Tour participants - John Horton & Matthew Scragg (Leaders) with nine Naturetrek clients.

## Day 1

## Monday 20th September

The flight from Southampton arrived 15 minutes early, and after everyone was settled in at the hotel we met on the spacious sun-drenched veranda overlooking Braye Bay where we met for a meet and greet. As our Naturetrekers gathered we spotted wading birds on the beach including Sanderling and Little Stint. A Peregrine Falcon overhead interrupted our gathering ahead of us taking a walk down to the sand-dunes below us to enjoy some of the shoreline wildflowers that included Wall Rocket, Prickly Saltwort, Sea Holly, Sea Rocket, Sea Samphire and Large Flowering Evening Primrose, while several White Wagtails, a Wheatear and a couple of Rock Pipits were on the tideline.

## Day 2

## Tuesday 21st September

All aboard our executive minibus, our first stop today was at the north end of Braye Bay. Here we picked out Mediterranean Gulls amongst the Black-headed Gulls and while looking at the identification features we were suddenly treated to a close flypast by around 60 Oystercatchers accompanied by nine Bar-tailed Godwits. The shoreline plants at this spot offered up Bush Vetch, Sea Sandwort and Frosted Orache. Ahead of returning to the bus Jane gave a call pointing out an exceptionally large bird in the sky that had got her attention - an Osprey! This wonderful bird of prey, likely migrating down from Scotland, drifted slowly overhead travelling south-west on its long journey to winter in Africa.

Now to the South-west coast and the Gorse covered headland at Giffoine, with high hopes amongst the group of catching a glimpse of the elusive Dartford Warbler. In the event, boy did we see them well! At a location known to our guides we were quite literally surrounded by up to 10 Dartford Warblers popping up on Gorse and Bramble tops in every direction, occasionally offering tantalising views down to just a few feet. Butterflies were a-plenty as were crickets and bees and a bee-sized fly got our attention. A few photos later and a bit of investigation brought us to the realisation that we had recorded Europe's largest fly species, the Giant Tachinid Fly.

In the afternoon with conditions of light winds and bright sunshine we went on our boat trip to take in the spectacle of the Gannet colony, still laden with thousands of these magnificent marine birds. At this time of year there is always the chance of other more unusual seabirds during the round island trip. Today we were fortunate to see a Great Skua chasing and harassing a dozen Sandwich Terns. Peregrines, Ravens, and Buzzards also featured alongside an excellent historical commentary concerning Alderney's Forts and nautical past from boat skipper Dave Venn. Whilst docking a half dozen Turnstones were about the quay.

## Day 3

## Wednesday 22nd September

We began at Longis Common with some birdwatching which produced Stonechats, Greenfinches, Chiffchaffs, and a wonderful Spotted Flycatcher. Heading into the Roman fort Nunnery, John gave the group a historical tour taking in features from the Roman ramparts through to the building's Napoleonic, Tudor, Victorian and

WW11 occupations. Next our tour co-leader Matt emptied the moth trap, and we took in over 20 species of moths from the non-descript to the beautiful and showy, while also present were three Sexton Beetles.

Our afternoon walk started out at Mannez Lighthouse situated at the north-east corner of the island and began with an Autumn Ladies 'Tresses Orchid in the Lighthouse Garden. Along this trail where south-facing slopes face the French coast, butterflies including Small Copper, Common Blue and Wall Brown emerged from grasses busy with Field Crickets.

This walk takes in some of the Channel Islands rarest wildflowers and the group enjoyed both Rock Sea Lavender and the exceedingly rare Alderney Sea Lavender. Sea Rush is also found on this stretch and as we examined this species John spotted an Atlantic Grey Seal basking in the sunshine offshore. Our last 400 yards saw us arriving at the 'Naturetrek Hide' at Longis Nature Reserve where we hoped for songbirds dropping into the freshwater pond smattered with Amphibious Bistort to take a drink during the hot late afternoon, and as it turned out we got more than we bargained for! Water birds we added to our trip-list included Little Grebe and a very well camouflaged Teal found by Dave, then to our delight two Snipe and a Water Rail offered fantastic views just a few feet in front of the hide. Reed Warblers and Chiffchaffs were spotted but eclipsed by a Garden Warbler, another species that offered uncharacteristically good views to our guests, giving us the opportunity to look at its identification features as it moved about a Willow tree outside the hide.

