

Appendix D: Environmental Weed Strategy - Criteria for the Assessment and Rating of Weeds in Terms of their Environmental Impact on Biodiversity (CALM 1999)

ENVIRONMENTAL WEEDS RATING

- **Invasiveness**- ability to invade bushland in good to excellent condition or ability to invade waterways (Score as yes or no).
- **Distribution** – wide current or potential distribution including consideration of known history of wide spread distribution elsewhere in the world (Score as yes or no).
- **Environmental Impacts** – ability to change the structure, composition and function of ecosystems; in particular an ability to form a monoculture in a vegetation community (Score as yes or no).

The Rating System used in the Environmental Weed Strategy for Western Australia

High	A weed species would have to score yes for all three criteria. Rating a weed species as high would indicate prioritising this weed for control and/or research.
Moderate	A weed species would have to score yes for two of the above criteria. Rating a weed species as moderate would indicate that control or research effort should be directed to it if funds are available; however it should be monitored (possibly a reasonably high level of monitoring).
Mild	A weed species scoring one of the criteria. A mild rating would indicate monitoring of the weed and control where appropriate.
Low	A weed species would score none of the criteria. A low ranking would mean that this species would require a low level of monitoring.

Appendix E: Fauna species which Occur or Potentially Occur in the Study Area (Western Wildlife 2016)

Table 1: Amphibians which occur or Potentially occur in the Study Area

Mantinea '16 & Carlton '16 = species recorded in the study areas during the 2016 fauna survey.

WAM = species recorded in the area on the Western Australian Museum Specimen Database (see Table 6 of main report).

FSDB = species recorded in the area on the Fauna Survey Returns Database (see Table 6 of main report).

Mantinea '09 = species recorded on the Mantinea Plain in 2009 (Strategen 2010).

PS, WB, EB = species recorded on the Packsaddle Plain, East Bank or West Bank in 2009 (Strategen 2010).

Ord Stage 2 = species recorded on the Weaber Plan, Knox Plain or Keep River Plain in 1996/1997 (Ecologia 1997).

DPAW = species recorded in the area on DPAW's Threatened and Priority Fauna Database (see Table 6 of main report).

EPBC = species/species habitat recorded in the area on the EPBC Act Protected Matters Search Tool (see Table 6 of main report).

SZ412: Bat call identification from Kununurra, WA

SUMMARY

Bat identifications from acoustic recordings are provided from near Kununurra, in the Kimberley region of Western Australia. At least 11 species of bat were identified as being present, with the possibility of others that could not be distinguished based on their echolocation call characteristics (**Tables 1 and 2**). There was no evidence of the presence of the Bare-rumped Sheath-tailed Bat *Saccopteryx saccolaimus* (**Table 3**), however the recordings of the Northern Leaf-nosed Bat *Hipposideros stenotis* are of significance. Representative echolocation calls are provided (**Figure 1**), as recommended by the Australasian Bat Society (ABS 2006). Further data are available should verification be required.

COMMENTS ON IDENTIFICATIONS

The identification of bat species from full spectrum WAV format recordings of their echolocation calls was based on measurements of characteristic frequency, pulse shape, and the pattern of harmonics. Harmonic patterning was especially useful for distinguishing species of the Emballonuridae from the Molossidae. For these low-frequency emitting bats (producing calls with the characteristic frequency of the loudest harmonic below 30 kHz), identification to species was made only when more than one harmonic was visible. The identification of the Northern Free-tailed Bat *Ozimops lumsdenae* (*Mormopterus beccarii*) was aided by the pattern of harmonics and pulse shape, but there were only a few call sequences where the harmonic profile characteristic of this species was observed.

Some call sequences could not be identified reliably to one species because of the overlap in echolocation pulse characteristics amongst one or more candidate species. The calls of the Hoary Wattled Bat *Chalinolobus nigrogriseus*, Little Broad-nosed Bat *Scotorepens greyii* and Northern Broad-nosed Bat *Scotorepens sanborni* are similar and could not be distinguished. Likewise, the calls of the Northern Bent-winged Bat *Miniopterus orianae orianae* and Forest Pipistrelle *Pipistrellus adamsi* cannot be distinguished reliably for some call types, and sometimes also overlap with the calls of the Northern Pipistrelle *Pipistrellus westralis*.

An assessment of calls with a characteristic frequency lower than 25 kHz for evidence of the presence of the Bare-rumped Sheath-tailed Bat *S. saccolaimus* was made in the context of seven criteria that can be helpful in separating the calls of the three Australian species of *Saccopteryx* and other low-frequency-emitting bat species (**Table 3**). Calls typical of *Saccopteryx* sp. met criteria 1–4, however none of these particular features by themselves or in combination provided an unambiguous identification of *S. saccolaimus*. Calls with characteristics that placed them with the confidence region of *S. saccolaimus* (Criterion 4;

SZ412: Bat call identification from Kununurra, WA

Figure 2) were examined, and were observed to be derived from other species (*Ozimops lumsdenae*, *Saccopteryx flaviventris*, *Taphozous georgianus*). While the method for distinguishing the calls of each *Saccopteryx* species is not fully effective, there was no compelling observation that suggested the presence of *S. saccostomus* from any recording site.

METHODS

Data recorded in full spectrum lossless WAC0 format with Wildlife Acoustics SM2BAT+ bat detectors (sampling rate 384 kHz, trigger 6 dB above background; 48 dB gain; set to turn on automatically at sunset and off at sunrise) was converted to high quality bitstream WAV format using Kaleidoscope 3.3.0 software.

A multi-step acoustic analysis procedure developed to process large full spectrum echolocation recording datasets from insectivorous bats (Armstrong and Aplin 2014; Armstrong et al. 2016) was then applied to the recordings made on the survey. Firstly, the WAV files were scanned for bat echolocation calls using several parameter sets in the software SCAN'R version 1.7.7 (Binary Acoustic Technology), which also provides measurements (in “SonoBat™ compatible output”) from each putative bat pulse. The output was then used to determine if putative bat pulses measured in SCAN'R could be identified to species. This was done using a custom [R] language script that performed three tasks: 1. undertook a Discriminant Function Analysis on training data from representative and reference calls from northern Australia; 2. from the measurements of each putative bat pulse from SCAN'R, calculated values for the first two Discriminant Functions that could separate the echolocation call types derived from the analysis of training data, and plotted these resulting coordinates over confidence regions for the defined call types; and 3. facilitated an inspection in a spectrogram of multiple examples of each call type for each recording night by opening the original WAV files containing pulses of interest in Adobe Audition CS6 version 5.0.2. The [R] language script also included a separate process that repeated the above steps using training data from low frequency emitting species, and which is able to separate *Chaerephon jobensis* from *Saccopteryx* species, and the three Australian species of *Saccopteryx* from each other (Armstrong et al. 2014).

