enrollment of 10,000 students for the second term of the University of Minnesota summer session, which starts Tuesday, July 30, is predicted by Thomas A. H. Tector, director of the summer session. Registration is set for Monday, and classes will begin Tuesday morning to extend through August 31.

Advance registration was conducted last week for the second summer term, resulting in the recording of approximately two-thirds of the anticipated enrollment. Registration on Monday will be from 8 a.m. to 4:30 p.m.

In the first term of the summer session, which will close Saturday, there were 12,500 students, of whom 7,200 were veterans studying under the G. I. bill. The majority of these veterans are expected to continue through the second summer term.

Fledermaus Waltz.....Strauss-Klein

'U' Nursing

School Adopts

New Program

Minneapolis, July - Because the long-range nursing needs of the country call for more highly trained nurses who understand the increasingly complex techniques of medicine, the University of Minnesota's school of nursing has adopted a plan to offer only the five-year nursing course after January 1. Approved recently by the University's board of regents, the program is aimed to fill the needs of the nursing profession not only in numbers but in quality of training.

Students entering the nursing school this fall, however, will still have the opportunity, under the old plan, of choosing either the three or five-year program of study. The three-year or basic course leads to the degree of graduate in nursing, while students completing the five-year course are awarded the bachelor of science degree.

Facilities are available for all qualified high school graduates who wish to enter the fall quarter freshman class, which starts September 23. The U. S. Cadet Nurse corps, which enrolled its last class at the University in the fall of 1945, will continue in operation until this group finishes its training in 1948.

More nurses are needed right now and for the future, and these needs cannot be met without a core of highly trained women to serve as teachers and administrators in the numerous fields of nursing. The five-year course is adapted to fill these demands.

The need for more nurses is not due to a present shortage, Miss Katharine J. Densford, director of the University's school of nursing, explained, but rather to an ever-increasing expansion of the functions of nursing.

MORE

Care of war service casualties will extend over a long period of time, and the over-all use of hospitals by the entire population also is constantly rising. The daily hospital patient "load" has increased from 1,152,201 in 1943 to 1,405,247 in 1945.

Miss Lucile Petry, chief of the division of nursing, U. S. public health service, Washington, D.C., commended the University on making its change to the five-year program. Visiting on the University campus last week Miss Petry, who was formerly assistant director of the University's school of nursing, said:

"Demands and opportunities in nursing are greater than ever, and the University program leading to a degree is the best fitted to prepare young women to meet these needs."

The University of Minnesota, with the largest school of nursing in the United States, had a total of 1,005 students in nursing on June 30 this year. The school of nursing ranked fourth scholastically among all colleges and schools at the University in the last academic year. Established in 1909, it was the first university school of nursing in the world.

National goal for enrollment of nursing students this year is 40,000, according to Miss Densford, who also is president of the American Nurses' association. National enrollment has gained from 110,222 students in state accredited schools of nursing in 1943 to 130,909 in 1945. There were 1,250 such schools last year.

Film Service

At 'U' Aids

State Schools

Minneapolis, July - Recent addition to the University of Minnesota's visual education staff of two veterans with outstanding war experience in motion picture filming marks the re-establishment of the film production work in that department, which was abandoned during the war. The visual education department, providing a wide range of service to schools of the state, stands ready to help schools with any phase of their film production, Paul R. Wendt, director, reported.

Peyton M. Stallings, Jr., newly appointed production manager, was one of the three army signal corps men who made the motion picture record of the entire Nuremberg trials. James W. McCarron, new production assistant, served with the navy in the Pacific and helped make "The Fighting Lady," the famed movie of the aircraft carrier's part in the war.

The production staff has already assisted the Brainerd schools in completing a sound film of that town's school system, the movie to have its premier at the fair there in mid-August.

The University's film production department is much larger than that of any other university in the country, Wendt explained, and it assists other colleges and universities in this type of work. Advice on the use of films, slides and other audio-visual aids in program planning is given to many schools of the state.

In addition, a rental library of educational films is maintained by the Community Program Service of the University. Approximately 1,500 films are available, as well as slides and recordings. A total of 9,259 bookings were made last year to schools, civic organizations, churches, and similar groups. A new catalog of available material will be ready early in the fall and can be obtained by writing to Community Program Service, of which J. S. Lombard is director.

