Tour Participants: Paul Harmes & Hasmik Ter Voskanyan (leaders) with seven Naturetrek clients
Driver: Edik and Local Agent: Armine

Day 1

Saturday 3rd June

Fly Heathrow to Moscow & Yerevan

Seven group members met with Paul at Heathrow Terminal 4 for the Aeroflot Flight SU2579 to Moscow Sheremetyevo Airport, where we saw a Common Kestrel before we transferred to Aeroflot flight SU1868 to Yerevan. We arrived at Yerevan Zvartsnots Airport where, after changing money and collecting our luggage, we met with Hasmik, our local leader, and Edik, our driver for the week. We transferred to our bus for the short journey through the Armenian capital to the Minotel Barsam Suites, our base for the first two nights of the tour. After rooms had been allocated, we retired for the night.

Day 2

Sunday 4th June

Mount Aragats

At 9.30am, following breakfast, we left the hotel and were on our way north-westwards towards Mount Aragats. Along the way we recorded Rosy Starling, Eurasian Magpie, Little Egret and numerous Common Swifts. Our first stop today was in an area of semi-degraded steppe above Byurakan, about a 40-minute drive from Yerevan. Here the botanists had an introduction to some of the characteristic steppe plants. These included *Onosma microcarpum* (a Golden Drops), *Thymus kotchyanus*, *Alkanna orientalis* (Yellow Alkanet) and *Cerintho minor* (Lesser Honeywort), whilst the birders recorded Crested Lark, Western Rock Nuthatch, Northern and Black-eared Wheatears, Woodlark and Ortolan Bunting. Butterflies included Cardinal Fritillary, Large White and Adonis Blue. As we moved a little higher, we passed *Quercus petraea* subsp. *iberica* (Georgian Oak) and *Veronica multifida* (a Speedwell). We made a second stop as we ascended into the foothills, where a 30-minute pause in an area of mountain steppe produced views of White-throated Robin, Ring Ouzel, Common Whitethroat and Red-backed Shrike. For the botanists there were *Ornithogalum transcaasicum* (a Star of Bethlehem), *Ajuga orientale* (Oriental Bugle) and *Pulsatilla albana*.

We now made the 20-minute drive to Amberd where we took our picnic in boulder-strewn grassland. Red-billed Chough, Griffon Vulture, Common House Martin, Barn Swallow and Common Swift were all seen as we ate. We now took the opportunity to visit the seventh century church and fortress whilst we were there. Here we found the rare *Allium tripedale*, *Valeriana leucophaea*, *Scrophularia chrysantha* (Golden Figwort) and *Isatis tinctoria* (Woad). We had superb views of Black-headed Bunting, and Clouded Apollo, Berger's Clouded Yellow and Large White butterflies were also recorded.

Most of our remaining time on Mt. Aragats was devoted to exploring the alpine zone where a fair amount of snow remained. The botanists enjoyed *Gagea glacialis* (Glacier Yellow Star of Bethlehem), *Scilla siberica* subsp. *armena*, *Pulsatilla albana*, *Colchicum raddianum* (a Crocus) and *Puschkinia scilloides* (Puschkinia). Birds included Horned Lark, Water Pipit, Alpine Accentor, Black Redstart and White-winged Snowfinch. We also had great views of Bearded Vulture.

Our final stop of the day was in the sub-alpine zone, where the birders found Radde's Accentor. Common Rock Thrush and Red-backed Shrike. The botanists added *Primula veris* subsp. *macrocalyx* (a Cowslip), *Solenanthus stamineus* and *Cruciata laevipes* (Crosswort).

It was now time to return to the hotel to freshen up, before visiting a nearby restaurant for dinner.

Day 3

Monday 5th June

Armash Fishponds – Noravank Gorge & Yeghegnadzor:

After breakfast we left the hotel at 9am, heading for Armash, which is on the Turkish border, an hour or so south-east of Yerevan. We drove south on the M2, passing through Artashat and Avshar. A few White Storks, some on nests, Hoopoe and Lesser Grey Shrike were seen along the way. We also made one brief stop to photograph Mount Ararat.

