FALL/WINTER 2017 OPTICS CATALOG

Oakley eyewear is science wrapped in art. It's the drive to solve problems with industry-leading innovation and technology. It's the need to be brave and defiant through iconic designs. It comes from the undeniable passion to look at the world differently, challenge our own way of thinking and ignore the status quo. It is the belief that everything in this world can and will be made better.

SUN FRAME TECHNOLOGY

COMFORT

FRAME MATERIALS

Engineering breakthroughs in structural materials allow Oakley to produce lightweight, high-performance frames that maintain superior protection and comfort.

O MATTER™

Formulated for high durability and controlled flexibility, Oakley's lightweight O Matter™ frames maintain superior protection and comfort.

C-5™

To produce the ultra-strong, ultra-lightweight chassis of Oakley wire frames, five metallic compounds are fused into a single C-5™ alloy.

STAINLESS STEEL

The durability of an extremely high strength-to-weight ratio allows us to make stainless steel frames with comfortably thin architecture.

TITANIUM

An ultra-lightweight, virtually indestructible material used in fighter jets, titanium allows us to produce some of the strongest, lightest and most comfortable Oakley frames.

ALUMINUM

The high strength-to-weight ratio of Oakley's aerospace-grade aluminum alloy enables the bold styling of sculptural designs in a durable and very lightweight frame construction.

CARBON FIBER

With durability that comes from decades of research and development in sports innovation, this ultra-lightweight material provides superior comfort and flexibility.

SUN FRAME TECHNOLOGY

COMFORT

NO-SNAG NOSEPADS

Oakley Women's patented hassle-free, adjustable nosepads won't snag or pull your hair.

THREE-POINT FIT

Oakley's Three-Point Fit ensures that each frame makes contact only at the bridge of the nose and behind the temples. This retains optics in perfect alignment, maintains a secure fit and eliminates the discomfort of ordinary frames that hook the ears with unbalanced pressure points.

UNOBTAINIUM®

First introduced on our sport performance products, Unobtainium® earsocks and nosepads provide increased comfort and performance. Increases grip with sweat.

SWITCHLOCK® TECHNOLOGY

Adapt and conquer with Oakley Switchlock® Technology. The simple switch mechanism makes the process of lens changing quick and hassle-free. This revolutionary technology lets athletes take full advantage of Oakley's wide array of performance lenses to optimize their vision per environment. With conventional interchangeable lens designs, uneven pressure can distort the lens shape, sending light rays in directions that diminish your vision. Oakley SWITCHLOCK® Technology makes the process quick and easy, and the lens is held securely in place for optimal clarity of vision.

- Provides optimal convenience with innovations that make lens changing quick and hassle-free.
- Offers the ability to adapt to any environment and keep up with changing light and weather conditions.

SWITCHLOCK® MODELS

RADARLOCK®

RACING JACKET®

SUN LENS TECHNOLOGY

CLARITY

OAKLEY HIGH DEFINITION OPTICS (HDO®)

A combination of technologies and patented innovations that give you clearer, sharper vision, HDO® virtually eliminates the distortion common in high-wrapped sunglasses.

- REFRACTIVE POWER. Conventional lenses can magnify images. HDO® precision gives less distorted vision across the entire field of view.
- ASTIGMATISM. Ordinary lenses can't focus all light waves in the part of your eye that does the seeing. With HDO®, you won't have the blur of inferior optics.
- PRISMATIC POWER. With regular lenses, objects aren't really where you see them. HDO® offers a truer visual image, and it helps ensure each eye has the same image so your brain won't have to work overtime.

OAKLEY AUTHENTIC PRESCRIPTION LENSES

Oakley can custom-build eyewear with prescription lenses exactly to the doctor's orders. Take advantage of the quality and innovation of a specialty lab created for Oakley dealers. It's the only way to maintain the integrity and warranty of the Oakley sunglass and frame. Numerous lens options are available, including Oakley HDPolarized™ and progressive lens technologies. All lenses feature the unbeatable clarity of Oakley True Digital Technology, and are available in select frames from +4.00 to -6.00 prescriptions.

