BARR'S

1931

GOLD MEDAL DAFFODILS

Daffodils naturalised in Woodland.

BARR & SONS

11, 12 & 13, King Street, Covent Garden, London, W.C.2.

No connection with any other Firm of the same name.

Barr's "Gold Medal" Daffodils

AWARDED

One hundred and Nine Gold Medals, Four Silver Challenge Cups and Two R.H.S. Silver Cups for New Seedling Daffodils.

Also many First-class Certificates and other high awards.

We have been awarded for New Seedling Daffodils—

The Engleheart Challenge Cup by the Royal Horticultural Society as First Prize for 12 Best Seedling Daffodils not in commerce.

The Walter Ware Challenge Cup for the Best New Triandrus Hybrids.

The R.H.S. Silver Standard Cup for the best 12 New Seedling Daffodils.

R.H.S. First Prize for the 12 Best Seedling Daffodils in Commerce.

Our Exhibits of Daffodils received the following High Awards for Excellence during the Spring of 1931 :

- Mar. 26th. Gold Medal, awarded at the Taunton Spring Show.
 „ 27th. Gold Medal, awarded at the Torquay Spring Show.
 April 8th. Gold Medal, awarded at the Falmouth Spring Show.
 „ 8th. Silver-Gilt Banksian, awarded by Royal Horticultural Society, London.
 „ 14th. Gold Medal, awarded by the Daffodil Show Committee of the Royal Horticultural Society, London.
 „ 16th. Gold Medal, awarded by Tewkesbury Daffodil Society.
 „ 18th. Gold Medal, awarded at the Glamorgan Spring Show.
 „ 22nd. Gold Medal, awarded by Royal Horticultural Society, London.
 „ 22nd. Gold Medal, awarded by the Midland Daffodil Society, Birmingham.

New Seedling Nerines

Eight Silver and Silver-Gilt Medals Awarded by the R.H.S.

The most beautiful and easiest grown of Autumn-flowering bulbs for cool greenhouse. For descriptive list and full cultural directions, see page 31.

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

Soil and Manures.—Daffodils will thrive in any well-cultivated garden soil, but prefer a good deep well-drained loam. In preparing the ground for planting, dig deeply, and if well-rotted stable or cow manure is available, or the material from an exhausted hot bed, this may with advantage be dug in 15 to 18 inches deep so as not to be in immediate contact with the bulbs. *Fresh stable manure should on no account be used.* Where cow or well-rotted stable manure is not available a good compound manure should be used such as our Phytobroma (which contains, in suitable proportions, Steamed Bone Flour, Sulphate of Potash, Superphosphate of Lime, etc.) forked into the ground before or at planting time at the rate of 3 oz. per square yard; this is a perfectly safe complete manure, suitable for heavy or light soils, and the best general manure for all bulbs, encouraging vigorous root action and subsequent good bloom.

In February as soon as the foliage is visible Daffodil Beds should be hoed and given a surface dressing of our Phytobroma at the rate of 3 oz. to the square yard. In the case of bulbs which have not been lifted we recommend a surface dressing, well hoed in, of Phytobroma in October or November, and again in February. These dressings should also be given to Daffodils naturalised in grass; soil fertility must be maintained if bulbs are to continue to flourish and flower well. *For Prices of Manures see our General Bulb Catalogue.*

Time and Depth to Plant.—Daffodils are best planted as early in Autumn as possible (especially Poeticus varieties), although we have planted the stronger growing sorts as late as the end of December and obtained excellent blooms. Depth of planting depends on the size of the bulbs; a good rule to follow on heavy and medium soils is to cover the bulb with soil once and a half to twice its own depth, measuring the bulb from base to shoulder, and at least twice its own depth on light soils. Thus a Daffodil bulb measuring 2 inches from base to shoulder should be covered with 3 to 4 inches of soil. Some of the stronger growing sorts such as Emperor, Empress, Incomparabilis Sir Watkin and Barrii Conspicuus, also the Poeticus varieties, may with advantage be planted deeper.

Freshly dug soil should be allowed to stand vacant two or three weeks before planting, or some of the bulbs may sink below their proper depth, causing irregularity in growth and flowering.

Naturalising Daffodils in Grass, etc.—All Daffodils are suitable for naturalising, but in heavy soils, preference should be given to the stronger growing sorts. To produce the best effect Trumpet, Chalice-cup, and Poeticus varieties should be grouped separately; we offer mixtures of these groups separately on page 5. Daffodils are admirably adapted for grassy slopes and banks, where they should be freely planted.

In planting bulbs *in grass*, Barr's Bulb Planter (see General Bulb Catalogue) should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for filling in the first hole. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting place for the bulb, while by its use *the grass is not in the least disturbed.* Planting is best done after the first autumn rains. If the ground is poor, a compost of fresh soil with Phytobroma (1 lb. to a bushel) should be made and dropped into each hole before placing the bulb. Cut the grass as late in autumn as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Daffodils in no way affect the hay crop, which may be cut at the usual season.

CULTURE OF DAFFODILS IN POTS OR BOXES.

Daffodils should be potted in September or October in a compost of good sweet fibrous loam and well-decayed cow manure or leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of steamed bone flour or 1 lb. of Phytobroma to every bushel of soil, which mix well together before using. The pots should be carefully washed and allowed to dry before using; new pots should be well soaked. Good drainage should be secured by placing pieces of charcoal or crocks over the drainage hole, covering the charcoal or crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with pieces of charcoal, and a good layer of rough fibrous loam or leaf soil placed on this to ensure perfect drainage.

After potting, stand the pots or boxes outside, on a firm bottom, such as a bed of well-weathered ashes or gravel to prevent entrance of worms. They should then be completely covered with Peat Fibre, the top of the pots being 2 inches below the surface of the covering material. This will secure a natural and moist condition to the bulbs and encourage root action.

The pots or boxes should remain plunged for ten to twelve weeks in order that the bulbs may get well rooted, when they may be removed indoors for succession, selecting first those which bloom naturally early. *On no account should bottom heat be given.* A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed and subjected to heat too early, before they have made sufficient root growth, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check to the young top growths from draughts or too sudden exposure to light. Weak liquid manure-water (1 oz. of Phytobroma to a gallon of water) may then be given once a week until the bulbs come into flower. Those that are wanted in bloom early, may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from insufficient light or air.

COLLECTIONS OF DAFFODILS

FOR FLOWER BORDERS, POTS, AND BOWL CULTURE.

Barr's 21/- Collection of Daffodils for Flower Borders.

The following varieties are all beautiful in the flower border, and the selection embracing early and late varieties gives a good succession of bloom. All are suitable for pot culture and will give an equally fine display in the greenhouse or sitting-room.

ALL EXTRA STRONG SELECTED BULBS.

6 Emperor	6 Incomparabilis Lucifer	6 Leedsii Evangeline
6 Golden Spur	6 " Sir Watkin	6 Odorus rugulosus
6 Bicolor Empress	6 " Gloria Mundi	6 Poetaz Elvira
6 " Victoria	6 Barrii conspicuus	6 Poeticus ornatus
6 Madame de Graaff	6 " Fair Maiden	6 " Cylgad
6 Incomparabilis Anteros	6 Leedsii Mermaid	6 The Pearl (double)

3 Bulbs each of the above 18 varieties for 10/6

Barr's 30/- Collection of Daffodils for Pot Culture.

The following Daffodils can be specially recommended for pot culture, and by gentle forcing a succession of bloom may be had through February and March, the selection containing early and later-flowering varieties. If after flowering they are turned out of pots and carefully planted out (the ground being well watered previously, should it be dry) they will mostly flower well outdoors the following season. *For Cultural Directions see page 2, and pages 2 and 3 of our General Bulb Catalogue.*

ALL EXTRA STRONG SELECTED BULBS.

6 Emperor	6 Incomparabilis Sir Watkin	6 Poetaz Elvira
6 Glory of Leiden	6 Barrii Fair Maiden	6 " Klondyke
6 Madame de Graaff	6 " Seagull	6 Poeticus Cassandra
6 W. P. Milner	6 Leedsii Bridesmaid	6 " Herrick
6 Bicolor Amastris	6 " Southern Gem	6 Argent (double)
6 " Victoria	6 " Lord Kitchener	6 Campanelle Jonquill
6 Incomparabilis Bonaparte	6 Triandrus Queen of Spain	

3 Bulbs each of the above 20 varieties for 15/-

3 Bulbs each of 12 varieties (our selection), 8/6

Barr's 21/- Collection of Daffodils for Bowl Culture.

For growing in bowls in our Peat-fibre Mixture. *For Cultural Directions see page 3 of Bulb Catalogue.*

ALL EXTRA STRONG SELECTED BULBS.

6 Emperor	6 Bicolor Empress	6 Barrii Fair Maiden
6 Golden Spur	6 " Victoria	6 Leedsii Fairy Queen
6 Obvallaris	6 Incomparabilis Gloria Mundi	6 Odorus Campanelle
6 Madame de Graaff	6 " Sir Watkin	6 Poetaz Alsace
6 W. P. Milner	6 Barrii Seagull	6 " Elvira

3 Bulbs each of the above 15 varieties for 10/6

 *Special Collections for Bowl Culture, Pots, or Borders, made up to any value to meet customers' requirements.*

Barr's Peat-Fibre Shell and Charcoal Mixture.