On arrival at the Armash Fishponds Black-crowned Night Heron and European Roller were spotted. After entering the site, we drove past two large buildings and parked between two of the lakes, on a dyke. Early sightings were Black-winged Stilt, Slender-billed Gull, Grey, Squacco and Purple Heron, Glossy Ibis and Greater Flamingo, which all showed well. Setting off from the bus, we walked the tracks beside two large ponds. In the marginal reeds, Bearded Reedling, Penduline Tit, European Reed Warbler and Great Reed Warbler were active, and Cetti's Warblers were calling. As we reached an area of grassland, European Roller was seen, together with two Black-headed Yellow Wagtails. On the open water we saw Ferruginous Duck and Red-crested Pochard. Eurasian Coot and a good number of Pygmy Cormorants were also present. For the botanists this was a fascinating, inland, saline habitat. Many of the plants found here were some 1,000 miles from the nearest coast. *Chenopodium glaucum* (Oak-leaved Goosefoot), *Lepidium latifolium* (Dittander), *Cynodon dactylon* (Bermuda Grass), *Sphaerophysa salsula* (Red Bladder-vetch) and *Suaeda maritima* (Sea-blite) were all recorded, as well as Black-tailed Skimmer, and Red-veined Darter dragonflies.

We now made our way back to the vehicle for the short journey to the lunch stop, on the south side of the site. As we went, we added White-tailed Lapwing and Common Kingfisher. We took our picnic lunch under the shade of a solitary *Elaeagnus angustifolia* (Russian Olive). After eating, it was time to move on. Having left the fish ponds, we stopped for ice cream before continuing our journey eastwards through Sevakanan, on our way north.

Our next stop was at the head of the Noravank Gorge, where we parked up in a prolonged, heavy, local shower. In the area around the ancient churches we found a pair of Western Rock Nuthatches feeding young, Common Linnet, Goldfinch, Northern and Black-eared Wheatear, Red-billed Chough and had a fleeting glimpse of Golden Eagle. The rocky slopes and a good show of *Eremostachys molucelloides* and *Pistacia atlantica* (Mount Atlas Mastic Tree).

From here, it was only about 10 kilometres to our Homestay accommodation in Yeghednazor, where we arrived just after 5pm, to the song of Eurasian Golden Oriole and Common Nightingale, and to be met by Gohar, our host.

Day 4

Tuesday 6th June

Mount Gndasar - Gnishik

Golden Oriole was heard this morning as we were getting up, to be on our way at 5am. We travelled in 4x4 vehicles towards the village of Hors, where we left the public roads and started to climb on mountain tracks, in the direction of Mount Gndasar. We made steady progress to the first stopping point, recording Common Whitethroat and Black-headed Bunting as we climbed. We began scanning for Caspian Snowcock, but these elusive birds remained hidden. However, we did locate three distant Brown Bears: one solitary adult and one adult with a cub. Among the birds were Ring Ouzel, Common Buzzard and Rock Bunting. Plants seen included *Onosma tenuiflora*, *Eremurus spectabilis* (Yellow Foxtail Lily), *Orchis palustris*, *Rumex alpinus* (Monk's Rhubarb) and *Lallemantia iberica*. As the sun rose, insects became more obvious, and Scarce Swallowtail, Eastern Dappled White, Orange Tip and Clouded Apollo were all noted.

We now moved to a second location, in a col, and began to scan once more for the Snowcock. We soon added Golden Eagle, Chukar Partridge, Red-backed Shrike, Common Cuckoo and Tree Pipit, but, sadly, we could not locate the Caspian Snowcock. Around our feet we found *Eremogone (Arenaria) dianthoides* (a Sandwort), *Geranium tuberosum* (Tuberous Crane's-bill), *Eremogone gypsophiloides* and *Silene spergulifolia* (a Catchfly).

It was now time to move back down the mountain, stopping on the descent to admire a fine stand of *Gladiolus caucasicus* (Caucasian Gladiolus) and, growing with it, *Echium russicum* (Red Bugloss) and *Lathyrus miniatus* (a Red Pea). Additional insects included Dingy Skipper, Green-underside Blue, Oberthur's Grizzled Skipper, Small White and Heath Fritillary for the butterflies, and Black-veined, Chimney Sweeper and Burnet Companion moths. We now re-joined our vehicles for the journey back to base. As we were moving down the mountain, one of our drivers spotted another Bear. This time it was a solitary juvenile, probably only recently parted from its mother.