JUL 29 1946

Minneapolis, August - Peyton M. Stallings, Jr., son of Mr. and Mrs. Peyton M. Stallings of 903 Bruce Street, Tampa, was recently appointed production manager of the University of Minnesota's visual education department.

In this capacity, Stallings will supervise production of educational films, a service which is now re-established at the University following a wartime curtailment.

Stallings, who received his discharge from the army last spring, had considerable motion picture experience during the war. He served with the 3227th signal photo production department and was one of three army cameramen who made a motion picture record of the Nuremberg trials earlier this year.

Two music recitals, featuring John Anglin, tenor, and the Ambassadors of Song, a vocal octet, will be presented at the University of Minnesota this week as features of the second term summer session entertainment program. The octet will appear Monday at 8:30 p.m. in the ballroom of Coffman Memorial union, and Anglin will sing Wednesday at 8:30 p.m. in the Music auditorium.

The Ambassadors of Song, directed by Ray G. Steiner, will sing a cappella selections, classics, musical comedy songs and western melodies, appearing in cowboy costumes for the last group. Several members of the octet will sing solos or duets, and William Kreeger will play the piano.

Anglin, 25-year old Negro singer, studied at Xavier University in New Orleans and during his summer vacations worked with a Negro choir, of which he was soloist and director, touring in nearby states. The famed singer, Marian Anderson, broke her rule of "no auditions for anyone on tour" by hearing Anglin sing in Oklahoma City and predicted a great career for him.

Programs for the two concerts will be as follows:

AMBASSADORS OF SONG

I

- I. Grant us to do with Zeal. . . . . Bach
- An Evening's Pastorale. . . . . Shaw
- Passing By. . . . . Purcell
- John Peel . . . . . (arr.) Andrews
- II. Solo. . . . .
- Robert Norton-Cass

(MORE)

- III. On Wings of Song . . . . . Mendelssohn
- Dear Land of Home . . . . . Sibelius
- How Beautiful Art Thou . . . . . Schumann
- My Native Land . . . . . Gretchanineff

- IV. Duet-Solemn In Quest'era . . . . . Verdi
- Leonard Malsama-tenor
- Howard Berhalter-baritone

- V. Hail Bright Abode . . . . . Wagner
- Ave Maria . . . . . Couper
- Moonlight On The Water. . . . . Rossini

INTERMISSION

II

- I. Morning . . . . . Speaks
- A Spirit Flower. . . . . Campbell-Tipton
- I Won't Kiss Katy . . . . .(Arr.) Aschenbrenner
- Lift Thine Eyes . . . . . Logan
- II. Student Prince Selections . . . . . Ramberg
- III. Ritual Fire Dance . . . . . DeValla
- William Kroeger-piano
- IV. Great Day. . . . . Youmans
- Medley of Cowboy Favorites . . . . . Selected
- Rie Rita Selections . . . . . Tierney

JOHN ANGLIN

I.

- I Walk Along the Beaten Path. . . . . Alexander
- I Know the Lord Does Laid His Hands on Me. . Traditional
- I Want Jesus To Walk With Me . . . . . Traditional
- Land of Degradation . . . . . McGinsey

II.

She Never Told Her Love . . . . .	Haydn
Air (from <i>Comus</i> ) . . . . .	Arne
<i>Ombra Mai Fu</i> (from the opera <i>Xerxes</i> ) . . . .	Händel
<i>Vittoria, Mio Core</i> ( <i>Victorious my Heart</i> ) . .	Carraccioli

III.

O Cease Thy Singing Maiden Fair . . . . .	Rachmaninoff
I Feel Thy Breath Blow 'round Me . . . . .	Rubinstein
I See, I Hear . . . . .	Gretchaninoff
Over The Steppe . . . . .	Gretchaninoff

IV.

<i>Après Un reve</i> (After a dream). . . . .	Fauré
<i>Les Papillons</i> (The Butterflies) . . . . .	Chausson
<i>Chère Nuit</i> (Dearest Night) . . . . .	Bachelot

V.

Age and Youth . . . . .	Vencé
Do Not Go My Love . . . . .	Hageman
Ah Love But A Day . . . . .	Pretheroe
Let All My Life Be Music . . . . .	Spross

Examples of modern advertising art from two collections will be on display at the University of Minnesota Gallery in Northrop Memorial auditorium from Monday, August 3, through August 30, with visiting hours 8 a.m. to 5 p.m., Mondays through Fridays.