Species were identified based on information in Milne (2002), Churchill (2008) and McKenzie and Bullen (2012), and nomenclature follows Reardon et al. (2015) and Jackson and Groves (2015). Examples of calls are illustrated with the help of the [R] package ‘seewave’ (Sueur et al. 2008).

TABLE 1. Species identified in the present survey from all sites combined.

RHINONYCTERIDAE	
Orange Leaf-nosed Bat	<i>Rhinonicteris aurantia</i>
HIPPOSIDERIDAE	
Northern Leaf-nosed Bat	<i>Hipposideros stenotis</i>
EMBALLONURIDAE	
Yellow-bellied Sheath-tailed Bat	<i>Saccopteryx flaviventris</i>
Common Sheath-tailed Bat	<i>Taphozous georgianus</i>
VESPERTILIONIDAE	
Gould's Wattled Bat	<i>Chalinolobus gouldii</i>
Northern Pipistrelle	<i>Pipistrellus westralis</i>
Northern Cave Bat	<i>Vespadelus caurinus</i>
MOLOSSIDAE	
Greater Northern Free-tailed Bat	<i>Chaerephon jobensis</i>
Northern Free-tailed Bat	<i>Ozimops lumsdenae</i>
Ambiguous	
Hoary Wattled Bat / <i>and/or</i> Little Broad-nosed Bat / <i>and/or</i> Northern Broad-nosed Bat	<i>Chalinolobus nigrogriseus</i> / <i>Scotorepens greyii</i> / <i>Scotorepens sanborni</i>
Northern Bent-winged Bat / <i>and/or</i> Forest Pipistrelle	<i>Miniopterus orianae orianae</i> / <i>Pipistrellus adamsi</i>

Definition of confidence level codes:

— Not detected.

◆ Unambiguous identification of the species at the site based on measured call characteristics and comparison with available reference material. Greater confidence in this ID would come only after capture and supported by morphological measurements or a DNA sequence.

NC Needs Confirmation. Either call quality was poor, or the species cannot be distinguished reliably from another that makes similar calls. Alternative identifications are indicated in the *Comments on identifications* section of this report. If this is a species of conservation significance, further survey work might be required to confirm the record.

SZ412: Bat call identification from Kununurra, WA

TABLE 3. Criteria used to attribute call types to the Bare-rumped Sheath-tailed Bat *Saccopteryx saccolaimus*. A tick or a cross indicates whether an observation consistent with that particular criterion was observed in the recordings from the present survey.

	Indicative of a species of <i>Saccopteryx</i>
✓	1. Characteristic frequency of the second (loudest, based on microphone sensitivity) harmonic between c. 20 and 25 kHz (Milne et al. 2009; Armstrong et al. 2014; K.N. Armstrong unpublished data; evident in AnaBat or full spectrum format data). This criterion is indicative of, but not exclusively characteristic of <i>Saccopteryx</i> .
✓	2. In multi-harmonic representations available from full spectrum recordings, the characteristic frequency of the fundamental at around 10–12 kHz, and of the third harmonic around 30–35 kHz (Armstrong et al. 2014; K.N. Armstrong unpub. data; evident sometimes in AnaBat or more usually full spectrum format data; see examples of harmonic fragments in the AnaBat-recorded calls of Milne et al. 2009). This criterion is exclusively characteristic of <i>Saccopteryx</i> and <i>Taphozous</i> .
✓	3. A pulse shape that is either curvilinear or serpentine (a typical curvilinear chirp with a terminal droop) (Milne et al. 2009; Armstrong et al. 2014; K.N. Armstrong unpublished data; evident in AnaBat or full spectrum format data). This criterion is indicative of, but not exclusively characteristic of <i>Saccopteryx</i> .
✓	4. Measurements from pulses that fall within the confidence region of <i>S. saccolaimus</i> in an ordination plot constructed from the Discriminant Function Analysis of a range of low frequency emitting bats from northern Australia (Armstrong et al. 2014; see example in Figure 2). Meeting this criterion is indicative of, but not exclusively characteristic of <i>S. saccolaimus</i> . Note that there is often variation from other low frequency emitting species that can fall close to the cluster centroid of <i>S. saccolaimus</i> , so points falling within the confidence region of this species are not absolutely diagnostic.
✗	5. Feeding buzz shape differing from that of <i>S. flaviventris</i> as described by Corben (2010, 2011), which can be diagnostic in the absence of the Papuan sheath-tailed bat <i>S. mixtus</i> (K.N. Armstrong unpublished data; evident in AnaBat or full spectrum format data).
	Diagnostic of the species <i>Saccopteryx saccolaimus</i> (given criteria 1–5) in sympatry with <i>S. mixtus</i>.
✗	6. Alternation of high and low characteristic frequency in successive pulses within the band 20–25 kHz (Milne et al. 2009; evident in AnaBat or full spectrum format data).
✗	7. Repeated triplet or doublet pulse sequences as described by Coles et al. (2012, 2014) and Meutstege et al. (2014) (evident in full spectrum format data only).