Upon our return to our accommodation, we took lunch, before joining Edik and our own bus for an afternoon excursion. Our final destination today was among the high, rolling meadows and rocky gorges at Gnishik, south of Yeghednadzor. Here we left our vehicle at the top of the quiet valley and began to walk down. Skylark, Black-headed Bunting, Common Whitethroat and European Bee-eater and Black-eared Wheatear were early finds for the birders. The botanists explored the open meadows and verges, finding the endemic *Onobrychis cornuta* (a Sainfoin), *Astragalus fragrans*, *Gladiolus atroviolaceus*, *Onobrychis radiata*, *Achillea arabica* (Bieberstein's Millfoil), *Rosa hemisphaerica* and *Hypericum scabrum* (a St. John's-wort). Lower down, European Stonechat and Blue Rock Thrush were added, Common Quail was singing, and we had distant views of Long-legged Buzzard. Butterflies included Black-veined White, Adonis Blue, Cardinal Fritillary, Queen of Spain Fritillary and Clouded Yellow. It was then time to return to Yeghednadzor to freshen up before going out to dinner.

Day 5

Wednesday 7th June

Selim Pass & Plateau – Shore of Lake Sevan

After breakfast, we left the Homestay accommodation, bidding farewell to Gohar, and were soon on our way northwards towards the Selim Pass and plateau. Along the way we saw White Wagtail, Hoopoe and Black-eared Wheatear.

Our first stop was on the twisting road that leads to the Selim Pass, at the Caravanserai, the resting place of travellers on the Silk Road in medieval times. While here we found Hoopoe, Whinchat, Crag Martin, Common Rosefinch, and Rock Sparrow. Meanwhile, along the roadside, there were *Symphytum asperum* (Rough Comfrey), *Cerastium purpurescens*, *Alchemilla glabra* (Smooth Lady's-mantle) and *Tragopogon reticulatus* (a Goat's-beard). As we were about to leave, a Long-legged Buzzard was spotted, circling.

Moving on, we soon reached the wide Selim Plateau, an extensive area of wet meadows and streams which produced *Pedicularis condensata* (Condensed Lousewort) and *Pedicularis wilhelmsiana* (Wilhelm's Lousewort), *Veronica gentianoides* (Gentian-like Speedwell), *Caltha palustris* (Marsh Marigold), *Primula auriculata* (a Bird's-eye Primrose) and large numbers of *Dactylorhiza umbrosa* (a Marsh Orchid). For the birders, there was Common Rosefinch, Common Sandpiper, Bluethroat, Black-headed Yellow Wagtails (*feldegg* race), and Common Whitethroat.

We now descended to the shores of Lake Sevan, near Lichk, where we spent some time in marginal reclaimed grassland, scrub and woodland. Before setting off to explore, we took lunch by the river where we heard Cetti's Warbler and Mountain Chiffchaff. After lunch we set off towards a small lake. As we progressed, we saw *Lappula squarrosa* (Bur Forget-me-not), *Cynoglossum officinale* (Common Hound's-tongue), *Nonea armeniaca* and *Buglossoides arvensis* (Corn Gromwell). Here, the birds included Little Grebe, Western Marsh Harrier, Grey Heron, Eurasian Coot and Gadwall. However, the spectacle of the day was a cloud of some hundreds of Sand Martins in the air and at their nest holes in a sandy bank.

Our final stop was at 'Gull island', on Lake Sevan near to the village of Norashen. Here we got our first real opportunity to study Armenian Gull at fairly close quarters, and good scoped views were had by all. We also recorded Great Crested Grebe, Western Cattle Egret, Black-crowned Night Heron, Little Egret, Great Cormorant, Glossy Ibis and Ruddy Shelduck.

The final leg of our journey to Dilijan took just under an hour, before we arrived at the rather grand Dilijan Resort Hotel. After checking in, we retired to freshen up before dinner.

Day 6

Thursday 8th June

Parz Lich Forest - Haghartsin Forest & the Sevan Pass

An early bird walk, around the hotel grounds, produced Robin, Green Warbler and Middle Spotted Woodpecker.