Our day ended with the much-anticipated night safari which began with a visit to the bird observatory where the moth trap lit up the courtyard attracting local and migrant moths. In turn a couple of Common Pipistrelle Bats were at close quarters catching insects attracted by the light.

We met Suzy Weir, a local Hedgehog expert currently working with UK scientists studying the animals and taking DNA samples, looking to develop knowledge of the high percentage of leucistic individuals that make up the overall population on Alderney. We headed to 'Hedgehog Central' where Suzy soon located some 'blonde' form Hedgehogs and expertly handling the animals, Suzy fielded questions from the group whilst explaining her research work. A Barn Owl was heard several times during our evening stroll but alas not seen.

## Day 4

## Thursday 23rd September

This morning we had an early start with everyone determined to be present for the bird ringing session that has proved to be a highlight of the trip for so many since a demonstration session of this research was introduced to these Naturetrek holidays through Alderney Bird Observatory in 2016. At close quarters the group sat spellbound as birds including Sand Martin, Swallow, Blackcap, Chiffchaff and Robin were expertly handled and ringed by our tour leader, whilst the invaluable data concerning the birds' species and biometrics was obtained and explained.

In the afternoon, a stop at Braye Bay offered the chance to admire a flock of 28 Mediterranean Gulls gathered on a rocky shoreline spit at high tide. Next, we headed up to Fort Albert, one of the best viewpoints on the island looking down across the sands of Braye Bay and our group's hotel. We moved on to the site of "Nordeney" one of the Russian forced-labour camps during the occupation, stopping at the WW11 Hammond remembrance memorial to discuss Alderney's dark days under Nazi occupation.

Arriving at our north coast destination, now a thriving modern-day campsite adjacent to the beautiful Saye Bay we walked under the ancient 'Norman built' stone Arch that leads to the delightful white sands of Arch Bay.

Here Sea Spurge thrives at this much photographed and picturesque site. We walked to Corblett's Bay where we found a Common Gull on the beach and in the adjacent quarry a Cormorant and Little Egret were amongst other water birds.

## Day 5

## Friday 24th September

Our first walk of the day was from Platte Salin beach to Fort Clonque. On the beach were some flowering Yellow Horned Poppy and we also found Sea Kale and Ringed Plover here. Our stroll was timed to coincide with the rising tide in the hope of finding waders using the beach to roost and we homed in on the assembled birds - some 200 Oystercatchers and 32 Eurasian Curlews. A flurry of Chiffchaffs and a Whitethroat were chasing insects amongst shrubs a little further long the coast. Water Mint and Greater Birds-foot Trefoil adorned a damp patch in a small disused quarry. At a popular location that is a sun-trap for insects hundreds of Ivy Mining Bees gathered around a sea of Fuchsia and Ivy and from here looking down into the bay, scanning the seaweed strewn tide line, our group leader picked up two Common Sandpiper snapping up Sandhoppers. The two migrant waders appeared focussed on feasting and went about their task oblivious to their admirers. A Bar-tailed Godwit was a little further along the beach and at the end of the track where the tidal causeway to Fort Clonque begins, several Small Heath Butterfly featured. Now we headed to the watermill, built in 1206. The building has undergone sympathetic restoration and retains many of its original features, while the short track to the site was busy with Speckled Wood and Red Admiral butterflies.

After lunch we took our cliff path walk, and the air quality was so clear that we could easily see the Contentin peninsula on the French coast, then from east to west the islands of Jersey, Sark, Herm and Guernsey. Additional plant species here were White Stonecrop and Butchers Broom. Migrating Swallows regularly passed by, a single Dartford Warbler flew typically low and swiftly through the Gorse, and Buzzards and Kestrels were regularly spotted.

## Day 6

## Saturday 25th September

Our morning started out with our second helping of the moth trap which offered up another fascinating variety of species many of which were new for our trip including Brindled Ochre and Black Rustic.