SZ412: Bat call identification from Kununurra, WA

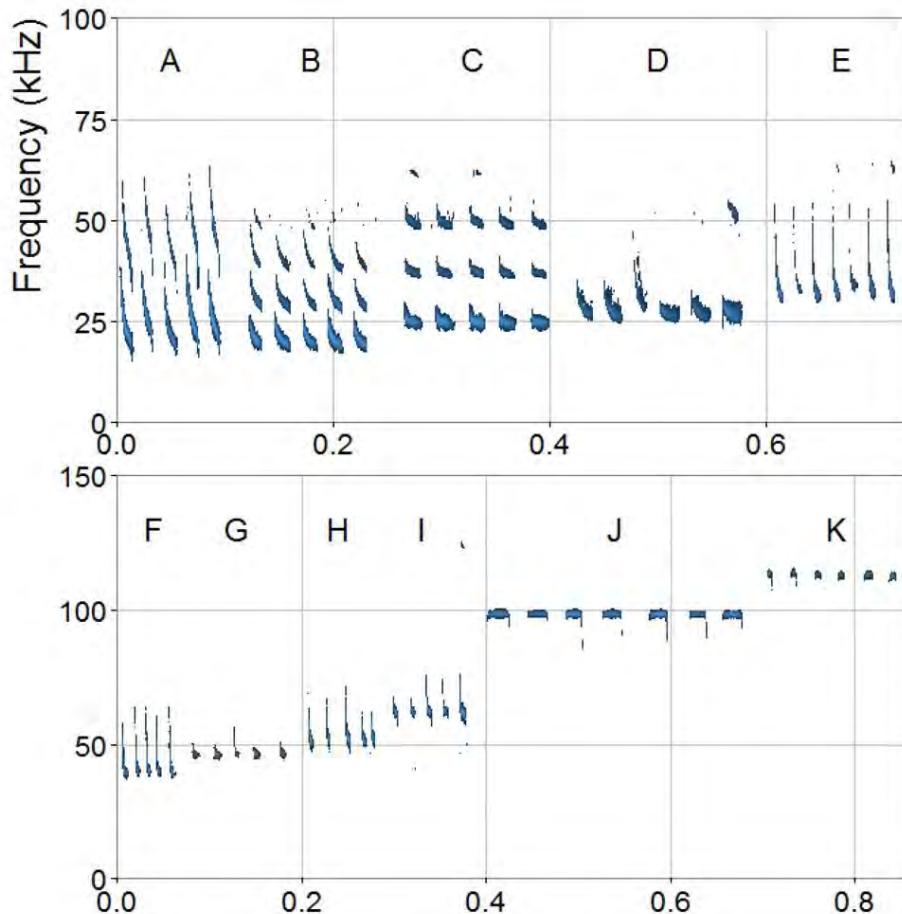

FIGURE 1. Representative call sequence portions of the species identified (time between pulses has been compressed).

A: *Chaerephon jobensis*
 B: *Saccopteryx flaviventris*
 C: *Taphozous georgianus*
 D: *Ozimops lumsdenae*
 E: *Chalinolobus gouldii*

F: *Chalinolobus nigrogriseus* / *Scotorepens greyii* / *S. sanborni*
 G: *Pipistrellus westralis*
 H: *Miniopterus orianae* / *Pipistrellus adamsi*
 I: *Vespadelus caurinus*
 J: *Hipposideros stenotis*
 K: *Rhinonicteris aurantia*

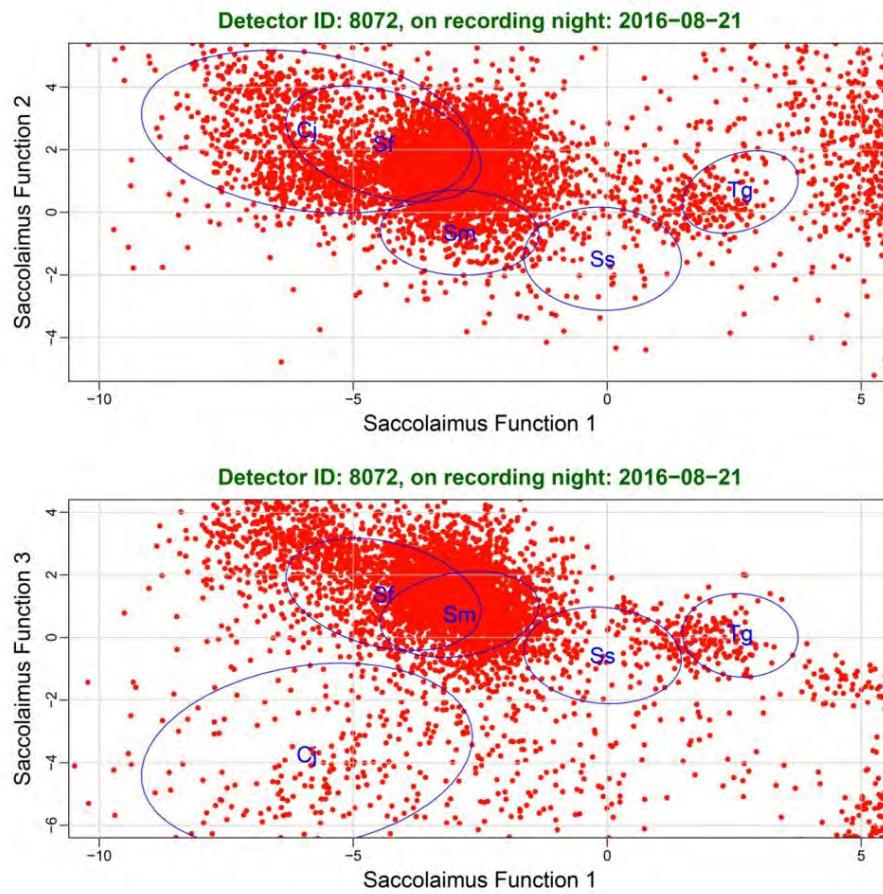

FIGURE 2. Discriminant Function Analysis ordinations with coordinates from anonymously-recorded pulses (red points) in an example subset of WAV files. Ellipses are 68% confidence regions based on measurements from reference calls of each species (Cj: *Chaerephon jobensis*; Sf: *Saccolaimus flaviventris*; Sm: *S. mixtus*; Ss: *S. saccolaimus*; Tg: *Taphozous georgianus*).

Appendix H: Vegetation Condition Scale for the Eremaean and Northern Botanical Provinces (adapted from Keighery 1994)

Condition Ranking	Description
E (Excellent)	Pristine or nearly so, no obvious signs of damage caused by human activities since European settlement.
VG (Very Good)	Some relatively slight signs of damage caused by human activities since European settlement. For example, some signs of damage to tree trunks caused by repeated fire, the presence of some relatively non-aggressive weeds, or occasional vehicle tracks.
G (Good)	More obvious signs of damage caused by human activities since European settlement, including some obvious impact on the vegetation structure such as that caused by low levels of grazing or slightly aggressive weeds.
P (Poor)	Still retains basic vegetation structure or ability to regenerate to it after very obvious impacts of human activities since European settlement, such as grazing, partial clearing, frequent fires or aggressive weeds.
VP (Very Poor)	Severely impacted by grazing, very frequent fires, clearing or a combination of these activities. Scope for some regeneration but not to a state approaching good condition without intensive management. Usually with a number of weed species present including very aggressive species.
D (Completely Degraded)	Areas that are completely or almost completely without native species in the structure of their vegetation; i.e. areas that are cleared or 'parkland cleared' with their flora comprising of weed or crop species with isolated native trees or shrubs.