After breakfast at 8am, we were ready to leave by 9am for the 15-minute drive to an area of broadleaf woodland at Parz Lich, where the forest produced *Fagus orientalis* (Oriental Beech), *Quercus macranthera* (Caucasian Oak) and *Zelkova (Ulmus) carpinifolia* (Caucasian Elm). As we left our vehicle, we immediately found Eurasian Nuthatch, Eurasian Treecreeper and a Song Thrush was singing. Further on up the track, the woodland had Coal Tit, Common Chaffinch and Great Tit for the birders, and for the botanists, *Dactylorhiza urvilleana*, *Bunias orientalis* (Warty Cabbage), *Hesperis matronalis* (Dame's Violet), *Cardamine impatiens* (Cut-leaved Bitter-cress), *Cephalanthera damasonium* (White Helleborine), *Neottia nidus-avis* (Bird's-nest Orchid) and the curious *Rhynchochorys orientalis*.

Moving on, we made the short journey to the wooded valley of Haghartsin and spent time exploring the woodland there. Bird sightings included Red-breasted Flycatcher, Great Spotted Woodpecker, and Spotted Flycatcher. The botanists added a number of Orchid species, including emerging *Cephalanthera rubra* (Red Helleborine) and *Platanthera bifolia* (Lesser Butterfly Orchid). Within the forest, there were a number of picnic shelters, so we took our picnic lunch here.

As we finished lunch, it began to rain, so we made the short hop to the Haghartsin Church, which group members took time to visit. Plants by the roadside included more of the *Rhynchochorys orientalis*, *Gypsophila elegans* (Gypsophila), and *Heracleum mantagazzianum* (Giant Hogweed).

As it had now stopped raining, we now made our way into Dilijan for ice cream, before we moved on to the sub-alpine zone of the Sevan Pass where the whole group set off into the flower-rich meadows, near the village of Semyonovka. The wonderful meadows produced *Anemone narcissiflora* subsp. *fasciculata*, *Veronica gentianoides* (Gentian-like Speedwell) and *Pedicularis condensata* (Condensed Lousewort). Here, we also recorded Green-veined White; the birders had Lesser Spotted Eagle, Long-legged Buzzard, Corn Bunting, Common Rosefinch and they heard Common Quail and Corncrake. A second stop on a sunny bank added Pearl-bordered Fritillary, Woodland Ringlet and Dingy Skipper as well as Armenian Rock Lizards.

We now returned to the hotel in time for dinner.

Day 7

Friday 9th June

Pambak Mountain Ridge – Travel to Yeravan

All of the group members joined Hasmik and Paul on an early morning excursion to try to see Caucasian Grouse. We left the hotel, following at 5am in 4x4 vehicles, to make the journey to an isolated mountain top west of Dilijan. The track up this remote mountain was very uneven and stony. After an hour and a half we arrived just below the summit, c.2,600 metres above sea level, in low cloud. Scanning of the mountainside for the Caucasian Grouse proved rather difficult! However, Common Rosefinch, Water Pipit, and Northern Wheatear, were found. For the botanists, the highlights were *Rhododendron caucasicum* (Caucasian Rhododendron), *Fritillaria collina*, *Gentiana pyrenaica* (Pyrenean Gentian) and *Primula ruprechtii* (Ruprecht's Primrose) among many many more. At this point, we took our packed breakfast, before moving higher, in an attempt to get above the low cloud. This proved to be a good decision, as the top of the ridge was in bright sunshine, although unfortunately, we were still not able to locate any Grouse. We

did add Rosy Starling, Armenian Gull and Common Whitethroat, while additional plants included *Pedicularis armena* (Armenian Lousewort), *Gentiana aquatica* and *Primula algida*.

We then headed back down the mountain, passing herders and their cattle on the high grazing pastures. A brief pause on the downward journey added *Corallorhiza trifida* (Coralroot Orchid) and *Gymnadenia conopsea* (Fragrant Orchid), as well as good views of Mountain Chiffchaff. We made our way back to Dilijan to collect our luggage and started the journey back to Yerevan, having our picnic lunch in the hotel grounds, before we set off.