PHOTOCHROMIC

- Our photochromic lenses help you adapt to changing light conditions so you can always perform at your best.
- Your lenses won't be too dark when the sun pulls a disappearing act or too light when it knifes through the clouds.

LIGHT CONDITIONS

LENS ADAPTATIONS

OAKLEY HDPOLARIZED™

Oakley HDPolarized™ lenses block 99% of harsh glare and minimize eye strain. Our infusion molding process eliminates the glues, layering and distortion found in conventional polarized technology.

Other lenses are made up of multiple layers, attached with glue. Glue bonded layers diminish clarity and cause distortion.

One layer and no glue means the greatest possible clarity and least distortion. Look through less to see more.

OAKLEY: FUSED AT THE MOLECULAR LEVEL

VS.

COMPETITORS: GLUED LAYERS = DISTORTION

PROTECTION

IMPACT PROTECTION

We go to great lengths to ensure our sunglasses protect your eyes. The lens material and frame geometry provide protection against high velocity and high mass impact.

- High velocity testing: Impact resistance against light objects at high speeds.
- High mass testing: Impact resistance against heavy objects at low speeds.

102 MPH

UV PROTECTION

- Oakley Plutonite® filters out 100% of all UVA, UVB, UVC and harmful blue light up to 400nm.
- The lens material itself blocks UV, so you don't have to rely on a thin surface coating that can wear away or become scratched.
- Our optical technologies allow for lens curvature that improves protection at the top and sides of your eyes.

OAKLEY LENS TECHNOLOGY

CLARITY

Oakley Prizm™ lens technology has turned eyewear into vital equipment for sports. It all comes down to enhancing detail in the most precise ways to optimize your visual experience, and the result is game-changing performance.

We analyze the demands of each sport and environment to ensure each lens transmits the right wavelengths. That way, you can experience sharpened visual acuity that helps you see everything more clearly, and react more quickly. Beyond enhanced detail recognition that helps you spot what you need to see, Prizm Sport lenses improve your ability to see and track moving objects in your periphery. Whatever the sport, you'll have improved performance to help you compete with confidence.

PRIZM™ ROAD*

Enhances the road so you can see obstacles like rocks and potholes quickly and feel more confident as you ride.

PRIZM™ GOLF*

Enhanced contrast so you can read the course better and make more informed decisions.

PRIZM™ TRAIL*

Easily distinguish obstacles such as rocks, sand and hard packed dirt so you can ride with confidence.

*Available with Oakley Authentic Prescription Lenses as shown. Prescription lenses are not available with laser etching.

PRIZM™ FIELD*

Pick up the ball faster with the infield lens and easily track high fly balls with the outfield lens.

PRIZM™ WATER

The HDPolarized™ lens reduces glare and helps you see the things that matter most like fish and the places they like to hide.

PRIZM™ SNOW

Enhanced visibility of snow contours, bumps and textures.

OAKLEY LENS TECHNOLOGY

CLARITY

Oakley Prizm™ lenses fine tune individual colors, enhancing detail for an optimized experience. With ordinary sunglass lenses, the world looks dull and flat, but Prizm lens technology makes everything look vivid and vibrant. It's a breakthrough that comes from decades of research in optics for professional athletes, and it helps you make the most of everything from sports to everyday life.

Some of our most popular lens colors are now available in Prizm. We chose our top sellers, including rich hues of Iridium® such as Tungsten, Ruby, Sapphire, and Jade. Customers who prefer a neutral grey tone can choose the Prizm edition of Black Iridium. Each of these Prizm lens colors is available with HDPolarized® optics that cut glare to improve performance in sports, and to keep your eyes comfortable when you're driving.