The best medium for growing bulbs in Vases, Bowls, Etc., 5/6 per bushel, 1/6 per peck

DAFFODILS RECOMMENDED FOR FORCING.

The following varieties may be easily brought into bloom by January or February by gentle forcing. *For Cultural Directions see page 2, and pages 2 and 3 of General Bulb Catalogue.*

 In addition to the above we recommend all the Polyanthus Narcissi offered on page 26.

Barr's Mixtures of Daffodils and Narcissi.

For the Flower Border.

Barr's Flower Border Mixture, a superior mixture of Yellow, Bicolor and White TRUMPETS, showy varieties of *Incomparabilis*, *Barrii* and *Leedsii*, *Campanelle* Jonquils and POET'S NARCISSI for massing in the Flower Border or large Beds.

Strong flowering bulbs, per 100, 12/6; per doz., 1 9

Barr's Red-Cup Mixture, composed of showy red-cup varieties of *Incomparabilis* and *Barrii* varieties in mixture, charming for Flower Beds and Borders.. per 100, 20/-; per doz., 2 9

Choice Seedling Daffodils for the Flower Border.

The following can be confidently recommended for the FLOWER BORDER; they are beautiful flowered Seedlings from crosses with some of the finest Yellow, White and Bicolor Trumpets and choice Chalice-cupped Daffodils. They have not been named as they resemble too closely other named Seedlings which are already in commerce. *All strong flowering bulbs.*

Barr's Seedling Trumpet Daffodils, Mixed, choice unnamed hybrids of KING ALFRED, MONARCH, CLEOPATRA, DUKE OF BEDFORD, WEARDALE PERFECTION, PETER BARR, LOVE-LINESS, etc., all beautiful..... per 100, 27/6; per doz., 3 9

Barr's Seedling Chalice-Cupped Daffodils, Mixed, unnamed hybrids of Choice Chalice-Cupped varieties, such as MERMAID, BERNARDINO, SEVILLE, RED BEACON, etc. per 100, 32/6; per doz., 4 6

The Backhouse Red-Cup Seedling Mixture, a very striking and extremely showy mixture of unnamed seedling varieties from the famous Backhouse collection, composed entirely of giant red-crowned *Incomparabilis* and *Barrii* varieties ...each, 1/6; per doz. 16 0

Miniature Daffodils for the Rock Garden.

The following are charming little subjects for the rock garden, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the *Bulbocodiums* (except *monophyllum*) and *Cyclamineus* like moisture, and should therefore be planted in a moist situation. *Bulbocodium monophyllum*, which blooms in winter, requires a warm dry sheltered situation, planted in almost pure sand; when coming into bloom give water freely. *Triandrus albus* (*Angel's Tears*) and *Juncifolius* delight in partial shade and a light gritty soil, and should be given a well-drained position. In the case of these Miniature Daffodils, the ground may be carpeted with close-growing surface-rooting plants, such as *Acena*, *Arenaria caespitosa*, *Thymus serpyllum* vars., *T. lanuginosus*, *Herniaria glabra*, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. Many prefer, however, seeing these little gems peeping out of grass, and we can supply seed of a suitable fine dwarf grass for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring when the Narcissi bloom.

☞ Full descriptions of the following Miniature Daffodils will be found in body of Catalogue.

Daffodils and Narcissi for Naturalising

In Woodlands, Shrubberies, Orchards, Grass, etc., and to plant for cutting.

BARR'S COLLECTIONS FOR NATURALISING.

1000 in 20 fine showy named sorts (Trumpets, Chalice-cupped, Poets, etc.)	120/-
500 in 20	60/-
100 in 10	12/6

The above Collections of Daffodils are made up from varieties specially selected as being suitable for naturalising and for cutting. They may be relied on to give a good supply of flowers over a long period.

Barr's Mixtures of Daffodils for Naturalising.

The following mixtures are specially made up by us from separate named varieties, and are greatly superior to the cheap mixtures frequently sold.

- Mixed Daffodils of Many Sorts, for large plantings, naturalising and cutting,** including a good mixture of **Trumpets, Incomparabilis, Barrii, Leedsii, Poets,** etc., suitable for large plantings in Grass, Woodlands, Herbaceous Borders, etc.....per 1000, 80/-; per 100, 8/6; per doz., 1/3
- Trumpet Daffodils in Mixture,** a splendid mixture of large Trumpet Daffodils, including **EMPEROR, EMPRESS,** etc., all suitable for naturalising..per 1000, 120/-; per 100, 12/6; per doz., 1/9
- Single Chalice-Cup or Star Narcissi Mixed (Incomparabilis, Leedsii and Barrii varieties);** the charming effect of these light graceful Daffodils, when naturalised, must be seen to be realised. For cutting they are most valuable.....per 1000, 80/-; per 100, 8/6; per doz., 1/3
- Single Poet's Narcissi in Mixture,** including good seedling varieties, all suitable for naturalising.....per 1000, 80/-; per 100, 8/6; per doz., 1/3

DAFFODILS AND NARCISSI RECOMMENDED FOR NATURALISING.

We recommend the following varieties for planting in large quantities in grass, shrubberies, etc. They are all of robust constitution and remarkably decorative; all are suitable for maintaining a supply of flowers for cutting. Full descriptions of these sorts will be found in the body of the catalogue.

Barr's New Seedling Daffodils

Including New Varieties for 1931.

The following list comprises some of the finest New Seedling Daffodils raised by ourselves and other well-known hybridists. The relative qualities as we judge them are indicated by xx, xxx, xxxx, the highest quality flower being given the most marks. The figures after the names indicate the relative period of flowering, (1) being the earliest, (7) the latest.

	each.
	£ s. d.
Abelard (Giant Incomparabilis) (3), xxx½, a fine bold flower of good substance, large flat well imbricated perianth of a deep primrose colour, very large crown orange-scarlet shading down to gold at centre, a fine showy new variety, ht. 20 in.....	2 10 0
Anastasia (Trumpet Daffodil) (2), xxx½, new 1930, a fine very robust yellow trumpet variety of pleasing form and good deep colour. Perianth of a full lemon-yellow well imbricated, bold deep golden-yellow trumpet heavily flanged at mouth, ht. 24 in., of remarkable vigour.....	2 2 0
Assam (Giant Incomparabilis) (3), xxx, a fine variety of great vigour, solid white perianth of good texture, large bold crown of a deep golden apricot colour, ht. 21 in., a very vigorous grower producing a striking effect in the garden.....per doz., 60/-	0 5 6
Astoria (Trumpet Daffodil) (3), xxx½, new 1931, a fine well formed bicolor trumpet of good texture, flat white perianth of good form, deep primrose trumpet well flanged and delicately cut at brim, ht. 24 in.....per doz., 72/-	0 6 6
Basilia (Giant Leedsii) (3), xxxx, a very large bold flower of good form measuring 4 inches across, with broad white perianth and very large crown of a delicate cream colour, open and frilled at mouth, ht. 21 in.	0 7 6
Beersheba (Trumpet Daffodil) (2), xxxx, the finest White Trumpet Daffodil yet raised, of perfect form, perianth large and perfectly flat, trumpet long and beautifully flanged at mouth. A flower of great size, measuring nearly 5 inches across, a vigorous grower and a grand exhibition flower, ht. 21 in. FIRST CLASS CERTIFICATE R.H.S., 1926.....	1 10 0
Bellona (Giant Incomparabilis) (3), xxx½, new 1930, a fine variety of wax-like texture and very great substance, solid pure white perianth well overlapping, wide saucer-shaped crown of a bright canary-yellow very slightly tinged apricot at brim, a good show flower, ht. 19 in.....	1 1 0
Carnation (Double Incomparabilis) (4), xxx, flowers measuring 3½ inches across, not so double as Orange Phoenix and with more pointed petals, sulphur-white, centre brilliant orange, very showy, ht. 15 in....per doz., 16/-	0 1 6
Dakota (Barrii) (5), xxx½, well shaped solid creamy white perianth with large expanded crown of rich gold broadly edged orange-scarlet and prettily frilled at margin, ht. 18 in.....	0 7 6
Eskimo (Trumpet Daffodil) (2), xxx½, a very beautiful flower of great substance, with erect broad white perianth; trumpet opening pale creamy primrose, quickly developing to snowy white and well expanded at brim. AWARD OF MERIT R.H.S....per doz., 84/-	0 7 6
Fantin Latour (Trumpet Daffodil) (3), xxxx, a noble flower of great size, with very broad rounded perianth of a bright lemon-yellow, short broad trumpet rich golden-yellow and very wide at mouth, margin elegantly frilled, ht. 17 in.....	0 10 6
Fez (Barrii) (4), xxx, a charming decorative variety, primrose perianth flushed cream and large open canary yellow cup, broadly margined fiery scarlet, ht. 19 in...per doz., 72/-	0 6 6
Fiery Monarch (Giant Incomparabilis) (3), xxx½, a flower of most striking colour, well imbricated creamy white perianth slightly flushed lemon at base, very large crown of intense fiery orange-scarlet; a wonderfully decorative flower of great merit, ht. 18 in.	8 8 0
Fortune's Queen (Giant Incomparabilis) (3), xxxx, broad creamy white perianth of fine solid texture, slightly flushed lemon at base; crown of great size and elegant form, opening out at mouth and beautifully frilled, of a glowing apricot-orange colour; very large flowers measuring 4 inches across, ht. 22 in.....	12 12 0
Gallipoli (Incomparabilis), xxx, a very large flower of good substance, a cross between Bernardino and Will Scarlett ; large pale yellow perianth and large well-frilled crown of a golden-yellow broadly banded orange-red.....	0 12 6

NARCISSUS BEERSHEBA.