The two groups of pictures are a selection of the 1944-45 annual exhibition of the Art Directors' club of New York City, circulated by the American Federation of Arts, Washington, D. C., and Modern Advertising Art, a display prepared for the American Federation of Arts by the art department of Phillips Kuster academy and the Addison gallery, Andover, Mass.

The Art Directors' club exhibit consists of 27 original works and 95 engravers' proofs, including 32 of the 36 award winners in the annual competition. The club's final selection was made from 6,000 original entries. Categories represented in the display are human interest, atmosphere, style and glamour, humor, product, display, news, editorial art, design of complete advertisement, 24-sheet poster award and a special award for the best reproduction.

Among the artists represented are Bernard LeMoite, Clarence Carter, John Atherton, Steven Dehano, Dorothea Tanning, William S. Schwartz, Miguel Covarrubias, Peter Malck, John La Gatta, Peter Arno, Ray Prohaska and E. McKnight Kauffer.

The Modern Advertising Art collection consists of 16 large panels displaying layouts, drawings, diagrams and examples of work by leading advertising designers. The panels analyze contemporary advertising art both from psychological and design points of view.

Minneapolis, - Human beings will serve as volunteer

"guinea pigs" in a long-range experiment to be conducted at the University of Minnesota to determine the relationship between man's diet and exercise habits and his most deadly ailment, the degeneration of his heart and blood vessel system with resulting high blood pressure, hardening of the arteries or stroke. Subjects in this research project will be University students and groups of St. Paul and Minneapolis men, all volunteers.

Made possible by an initial grant of \$24,068 from the United States Public Health Service, the experiment will be conducted by Dr. Ancel Keys, director of the University's laboratory of physiological hygiene, whose recent study of starvation fatigue with conscientious objectors as subjects has received much attention throughout the country. Although the initial grant is for the fiscal year 1946-47 only, Dr. Keys explained that his new project is at least a five-year study and that he anticipates additional financial aid from the United States Public Health Service to enable him to complete the experiment on factors of cardio-vascular degeneration.

"Life insurance companies have been talking for a long time," Dr. Keys said, "about 'the penalty of overeating'. Life insurance statistics indicate that there is a relationship between obesity or overweight and the degeneration of the heart and blood vessels, the most common cause of death. Insurance firms employ height and weight tables in determining the obesity of applicants.

"Obesity itself, however," Dr. Keys pointed out, "cannot be

measured properly by height and weight alone. Other factors are involved such as the size of skeletal system and the heaviness of the bones. The true measure of obesity is excess fat. About 15 per cent of the weight of the normal human body is made up of fat."

Dr. Keys hopes that the results of his experiments may sharpen the definition of obesity and may give life insurance companies a basis for differential insurance rates. The subject never before has been studied on an extensive scale, he said.

"We want to know," stated Dr. Keys, "what a man's manner of living has to do with the breakdown and eventual failure of his heart and blood vessels, cardio-vascular degeneration. We want to know if that breakdown or degeneration is speeded up by overeating or by too much or too little exercise. We want to know how the physical changes involved in 'growing old' are related to the way in which a man lives his life.

"The two important factors of life which man can most easily control are the food he eats and the amount of exercise he gets. We want to know how man can order his life through control of his diet and exercise so as to prolong his life span."

About 400 men volunteers in two age groups will be used as "guinea pigs" in the experiment, Dr. Keys explained, and will be observed closely over a long period, at least five years. The volunteers will consist of two major groups. Half will be University of Minnesota students whose homes are in St. Paul and Minneapolis, who will be observed throughout their University careers and who may reasonably be expected to be available for observation following their graduation. The men in this group will range from 18 to 20 years of age as the observations begin next fall. The other half will be Twin City men, whose ages range from 45 to 60 as observations begin.

These volunteers will be given periodic examinations under highly standardized conditions in Dr. Keys' laboratory in the south tower of the

University's stadium. Closely watched will be their heart efficiency, the elasticity of their blood vessels and the efficiency of their circulation.

Standard conditions will prevail in all examinations and will include a room temperature of 77 degrees and room humidity of 50 per cent. The subject must be in state of absolute rest and must have eaten nothing for a period of 12 hours prior to the examination. Standardized exercises also will be taken by the subjects in the course of the examinations.