PRIZM™ RUBY POLARIZED*

PRIZM™ TUNGSTEN POLARIZED*

PRIZM™ DAILY POLARIZED

Reduces harsh glare and allows you to see the world in dynamic high-definition.

*Available with Oakley Authentic Prescription Lenses as shown. Prescription lenses are not available with laser etching.

PRIZM™ JADE POLARIZED

PRIZM™ BLACK POLARIZED

Oakley's High Definition Optics® (HDO®) offers the ultimate in performance. Now get the ultimate in automatic protection, comfort and convenience: lenses that darken and lighten automatically to help you keep up with Mother Nature. They're called Transitions adaptive sunwear and they combine Transitions Photochromic technology with Oakley HDO® to give you the best clarity available, plus the unrivaled impact protection and 100% UV filtering of one of the purest lens materials on earth.

They feature base colors that precisely balance light and boost contrast to improve your depth perception. When sunlight is minimal, the color diminishes but never goes away, so you can maintain peak performance in the flat light of overcast skies. As sunlight increases, the sunglass lens color darkens to keep up.

Add it all up and it's proof that there's only one thing better than sunglass lenses that change color: sunglass lenses that change color and give you the best visual quality, clarity and performance.

SUN / SPORT PERFORMANCE

Oakley performance eyewear represents uncompromising excellence in functionality, and world-class athletes rely on the Sport Performance segment to compete at their highest level. Our lenses extend the critical angles of view with razor-sharp clarity and are engineered to optimize vision for specific environments and activities. Shaping performance with styling worthy of our icon, the unique frame architectures are crafted with Three-Point-Fit and lightweight materials that maximize impact protection and comfort. From weekend warriors to the world's top athletes, those who strive to achieve their best choose Oakley Sport Performance eyewear.

- Durability and all-day comfort of lightweight, stress-resistant O Matter™ frame material
- Unobtainium® nosepads increase grip with perspiration for a no slip grip
- Comfort and Performance of Three-Point Fit that holds lenses in precise optical alignment
- Metal Icon Accents
- Asia Fit version available
- Polarized – Minimized glare via technology that produces the best polarized lenses on the planet (optional)
- Prizm™ – Sport and Environment specific lenses to optimize and sharpen visual acuity (optional)
- Optimized peripheral vision and side protection of 8.75 base lens curvature
- Glare reduction and tuned light transmission of Iridium® lens coating (optional)
- Optical precision and performance that meets ANSI Z87.1 standards
- Impact protection that meets ANSI Z87.1 standards for High Velocity and High Mass impact resistance
- Maximum clarity at all angles of vision with patented XYZ Optics®
- UV protection of Plutonite® lens material that filters out 100% of UVA / UVB / UVC & harmful blue light up to 400 nm
- Available with Authentic Oakley Prescription Inserts: Range TBD

SUN / ACTIVE PERFORMANCE

In developing technologies to meet the demands of professional athletes, Oakley has achieved innovations that serve everyone. The Active Performance segment is for those who seek versatile eyewear that combines daily wear styling with functional performance features for active lifestyles. Form and function blend seamlessly to offer industry-leading clarity, comfort and protection, and each design retains the Oakley DNA of sports breakthroughs that optimize performance. Echoing the sport culture of the brand, this segment offers unsurpassed innovation to those who lead active lives and want a look of originality for daily wear.

009253 DET CORD

Matte Black/Grey
925306

Matte Black
925307

The SI Ballistic Det Cord™ is the perfect blend of ballistic protection and Oakley fashion. Fully compliant with the ballistic and optical standards of MIL PRF32432 and ANSI Z87.1 (2010), the SI Ballistic Det Cord™ is balanced for aggressive environments and covert capabilities. The SI Ballistic Det Cord™ is also “fully-equipped” with its’ anti-fog coating, comms compatible ear stems, and rubberized unobtanium nosepiece. It is one piece of eyewear that is ready for any situation.