New Seedling Daffodils—continued.

Glowing Phoenix (Double Incomparabilis) (2), xxx½, new 1930, a fine very free-flowering new double variety with large rounded flowers of fine symmetry and good substance, outer petals primrose-yellow, centre glowing orange, ht. 21 in..... each. £ s. d. 0 15 0

NARCISSUS HELEN O'HARA.

Golden Age (Trumpet Daffodil) (2), xxx, new 1930, a good showy variety, broad soft yellow perianth, short broad full yellow trumpet well open and frilled at mouth, good sturdy grower, ht. 18 in..... 0 7 6

Golden Rule (Trumpet Daffodil) (3), xxx½, a fine King Alfred seedling of a very deep colour, slightly twisted deep golden perianth, well balanced trumpet of an intense golden colour, well flanged and cut at the brim, ht. 23 in.....per doz., 72/- 0 6 6

Golden Song (Trumpet Daffodil) (2), xxx½, a fine new yellow trumpet variety of beautiful form, having a massive overlapping bright yellow perianth of fine form and substance with straight golden-yellow trumpet flanged and frilled at brim, of very vigorous constitution, ht. 24 in..... 1 1 0

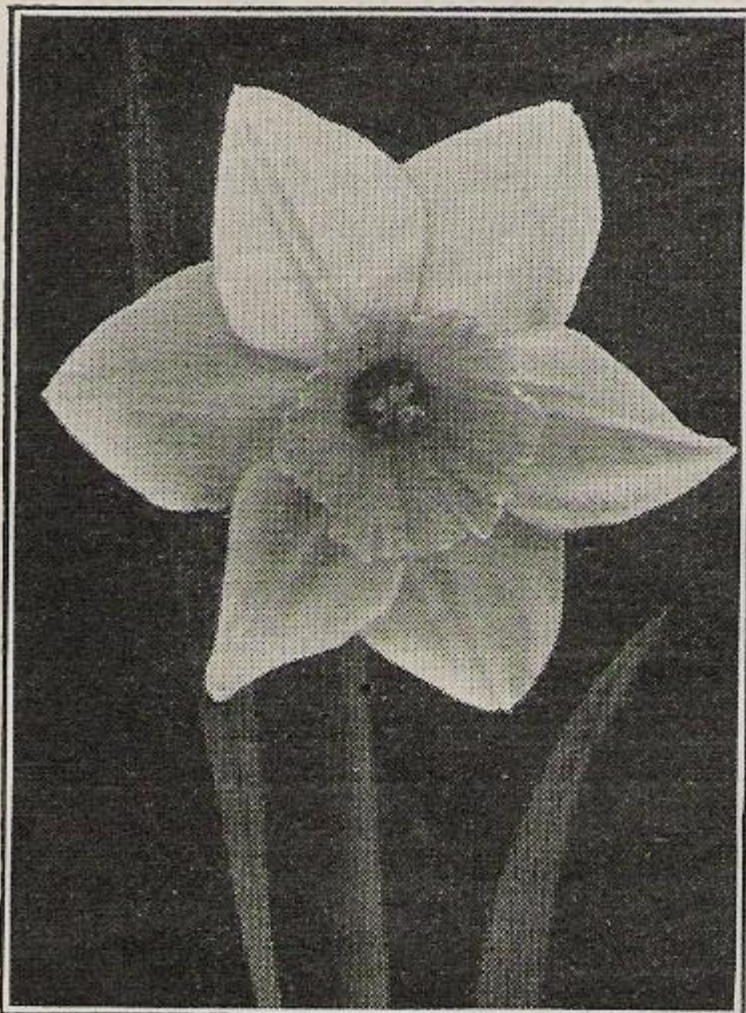

Helen O'Hara (Trumpet Daffodil) (3), xxx½, a fine white trumpet exhibition variety with broad white overlapping perianth of slightly campanulate form; long trumpet elegantly expanded at brim, opening pale primrose, but rapidly passing to pure white; flower of fine substance, vigorous grower, ht. 18 in. AWARD OF MERIT R.H.S.....per doz., 60/- 0 5 6

Hospodar (Giant Incomparabilis) (2), xxx, flower of good form and a strong, vigorous grower, flat bright yellow perianth, deep orange cup; early and does not burn in the sun, ht. 22 in.....per doz., 36/- 0 3 6

Indus (Giant Incomparabilis) (3), xxx½, a beautiful new self-yellow Incomparabilis of fine form and great substance, broad well imbricated yellow perianth, bright yellow crown of trumpet shape, well open at mouth, strong vigorous grower, ht. 18 in. per doz., 72/- 0 6 6

John Evelyn (Giant Incomparabilis) (2), xxx½, a very large and striking flower, measuring 4 inches across, broad creamy white perianth of great substance; very large open expanded cup, with double frill at margin, of a beautiful apricot-orange colour, a grand exhibition flower, ht. 20 in. AWARD OF MERIT R.H.S..... 2 0 0

Lady Hilda (Trumpet Daffodil) (3), xxx½, a good strong growing bicolor trumpet variety with well imbricated white perianth of good form, trumpet canary yellow prettily flanged and frilled at mouth, ht. 19 in.....per doz., 84/- 0 7 6

NARCISSUS MITYLENE
(see page 8).

Le Beau (Cyclamineus Hybrid) (2), xxx, a graceful slightly drooping flower of a self soft yellow, with long elegant trumpet, ht. 13 in... 0 5 6

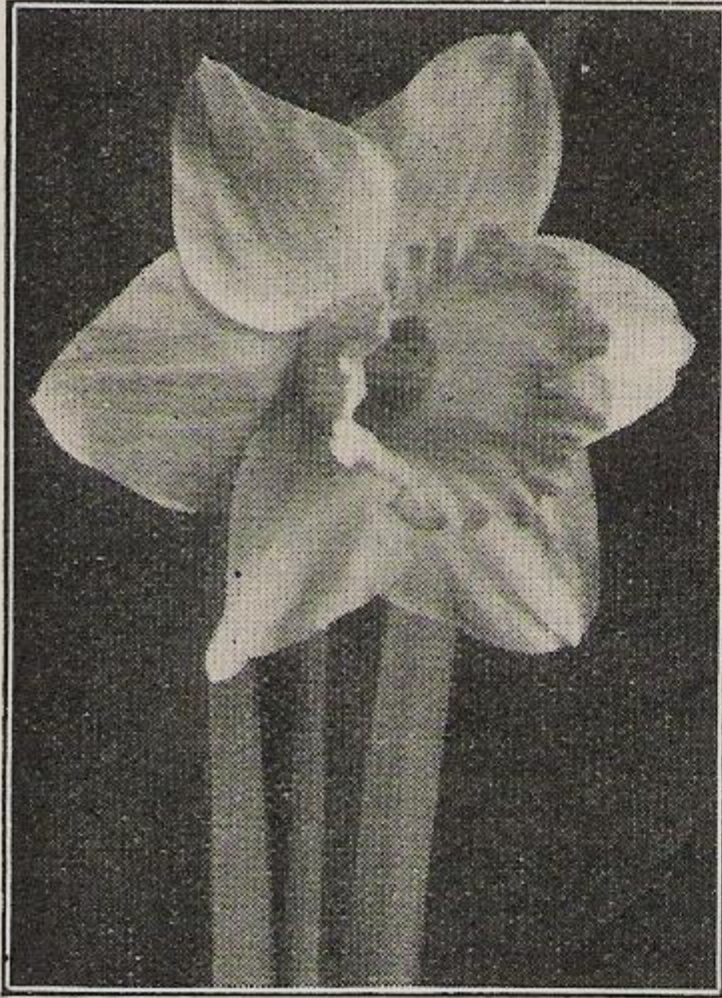

Lune de Miel (Double Incomparabilis) (3), xxx½, new 1930, a light and graceful double variety, the flowers are borne on slender wiry stems which withstand strong winds and rain; broad pure white petals of fine texture, centre opening apricot and passing to creamy yellow; a beautiful flower, ht. 21 in. per doz., 36/- 0 3 6

Tenedos (Giant Leedsii) (3), xxx, one of the finest of this class yet raised, enormous flowers measuring 5 inches across, perianth pure white and slightly pointed, crown opening pale primrose and passing to pure white, ht. 20 in. AWARD OF MERIT R.H.S., 1924..... 0 10 6

Twink (Double Incomparabilis) (2), xxx½, a fine variety, flowers large and very double, pale primrose, with showy glowing orange centre; a good exhibition flower and a fine border plant, ht. 20 in.....per doz., 60/- 0 5 6

Venetia (Triandrus Hybrid) (4), xxx½, one of the finest of the short-cupped Triandrus Hybrids; flowers of the purest white, borne on stout erect stems, measuring 4 inches across, with broad overlapping perianth, crown expanded at mouth; a lovely cool flower, of robust constitution and free-flowering, sometimes coming twin-flowered, ht. 22 in. FIRST-CLASS CERTIFICATES by the R.H.S. and at BIRMINGHAM. AWARD OF MERIT R.H.S., 1927, as a cut flower 0 4 6

Viscountess Northcliffe (Triandrus Hybrid) (4), xxx½, a large and handsome snowy white flower, measuring 4½ inches across, of erect bearing and fine contour, trumpet straight, slightly opening out at mouth with prettily fluted margin, ht. 16 in. 0 15 0

NARCISSUS WHITE NILE.