Dr. Keys is now building the apparatus necessary for the experiment and expects to start his observation of the volunteer human guinea pigs in the fall.

Dr. Keys came to the University of Minnesota in 1937, from the Mayo Clinic in Rochester, Minn., where he served as an associate professor of biochemistry on the Mayo Foundation for a year. In 1930-31, he was a National Research Council fellow at the Institute of Physiology at Copenhagen, Denmark. Later he lectured in physiology at Cambridge university in England and then went to Harvard university where he taught biochemical sciences for three years. He holds three degrees from the University of California.

His work at the University of Minnesota has been primarily in the fields of research in the experimental study of human functions, fatigue, efficiency of the heart, and problems of adjustment to climate. His work on Army rations early in the war led to the development of the "K" ration. He also contributed to the development and testing of the "C" ration and the "B" or "10-in-1" ration.

Minneapolis - A children's radio series, "Old Tales and New", written by Miss Betty Thomas Girling, director of the Minnesota School of the Air of the University of Minnesota radio station KUOM, has been selected by the Portland, Ore., public schools for use during the coming school year. The series, inaugurated in 1938 by KUOM and now the most popular feature of the School of the Air, has a listening audience of more than 6,500 Minnesota school pupils.

"Old Tales and New" is a series of dramatized stories for children of the primary grades. The Portland radio station KBPS has produced 32 scripts comprising the 1945-46 Minnesota series for broadcast to schools of the city. Transcriptions of the series also have been used by the Chicago schools.

Miss Girling's programs have won four national honors since 1940 at the Institute for Education by Radio, held annually in Columbus, Ohio. Miss Girling, a graduate of the University of Minnesota, has been on the staff of KUOM since 1940. She became program director in 1941 and director of the School of the Air in January this year. Recently she was appointed on the Canadian-American Committee for the Exchange of Educational Radio Programs.

The School of the Air, established in 1938, now broadcasts 14 programs over KUOM each week for classroom use in primary grades through high school, with a weekly listening audience of more than 30,000 pupils. The programs are planned to conform as nearly as possible with the general course of studies offered in schools of the Twin Cities area.

School of the Air broadcasts include, besides "Old Tales and New", four news background programs, five English social studies programs, a science series, a health commentary, a vocational guidance program and two music broadcasts each week. The programs are arranged under supervision of educators and are constantly checked through teacher committees on such phases as subject matter, presentation, vocabulary level and social significance.

Facilities for 50 more child polio patients will be provided by University of Minnesota Hospitals with establishment of a hospital department in the University farm campus students' health service building, Ray M. Amberg, superintendent of University Hospitals, announced late Wednesday.

The move is necessary because accommodations at the main University hospitals are filled, Amberg explained. The new department will be under the pediatrics department of the University, and patients will receive the same care they would get at the main buildings.

The National Foundation for Infantile Paralysis has agreed to give financial assistance in setting up the annex hospital, Amberg announced after conference with J. W. Allen, regional director of the Foundation, and Miss Carolyn Kingdon, executive assistant in the medical department of the Foundation.

All patients will be received at the main campus hospital, as formerly, and the acutely ill will be kept there, the farm campus building being used for those who are recovering or who have light cases. The annex department will be ready to receive patients by noon Thursday, Amberg said.

FOR IMMEDIATE RELEASE

TO: THE MINNESOTA DAILY

Col. R.A.Ericson, head of the Department of Military Science and Tactics, announced Thursday that the final selection of students for enrollment in the fall quarter advanced ROTC courses will be made during the first week of August.

Students who desire to enroll and who have not filed applications with the military department are advised to apply in Room 106, Armory, not later than August 1, Col. Ericson said.

All students who have already filed applications are requested to call at Room 106, Armory, for a final personal interview at any time between the hours of 9 a.m. and 4 p.m., July 24 to 26 or July 29 to 31, inclusive. Applicants who do not appear for this personal interview may not be considered in the final selections.

Col. Ericson also announced Thursday that credit for the two-year elementary ROTC course may now be granted for one year of prior service in the Army, Navy, Marine Corps or Coast Guard. Many ex-servicemen, therefore, may be eligible for enrollment this fall in the two-year advanced course.
