Pro Tip:

I carry a lot of extra gear when I ride: spare gloves and goggles, a couple of bottles of water, jacket liner, tow rope, tools and some snacks. With 21 liters of capacity, the tunnel gear bag lets me bring it all while still looking sleek and sporty.

Pro Tip:

I always keep my smartphone in the accessory goggle holder, usually plugged in using the 12V source so it's ready for taking photos. But cold phones automatically shut down. So I use a bag heater kit, which I wrap in fleece so the heating element won't scratch my phone.

— JOHN SANDBERG *ArcticInsider*

GOGGLE HOLDER

- ▶ Engine heat dries goggles, masks or gloves while you ride
- NOTE:** Do not leave goggles in holder for extended periods; heat may damage goggles.

Pro Tip:

Adding a handlebar bag is the first thing Arctic Cat mountain development engineers do when setting up their sleds for a day of testing. It's easily accessible when sitting on the sled and doesn't get in the way or move around while riding in the backcountry.

7639-112 UNIVERSAL

Pro Tip: We often ride when the temperature is below 0°F, which makes it tough to keep your hands warm, no matter how hot the handlebar heaters. The solution is Soft Muffs, which keep the wind off your hands and retain maximum hand warmer heat. A bonus: If it's too warm, you can just roll them up out of the way until you need them again.

— TROY HALVORSON Arctic Cat Snowmobile Product Manager

DUAL SPEED COMPRESSION (DSC)

With DSC, you can adjust the shock's high- and low-speed compression damping by simply turning the external adjusters. DSC allows you to maximize small bump compliance and traction while still having the extra damping required for big hits.

EVOL AIR CHAMBER

The infinitely adjustable pressure setting in the extra volume (EVOL) air chamber regulates spring rate in the final portion of the stroke and controls the bottom-out characteristics of the shock.

KASHIMA COAT

FOX FLOAT 3 and ZERO shocks feature Genuine Kashima Coat. The distinctive gold color is backed by its high-performance properties that provide reduced friction, an exceptionally smooth feel and extreme durability.

QS3 (3 SETTING QUICK POSITION SWITCH)

Choose from three specifically calibrated ride control settings to tune in your own personal ride and handling setting. The QS3 supplies a wide range of adjustments while simply allowing the user to make a change quickly without tools.

REBOUND DAMPING

Rebound damping controls the rate at which the shock returns after it has been compressed. The proper rebound setting is a personal preference and changes with rider weight, riding style and conditions.

Pro Tip:

Yeah, I like jumping and sending it over big air hits, but I also like the finesse of carving powder. FOX FLOAT 3 QS3-R shocks are the best because I can switch them up for whatever kind of riding I'm doing. Kashima coating, adjustable rebound, lightweight ... no other shock compares for my style.

PRO MTN ACCESSORIES

You thrive in tough conditions. So do these accessories. Each of our accessories is tested and proven worthy by legendary backcountry riders Dave McClure and Rob Kincaid in the most rugged terrains possible. Because the way we see it, your accessories should be just as at home in the backcountry as you are.

Pro Tip:

Good footing is key to being able to move from side to side on your Mountain Cat while boondocking through the trees and deep snow. We developed the Pro Mtn running boards for extra-aggressive foot traction and a further foot positioning than the stock boards. Plus, the open-air design eliminates snow buildup.

— DAVE MCCLURE Pro Black Cats Backcountry Rider

PRO MTN RUNNING BOARDS

- ▶ Aluminum running boards feature an open-tube design that eliminates snow buildup
- ▶ Includes aggressive, injection-molded rail grippers
- ▶ 6.25-in. front stirrup width is 1 in. narrower per side than production boards
- ▶ Front support tube allows a more forward foot position when sidehilling
- ▶ Installation requires removal of stock running boards
- ▶ Includes right-hand and left-hand boards and rail grippers
- ▶ Accepts Pro Mtn Rear Bumper
- ▶ 8.5 lbs.

Pro Tip:

I don't want to worry about the front of my sled when I'm getting gnarly in the trees. The Pro Mtn front bumper is extra burly without being overweight. And along with the Pro Mtn rear bumper, it's easy to grab onto McClure's sled for all those times he gets stuck and I have to help him.

TRACK RACK SYSTEM

Unique design allows you to easily slide a Utility Jug or Gear Bag on and off your tunnel. A raised mounting track keeps the gear away from your tunnel. Mounting tracks are made of HDPE plastic for durability plus resistance to snow and ice buildup. Heavy-duty Utility Jugs are UV-protected. Hard-sided Gear Bags are made of water-resistant polyester with a urethane-coated outer shell and feature padded foam lining. The Utility Jug and Gear Bag base slides easily onto the mounting track. Mounting Track, Utility Jugs and Gear Bags are sold separately.