Warwick (Trumpet Daffodil) (3), xxx½, a beautiful King Alfred seedling with fine bold shapely flowers of a rich deep golden-yellow, almost a self-colour; of good exhibition quality, ht. 21 in.....per doz., 60/- 0 5 6

White Emperor (Trumpet Daffodil) (3), xxx½, a beautifully formed white trumpet variety of charming form, perianth segments slightly pointed, trumpet prettily flanged at mouth, a good show flower, ht. 18 in. per doz., 48/- 0 4 6

White Nile (Giant Leedsii) (2), xxx, large flower of remarkably fine form, measuring 4 inches across, broad snowy white perianth of fine substance, bold white crown open and frilled at mouth, strong vigorous grower, early, ht. 20 in. AWARD OF MERIT R.H.S. per doz., 60/- 0 5 6

Yorick (Trumpet Daffodil) (2), xxx½, an elegant flower of great size and substance of a pleasing clear self-yellow colour, pointed and well-imbricated perianth elegantly twisted, trumpet well open at mouth and gracefully flanged at brim, ht. 22 in..... 0 10 6

Barr's General List of Daffodils.

For Alphabetical Index, see page 2 of Cover.

New Seedling Varieties, see page 6.

Classification.—In the following pages we have practically adopted the classification of the R.H.S. Narcissus Committee, which we hope will be of assistance to exhibitors of Daffodils and to amateurs who desire to make a selection of distinct types. As will be seen, 10 distinct divisions have been made, together with a section (Div. XI.) at the end to take in a few various species and hybrids which do not come under the other divisions. Under each Division we have given its distinguishing character.

Time of Flowering.—The relative period of flowering of the different varieties out of doors we have denoted by means of numbers after the names, (1) being the earliest, (7) being the latest.

Height.—The heights given in inches are as recorded at our Nurseries.

Quality of Flowers.—Each season we go carefully over our Daffodil collection with a view to recording the quality of each variety. This we indicate by x, xx, xxx, and xxxx, giving the most marks to those we judge to be the finest. We trust this record may be found useful to amateurs in making their selections.

Cultural Marks.—* Indicates those varieties which thrive best either under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

† Indicates those kinds which should be selected where Daffodils are grown in pots or for exhibition; they are, however, in most cases also splendid border varieties.

§ Indicates those Daffodils which, beside being fine border plants, are very effective when naturalised in grass; they are all strong growers and free bloomers.

Time to Plant.—The best time to plant, to obtain the finest flowers, is early autumn (as early as possible), *although bulbs may be put in as late as Christmas with fairly satisfactory results*; we have planted some Daffodils as late as the second week in February, and had some very good blooms in May. We recommend, however, *early* planting to obtain the best results.

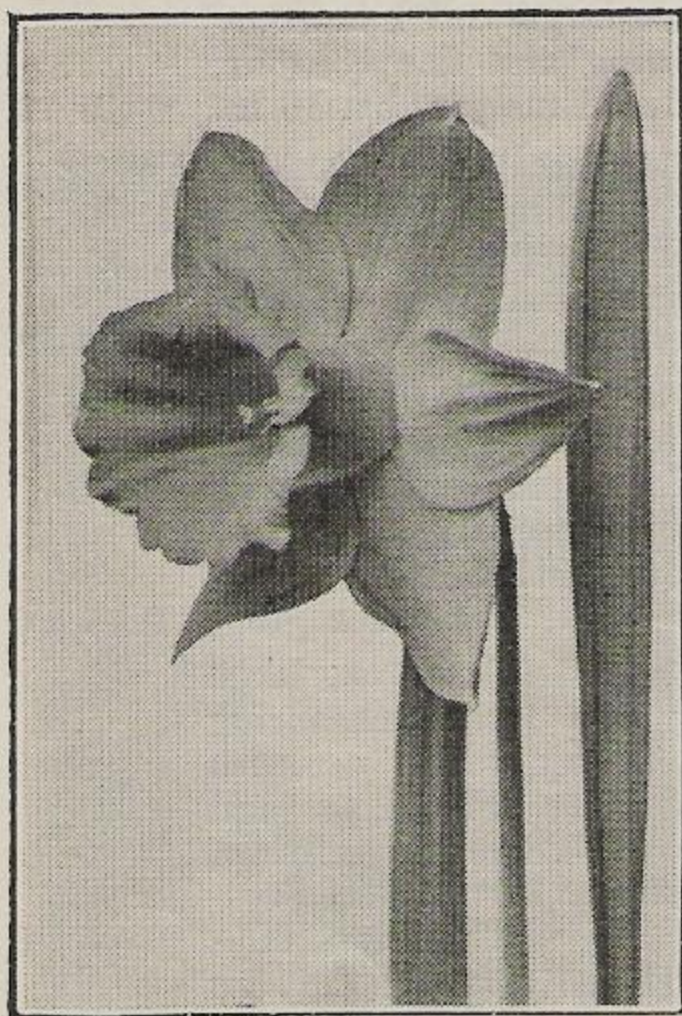

Depth to Plant.—Failures with bulbs are most frequently due to their having been planted too deep or too shallow. A good general rule to follow is to cover the top of the bulb with soil once and a half to twice its own depth, *measuring the bulb* from base to shoulder. Thus a daffodil bulb measuring 2 inches from base to shoulder should be covered with 3 to 4 inches of soil. See Cultural Notes, page 2.

DIVISION I.—TRUMPET DAFFODILS

Distinguishing Character.—Trumpet or crown as long as or longer than the perianth segments.

(A) YELLOW AND SULPHUR-COLOURED TRUMPET DAFFODILS.

With Yellow, Lemon or Sulphur-coloured Trumpets, Perianth of same shade or lighter (but not white).

DAFFODIL GOLDEN EMPRESS.

Aerolite (3), xxx½, a graceful flower, perianth primrose-yellow, overlapping and slightly reflexed, short bright yellow trumpet of elegant form; this variety is almost a Giant Incomparabilis, ht. 20 in..... 48 0 4 6

†**Ben Alder** (2), xxx½, a very handsome flower of the King Alfred type but larger, and of more robust growth, ht. 20 in..... 36 0 3 6

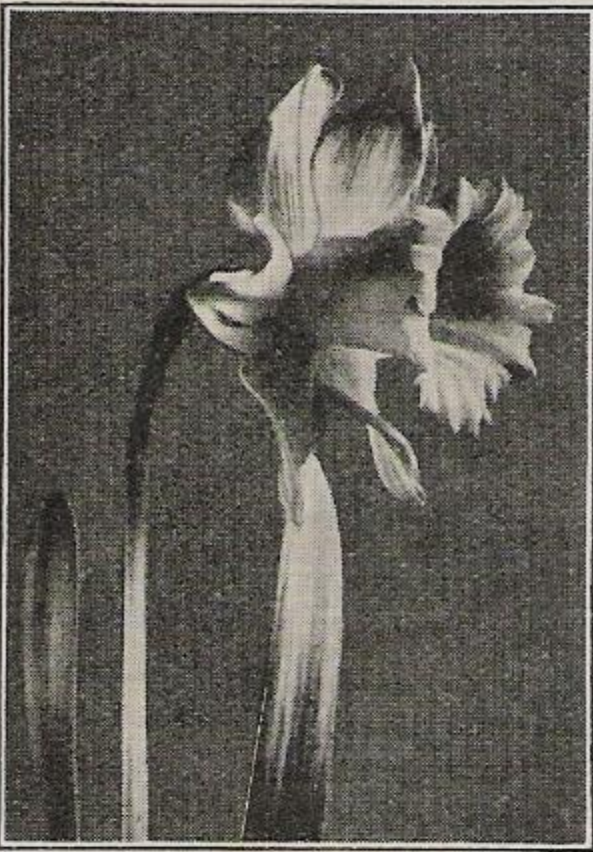

†**Brian** (2), xxx½, a bold, fine showy variety, well imbricated bright yellow perianth, trumpet golden-yellow, slightly ridged and well frilled at margin, ht. 17 in..... 10 6 1 0

†**Cleopatra** (4), xxx½, large flower of perfect form and colour; very broad imbricated yellow perianth and long bold deep yellow trumpet; a beautiful Daffodil, equally suitable for pot-culture or the flower border, ht. 15 in. AWARD OF MERIT R.H.S. and MIDLAND DAFFODIL SOCIETY ...per 100, 63/- 8 6 0 9

§†**Cornelia** (3), xxx, flower soft canary-yellow with expanded trumpet and broad smooth perianth, ht. 18 in; it makes a good pot plant and is a splendid bedder. AWARD OF MERIT R.H.S.....per 100, 30/- 4 0 0 5

Yellow Trumpet Daffodils—continued.

Table listing various daffodil varieties such as Emperor, Glory of Leiden, Golden Empress, Golden Flag, Golden Herald, Golden Spur, Gold Sand, King Alfred, Latona, Lobularis, Lord Roberts, Maximus Superbus, Michael, and Minimus, with their descriptions and prices per dozen and each.

DAFFODIL KING ALFRED.

Henry Irving. We no longer offer this variety as it is an inferior grower and out of date. We recommend Golden Spur in its place.