On the return journey, we stopped at a dry gorge near the village of Bjni. Here the birders found Common Rock Thrush, Booted Eagle, Rock Bunting, Ortalan Bunting, Crag Martin and Common Rosefinch. Plants included *Hypericum scabrum*, (Rough St. John's-wort), *Lappula squarrosa* (Bur Forget-me-not), *Marrubium vulgare* (White Horehound), *Onobrychis cornuta* and two scarce endemics, *Astragalus goktschiacus* and *Campanula caucasica* (Caucasian Bellflower). Queen of Spain Fritillary, Eastern Wood White, Large White and Adonis Blue butterflies, together with Churchyard Beetle and Roesel's Bush-cricket, were also seen.

We arrived at the Minotel Hotel in good time to freshen up before going out to dinner at a local restaurant.

Day 8

Saturday 10th June

Near Hatsavan – Garni

After breakfast, we set off south-eastwards towards Garni, tuning right after about 40 minutes, in the direction of Artashat. We stopped in the vicinity of Hatsavan, an area of semi-desert in the direction of the Azet Reservoir. As we approached our destination, a solitary Long-legged Buzzard and several Isabelline Wheatears were spotted. We made a short stop on the quiet roadside, adding Rosy Starling, Crested Lark and a distant Female Finsch's Wheatear. The verges and adjacent dry fields produced *Onopordum armenum* (Armenian Cotton Thistle) *Capparis spinosa* (Caper) and *Glaucium elegans*.

Moving a little further on, we left our vehicle to explore the track alongside some new fruit tree plantations, we came upon a good number of *Centaurea moschata* (Sweet Sultan), *Glaucium elegans*, *Lappula squarrosa* (Bur Forget-me-not), *Senecio caucasica* (Caucasian Ragwort), *Caccinia macranthera* and *Consolida divaricata* (a Larkspur). Meanwhile, the birders found Isabelline Wheatear and Black-eared Wheatears as well. Added to these were Rufous Bush Robin, Upcher's Warbler, and Pale Rockfinch. Butterflies included Powdered Brimstone, Cardinal Fritillary, Common Blue, Eastern Marbled White and Eastern Dappled White.

A short final stop in this desert landscape produced some distant views of Finsch's Wheatear.

It was now time to make our way into the small town of Garni, where lunch was taken in a local restaurant. On our arrival, we watched a demonstration of how the local flat-bread, 'Lavash', was prepared and cooked in a floor oven. We then had the opportunity to taste it with herbs and cheese, and

all agreed it was very good. After a delicious lunch of salad and barbecued fish, we re-joined our vehicle for the short drive to visit to the last remaining example of a Pagan Temple in Armenia, this one dedicated to the god Mihr. Whilst there, we recorded Levant Sparrowhawk, Common Kestrel, Alpine Swift and Common House Martin. In addition, there were a good number of Cardinal Fritillaries.

We now began to make the return journey to Yerevan. Along the way we stopped for photographs, and also recorded Black-headed Bunting and European Roller, as well as *Chardinia orientalis*, *Cirsium congestum* (Congested Thistle) and *Helichrysum armenium* (Armenian Everlasting). It was now time to make our way back to Yerevan. Dinner tonight was in another restaurant, not too far from our hotel.

Day 9

Sunday 11th June

Yerevan Botanic Gardens – Travel home.

A leisurely morning began with breakfast from 8am. After eating, we met at 9am to make the short journey to the Yerevan Botanic Gardens. In the short time we had there we heard Whitethroat and Nightingale, and saw Hooded Crow, Levant Sparrowhawk, and Hoopoe. There were also some new butterflies, including Eastern Meadow Brown, Essex Skipper, Large Skipper, White-letter Hairstreak and Southern White Admiral. At 11am we returned to the hotel to complete our packing before joining the bus for the journey to the airport.

At the Airport, we checked in for Aeroflot flight SU1861 to Moscow, and said goodbye to Edik and Hasmik. On arrival in Moscow Sheremetyevo Airport, we waited for our onward Aeroflot flight SU2584 to London Heathrow Terminal 4, which left at 8.25pm local time. On arrival at Heathrow at 9.25pm, we collected our luggage and said our goodbyes at the carousel, after an extremely enjoyable visit to Armenia.