Appendix I: Raw Data Recorded within Relevés in the Study Area

Site Name: KAI-001
 Site Type: AREA
 Survey Date: 24/08/2016
 GPS Location: GDA94 Zone 52 456465.5571E 8276506.624N
 Vegetation Type: 33
 Landform Type: Drainage Line
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: N
 Soil Type: Loamy clay
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - VP - Very Poor
 Disturbance: Grazing - Heavily grazed, Exotic Weeds - Significant weeds, 60% weed cover, very dry
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Adansonia gregorii, Bauhinia cunninghamii, Lophostemon grandiflorus*
 subsp. riparius, Terminalia hadleyana

<i>Eucalyptus microtheca</i>	6	0.5
<i>Themeda triandra</i>	1.1	60

Site Name: KAI-142
 Site Type: AREA
 Survey Date: 21/08/2016
 GPS Location: GDA94 Zone 52 447398E 8280422N
 Vegetation Type: 28
 Landform Type: Lower Slope
 Slope Class: Moderately Inclined (10 degrees)
 Aspect: S
 Soil Type: Clay
 Soil Colour: Light brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 20-50%
 CF Sizes: 2-6mm, 6-20mm, 20-60mm, 60-200mm, 200-600mm, 600-2000mm,
 >2000mm
 CF Types: Metamorphic
 Vegetation Condition: Northern Vegetation Condition - VG - Very Good
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Cochlospermum fraseri, Corymbia confertiflora, Erythrophleum chlorostachys, Terminalia canescens*
 Mid Stratum 1: *Calytrix exstipulata*
 Lower Stratum 1: *Sorghum ?stipoideum*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Bauhinia cunninghamii</i>	2	1
<i>Calytrix exstipulata</i>	3	20
<i>Cochlospermum fraseri</i>	6	3
<i>Corymbia confertiflora</i>	5	3
<i>Dicliptera armata</i>	0.3	0.1
<i>Ehretia saligna</i> var. <i>saligna</i>	3	2
<i>Erythrophleum chlorostachys</i>	8	12
<i>Sorghum ?stipoideum</i>	1.2	60
<i>Terminalia canescens</i>	8	15
<i>Triodia stenostachya</i>	0.1	0.1

Site Name: KAI-143
 Site Type: AREA
 Survey Date: 21/08/2016
 GPS Location: GDA94 Zone 52 448335E 8281260N
 Vegetation Type: 28
 Landform Type: Lower Slope, of hill
 Slope Class: Moderately Inclined (10 degrees)
 Aspect: E
 Soil Type: Clay
 Soil Colour: Light brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 50-90%
 CF Sizes: 2-6mm, 6-20mm, 20-60mm, 60-200mm, 200-600mm, 600-2000mm
 CF Types: Metamorphic sandstone
 Vegetation Condition: Northern Vegetation Condition - VG - Very Good
 Disturbance: - Dry, Grazing
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Adansonia gregorii*
 Mid Stratum 1: *Bauhinia cunninghamii, Calytrix exstipulata, Cochlospermum fraseri, Hakea arborescens, Melaleuca minutifolia, Terminalia canescens*
 Lower Stratum 1: *Eriachne ciliata, Eriachne major, Heliotropium euodes*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Adansonia gregorii</i>	8	10
<i>Bauhinia cunninghamii</i>	2	1
<i>Calytrix exstipulata</i>	3	4
<i>Carissa lanceolata</i>	1	0.2

 Vegetation Type: 1
 Landform Type: Drainage Line
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: SSE
 Soil Type: Clay
 Soil Colour: Grey
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - P - Poor
 Disturbance: Grazing - Heavy grazing, Pig/Animal Disturbance - Heavy cattle trmapling
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Excoecaria parvifolia*
 Lower Stratum 1: *Bergia pedicellaris*, *Cyperus pygmaeus*, *Dentella minutissima*, *Glinus lotoides*, Poaceae sp.5

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Alternanthera nodiflora</i>		0.1
<i>Bergia pedicellaris</i>		1
<i>Cyperus pygmaeus</i>		4
<i>Dentella minutissima</i>		1
<i>Excoecaria parvifolia</i>	6	8
<i>Glinus lotoides</i>		1
<i>Marsilea hirsuta</i>		0.1
Poaceae sp.5	0.1	15

Site Name: KAI-189
 Site Type: AREA
 Survey Date: 19/08/2016
 GPS Location: GDA94 Zone 52 438229.2589E 8286740.787N
 Vegetation Type: 11
 Landform Type: Plain
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: SE
 Soil Type: Sandy clay
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - G - Good
 Disturbance: Grazing
 Fire: >5yrs

DOMINANT TAXA IN VEGETATION STRATA

Lower Stratum 1: *Chrysopogon fallax, Iseilema sp.2*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Chrysopogon fallax</i>	0.6	85
<i>Iseilema sp.2</i>	0.5	15

Site Name: KAI-191
 Site Type: AREA
 Survey Date: 19/08/2016
 GPS Location: GDA94 Zone 52 437044.5E 8285665.38N
 Vegetation Type: 4
 Landform Type: Drainage Line, /floodplain
 Slope Class: Gently Inclined (3 degrees)
 Aspect: SW
 Soil Type: Sandy Loam
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - D - Degraded
 Disturbance: Limited Clearing - Heavy grazing, Exotic Weeds, very dry, if Grass stubborn (193-02) is a weed - cover is 80%
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Eucalyptus microtheca, Excoecaria parvifolia*
 Lower Stratum 1: Poaceae sp.6

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Eucalyptus microtheca</i>	9	20
<i>Excoecaria parvifolia</i>	7	5
Poaceae sp.6	0.4	80

Site Name: KAI-192
 Site Type: AREA
 Survey Date: 19/08/2016
 GPS Location: GDA94 Zone 52 437313.56E 8286939.52N
 Vegetation Type: 1
 Landform Type: Plain, Plain with drainage lines
 Slope Class: Gently Inclined (3 degrees)
 Aspect: SW
 Soil Type: Loamy clay
 Soil Colour: Dark brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - G - Good
 Disturbance: Grazing, Exotic Weeds - Some weeds, 30% weed cover, very dry, cracking clay
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Excoecaria parvifolia*
 Lower Stratum 1: *Eriachne sulcata*, *Eulalia aurea*, ?*Sorghum* sp.
 Lower Stratum 2: *Fimbristylis blepharolepis*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Alternanthera nodiflora</i>		0.1
<i>Eriachne sulcata</i>	0.6	40
<i>Eulalia aurea</i>	0.6	2
<i>Excoecaria parvifolia</i>	6	25

 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - VP - Very Poor
 Disturbance: Grazing, Pig/Animal Disturbance - Cattle trampling
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Corymbia bella, Eucalyptus microtheca, Ficus aculeata var. indecora*
 Mid Stratum 1: *Melia azedarach, *Parkinsonia aculeata*
 Lower Stratum 1: **Hyptis suaveolens, Solanum fecundum*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Corymbia bella</i>	17	5
<i>Eucalyptus microtheca</i>	15	25
<i>Ficus aculeata var. indecora</i>	20	5
<i>*Hyptis suaveolens</i>	0.4	2
<i>Melia azedarach</i>	2	0.1
<i>*Parkinsonia aculeata</i>	3	9
<i>Solanum fecundum</i>	1	8