We headed to the nearby German underground tunnels, a location of some recent controversy now considered by many to be a Nazi location hiding long range rockets and possibly chemical weapons. Many original features remain in the pitch-black tunnel where we also found some cave dwelling moths, the Herald and the Bloxworth Snout.

Our walk ahead of lunch was up Essex hill to Essex Castle, a building built for the Earl of Essex in the 16<sup>th</sup> Century. Butterflies absorbing the sun reflecting off the Ivy along the path sides included several Peacocks, Speckled Wood, Red Admirals and a Painted Lady, and a Hummingbird Hawkmoth also made an appearance. Chiffchaffs, Robins and Great Tits were spotted along the way and a migrating Golden Plover called as it passed overhead. At our destination, a short circular route through the gorse habitat offered brief views of another Dartford Warbler and here Wall Brown and Small Heath were found along the pathways. From this location Alderney bird observatory monitors bird migration by way of a device that records the calls of migrating birds.

After lunch we drove to our afternoon activity venue beginning with a visit to the giant WW11 German range finding tower - another venue from which to take in fantastic views across towards the French coast. Walking

down across the Mannez Garrenne towards Longis hide we chanced upon our first Grayling butterfly of the trip and soon followed it up with another butterfly addition, a male Brown Argus. From the Naturetrek hide a Sedge Warbler showed well, several Water Rails made themselves heard and amongst half a dozen Chiffchaffs and Blackcaps the tour leader picked out a Red-breasted Flycatcher! The bird perched in an Alder bush before flying across the pond in front of the hide showing off its distinctive black and white tail pattern to our excited group.

## Day 7

## Sunday 26th September

Today offered options to our group which split up to enjoy either a visit to the Alderney museum or heading to the hotel cinema to watch a compelling short film telling the story of the German occupation of Alderney, told by those who lived through it.

Our afternoon walk was towards the south-west end cliffs to Telegraph Bay. At our van parking site some flowering Chicory and a fly over by two vocal Ravens got us off to a good start, migrating Meadow Pipits and Swallows passed over head and on reaching the cliff tops overlooking Telegraph Bay we added two more wildflowers to our list - Prostrate Broom and Greater Broomrape.

The second phase of this walk took us out to the headland overlooking the Les Etacs Gannet colony that we visited by boat on the 21<sup>st</sup>. Stonechats perched on Gorse tops observing the group walking back to the minibus. On our way along the west coast we made a last stop of the trip at a wildflower meadow. Earlier in the year there is a blaze of colour, and although past its summer glory it still offered us some further additions to the trip list being Corn Marigold and Scarlet Clover. A couple of Linnets waited patiently for us to move on and several Small Copper Butterflies offered excellent photo opportunities.

Alas, it was time to return to the hotel. Our final evening meal was at the popular Blonde Hedgehog hotel where during dinner Alderney Bird observatory pin badges were awarded to our guests who the leaders felt had made 'spot of the week' - Jane for her Osprey, John for the Atlantic Grey Seal and David for finding a very well camouflaged Teal on Longis reserve.

## Day 8

## Monday 27th September

The hotel was kind enough to facilitate an early breakfast for our group who departed as they arrived, in bright sunshine and blue skies. It had been quite a trip that incorporated seven consecutive days of wall to wall sunshine accompanied by a pleasant light breeze, simply perfect for our walks. The super weather conditions contributed to us seeing 15 different species of butterfly, a wide variety of migrant birds and over 100 species of wildflowers, many still in bloom. This trip included several guests re-visiting Alderney with Naturetrek to enjoy a fine blend of the best of diversity of British Isles Wildlife, great food, and accommodation in a relaxing environment with plenty of laughs along the way.