King Alfred (2), xxx, a remarkably handsome Daffodil which we can strongly recommend; flowers of large size, great substance and refined finish. Colour a uniform intense rich golden-yellow trumpet large and of elegant form, with deeply frilled open mouth; very tall vigorous grower and free bloomer; foliage of a handsome bluish shade, ht. 24 in. It forces early and is greatly prized as a cut flower for vases. FIRST-CLASS CERTIFICATE R.H.S., and R.B.S. LONDON. per 100, 30/- 4 0 0 5 Very large bulbs, per 100, 42/- 5 6 0 6

Latona (3), xxx, a remarkably beautiful flower, measuring 4 inches across, of a self buttery yellow, perianth segments elegantly pointed, trumpet long with rolled back brim, very distinct, ht. 20 in. — 5 6

Lobularis, perianth sulphur-yellow, trumpet full yellow; a pretty miniature dwarf Daffodil suitable for the rock garden, edgings, etc., flowers one-third larger than Nanus, ht. 8 in. per 100, 20/- 2 9 0 3

Lord Roberts (3), xxx, a grand Trumpet Daffodil, raised at our Nurseries at the same time as PETER BARR; large golden-yellow flowers, with broad massive perianth and noble trumpet; tall grower and free bloomer, with strong constitution, ht. 23 in. AWARDED FIRST-CLASS CERTIFICATE by the R.H.S., MIDLAND DAFFODIL SOCIETY, CORNWALL DAFFODIL SOCIETY, and DEVON DAFFODIL SOCIETY. 10 6 1 0

Maximus Superbus (1), xxx, a fine stock of this very beautiful and graceful variety; flowers of a uniform rich deep golden-yellow, perianth elegantly twisted, ht. 18 in.; it is one of the richest coloured yellow Trumpet Daffodils and very early, per 100, 55/- 7 6 0 8

Michael (3), xxx, a beautiful and refined Daffodil, flowers of a clear soft yellow, with a broad, slightly campanulate perianth of great substance, trumpet of fine form and of solid texture, ht. 19 in. AWARD OF MERIT R.H.S. 12 6 1 3

Minimus, true (1). The smallest and dwarfiest of all Trumpet Daffodils, producing outdoors in February dainty little trumpet flowers of elegant form, rich full yellow, height about 3 inches. It likes a peaty soil and may be naturalised on rockeries or in grass, or grown in pots or pans for the Alpine house; no manure should be given. Although the collected bulbs have to be taken up while the foliage is green, a good percentage of the bulbs bloom the first season. Collected bulbs, per 100, 32/6 4 6 0 5 Home-grown bulbs, per 100, 45/- 6 0 0 7

Yellow Trumpet Daffodils—continued.

	per doz. each.			
	s.	d.	s.	d.
* Minor, true (1), a most graceful and charming very early-flowering miniature Daffodil of <i>Maximus</i> form, flowers with full yellow perianth gracefully twisted, the miniature trumpet being elegantly flanged at mouth, ht. 6 in.; prized for edgings, the rock garden, and for pots in the Alpine house, <i>now very scarce</i>	12	6	1	3
† Monarch (3), xxx, a large noble and refined flower; perianth and trumpet rich full yellow and of perfect form and fine substance, growth strong and sturdy, ht. 20 in...	8	6	0	9
† Mustapha (2), xxx½, a large and beautiful shapely flower with broad pointed perianth of a rich yellow; trumpet deep yellow, elegantly frilled at mouth, ht. 19 in.	25	0	2	3
* Nanus, true (1), a charming miniature yellow trumpet Daffodil, larger than <i>Minimus</i> but smaller than <i>Minor</i> , flowers rich full yellow; very dwarf and early, a gem for edgings and the rock-garden and for naturalising on grassy banks, etc., ht. 4½ in. <i>Lobularis</i> is often sold for this, but it is inferior to the true <i>Nanus</i> per 100, 42/-	5	6	0	6
§* Obvallaris, The true Tenby Daffodil (1), xx, an attractive Daffodil of medium size, flowers of pleasing symmetry and model form, perianth and trumpet full yellow, <i>very early</i> : it does well grown in partial shade, and is a fine variety for naturalising in grass, ht. 12 in..... per 1,000, 140/-; per 100, 15/-	2	3	0	3
† Polemon (3), xxx½, flower 4½ inches across with broad well imbricated primrose-yellow perianth, trumpet full yellow of elegant form, deeply frilled at mouth; a grand exhibition flower, ht. 16 in., AWARD OF MERIT, HUNTINGDON, 1928.....	21	0	2	0
† Prince of Wales (3), xxx, a large bold handsome flower, perianth soft primrose, broad, smooth and imbricated, trumpet bright yellow, ht. 20 in.... per 100, 55/-	7	6	0	8
† Princess Juliana (3), xxx½, almost a self golden-yellow, flower of fine form, trumpet being beautifully frilled at margin, ht. 19 in.....	36	0	3	6
pumilus (1), a pretty form of <i>Minor</i> growing rather taller and producing flowers a shade lighter in colour; the perianth is not quite so twisted as in <i>Minor</i> , trumpet elegantly flanged at mouth, ht. 7 in.....	8	6	0	9
† Queen Maya (3), xxx, perianth sulphur, trumpet soft canary-yellow, of beautiful form, deeply frilled expanded mouth, ht. 17 in.....	8	6	0	9
† Royal Gold (2), xxx½, a grand flower of fine form, with broad imbricated rich yellow perianth and a large golden trumpet deeply flanged at mouth; a fine Exhibition variety, ht. 22 in.....	27	6	2	6
§ Santa Maria Seedling (1), xx½, a seedling of <i>Santa Maria</i> , of more vigorous growth, with flowers of similar form, very deep self golden-yellow with elegantly twisted perianth, ht. 15 in.; charming for naturalising in grass or rock garden	7	6	0	8
† Tresserve (3), xxx, a handsome hybrid of <i>Golden Spur</i> × <i>Emperor</i> , flower very large with slightly campanulate canary-yellow perianth and a very bold rich yellow trumpet with wide expanded brim deeply flanged, flower measuring 2¼ inches across, ht. 17 in.; a fine exhibition variety..... per 100, 63/-	8	6	0	9
† Van Waveren's Giant (3), xxx, a giant Trumpet Daffodil; flowers of immense size, perianth primrose and of rather campanulate form, trumpet bright yellow with very large open mouth, flanged at brim, ht. 18 in., a very showy and decorative variety of great vigour, fine for bedding or for making bold clumps in the flower border..... per 100, 95/-	12	6	1	3

DAFFODIL ALICE KNIGHTS.

(B) WHITE TRUMPET DAFFODILS.

Varieties with White Perianth and White or nearly White Trumpet.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone flour, basic slag, or our *Phytobroma* should be used. See Cultural Notes, page 2.

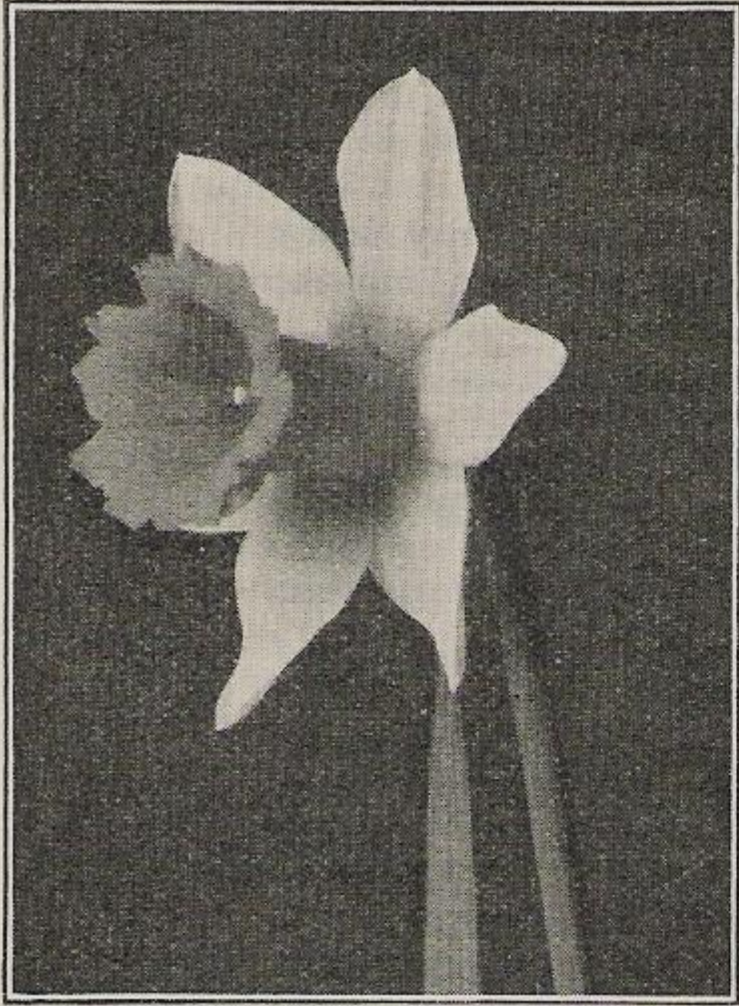

†§ Alice Knights (1), xxx, raised at our Nurseries, the earliest of white Trumpet Daffodils, flower of medium size, perianth white, trumpet creamy white of elegant form with prettily frilled open mouth; it lasts well, whether cut or on the plant, and makes a fine forcing variety, ht. 14 in. AWARD OF MERIT R.H.S., as a pot plant.... per 100, 35/-	5	0	0	6
--	---	---	---	---

Cernuus true (1), xx, a very ancient Daffodil with elegant nodding flowers and blue-green foliage; perianth and trumpet silvery-white and of the same length, an early-flowering variety; best grown in shade or in grass, ht. 10 in....	10	6	1	0

NARCISSUS BERNARDINO.
Example of a Flower in Division II.