- ANSI Z87.1 Stamped
- Our performance sunglasses meet and exceed the impact-resistance standards of the American National Standards Institute (ANSI)
- Anti-fog coating
- Comms compatible ear stems
- Rubberized unobtanium nosepiece
- Ballistic resistance meets MIL-PRF3243

SUN / PERFORMANCE LIFESTYLE

This segment blends the bold and unique design language of Oakley frame architecture with features that offer the benefits of comfort, protection and visual clarity to life beyond sports. Styles are inspired by athletes who see everyday eyewear as an expression of personality, and along with unrivaled aesthetics, the designs offer innovations made possible by Oakley's sport performance roots. Frame and lens technologies match the all-day comfort of a precise fit with breakthroughs in optical performance. The Performance Lifestyle segment takes the ultimate in functionality and shapes it with Oakley style.

MOTO GP COLLECTION

MotoGP is the world's premier motorcycle championship. Each Grand Prix brings together the most talented riders from around the globe to race on bikes so performance optimized, their use on the street is forbidden. The Oakley MotoGP Collection was created in collaboration with elite riders who pilot those machines in pursuit of glory. These unique renditions are made for those who respect the ultimate in performance and style, and the superstars of racing who define it.

YOUTH SUN / SPORT PERFORMANCE

Oakley innovation has reinvented the science of fit for youth faces. Youth today can now take advantage of Oakley's decades of eyewear advances, including uncompromising protection and durability with the comfort of a specially-engineered fit. Analyzing aspects of facial geometry and frame architecture, Oakley's Youth Collection blends optical performance with style to endure the daily activities of young active lives.

OPTICAL FRAME TECHNOLOGY

COMFORT

FRAME MATERIALS

Engineering breakthroughs in structural materials allow Oakley to produce lightweight, high-performance frames that maintain superior protection and comfort.

ACETATE

Handmade layered acetate allows for a multitude of rich hues and colors, as well as visual textures, giving this frame material its high-quality look and feel.

ALUMINUM

The high strength-to-weight ratio of Oakley's premium aluminum alloy enables the bold styling of sculptural designs in a durable and very lightweight frame construction.

CARBON FIBER

With durability that comes from decades of research and development in sports innovation, this ultra-lightweight material provides superior comfort and flexibility.

C-5™

To produce the ultra-strong, ultra-lightweight chassis of Oakley wire frames, five metallic compounds are fused into a single C-5™ alloy.

NANO-MATTER™

Oakley's ultra-lightweight durable frame material allows for all-day comfort and is highly resistant to the elements.

NANOWIRE®

Comprised of incredibly sleek and ultra-lightweight titanium alloy, Oakley Nanowire™ creates sculptural contours without sacrificing comfort or flexibility. Shape-shifting Memory Metal flexes and springs back into place, providing an adaptable fit that borders zero gravity.

O MATTER™

Formulated for high durability and controlled flexibility, Oakley's lightweight O Matter™ frames maintain superior protection, comfort and performance.

TITANIUM

An ultra-lightweight, virtually indestructible material, titanium allows us to produce some of the strongest, lightest and most comfortable Oakley wire frames.

OPTICAL FRAME TECHNOLOGY

COMFORT

HINGES

Oakley hinge designs range from the miniaturized mechanics of dual-cam action to spring hinges that maintain a stable, pressure-free fit. Inspired by racing technology, these industry-leading hinge designs provide unrivaled durability and aesthetics that do not compromise comfort or fit.

HOLLOWPOINT

Inspired by hubless motorcycle wheels, HOLLOWPOINT™ hinges turn simplicity into a work of art. This pure approach uses a self-contained spring cam mechanism and an internal piston, achieving a minimalist design that is both sturdy and lightweight.

MONOSHOCK

The Oakley MONOSHOCK™ hinge combines mechanical precision for flexibility, comfort and fit to create a prescription frame hinge that is as big on technology as it is on style. The MONOSHOCK™ hinge has a single “tine” (a slender projecting part, like the tine of a fork) that bridges the frame and earstem.