Site Name: KAI-216
 Site Type: AREA
 Survey Date: 20/08/2016
 GPS Location: GDA94 Zone 52 439751E 8283132N
 Vegetation Type: 22
 Landform Type: Flat
 Slope Class: Level (0 degrees)
 Aspect: W
 Soil Type: Clay
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - P - Poor
 Disturbance: Exotic Weeds, Pig/Animal Disturbance - Cattle trampling
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Ehretia saligna* var. *saligna*, *Eucalyptus microtheca*, *Excoecaria parvifolia*
 Mid Stratum 1: *Flueggea virosa* subsp. *melanthesoides*
 Lower Stratum 1: **Cardiospermum halicacabum* var. *halicacabum*, **Hyptis suaveolens*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
* <i>Cardiospermum halicacabum</i> var. <i>halicacabum</i>	0.2	5
<i>Ehretia saligna</i> var. <i>saligna</i>	7	2
<i>Eucalyptus microtheca</i>	12	55
<i>Excoecaria parvifolia</i>	8	3
<i>Flueggea virosa</i> subsp. <i>melanthesoides</i>	2.5	30
* <i>Hyptis suaveolens</i>	0.4	5

Site Name: KAI-224
 Site Type: AREA
 Survey Date: 20/08/2016
 GPS Location: GDA94 Zone 52 440936E 8279568N
 Vegetation Type: 17
 Landform Type: Plain
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: W
 Soil Type: Clay
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - P - Poor
 Disturbance: Grazing, Exotic Weeds, Pig/Animal Disturbance - Cattle trampling
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Eucalyptus camaldulensis* subsp. *obtusa*, *Gyrocarpus americanus* subsp. *pachyphyllus*
 Mid Stratum 1: **Calotropis procera*, *Flueggea virosa* subsp. *melanthesoides*,
Heliotropium muelleri

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
* <i>Calotropis procera</i>	3	7
<i>Eucalyptus camaldulensis</i> subsp. <i>obtusa</i>	20	10
<i>Flueggea virosa</i> subsp. <i>melanthesoides</i>	4	60
<i>Gyrocarpus americanus</i> subsp. <i>pachyphyllus</i>	10	4
<i>Heliotropium muelleri</i>	2.5	2

Site Name: KAI-231
 Site Type: AREA
 Survey Date: 20/08/2016
 GPS Location: GDA94 Zone 52 440016.97E 8287691.38N
 Vegetation Type: 4
 Landform Type: Plain
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: S
 Soil Type: Sandy clay
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - VG - Very Good
 Disturbance: Grazing - Very minor grazing, very dry, 0% weed cover
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Eucalyptus microtheca, Excoecaria parvifolia*
 Mid Stratum 1: *Carissa lanceolata*
 Lower Stratum 1: *Chrysopogon fallax, Iseilema sp.1, ?Sorghum plumosum*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Aristida latifolia</i>	1	0.1
<i>Carissa lanceolata</i>	1.2	0.5
<i>Chrysopogon fallax</i>	0.6	15
<i>Eucalyptus microtheca</i>	8	30
<i>Excoecaria parvifolia</i>	5	1
<i>Iseilema sp.1</i>	0.5	10
<i>Melaleuca ?nervosa</i>		0.1
<i>?Sorghum plumosum</i>	1	70

Site Name: KAI-234
 Site Type: AREA
 Survey Date: 19/08/2016
 GPS Location: GDA94 Zone 52 445515E 8285236N
 Vegetation Type: 11
 Landform Type: Flat
 Slope Class: Level (0 degrees)
 Soil Type: Clay
 Soil Colour: Grey
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - G - Good
 Disturbance: Grazing - Cattle, Pig/Animal Disturbance - Cattle present, - Condition possibly very good if native species
 Fire: >5 yrs

DOMINANT TAXA IN VEGETATION STRATA

Lower Stratum 1: *Eragrostis tenellula*, *Fimbristylis sp.2*, *Iseilema sp.2*, Poaceae sp.7

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Eragrostis tenellula</i>	0.1	1
<i>Fimbristylis sp.2</i>	0.1	1
<i>Iseilema sp.2</i>	0.5	5
Poaceae sp.7	0.5	85

Site Name: KAI-235
 Site Type: AREA
 Survey Date: 18/08/2016
 GPS Location: GDA94 Zone 52 439479.62E 8291224.77N
 Vegetation Type: 1
 Landform Type: Plain
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: S
 Soil Type: Loamy clay
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - VG - Very Good
 Disturbance: Grazing
 Fire: >5yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Adansonia gregorii, Eucalyptus microtheca, Excoecaria parvifolia, Terminalia hadleyana*
 Mid Stratum 1: *Ophiuros exaltatus*
 Mid Stratum 2: *Eulalia aurea*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Adansonia gregorii</i>	5	0.5
<i>Eucalyptus microtheca</i>	6	1
<i>Eulalia aurea</i>	1	90
<i>Excoecaria parvifolia</i>	5	3
<i>Ophiuros exaltatus</i>	1.5	5
<i>Terminalia hadleyana</i>	5	2

Site Name: KAI-236
 Site Type: AREA
 Survey Date: 18/08/2016
 GPS Location: GDA94 Zone 52 439866E 8291017N
 Vegetation Type: 1
 Landform Type: Plain, with minor drainage lines
 Slope Class: Very Gently Inclined (1 degree)
 Soil Type: Clay and loamy clay
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - VG - Very Good
 Disturbance: Grazing
 Fire: >5yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Eucalyptus microtheca, Excoecaria parvifolia*

Mid Stratum 1: *Chrysopogon fallax, Eulalia aurea*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Chrysopogon fallax</i>	1	20
<i>Eucalyptus microtheca</i>	4.5	1
<i>Eulalia aurea</i>	1	80
<i>Excoecaria parvifolia</i>	4	1

Site Name: KAI-237
Site Type: AREA
Survey Date: 19/08/2016
GPS Location: GDA94 Zone 52 438021.93E 8286102.76N
Vegetation Type: 11
Landform Type: Plain
Slope Class: Very Gently Inclined (1 degree)
Aspect: S
Soil Type: Sandy clay
Soil Colour: Brown
Rock Outcrop: No bedrock exposed
CF Abundance: 0%
Vegetation Condition: Northern Vegetation Condition - VP - Very Poor
Disturbance: Grazing, Exotic Weeds, Pig/Animal Disturbance - Cattle trampling
Fire: >5yrs

DOMINANT TAXA IN VEGETATION STRATA

Lower Stratum 1: *Chrysopogon fallax*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Chrysopogon fallax</i>	0.8	70