DIV. II.—INCOMPARABILIS.

LARGE CHALICE-CUPPED DAFFODILS OR STAR NARCISSI.

Distinguishing Character. Cup or crown measuring from one-third to nearly the length of the perianth segments.

All having yellow or white perianth and yellow or red-stained cups.

These beautiful Star Narcissi commence flowering in March, and furnish a succession of bloom throughout April. All are of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and gently forced for early bloom (see pages 2 and 3 of our General Bulb Catalogue). They make charming pot plants, while in beds and borders they are very showy, and naturalised in grass produce a graceful effect. We illustrate Bernardino as an example of a flower in this Division.

BACKHOUSE RED-CUP SEEDLING MIXTURE.

An extra choice mixture of giant red-cupped Incomparabilis and Barrii varieties, fine for grouping in flower borders, per dozen 16/- : each 1/6.

NARCISSUS CHALLENGER.

Example of a Flower in Division III

DIVISION III.—BARRII.

Short-Cupped Daffodils, or Star Narcissi.

Distinguishing Character.—Cup or crown measuring less than one-third the length of the perianth segments.

All having yellow or white perianth and yellow or red-stained cups.

The chaste beauty of these shorter-cupped Narcissi is the more highly appreciated when the cut flowers are seen arranged in vases. The brilliancy of colouring in the cups of some, and the dainty elegance of others, render them all more or less valuable exhibition flowers. The cheaper kinds we can strongly recommend for beds and borders, and for naturalising in grass, woodlands, wild gardens, etc.

§†**Albatross** (4), xx, fine for cutting, perianth white, cup pale citron-yellow, frilled and edged orange-red, beautiful, ht. 24 in. It may be gently forced. FIRST-CLASS CERTIFICATE R.H.S.

BARR'S PHYTOBROMA.

The best manure for Bulbs and all Flowering Plants.

1b. carton, 1/3; 7 lb., 3/-; 14 lb., 5/6; 28 lb., 10/-; 56 lb., 19/-; 1 cwt., 36/-.

Circular with full particulars on application.

DIVISION IV.—LEEDSII.

Eucharis-Flowered Silver-White Star Narcissi.

Comprising all Star Narcissi (large chalice-cupped and short-cupped) which have pure white or silvery white perianth, and cup or crown white, cream, pale buff-orange, apricot or pale citron.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their graceful fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders they are most charming, while naturalised in grass they produce a lovely effect.

Winsome (3), xxx, a flower of perfect and beautiful form, creamy white throughout, perianth smooth and well imbricated, crown having a rolled-back brim, ht. 14 in.		—	3 6

NARCISSUS WHITE LADY.

DIVISION V.—TRIANDRUS.

Triandrus and varieties obviously containing Triandrus blood.

The introduction of Triandrus blood in hybridising has resulted in such a very distinct group of hybrids that it was deemed advisable to make one section of them. For grace and beauty they are unsurpassed. We recommend a situation partly shaded by trees, and if a little very fine dwarf grass seed (see p. 2 of Cover of our General Bulb Catalogue) is sown amongst them the beauty of their flowers is enhanced. Once planted they may remain undisturbed for years.

NARCISSUS TRIANDRUS.

The Cyclamen-flowered Daffodil with reflexing perianth.

NARCISSUS TRIANDRUS ALBUS.

THE DAINY LITTLE "ANGEL'S TEARS" DAFFODIL (*Triandrus albus*) was found by the late Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. All in this section make lovely little pot-plants (three or more bulbs in a pot), and grown thus should be given cold frame culture.

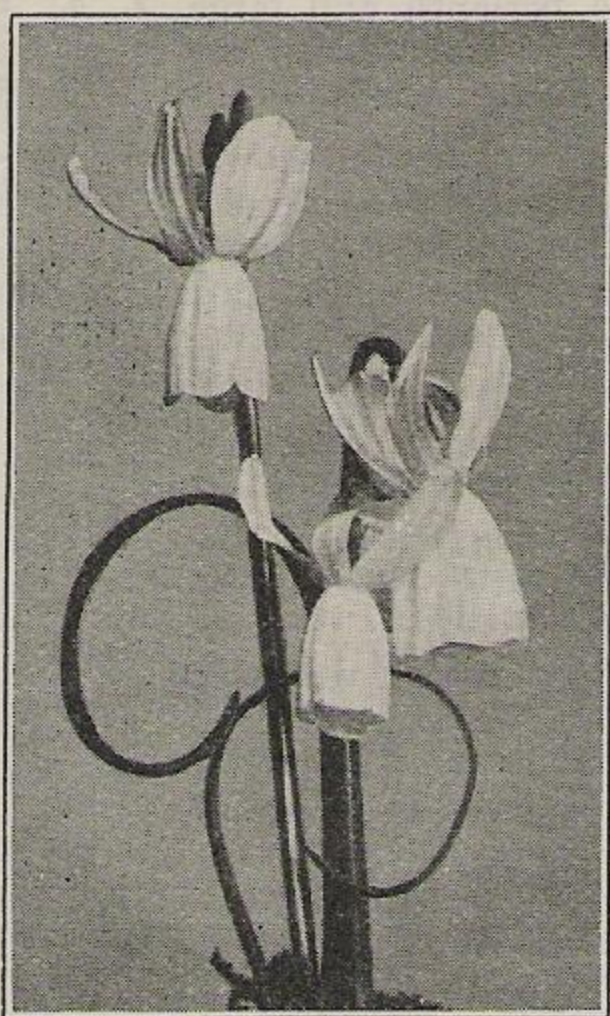

In the rock garden they form a picture of grace and beauty. They prefer shade, a gritty soil and a well-drained position; no manure should be given.

†**Triandrus albus** (3), an exquisitely beautiful little species, appropriately called the "Angel's Tears" Daffodil; it is of slender growth, and produces a cluster of elegant little creamy white flowers with globular cup and perianth reflexing as in the Cyclamen, ht. 7 in. As the collected bulbs have to be taken up while the foliage is still green, a few may possibly not bloom the first season: the bulbs should therefore be left undisturbed to become established.

TRIANDRUS CALATHINUS.

†**Triandrus calathinus** (3). One of the most beautiful little Daffodils in existence. The flowers, which are produced in drooping clusters of two or three, are snowy white, and more than twice the size of *Triandrus albus*, with long goblet-shaped crown prettily fluted; the foliage has a curious habit of curling over, ht. 7 in. For pots and the rock garden it is a perfect gem. This beautiful little Daffodil thrives best in a mixture of leaf mould, heath soil and coarse sand, with just a little bone flour added; no other manure should be given. The late Mr. Peter Barr collected this rare Daffodil some years ago on one of the sea-swept Glénan Isles (off Brittany). Unfortunately it is no longer to be found there, the sea having washed away all trace of this little species. It is, however, readily raised from seed, and we now offer strong flowering cultivated bulbs.

NARCISSUS TRIANDRUS HYBRIDS.

NARCISSUS QUEEN OF SPAIN.

§†**Queen of Spain** (3), xxx, a wild hybrid discovered by the late Mr. Peter Barr in Spain. One of the most beautiful, distinct, and graceful Daffodils, and recommended either for bedding, pot or bowl culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, and sometimes in form of trumpet, but all are of a uniform, delicate canary-yellow, with a gracefully reflexing perianth, ht. 12 in. Naturalised in grass under trees this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in our Peat-fibre mixture, and grown thus affords an artistic decoration for the sitting-room.

DIV. VI.—CYCLAMINEUS AND CYCLAMINEUS HYBRIDS.

NARCISSUS CYCLAMINEUS.

Cyclamineus (1), the Yellow Cyclamen-flowered per doz. each.

Daffodil. This beautiful little daffodil was found by the late Mr. Peter Barr in Spain and Portugal, at the margin of mountain streams and in flooded meadows adjoining; the moister the situation, the finer were the blooms. It is the earliest of all Daffodils, flowering from the middle of February to early March, and is a charming, elegant little flower of very distinct form; the trumpet is rich yellow, straight and tube-like, elegantly serrated at mouth, while the perianth is reflexed like a Cyclamen. A valuable little species for pot-culture, edgings, and to naturalise in damp spots in the rock garden, in grass and shady nooks, or at the water's edge; it delights in a dampish sandy peat soil and should be left undisturbed for years, ht. 6 in. **FIRST-CLASS CERTIFICATE R.H.S.** For pot culture and exhibition the larger size bulbs should be ordered.

Home-grown bulbs	per 100, 32/6	4	6	0	5

"Scilly Isles" White , perianth white, cup creamy white, very chaste; this variety may be forced into bloom by February	per 100, 18/6	2	8	0	3

NARCISSUS POETAZ—NEW HYBRID POLYANTHUS NARCISSI.

New Hybrids of *Poeticus Ornatus* × Best Forms of Polyanthus Narcissi.

NARCISSUS POETAZ ELVIRA.