Note: Utility Jugs are not intended for fuel storage.

MAXIMIZE STEERING CONTROL

The length of the turning carbide (carbide inserted directly under the steering spindle) is the determining factor on steering control. The longer the turning carbide, the more positive turning becomes. Too few studs with long turning carbides can result in the situation shown in Illustration 1 below.

MAXIMIZE TRACTION CONTROL

The quantity and types of studs inserted through the track can have several effects. If installed improperly, track and/or stud damage can result. If the pushing force from an excessive number of studs exceeds the ability of the steering to control the force, the effect could be like that in Illustration 2. In this case, the studs tend to "push" the skis in a straight line.

- 1 Back end loose. Too much carbide, not enough steering control.
- 2 Front end pushes. Weak steering from worn wearbars, turning carbides too short or overstudding on track.
- 3 Steering control and stud quantity are in balance for proper setup.

TUNE YOUR SLED'S HANDLING TO YOUR RIDING STYLE

Determining the proper traction and control is simple. What's your riding style: Are you a conservative trail rider or a performance trail rider? Look at the chart below. Find the line with the horsepower of your sled. Look under your riding category. Here you will discover the number of studs and the length of the carbide wearbar you should use. This is a baseline guide for stud and wearbar selection. See your dealer for specific model applications.

STUD QUANTITY / INCHES OF TURNING CARBIDE

SLED	TRAIL	PERFORMANCE
50-75 HP	48/4 in.	48/6 in.
75-125 HP	102/6 in.	153/8 in.
125-150 HP	153/8 in.	153/10 in.
150-200 HP	153/8 in.	153/10 in.

FOR STUD PLACEMENT, USE ONLY ARCTIC CAT-APPROVED STUD TEMPLATES SHOWN ON PAGE 151.

Arctic Cat traction products are available in package quantities that will give you the best combinations for 121-in., 128-in., 129-in. and 137-in. tracks.

RECOMMENDED STUD LENGTH (IN.)

TRACK LUG HEIGHT	WOODY'S STUD LENGTH	STUD BOY STUD LENGTH
1.000	1.075	1.080
1.250	1.325	1.375
1.352	1.325	1.375
1.375	1.450	1.500
1.500	1.575	
1.600	1.575	

For stud lengths 1.325 in. and longer, we recommend the use of a Big Nut (page 150) or Power Tower Support Nut (page 151). Cobra 1.352-in. tracks have a standard lug height of 1.25 in. The overall lug height including the extended "towers" is 1.352 in. Because the towers will flex, Cobra 1.352-in. tracks use the same stud length as a 1.25-in. track.

CAUTION

- ▶ TO PROTECT THE TUNNEL FROM POSSIBLE DAMAGE FROM THE STUDS, IT IS RECOMMENDED THAT A TUNNEL PROTECTOR KIT BE INSTALLED ON THOSE MODELS NOT SO EQUIPPED
- ▶ A SHORT SNOWFLAP IS REQUIRED WHEN INSTALLING STUDS ON '07-'09 F SERIES; '09 Z1, Z1 TURBO; '09-'11 CROSSFIRE AND CFR
- ▶ SEE YOUR DEALER FOR ADDITIONAL INFORMATION

STUD PLACEMENT

- ▶ DO NOT use studs that are longer than recommended
- ▶ DO NOT place studs in line with the heat exchanger or tunnel protector strip, and factor in the amount of suspension travel to avoid tunnel damage
- ▶ Studs MUST NOT extend more than 3/8-in. beyond the rubber track lugs
- ▶ Verify adequate clearance between the track, tunnel and heat exchanger to avoid serious damage
- ▶ Confirm that your machine has adequate tunnel protection before installing studs
- ▶ Use only Arctic Cat-approved Stud Templates shown on page 151
- ▶ The length of carbide and number of studs must coordinate to result in balanced handling and proper control

'05-'18 ARCTIC CAT SADDLELESS SKI WEARBARS

NOTE: The accessory wearbars use a 4-bolt stud pattern. When using accessory wearbars on '05 and newer models with Saddleless Skis and a 3-bolt stud pattern, it will be necessary to drill another mounting hole in the ski.