TWINSHOCK

Inspired by pro racing, the structure of the Oakley TWINSHOCK™ hinge is similar to leaf springs used for shock absorption. Utilizing two tines, the TWINSHOCK™ hinge combines durability, flex, comfort, fit and distinctive design architecture that is unique to Oakley.

ZERO® PROFILE

To achieve an entirely new aesthetic, we created a seamless blend of mechanics and art that does away with the inconvenience of a bulky hinge. The integrated design of the ZERO® PROFILE™ spring hinge leaves nothing but a sleek sculpture, and it maintains full durability and comfort.

Frost w/ Sapphire Iridium

OAKLEY TRUE DIGITAL™ II

CORNERSTONE OF OAKLEY PRESCRIPTION OPTICS

- This digital freeform technology delivers a more consistent power profile across the entire visible field of view

HIGH WRAP SPORT FRAMES IN HIGH PRESCRIPTIONS

- This technology uses what we know about frame tilt, wrap, and vertex distance to optimize your doctor's prescription for your frame on your face.

IMPROVED OPTICS AND INCREASED POWER CONTROL

- Wider power ranges with no frost in the lens periphery
- Minimizes oblique astigmatism for a wider field of view
- Faster adaptation & patient comfort

OAKLEY STEALTH

Oakley Stealth is an anti-reflective coating engineered exclusively for the critical needs of athletes and sports enthusiasts.

- Optimizes the wide, crisp visual field of Oakley True Digital lenses by reducing back surface reflections and glare.
- Repels dust, dirt and oil with an invisible shield of oleophobic and anti-static protection that helps your lenses stay clean.
- Has industry-leading durability, which is athlete-ranked and backed by a two-year warranty.

AUTHENTIC PRESCRIPTION LENSES

Oakley can custom-build eyewear with prescription lenses exactly to the doctor's orders. Take advantage of the quality and innovation of a specialty lab created for Oakley dealers. It's the only way to maintain the integrity and warranty of the Oakley frame.

IRIDIUM® LENS COATING

Oakley Iridium® is a premium lens coating available in a spectrum of colors designed to balance light transmission and reduce glare.

PROTECTION

UV PROTECTION

- Oakley Plutonite® filters out 100% of all UVA, UVB, UVC and harmful blue light up to 400nm.
- The lens material itself blocks UV, so you don't have to rely on a thin surface coating that can wear away or become scratched.
- Oakley optical technologies allow for lens curvature that improves protection at the top and sides of your eyes.

OAKLEY LENS TECHNOLOGY

CLARITY

Oakley Prizm™ lens technology has turned eyewear into vital equipment for sports. It all comes down to enhancing detail in the most precise ways to optimize your visual experience, and the result is game-changing performance.

We analyze the demands of each sport and environment to ensure each lens transmits the right wavelengths. That way, you can experience sharpened visual acuity that helps you see everything more clearly, and react more quickly. Beyond enhanced detail recognition that helps you spot what you need to see, Prizm Sport lenses improve your ability to see and track moving objects in your periphery. Whatever the sport, you'll have improved performance to help you compete with confidence.

PRIZM™ ROAD*

Enhances the road so you can see obstacles like rocks and potholes quickly and feel more confident as you ride.

PRIZM™ GOLF*

Enhanced contrast so you can read the course better and make more informed decisions.

PRIZM™ TRAIL*

Easily distinguish obstacles such as rocks, sand and hard packed dirt so you can ride with confidence.

*Available with Oakley Authentic Prescription Lenses as shown. Prescription lenses are not available with laser etching.

PRIZM™ FIELD*

Pick up the ball faster with the infield lens and easily track high fly balls with the outfield lens.

PRIZM™ WATER

The HDPolarized™ lens reduces glare and helps you see the things that matter most like fish and the places they like to hide.