Site Name: KAI-238
 Site Type: AREA
 Survey Date: 20/08/2016
 GPS Location: GDA94 Zone 52 445000.6765E 8286356.779N
 Vegetation Type: 12
 Landform Type: Plain
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: ESE
 Soil Type: Medium clay
 Soil Colour: Brown
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - VG - Very Good
 Disturbance: Grazing
 Fire: >5yrs

DOMINANT TAXA IN VEGETATION STRATA

Mid Stratum 1: *Ophiuros exaltatus, Sorghum stipoideum*
 Lower Stratum 1: *Chrysopogon fallax, Themeda triandra*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Chrysopogon fallax</i>	1	0.5
<i>Ophiuros exaltatus</i>	1.5	0.3
<i>Sorghum stipoideum</i>	2	99
<i>Themeda triandra</i>	1	0.5

Site Name: KAI-239
 Site Type: AREA
 Survey Date: 20/08/2016
 GPS Location: GDA94 Zone 52 440665.1528E 8290654.872N
 Vegetation Type: 7
 Landform Type: Plain
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: SSE
 Soil Type: Clayey sand
 Soil Colour: Orange
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - VP - Very Poor
 Disturbance: Grazing - Heavily grazed, Pig/Animal Disturbance - Cattle trampling
 Fire: >5yrs

DOMINANT TAXA IN VEGETATION STRATA

Upper Stratum 1: *Bauhinia cunninghamii, Grevillea striata*
 Mid Stratum 1: *Carissa lanceolata*
 Lower Stratum 1: *Chrysopogon fallax, Eriachne sp.*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Bauhinia cunninghamii</i>	6	5
<i>Carissa lanceolata</i>	1.7	0.5
<i>Chrysopogon fallax</i>	0.5	5
<i>Eriachne sp.</i>	0.3	5
<i>Grevillea striata</i>	6	7

Site Name: KAI-240
 Site Type: AREA
 Survey Date: 20/08/2016
 GPS Location: GDA94 Zone 52 442650.4166E 8286706.883N
 Vegetation Type: 11
 Landform Type: Plain
 Slope Class: Very Gently Inclined (1 degree)
 Aspect: S
 Soil Type: Loamy clay
 Soil Colour: Red
 Rock Outcrop: No bedrock exposed
 CF Abundance: 0%
 Vegetation Condition: Northern Vegetation Condition - VG - Very Good
 Disturbance: Grazing
 Fire: >5yrs

DOMINANT TAXA IN VEGETATION STRATA

Lower Stratum 1: *Chrysopogon fallax*, *Iseilema sp.2*, *Themeda triandra*

SPECIES LIST

Taxon Name	Avg. Height	Cover Alive
<i>Chrysopogon fallax</i>	1	5
<i>Iseilema sp.2</i>	0.5	85
<i>Themeda triandra</i>	0.8	10

Appendix J: Vascular Plant Taxa Recorded in the Study Area

Note: * denotes introduced taxon

FAMILY	TAXON
No family name	Indeterminate sp.1 Indeterminate sp.2 Indeterminate sp.3 Indeterminate sp.4 Indeterminate sp.5
Acanthaceae	<i>Dicliptera armata</i>
Amaranthaceae	<i>Achyranthes aspera</i> * <i>Aerva javanica</i> <i>Alternanthera nodiflora</i> <i>Ptilotus corymbosus</i> <i>Ptilotus nobilis</i> subsp. <i>nobilis</i> <i>Ptilotus</i> sp.
Apocynaceae	* <i>Calotropis procera</i> <i>Carissa lanceolata</i> <i>Cynanchum floribundum</i> <i>Cynanchum pedunculatum</i> <i>Tylophora cinerascens</i>
Asteraceae	* <i>Bidens ?pilosa</i> <i>Pterocaulon serrulatum</i> var. <i>velutinum</i> <i>Pterocaulon sphacelatum</i> * <i>Xanthium occidentale</i>
Bixaceae	<i>Cochlospermum fraseri</i>
Boraginaceae	<i>Coldenia procumbens</i> <i>Ehretia saligna</i> var. <i>salina</i> <i>Heliotropium euodes</i> * <i>Heliotropium indicum</i> <i>Heliotropium muelleri</i> ? <i>Heliotropium</i> sp. <i>Heliotropium tenuifolium</i> <i>Trichodesma zeylanicum</i>
Capparaceae	<i>Capparis lasiantha</i>
Chenopodiaceae	<i>Chenopodium auricomum</i> <i>Salsola australis</i>

Cleomaceae	<i>Cleome viscosa</i>
Combretaceae	<i>Terminalia canescens</i> <i>Terminalia hadleyana</i> <i>Terminalia platyptera</i> <i>Terminalia volucris</i>
Convolvulaceae	<i>Bonamia media</i> <i>Ipomoea muelleri</i> <i>Ipomoea polymorpha</i> <i>Operculina aequisepala</i>
Cucurbitaceae	* <i>Citrullus lanatus</i> <i>Luffa graveolens</i> <i>Trichosanthes cucumerina</i>
Cyperaceae	<i>Bulbostylis barbata</i> <i>Cyperus macrostachyos</i> <i>Cyperus pygmaeus</i> <i>Cyperus sp.1</i> <i>Cyperus sp.2</i> <i>Eleocharis dulcis</i> <i>Fimbristylis blepharolepis</i> <i>Fimbristylis cardiocarpa</i> <i>Fimbristylis schultzii</i> <i>Fimbristylis sp.1</i> <i>Fimbristylis sp.2</i>
Elatinaceae	<i>Bergia pedicellaris</i>
Euphorbiaceae	<i>Euphorbia ?bifida</i> <i>Euphorbia schultzii</i> var. <i>schultzii</i> <i>Euphorbia sp.</i> <i>Excoecaria parvifolia</i>
Fabaceae	<i>Acacia holosericea</i> <i>Acacia neurocarpa</i> <i>Acacia ?tumida</i> <i>Bauhinia cunninghamii</i> <i>Cathormion umbellatum</i> <i>Christia australasica</i> <i>Crotalaria novae-hollandiae</i> subsp. <i>novae-hollandiae</i> <i>Cullen badocanum</i> <i>Dichrostachys spicata</i> <i>Erythrina vespertilio</i> <i>Erythrophleum chlorostachys</i> <i>Fabaceae sp.</i>