YOUR BATTERY SHOULD BE READY WHEN YOU ARE

Your Arctic Cat vehicle is designed to deliver power & performance, so that you can sit back and enjoy the thrill of the ride. Here at Arctic Cat we understand the importance of the battery - the very heart of the vehicle. This is why we have partnered with CTEK, global manufacturer of the most awarded battery maintainers in the industry, to develop a battery charger specifically for your Arctic Cat.

- Made specifically for your Arctic Cat vehicle.
- Fully automatic 0.8 and 4.3 Amp Smart Charger.
- Suitable for all types of 12V lead acid battery.
- Why waste valuable riding time replacing a battery?
- Use the 4.3A charger for your sled, off-road vehicle or car.
- Convenient connection options make it easy to charge without opening the cowling.
- Properly maintained batteries last up to 3 times longer.
- Unlike trickle chargers, the Arctic Cat charger will never over-charge your battery.
- Perfect for long-term storage.

BELTS

- ▶ Custom fit to match each Arctic Cat sled and specific use
- ▶ Better contact with clutch surface and faster acceleration from double cogs
- ▶ Increased belt life by running 15° cooler than aftermarket belts
- ▶ Reinforced with Aramax® aramid fibers for strength and durability
- ▶ Increased power transmission with less slip from aramid-fiber rubber compounds
- ▶ Kevlar® drive belts available for F, M, ZR and XF models, which dramatically extend belt life and sustain belt length better than steel cords

NOTE: Proper break-in period required.

PREMIUM ARCTIC CAT "EXTENDED-LIFE" ORIGINAL EQUIPMENT REPLACEMENT BELTS

Don't settle for anything less than a drive belt built specifically for your sled. Proven through extensive lab and field testing, original equipment Arctic Cat replacement belts are precision-engineered for each Arctic Cat snowmobile.

CUSTOM-ENGINEERED FIT

While non-OEM aftermarket belts offer "one construction fits all," Arctic Cat Research & Development custom engineers each genuine Arctic Cat belt to match the specific performance characteristics of your sled. This produces the best combination of strength, durability and responsiveness for lower-horsepower, fan-cooled sleds all the way up to high-horsepower muscle sleds. Each one is built using only state-of-the-art materials, incorporating precision manufacturing techniques to meet exacting tolerances.

TOP & BOTTOM COGS

Arctic Cat original equipment belts are double cogged, so more of the belt contacts the clutch surfaces. This results in faster acceleration, maximum efficiency and superb overall performance. Double-cog design provides structure while adding surface area for greater cooling and longer life. In fact, our belt runs up to 15° cooler than flat-top aftermarket belts.

ARAMAX HIGH-MODULUS (LOW-STRETCH) ARAMID-FIBER TENSILE MEMBER

The Aramax inner cord provides incredible strength and durability for high-horsepower, high-performance sleds. In addition, each belt is reinforced with top-grade, high-flexibility, shock-resistant Aramax aramid-fiber cords, and chemically treated for maximum power transmission and length stability.

HIGH-PERFORMANCE PREMIUM COMPOUNDS

Arctic Cat's OEM belts incorporate advanced "premium" compound materials that ensure optimum belt performance under all riding conditions. The advanced aramid-fiber-loaded rubber compound resists wear and delivers consistent power while minimizing slippage over a broad range of operating temperatures. The thicker, highly flexible design increases grip to clutch surfaces for increased power transmission.

ARCTIC CAT KEVLAR DRIVE BELTS

These ultimate-performance Arctic Cat Kevlar drive belts are custom engineered for F, M, ZR and XF models. Extended-life belts feature top- and bottom-molded cog construction and high-performance compounds. Inside, the Kevlar cord provides increased belt life. Please note that proper belt "break-in" is required.

4-CYCLE OILS

Arctic Cat synthetic C-TEC4™ engine oil is purpose-built and proven for Arctic Cat 4-cycle snowmobile engines, and is the ONLY oil recommended by Arctic Cat engineering. The unique synthetic formulation of C-TEC4 allows your engine to deliver optimum performance and provides the ideal viscosity for easy cold weather starting and protection.