12	Small Tortoiseshell	<i>Aglais urticae</i>		1						
13	Small White	<i>Artogeia (Pieris) rapae</i>		2	10	2	2	5		
14	Speckled Wood	<i>Pararge aegeria</i>		2	5		2	5	2	
15	Wall Brown	<i>Lasiommata megera</i>			3		3			
<b>MOTHS</b>										
1	Black Rustic	<i>Aporophyla nigra</i>						1		
2	Bloxworth Snout	<i>Hypena obsitalis</i>						10		
3	Brimstone	<i>Opisthograptis luteolata</i>			1					
4	Brindled Ochre	<i>Dasypolia templi</i>						1		
5	Buff Ermine	<i>Spilarctia luteum</i>			1					
6	Common Carpet	<i>Epirrhoe alternata</i>			1					
7	Common Marbled Carpet	<i>Dysstroma truncata</i>			1			1		
8	Common Snout	<i>Libytheana carinenta</i>			1			2		
9	Common Wainscot	<i>Mythimna pallens</i>			1					
10	Crescent Dart	<i>Agrotis trux lunigera</i>						2		
11	Flame	<i>Axylia putris</i>			1		1			
12	Galium Carpet	<i>Epirrhoe galiata</i>			2			1		
13	Grass Eggar	<i>Lasiocampa trifolii</i>						1		
14	Herald	<i>Scoliopteryx libatrix</i>						20		
15	Hummingbird Hawk-moth	<i>Macroglossum stellatarum</i>						2		
16	Large Yellow Underwing	<i>Noctua pronuba</i>			2			8		
17	Lesser Yellow Underwing	<i>Noctua comes</i>			1					
18	Light Emerald	<i>Campaea margaritata</i>			1					
19	Marbled Green	<i>Cryphia muralis</i>			1					
20	Portland Wave	<i>Idaea degeneraria</i>						1		
21	Purple Bar	<i>Cosmorhoe ocellata</i>						1		
22	Rusty Dot Pearl	<i>Udea ferrugalis</i>			1				1	
23	Straw Underwing	<i>Thalpophila matura</i>						1		
24	Setaceous Hebrew Character	<i>Xestia c-nigrum</i>			3			3		
25	Silver Y	<i>Autographa gamma</i>		1	1		1			
26	Shuttle-shaped Dart	<i>Agrotis puta</i>			2			1		
27	Small Square Spot	<i>Diarsia rubi</i>			1					
28	Square-spot Rustic	<i>Xestia xanthographa</i>			1			4		
29	Vine Moth	<i>Eupoecilia ambiguella</i>			1					
30	Vine's Rustic	<i>Hoplodrina ambigua</i>			1					
31	Willow Beauty	<i>Peribatodes rhomboidaria</i>			3					
32	Yellow Belle	<i>Aspitates ochrearia</i>			1					
<b>DRAGONFLIES</b>										
1	Common Darter	<i>Sympetrum striolatum</i>				1				

			September 2021							
	Common name	Scientific name	20	21	22	23	24	25	26	27
2	Common Hawker	<i>Aeshna juncea</i>			2	1				
3	Migrant Hawker	<i>Aeshna mixta</i>			5			5		
<b>OTHER INSECTS</b>										
1	Black Headed Pasture Cockchafer	<i>Acrossidius tasmaniae</i>			3					
2	European Garden Spider	<i>Araneus Diadematus</i>		10				2		
3	Field Grasshopper	<i>Chorthippus brunneus</i>		✓	✓	✓	✓	✓	✓	
4	Great Green Bush-cricket	<i>Tettigonia viridissima</i>						1		
5	Sexton Beetle	<i>Nicrophorus vespillo</i>			1					
6	Small Bloody-nosed Beetle	<i>Timarcha goettingensis</i>				1	8			
7	Bee Wolf	<i>Philanthus triangulum</i>					1			
8	Common Carder Bee	<i>Bombus pascuorum</i>					✓	✓	5	
9	Ivy Bee	<i>Colletes hederæ</i>				1	✓	✓		
10	Large Carder Bee	<i>Bombus muscorum</i>				1				
11	Red -tailed Bumblebee	<i>Bombus lapidarius</i>				1				
12	White-tailed Bee	<i>Bombus Lucorum</i>					1			
13	Flesh Fly	<i>Sarcophaga crassipalpis</i>						2		
15	Marmalade Hoverfly	<i>Episyrphus balteatus</i>		1			5			
16	Zebra striped Hoverfly	<i>Scaeva pyrastrî</i>		2						
17	Giant Tachinid Fly	<i>Tachina grossa</i>		1						

## Other species