A fine race of Daffodils, resulting from a cross between *Poeticus ornatus* and the finest varieties of *Polyanthus* or *Bunch-flowered Narcissi*, the *Poeticus* being the seed-bearing parent. The plants are tall and vigorous growers with strong erect foliage and bearing heads of large well-formed flowers, deliciously fragrant; they are much finer than the old Polyanthus Narcissi, and have the advantage of being much hardier. In pots, bowls, or the flower border they are very decorative, while the flowers are highly prized for cutting. They can easily be brought into bloom early by gentle forcing.

† Admiration (3), xxx, a very handsome showy variety, bearing several flowers on a stem, perianth light yellow, cup heavily margined scarlet, ht. 21 in.	per 100 55/-	7	6	0	8
† Alsace (2), xxx, bearing several flowers on a stem, making a fine head; perianth pure white, cup yellow thinly margined orange, very attractive, ht. 15 in.	per 100, 25/-	3	6	0	4
† Aspasia (3), xxx, bearing four to five large bold flowers on a stem, with broad solid white perianth and golden cup, very prettily fluted, ht. 21 in.	per 100, 21/-	3	0	0	4
† Cheerfulness (Double Poetaz) (4), xxx, a very distinct and decorative variety, having rigid erect stems, each bearing 3 to 4 large blooms with broad rounded creamy white perianth and a full-double centre of creamy white and yellow, ht. 17 in., a good early forcer.	per 100, 27/6	3	9	0	4
† Elvira (3), xxx, bearing on long, graceful stems, heads of 3 to 4 large flowers with broad solid white petals of great substance and a bright yellow cup thinly edged orange, delicately fragrant, ht. 24 in. AWARD OF MERIT R.H.S.	per 100, 20/-	2	9	0	3
† Jaune à Merveille (4), xxx, a handsome variety, four to six flowers on a stem, with large broad soft primrose perianth and bright yellow cup, thinly edged orange, of good form, ht. 21 in.	per 100, 35/-	5	0	0	6
† Klondyke (3), xxx, a fine showy variety with primrose-yellow perianth and bright yellow fluted cup, five to seven large flowers on a stem, ht. 18 in.	per 100, 25/-	3	6	0	4
† Medusa (3), xxx a very attractive variety, bearing 2 to 3 flowers on a stem, broad pure white perianth slightly ridged and flushed primrose at base, open fluted crown of a fiery orange-scarlet, ht. 22 in. FIRST-CLASS CERTIFICATE R.H.S.	25	0	2	3	
† Orange Cup (3), xxx, bearing a cluster of large showy flowers, perianth primrose-yellow, cup brilliant fiery orange shading down to gold and prettily frilled, a good early forcer, ht. 15 in.	per 100, 25/-	3	6	0	4

Narcissus Poetaz—continued.

TAZETTA SUB-SPECIES.

§ CANALICULATUS (3), a dainty little Polyanthus Narcissus from Mentone, suitable for sunny situations in the rock garden; it has narrow erect bluish green foliage and bears heads of three to four flowers with white perianth and globular golden cup, sweetly scented; ht. 6 in.....per 100, 17/6	2	6	0	3
---	---	---	---	---

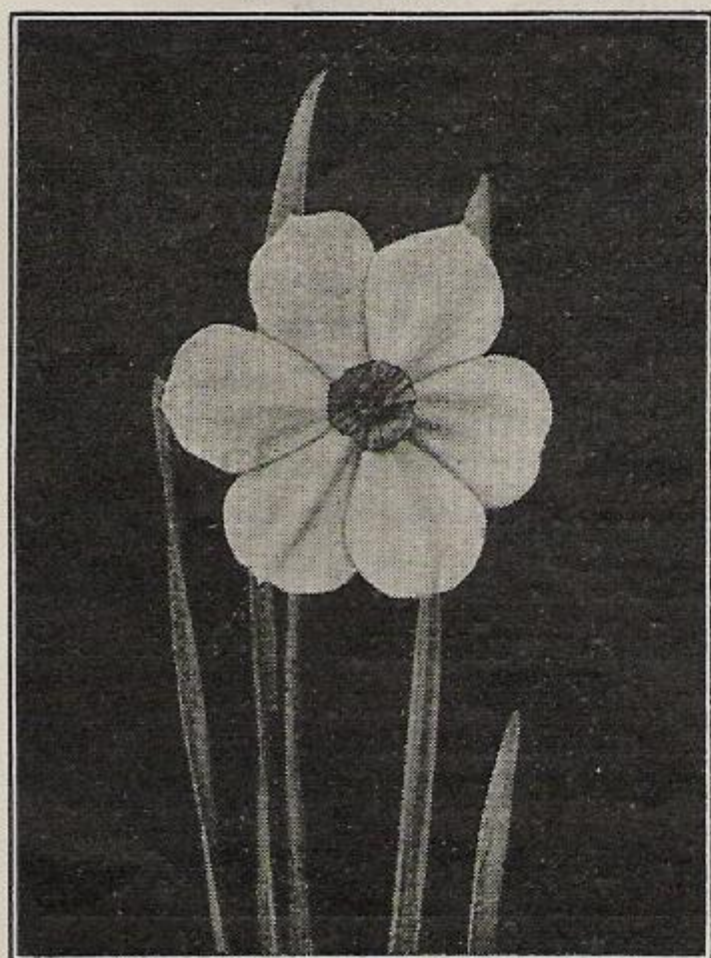

DIVISION IX.—POETICUS—TRUE POET'S NARCISSI.

These "Poet's Daffodils" or Narcissi all have snowy white perianth segments or petals, and a small flattened eye or crown, yellow or lemon edged more or less deeply with scarlet or orimson, sometimes almost self scarlet. All are sweetly scented.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) and may be gently forced. As border plants and naturalised in grass the Poet's Narcissi produce a lovely effect.

👉 Early planting and liberal culture is specially recommended for these Poet's Daffodils. To obtain tall stems and fine large flowers they should be grown in a rich deep soil not too dry. The varieties having very highly coloured crowns should be cut young to preserve the fine colouring.

	per doz.		each.	
	s.	d.	s.	d.
§† Ashgard (6), xxx, a bright and showy variety, well imbricated snow-white perianth slightly inclined to reflex, golden-yellow eye edged madder-scarlet, a fine decorative garden variety, ht. 21 in.....per 100, 30/-	4	0	0	5

DOUBLE INCOMPARABILIS NARCISSI.

The Double Rose-flowered Daffodils.

The large massive flowers of these are greatly prized for bouquets and vases, mixing well with other flowers and foliage in decoration. As pot plants (3 to 6 bulbs in a pot) they are very charming, while in beds, borders, or naturalised they make a most effective display.

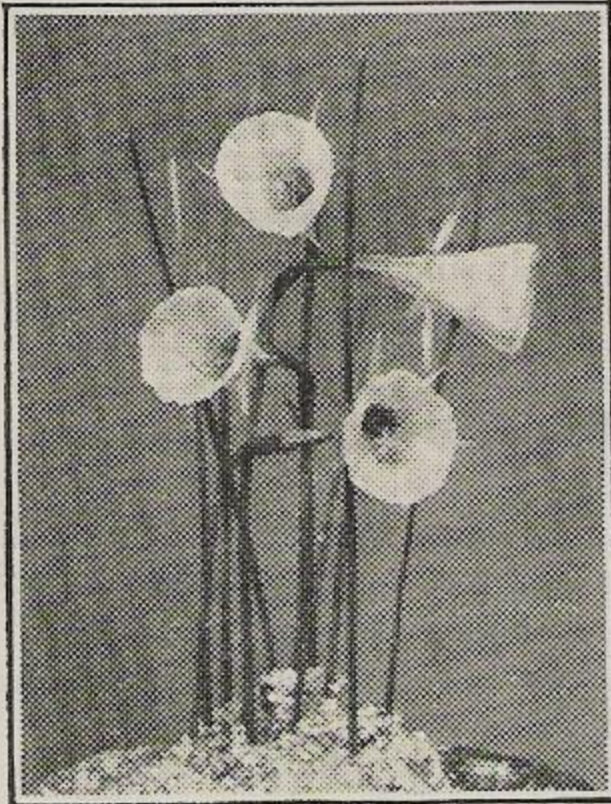

DOUBLE NARCISSUS, PRIMROSE PHOENIX.

§† Argent (3), xxx, a cross between Telamonius plenus and Poeticus ornatus , bearing very beautiful and elegant star-shaped semi-double flowers of erect bearing with creamy white petals and yellow centre, ht. 18 in. It may be gently forced and makes a charming cut flower.....per 100, 17/6	2 6	0 3

DIVISION XI.—VARIOUS SPECIES AND HYBRIDS.

NARCISSUS
LARGE SULPHUR HOOP PETTICOAT.

Distinct forms which cannot be classed under any of the foregoing divisions.

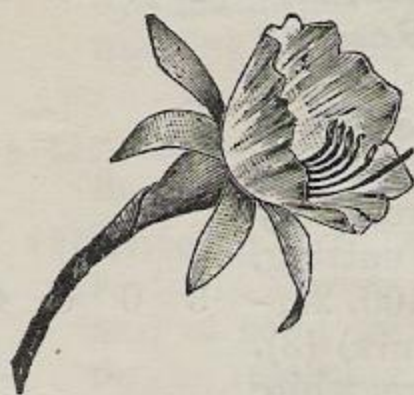

NARCISSUS BULBOCODIUM (CORBULARIA).