C-TEC4 SYNTHETIC OIL

- ▶ Provides superior performance in ALL operating conditions including in the extreme cold
- ▶ Synthetic base stocks offer high lubricity that protects engine from wear and scuffing
- ▶ Exclusive formulation includes additives that help prevent deposit formations, ring sticking and engine wear

6639-524 QUART | 6639-525 GALLON

- ▶ For use in ALL Arctic Cat 4-cycle snowmobiles including turbo engines

6639-528 SYNTHETIC OIL CHANGE KIT FOR THE 1056CC TWIN ENGINE

- ▶ Includes one gallon of synthetic C-TEC4 oil, oil filter, o-ring, washer and disposable funnel

6639-529 SYNTHETIC OIL CHANGE KIT FOR THE 1049CC AND 998CC (2017 9000) TRIPLE ENGINE

- ▶ Includes one gallon of synthetic C-TEC4 oil, oil filter, gaskets and disposable funnel

7939-042 SYNTHETIC OIL CHANGE KIT FOR THE 700CC TWIN ENGINE

- ▶ Includes one gallon of synthetic C-TEC4 oil, oil filter and disposable funnel

2-CYCLE OILS

Arctic Cat lubricants are designed and developed in conjunction with our engines and are proven through thousands of hours of dyno and field testing. They deliver the ultimate performance and protection for your Arctic Cat engine, and the peace of mind you expect.

C-TEC2 SYNTHETIC OIL

The C-TEC2™ revolutionary clean-burning engine technology demands an entirely unique oil formulation. This lubrication system effectively delivers oil where it is required — as a result using significantly less oil compared with traditional 2-cycle engines. This technology requires a unique viscosity and blend of additives and base stocks. After several years of intense testing, numerous formulations, thousands of dyno hours and hundreds of thousands of field test miles, we landed on this unique oil technology.

- ▶ The ONLY oil recommended for the C-TEC2 engine, but approved for ALL Arctic Cat 2-cycle engines
- ▶ Reduction in recoil pull-effort during cold weather starting
- ▶ Convenient C-TEC2 oil packaging provides easier pourability and less waste
- ▶ Fully synthetic formulation provides ultimate engine protection
- ▶ Detergent additives maximize Arctic Power Valve™ and engine cleanliness
- ▶ Smokeless formulation burns extremely clean with a fresher scent

ARCTIC CAT LUBRICANTS ARE THE ONLY LUBRICANTS APPROVED FOR ARCTIC CAT ENGINES.

APV™ SYNTHETIC OIL

- ▶ Outstanding performance for all non-C-TEC2 Arctic Cat 2-cycle engines
- ▶ Protects against engine wear with excellent lubricity
- ▶ Provides excellent Arctic Power Valve cleanliness
- ▶ Smokeless formulation burns clean
- ▶ Helps prevent piston scuffing, varnish formation and deposit buildup

4639-349 QUART | 5639-469 GALLON | 4639-347 2.5 GALLON

FORMULA 50

- ▶ Recommended for non-Arctic Power Valve 2-cycle engines
- ▶ Performs well over a wide range of operating temperatures
- ▶ Minimizes engine wear
- ▶ Prevents rust/deposit formation

5639-475 QUART | 5639-476 GALLON | 5639-477 2.5 GALLON

SYNTHETIC CHAIN LUBE

- ▶ Designed for Arctic Cat chain-driven snowmobiles
- ▶ Synthetic formulation helps protect against wear at extreme temperatures
- ▶ Inhibits rust and corrosion during periods of non-use or extended storage

5639-038 8 OZ. | 6639-539 15 OZ.
6639-117 2.5 GALLON

ARCTIC CAT CHAIN LUBE

- ▶ Maximizes performance and reduces friction
- ▶ Coats sprockets and chain rollers
- ▶ Prevents rust, wear and corrosion
- ▶ Extends chaincase component life
- ▶ Protects during periods of non-use

CHAIN LUBRICANT

- ▶ Minimizes dirt buildup
- ▶ Helps keep chain links moving freely

0436-983 12 OZ.

SYNTHETIC SHOCK OILS

- ▶ Superior performance under extreme racing conditions
- ▶ Inhibits fading, reduces wear and protects against corrosion

4639-368 MEDIUM WEIGHT — QUART

SEMI-SYNTHETIC SHOCK OIL

- ▶ Engineered with a high viscosity index (VI) formulation
- ▶ Provides superior, consistent performance in severe operating and racing conditions
- ▶ Protects against wear, foaming, oxidation and corrosion

5639-530 QUART

ARCTIC CAT SHOCK OIL

- ▶ Lends consistent performance to floating piston gas shocks
- ▶ Improves ride quality under demanding conditions

4639-366 QUART

ARCTIC CAT ANTIFREEZE — 60/40 EXTENDED LIFE

- ▶ Protects against freezing to -62°F
- ▶ Extended life has 2.5-year service life
- ▶ Premixed and ready to pour

639-916 GALLON

FUEL INJECTOR & CARBURETOR CLEANER

- ▶ Provides peak performance
- ▶ Cleans debris from vital fuel system/injectors
- ▶ Greatly helps avoid repairs

0436-904 12 OZ.