PRIZM™ SNOW

Enhanced visibility of snow contours, bumps and textures.

OAKLEY LENS TECHNOLOGY

CLARITY

Oakley Prizm™ lenses fine tune individual colors, enhancing detail for an optimized experience. With ordinary sunglass lenses, the world looks dull and flat, but Prizm lens technology makes everything look vivid and vibrant. It's a breakthrough that comes from decades of research in optics for professional athletes, and it helps you make the most of everything from sports to everyday life.

Some of our most popular lens colors are now available in Prizm. We chose our top sellers, including rich hues of Iridium® such as Tungsten, Ruby, Sapphire, and Jade. Customers who prefer a neutral grey tone can choose the Prizm edition of Black Iridium. Each of these Prizm lens colors is available with HDPolarized® optics that cut glare to improve performance in sports, and to keep your eyes comfortable when you're driving.

PRIZM™ RUBY POLARIZED*

PRIZM™ TUNGSTEN POLARIZED*

PRIZM™ DAILY POLARIZED

Reduces harsh glare and allows you to see the world in dynamic high-definition.

*Available with Oakley Authentic Prescription Lenses as shown. Prescription lenses are not available with laser etching.

Oakley's High Definition Optics® (HDO®) offers the ultimate in performance. Now get the ultimate in automatic protection, comfort and convenience: lenses that darken and lighten automatically to help you keep up with Mother Nature. They're called Transitions adaptive sunwear and they combine Transitions Photochromic technology with Oakley HDO® to give you the best clarity available, plus the unrivaled impact protection and 100% UV filtering of one of the purest lens materials on earth.

They feature base colors that precisely balance light and boost contrast to improve your depth perception. When sunlight is minimal, the color diminishes but never goes away, so you can maintain peak performance in the flat light of overcast skies. As sunlight increases, the sunglass lens color darkens to keep up.

Add it all up and it's proof that there's only one thing better than sunglass lenses that change color: sunglass lenses that change color and give you the best visual quality, clarity and performance.

OPTICAL / ACTIVE PERFORMANCE

In developing technologies to meet the demands of professional athletes, Oakley has achieved innovations that serve everyone. The Active Performance segment is for those who seek versatile eyewear that combines daily wear styling with functional performance features for active lifestyles. Form and function blend seamlessly to offer industry-leading clarity, comfort and protection, and each design retains the Oakley DNA of sports breakthroughs that optimize performance. Echoing the sport culture of the brand, this segment offers unsurpassed innovation to those who lead active lives and want a look of originality for daily wear.

OPTICAL / PERFORMANCE LIFESTYLE

This segment blends the bold and unique design language of Oakley frame architecture with features that offer the benefits of comfort, protection and visual clarity to life beyond sports. Styles are inspired by athletes who see everyday eyewear as an expression of personality, and along with unrivaled aesthetics, the designs offer innovations made possible by Oakley's sport performance roots. Frame and lens technologies match the all-day comfort of a precise fit with breakthroughs in optical performance. The Performance Lifestyle segment takes the ultimate in functionality and shapes it with Oakley style.

YOUTH OPTICAL / ACTIVE PERFORMANCE

Oakley innovation has reinvented the science of fit for youth faces. Youth today can now take advantage of Oakley's decades of eyewear advances, including uncompromising protection and durability with the comfort of a specially-engineered fit. Analyzing aspects of facial geometry and frame architecture, Oakley's Youth Collection blends optical performance with style to endure the daily activities of young active lives.

YOUTH OPTICAL / PERFORMANCE LIFESTYLE

Oakley innovation has reinvented the science of fit for youth faces. Youth today can now take advantage of Oakley's decades of eyewear advances, including uncompromising protection and durability with the comfort of a specially-engineered fit. Analyzing aspects of facial geometry and frame architecture, Oakley's Youth Collection blends optical performance with style to endure the daily activities of young active lives.