Fabaceae cont.	<i>*Macroptilium lathyroides</i> var. <i>semierectum</i> <i>Neptunia dimorphantha</i> <i>Neptunia</i> sp. <i>*Parkinsonia aculeata</i> <i>Rhynchosia minima</i> <i>Sesbania cannabina</i> <i>Sesbania formosa</i> <i>*Stylosanthes hamata</i> <i>Tephrosia</i> sp. <i>Tephrosia stipuligera</i> <i>*Vachellia farnesiana</i> <i>Vachellia valida</i>
Goodeniaceae	<i>Goodenia lamprosperma</i> <i>Goodenia sepalosa</i> var. <i>sepalosa</i>
Hernandiaceae	<i>Gyrocarpus americanus</i> <i>Gyrocarpus americanus</i> subsp. <i>pachyphyllus</i>
Lamiaceae	<i>Basilicum polystachyon</i> <i>*Hyptis suaveolens</i>
Lecythidaceae	<i>Barringtonia acutangula</i> subsp. <i>acutangula</i> <i>Planchonia careya</i>
Loganiaceae	<i>Strychnos lucida</i>
Loranthaceae	<i>Amyema villiflora</i> subsp. <i>villiflora</i>
Malvaceae	<i>Abelmoschus ficulneus</i> <i>Abutilon hannii</i> <i>Abutilon otocarpum</i> <i>Adansonia gregorii</i> <i>Brachychiton fitzgeraldianus</i> <i>Brachychiton tuberculatus</i> (P3) <i>Corchorus aestuans</i> <i>Corchorus fascicularis</i> <i>Corchorus pumilio</i> <i>Corchorus sidoides</i> <i>Grewia breviflora</i> <i>Grewia retusifolia</i> <i>Hibiscus apodus</i> <i>*Malvastrum americanum</i> <i>*Melochia pyramidata</i> <i>*Sida acuta</i> subsp. <i>acuta</i> <i>*Sida cordifolia</i> <i>Sida</i> sp.

Malvaceae cont.	<i>Sida spinosa</i> <i>Waltheria indica</i> <i>Waltheria virgata</i>
Marsileaceae	<i>Marsilea hirsuta</i>
Meliaceae	* <i>Azadirachta indica</i> <i>Melia azedarach</i> <i>Owenia vernicosa</i>
Menispermaceae	<i>Tinospora smilacina</i>
Molluginaceae	<i>Glinus lotoides</i>
Moraceae	<i>Ficus aculeata</i> var. <i>indecora</i> <i>Ficus coronulata</i>
Myrtaceae	<i>Calytrix exstipulata</i> <i>Corymbia bella</i> <i>Corymbia ?collina</i> <i>Corymbia confertiflora</i> <i>Corymbia ?dichromophloia</i> <i>Corymbia flavescens</i> <i>Corymbia ?grandifolia</i> <i>Corymbia grandifolia</i> subsp. <i>lamprocardia</i> <i>Corymbia greeniana</i> <i>Corymbia polycarpa</i> <i>Eucalyptus camaldulensis</i> subsp. <i>obtusa</i> <i>Eucalyptus microtheca</i> <i>Eucalyptus miniata</i> <i>Eucalyptus obconica</i> <i>Eucalyptus pruinosa</i> subsp. ? <i>pruinosa</i> <i>Eucalyptus sp.1</i> <i>Eucalyptus sp.2</i> <i>Lophostemon grandiflorus</i> subsp. <i>riparius</i> <i>Melaleuca argentea</i> <i>Melaleuca leucadendra</i> <i>Melaleuca minutifolia</i> <i>Melaleuca ?nervosa</i> <i>Melaleuca viridiflora</i>
Nyctaginaceae	<i>Boerhavia dominii</i>
Onagraceae	<i>Ludwigia octovalvis</i> <i>Ludwigia perennis</i> ? <i>Ludwigia perennis</i>
Pandanaceae	<i>Pandanus spiralis</i> var. <i>thermalis</i>

Passifloraceae	* <i>Passiflora foetida</i> var. <i>hispida</i>
Phyllanthaceae	<i>Breynia cernua</i> <i>Flueggea virosa</i> subsp. <i>melanthesoides</i> <i>Notoleptopus decaisnei</i> <i>Phyllanthus maderaspatensis</i> <i>Phyllanthus ?virgatus</i> <i>Phyllanthus virgatus</i>
Plantaginaceae	<i>Stemodia lythrifolia</i>
Poaceae	<i>Aristida holathera</i> var. <i>holathera</i> <i>Aristida latifolia</i> <i>Aristida</i> sp. * <i>Cenchrus ciliaris</i> <i>Chloris lobata</i> <i>Chrysopogon fallax</i> <i>Cynodon convergens</i> ? <i>Dichanthium fecundum</i> <i>Dichanthium fecundum</i> <i>Digitaria bicornis</i> * <i>Echinochloa colona</i> <i>Elytrophorus spicatus</i> <i>Enneapogon polypyllus</i> <i>Eragrostis cumingii</i> <i>Eragrostis falcata</i> <i>Eragrostis tenellula</i> <i>Eriachne ciliata</i> <i>Eriachne major</i> <i>Eriachne obtusa</i> <i>Eriachne pulchella</i> subsp. <i>dominii</i> <i>Eriachne</i> sp. <i>Eriachne sulcata</i> <i>Eriachne ?sulcata</i> <i>Eulalia aurea</i> <i>Heteropogon contortus</i> <i>Iseilema fragile</i> <i>Iseilema</i> sp.1 <i>Iseilema</i> sp.2 <i>Iseilema ?vaginiflorum</i> <i>Ophiuros exaltatus</i> <i>Panicum decompositum</i> <i>Panicum ?decompositum</i> <i>Panicum</i> sp. <i>Paspalidium</i> sp. <i>Paspalum scrobiculatum</i>

Poaceae cont.	Poaceae sp.1 Poaceae sp.2 Poaceae sp.3 Poaceae sp.4 Poaceae sp.5 Poaceae sp.6 Poaceae sp.7 Poaceae spp. <i>Setaria apiculata</i> ?Sorghum sp. <i>Sorghum ?stipoideum</i> <i>Sorghum stipoideum</i> <i>Sporobolus australasicus</i> <i>Themeda triandra</i> <i>Triodia bitextura</i> <i>Triodia stenostachya</i> * <i>Urochloa mosambicensis</i>
Polygonaceae	<i>Persicaria attenuata</i> subsp. <i>attenuata</i>
Proteaceae	<i>Grevillea dimidiata</i> <i>Grevillea erythroclada</i> <i>Grevillea pyramidalis</i> subsp. <i>leucadendron</i> <i>Grevillea striata</i> <i>Hakea arborescens</i>
Rubiaceae	<i>Dentella minutissima</i> ? <i>Gardenia</i> sp. <i>Spermacoce ?brachystema</i>
Santalaceae	<i>Exocarpos latifolius</i>
Sapindaceae	<i>Atalaya hemiglaucha</i> * <i>Cardiospermum halicacabum</i> var. <i>halicacabum</i> <i>Dodonaea hispidula</i> var. <i>arida</i> <i>Dodonaea polyziga</i> * <i>Datura inoxia</i>
Solanaceae	* <i>Datura inoxia</i> * <i>Physalis angulata</i> <i>Solanum fecundum</i>
Zygophyllaceae	<i>Tribulopis pentandra</i>
Conservation Significant Taxa	= 1
Common Native Taxa	= 200
Introduced Taxa	= <u>23</u>
Total Taxa	<u>223</u>