ARCTIC EXTREME LOW TEMP GREASE

- ▶ Premium synthetic base oils make Arctic Cat Extreme Low Temp Grease perform in extreme winter conditions
- ▶ Lithium complex thickener provides excellent water resistance and adhesion to parts

7639-517 10 OZ.

ENGINE STORAGE PRESERVER

- ▶ Protects internal engine parts during storage
- ▶ Aids in corrosion prevention

0436-888 12 OZ.

FUEL DE-ICER

- ▶ Prevents system failure at the coldest of temps
- ▶ Safe on internal parts
- ▶ Water-absorbing isopropyl blend

0436-906 12 OZ.

DOT 4 BRAKE FLUID

- ▶ Premium fluid designed with corrosion and oxidation inhibitors
- ▶ Optimizes brake performance if moisture is introduced into the brake system

5639-848 12 OZ.

CAT CLEANER

- ▶ Removes oil, grease and grime from vinyl, metal and paint
- ▶ Sprays on and wipes off quickly
- ▶ Won't alter finishes

4639-371 22 OZ.

FUEL STABILIZER

- ▶ Prevents fuel breakdown, jet clogging and corrosion
- ▶ Suggested for use in stored sleds

0436-907 8 OZ.

SPRAY & RINSE CLEANER

- ▶ Scrub-free cleanser eliminates grease and dirt

5639-872 24 OZ.
5639-789 GALLON

HIGH TEMP RACING BRAKE FLUID

- ▶ The high boiling point of Arctic Cat DOT 4 Racing Fluid means consistent performance in demanding race conditions
- ▶ For use in all applications where DOT 4 brake fluid is recommended

7639-518 12 OZ.

INSTANT DETAILER

- ▶ Polishes and protects for showroom-quality shine
- ▶ Resists finger markings
- ▶ Greaseless finish

WOODY'S LIMITED WARRANTY

International Engineering & Manufacturing, Inc. warrants each product manufactured by it to be free from defects in material and workmanship under use for the purpose for which it is intended. The Company shall not be liable for damage or delays caused by defective materials or workmanship; is limited to the repair or replacement at its factory of defective article or part thereof, which may be returned to the factory, transportation charges, prepaid within one (1) year after delivery to the original purchaser. Proof of purchase is also required. The Company shall be the sole judge of the existence of any defect in the article so returned. No claims for charges incurred in the removal, disassembly or reinstallation of such article shall be allowed. Product manufactured for consumer use on snowmobiles is designed for snow or ice only; use on any other surface voids warranty.

This Warranty shall not cover any article which has been misused or neglected or damaged by accident or any article which has been altered outside the Company's factory. The Warranty for studs is void unless the studs are installed with Woody's installation tools, support plates and lock nuts; according to the recommendations set forth in Woody's Instructions and Template Patterns. This Warranty does not cover bending, chipping, flaking or carbide pin breakage or pin loss from stud wear, stud replacement labor or shipping.

The Company shall, in no event, be liable for consequential damage or contingent liability arising out of any total or partial failure to function of any article manufactured by it or of any equipment on or in which it is used. Failure of a user to give notice to claim as to defect claimed under the provisions of the Warranty within one (1) year after delivery to original use, such claim shall constitute a waiver by consumer of all claims with respect to goods and equipment. No express, implied, or statutory warranty other than that herein set forth is made or authorized to be made by the Company. All returned warranties will not be accepted without a return authorization number.

Snowmobiling is serious fun. Be sure to read and understand your owner's manual and please pay special attention to the safety instructions. Arctic Cat Inc. endorses and encourages the safe use of all snowmobiles. Be careful, you can get hurt. Wear a helmet and don't drink and ride. Be aware of natural hazards you may encounter, allow yourself plenty of room to safely stop your snowmobile under all conditions, and maintain your equipment. Your safety is in your hands, so take care. All scenes depicted or described in this brochure were performed by professional riders under carefully controlled conditions. Leave the fancy riding to the pros; they practice for years and train very hard to make it look easy. Never attempt to duplicate these maneuvers or encourage others to do so. We care about your safety and enjoyment of the sport.

PROPOSITION 65 WARNING

To our knowledge, all Arctic Cat parts and fabrics are in full compliance with federal laws for product safety and are made from durable and safe materials. Out of an abundance of caution, Arctic Cat has elected to place the following warning on its products to comply with California Law: Warning: This product can expose you to chemicals which are known to the State of California to cause cancer and birth defects or other reproductive harm.