The Hoop Petticoat, or Medusa's Trumpet Daffodils.

For the rock garden, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration.

Large Sulphur Hoop Petticoat per doz. each.
(*Bulbocodium citrinus*) (3), very beautiful s. d. s. d.
pale citron-yellow flowers, ht. 6 to 8 inches; delights in a dampish sandy peat soil; no manure should be given. *The collected bulbs we offer having been taken up while in growth will not all bloom the first season: they should therefore be planted where they may be left undisturbed to become established.*

WHITE HOOP PETTICOAT.

White Hoop Petticoat (*Bulbocodium monophyllum* or *Clusii*) (1), native of N. Africa,

producing in winter little snowy white flowers of exquisite beauty; charming in the rock garden or may be grown in pots in a cold frame or alpine house; as soon as signs of growth are seen, give water freely, ht. 6 in. *The bulbs we offer having been collected while in growth; a few may therefore fail to flower the first season. Those planted outdoors should therefore be allowed to remain where planted so as to become established: on no account should manure be given...*

per 100, 21/- 3 0 0 4

†**Yellow Hoop Petticoat (*Bulbocodium conspicuus*) (2),**

flowers rich golden-yellow, of hoop-petticoat form and with rush-like foliage, ht. 6 in. It blooms from the end of February to early in March, and prefers a sandy peat soil with a fair amount of moisture while in growth, but not in summer; no manure should be given...

§**Gracilis** (7), a very beautiful little rush-leaved Daffodil, bearing 3 to 5 light yellow Jonquil-like sweet-scented flowers; the last of the family to bloom, the flowers opening about end of May, ht. 14 in.....

per 100, 35/- 5 0 0 6

Juncifolius (The Miniature Rush-leaved Daffodil) (4),

a charming and elegant little species for pots or for select spots in the rock garden; it has small graceful rich yellow flowers rather smaller than a Jonquil, with a dainty flattish little crown, ht. 3 to 4 in., delicately fragrant; a native of the Pyrenees: no manure should be given when planting.....

per 100, 35/- 5 0 0 6

NARCISSUS YELLOW HOOP PETTICOAT ON ROCKWORK.

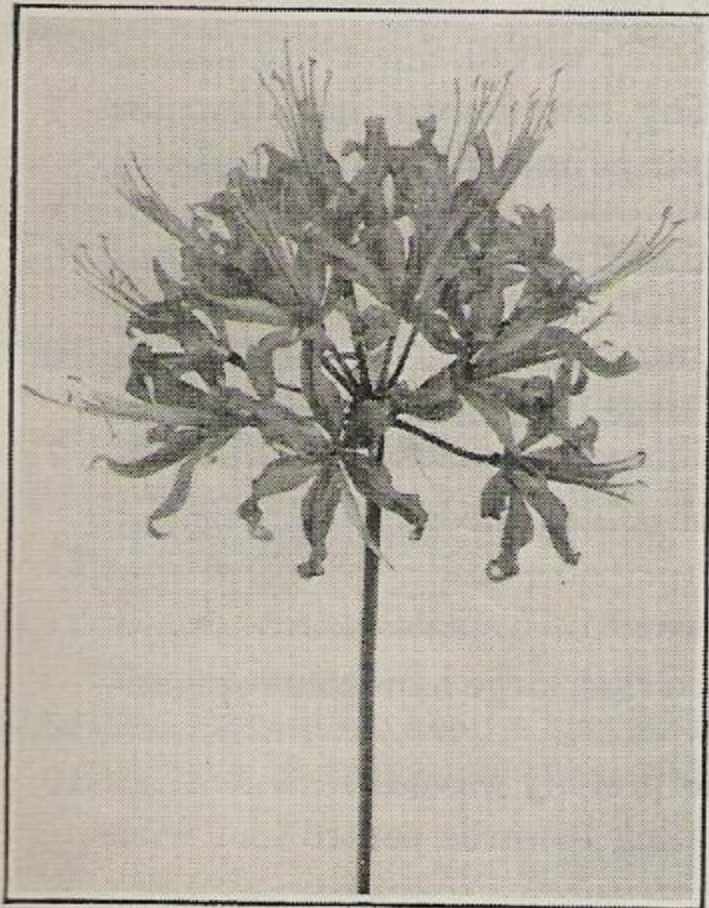

Serotinus, a rare little Narcissus producing in October, on slender stems, miniature star-shaped fragrant flowers with silvery white perianth and minute golden-yellow cup (sometimes two to three flowers on a stem), ht. 10 in. Plant in a warm spot on rockwork and lightly cover during winter, or grow in pots in a cold frame..

NERINES.

The most beautiful and easily grown Autumn-flowering bulbs for the greenhouse.

For autumn decoration in the greenhouse few plants can compare with *Nerines* for their brilliant and attractive colours, which form a pleasing contrast to the prevailing tints of this period of the year. The flowers, which are produced in umbels of 6 to 24 blooms, are borne on stout stems varying in height from 1 to 2 feet. In colour they range from *dark red, vivid crimson, cerise, and scarlet* to *salmon, coral-rose, pink, blush, and white*, many having a glistening lustre which in sunlight gives them the appearance of being dusted with gold or silver. In some cases the flowers have a well-defined bar or stripe running up the centre of the petal, which adds to their charm. They remain decorative for many weeks, and their beauty may be enjoyed in a sitting-room as well as the greenhouse, if the pots are kept in a sunny window.

A HYBRID NERINE.

The cut spikes, which last fresh a long time, are greatly appreciated for table decoration associated with some light graceful foliage like that of Maidenhair Fern.

The varieties we offer below are mostly **New Seedlings**, comprising new shades of colour and new forms; they are freer bloomers, and in some cases of taller growth, and with larger flowers than many of the older kinds.

CULTURE.—*Nerines* can be very easily grown by anyone who has a glass structure from which frost can be excluded. *Plenty of air and sunshine* are their principal requirements. After the bulbs have finished flowering, place the pots in an airy sunny situation close to the glass, and encourage a free foliage growth by occasionally giving a little weak liquid manure. In May, when the foliage commences to turn yellow, gradually cease giving water and allow the bulbs to ripen off in their pots. As soon as the plants show signs of making fresh growth in August or early September, stand the pots in saucers of water for a few hours to ensure the soil being uniformly moist, and then give water sparingly until the flower spikes are well advanced.

Nerines bloom most freely when well established in pots. Re-pot every third or fourth year, in August, using a 3½ inch pot, excepting for those varieties which make large bulbs, when an appropriate size pot should be used. In potting, put in plenty of crocks to ensure good drainage, and pot in a compost of good fibrous loam, coarse silver sand and well-decayed cow manure with a sprinkling of bone meal, well mixed.

Our *Nerine* Exhibits have been awarded by the R.H.S. Eight Silver and Silver-Gilt Medals.

Vieux Rose , a most distinct and attractive shade difficult to describe, the effect being a <i>dull salmon</i> with <i>old gold</i> suffusion and <i>vermilion</i> star.....	5	6

Two Grand New Hybrid Nerines.

These two wonderful Nerines were raised by Mr. James Rose, of Oxford, by crossing **N. Bowdeni** and a **N. Fothergilli Hybrid**. When exhibited at the R.H.S., they created a great sensation. One would hardly recognise them as Nerines owing to the large broad, Agapanthus-like foliage which accompanies the flowers, which are twice the size of an ordinary Nerine, and are produced in very large umbels on stout stems. On established plants the umbels carry as many as eighteen to twenty-four flowers. **Hera** comes into bloom about ten days before **Aurora**.

AURORA, flowers of great size and substance, *satiny rose* with *silvery lavender* stripe down centre of petals, borne in very large bold umbels, rising from a wealth of foliage. **FIRST-CLASS CERTIFICATE R.H.S.**.....each 15s.

HERA, flowers of great size and fine form, brilliant *rose pink*, with a *deeper rose* stripe down centre of petals, borne in large umbels on stout stems, rising from a bold *fresh green* foliage; it blooms freely every year. **FIRST-CLASS CERTIFICATE R.H.S.**.....each 15s.

Special Notices and Terms of Business.

Carriage of Bulbs—All Orders for Bulbs to value of 40s. (or 20/- if order is pre-paid) sent Carriage Paid to any Railway Station in the United Kingdom. *These terms do not include certain manures, soils or tools. These will either be sent by goods train, carriage forward, or consigned at lowest rate and carriage charged on invoice.*

5% Cash Discount on Bulb Orders of 40s. and upwards.—1s. in the £ discount is allowed for Cash with Order or for payment within 14 days from date of Invoice on all orders for bulbs of 40s. and upwards, with exception of the Collections offered on pages 3 and 4 which are nett.

Terms of Credit.—Our books are made up half-yearly, when all accounts are due nett. Interest at the rate of 5% per annum will be charged on overdue Accounts.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "Westminster Bank." Small amounts may be remitted in Postage Stamps or Coin in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.*

Naming Daffodils.—Cut specimens of Daffodils sent to us for naming should be addressed to our Nurseries, Taplow, Bucks., accompanied by a remittance of 4d. per bloom to cover attendant expenses.

Catalogues.—Our Seed Guide is published 1st of January, List of Bulbs and Tubers for Winter and Spring Planting 1st of February, Hardy Plant Catalogue in February, List of Autumn-flowering Bulbs (Crocus species, Colchicums, etc.) in July, Daffodil and General Bulb Catalogues in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.