Appendix K: Vegetation Types Mapped in the Study Area

VT	Description	Relevee	Area (ha)	Conservation Significance; Flora	Photo
VT1	Low open to low woodland of mixed tree species including <i>Excoecaria parvifolia</i> , <i>Eucalyptus microtheca</i> , <i>Adansonia gregorii</i> and <i>Terminalia hadleyana</i> over low open to low closed sedgeland of <i>Cyperus</i> spp. over low isolated grasses to low closed grassland of mixed species including <i>Ophiuros exaltatus</i> , <i>Eulalia aurea</i> and <i>Chrysopogon fallax</i> over mixed low isolated forbs to open forland flats, plains, floodplains and minor drainage lines on grey or brown cracking clay or loamy clay.	KAI-053, KAI-072, KAI-074, KAI-077, KAI-080, KAI-082, KAI-168, KAI-174, KAI-182, KAI-183, KAI-184, KAI-187, KAI-188, KAI-192, KAI-211, KAI-235, KAI-236	2182.7 (8.87 % of Study Area)	Potential habitat for <i>Typhonium</i> sp. Kununurra (A.N. Start ANS 1467) Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-192
VT2	Low open woodland of <i>Adansonia gregorii</i> and <i>Bauhinia cunninghamii</i> over tall isolated clumps of shrubs of <i>Carissa lanceolata</i> , <i>Ehretia saligna</i> var. <i>saligna</i> and <i>Terminalia canescens</i> over low to mid grassland of mixed species including <i>Chrysopogon fallax</i> , <i>Cynodon convergens</i> , <i>Eriachne ?sulcata</i> and <i>Themeda triandra</i> over low isolated clumps of forbs of <i>Corchorus aestuans</i> and <i>Heliotropium euodes</i> on gentle slopes of low hillocks on grey-brown clay loam, with surface stones.	KAI-181	19.9 (0.08 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-181

VT	Description	Relevee	Area (ha)	Conservation Significance; Flora	Photo
VT3	Mid isolated clumps of trees of <i>Adansonia gregorii</i> and <i>Eucalyptus microtheca</i> over low woodland of <i>Bauhinia cunninghamii</i> and <i>Excoecaria parvifolia</i> over tall sparse shrubland of <i>Flueggea virosa</i> subsp. <i>melanthesoides</i> over low open shrubland of * <i>Sida cordifolia</i> , <i>Tribulopis pentandra</i> and <i>Waltheria indica</i> on plains with drainage lines and sinkholes on brown sandy clay	KAI-186	10.1 (0.04 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-186
VT4	Low open woodland to low woodland of <i>Eucalyptus microtheca</i> over tall isolated clumps of shrubs of <i>Melaleuca ?nervosa</i> occasionally with mid isolated clumps of shrubs of <i>Carissa lanceolata</i> over low to mid closed grassland to grassland of mixed species including <i>Chrysopogon fallaxa</i> , <i>Heteropogon contortus</i> and <i>Dichanthium fecundum</i> occasionally with low isolated clumps of trees of <i>Excoecaria parvifolia</i> on plains and floodplains on brown sandy clay.	KAI-010, KAI-035, KAI-041, KAI-049, KAI-059, KAI-064, KAI-191, KAI-231	1799.8 (7.31 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-231

VT	Description	Relevee	Area (ha)	Conservation Significance; Flora	Photo
VT5	Low woodland of <i>Eucalyptus microtheca</i> and <i>Excoecaria parvifolia</i> over mid isolated clumps of shrubs of <i>Carissa lanceolata</i> over low open grassland of <i>Chrysopogon fallax</i> , <i>Cynodon convergens</i> and <i>Aristida holathera</i> var. <i>holathera</i> on plains on orange clayey sand.	KAI-179	23.2 (0.09 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-179
VT6	Mid open woodland to woodland of <i>Corymbia bella</i> and <i>Corymbia polycarpa</i> over low open woodland to woodland of <i>Acacia neurocarpa</i> and <i>Melaleuca ?nervosa</i> over low to mid sparse shrubland to shrubland of * <i>Hyptis suaveolens</i> over low to mid grassland of mixed species including <i>Cynodon convergens</i> and <i>Setaria apiculata</i> on plains and drainage lines on brown sandy clay.	KAI-178	11.8 (0.05 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-178

VT	Description	Relevee	Area (ha)	Conservation Significance; Flora	Photo
VT7	Low woodland of <i>Bauhinia cunninghamii</i> and <i>Grevillea striata</i> over tall isolated clumps of shrubs of <i>Carissa lanceolata</i> over low open grassland of <i>Chrysopogon fallax</i> and <i>Eriachne</i> sp. on plains on orange clayey sand	KAI-239	11.9 (0.05 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-239
VT8	Low isolated clumps of trees of <i>Corymbia ?grandifolia</i> over tall sparse shrubland of <i>Calytrix exstipulata</i> over tall isolated clumps of grasses of <i>Sorghum ?stipoideum</i> over low isolated clumps of forbs of <i>Spermacoce ?brachystema</i> on low hillocks on brown loamy sand, with sandstone outcropping and surface stones.	KAI-180	5.8 (0.02 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-180

VT	Description	Relevee	Area (ha)	Conservation Significance; Flora	Photo
VT9	Low open woodland of <i>Melaleuca minutifolia</i> over mixed grassland dominated by species including <i>Chrysopogon fallax</i> and <i>Eriachne obtusa</i> often with <i>Triodia bitextura</i> on stony plains and low rises on light brown clay.	KAI-002, KAI-005, KAI-058	333.1 (1.35 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-002
VT10	Low open woodland of <i>Terminalia platyptera</i> over mid isolated shrubs of <i>Bauhinia cunninghamii</i> and <i>Carissa lanceolata</i> over mid closed grassland of <i>Aristida holathera</i> var. <i>holathera</i> and <i>Sorghum stipoideum</i> on low hillocks on brown sandy clay, with surface stones.	KAI-177	76.4 (0.31 % of Study Area)	Considered representative of Ivanhoe Land System Priority 3 PEC (Section 5.1.1 of report)	 Site KAI-177

VT	Description	Relevee	Area (ha)	Conservation Significance; Flora	Photo
VT11	Mid grassland of mixed species dominated by <i>Chrysopogon fallax</i> , <i>Iseilema</i> spp. and <i>Themeda triandra</i> on plains with red, grey and brown sandy clay and loamy clay.
