Parties having weak eyes or who have in ured their eyes by using inferior glasses

The delicate construction of the eye makes it necessary to use great care in selecting spectacles. B. Mincer has made the eye his special study, and of late years has paid en-tire attention to the adaptation of spectacles to the same. Having a thorough experience in making and adapting spectacles to the eye, he is enabled to fit accurately in every case abnormal vision, known as Pre Myophia and Hypermetropia as well as weak sight, requiring various tinted glasses. His improved spectacles are of a perfect construction which assists and preserves the sight, rendering frequent changes unnecessary. They confer a brilliancy and distinctness of vision with an amount of ease and comfort not gen-erally enjoyed by persons using spectacles. His lenses are ground on the most scientific in the full strength of youth. B. Mincer has some flattering testimonials from some of the leading citizens and occu-
