산림청 국립수목원은 2015년 광복 70주년을 기념하여 ‘우리식물 주권찾기’ 운동의 일환으로 ‘한반도 자생식물 영어이름목록집’ 발간 사업을 추진한 바 있습니다. 이 사업을 통해 그 동안 일본 또는 다른 나라의 식물로만 인식되었던 우리 식물들의 제대로 된 이름을 찾아주고, 이름이 없었던 식물들은 새로운 영어이름을 가지게 됨으로서, 국제사회에 우리 식물임을 소개하는 계기가 되었습니다.

식물의 이름은 식물이 가지고 있는 특징을 나타내는 것을 넘어서, 그 식물의 생태적 가치, 자생하는 지역의 역사적 의미, 민족의 문화를 내포하고 있습니다. 2014년 나고야의정서 발효 이후, 식물 주권에 대한 관심과 중요도는 그 어느 때 보다 커졌으며, 다양한 방법을 통해 우리 식물의 주권을 확보할 필요가 있게 되었습니다.

이번 『한반도 자생식물 영어이름 목록집 (개정판)』은 2015년에 발간된 『한반도 자생식물 영어이름 목록집』에서 일부 영어 이름의 수정이 필요한 20종과 새롭게 자생이 확인된 닥나무, 큰개구리발톱, 섬진달래 등 450종을 추가하였습니다. 특히 우리나라 식물 이름의 표준목록인 『국가표준식물목록 (자생식물)』과 연계하였으며, 국가생물종지식정보시스템(NATURE)를 통해 쉽고 빠르게 검색이 되도록 하였습니다.

이러한 우리 식물의 영어 이름들이 확산되기 위해서는 학술논문, 자료집, 표찰, SNS 등의 다양한 경로를 통한 모두의 노력과 실천이 필요합니다. 이를 통해 우리 식물은 합당한 이름으로 불리게 되고, 우리가 제안한 이름의 진정한 주인이 될 것 입니다.

본 개정판이 나오기까지 애써주신 국가수목유전자원목록심의회 위원들과 영어 이름을 제안해 주신 한국식물분류학회 전문가분들께 감사드리며, 또한 국립수목원 관계자들의 노고를 치하하는 바입니다.

아무쪼록 본 목록집이 우리 식물의 주권 확보에 기여할 수 있기를 바라며, 산림청 국립수목원은 앞으로도 지속적인 연구와 지원을 아끼지 않을 것을 약속드립니다.

FOREWORD

In commemoration of Korea's 70th national liberation, the Korea National Arboretum of the Korea Forest Service published *English Names for Korean Native Plants* in order to correctly refer to Korean plants' vernacular names in English. Thanks to this publication, we are able to introduce newly named Korean native plants, which have been incorrectly referred or known as being non-Korean, to the global community.

Each plant's name implies much deeper ecological, historical and cultural significance let alone its botanical features. It is high time to claim 'plant sovereignty' over our native plants in a variety of ways after much attention and interest in preserving the characteristics of indigenous flora have grown since the 2014 Nagoya Protocol.

This latest version of *English Names for Korean Native Plants* includes the 20 species from the 2015 edition that were necessary to be edited, and newly 450 species such as *Broussonetia × hanjiana* M.Kim, *Semiaquilegia quepaertensis* D.C.Son & K.H.Lee and *Rhododendron keiskei* var. *hypoglaucum* Sutô & Suzuki added.

A wide range of channels including academic papers, databases, plant name labels, social media platforms are needed to raise awareness of the English names introduced in the this book. By these means, Korean native plants will be called appropriately and we can fully claim sovereignty over our plants.

I would like to appreciate those who have endeavored to publish this new edition including the members of the Korean Plant Names Index Committee, taxonomists of the Korean Society of Plant Taxonomists and my colleagues of the Arboretum.

I hope *English Names for Korean Native Plants* serves as a tool for protecting the identity of Korean native plants and the Korea National Arboretum will be committed to supporting research on the Korean flora.

Choi, Young-Tae
Director General of the Korea National Arboretum

우리 민족과 함께해 온 소나무의 영어이름으로 재패니즈 레드 파인(Japanese red pine)이 사용되고 있습니다. '줄기가 붉은 일본의 소나무'라는 뜻입니다. 세계적으로 한반도가 소나무 분포의 중심이지만 일본의 소나무가 서양인들에게 먼저 알려진 탓입니다. 이제 소나무가 한반도 중심의 나무임을 알려야 합니다.

우리 식물이 다른 나라의 식물로 알려진 경우 외에도 영어이름이 없는 식물도 있습니다. 식물주권의 확보는 한반도를 대표하는 식물을 '코리아(Korea) 식물'로 부르도록 세계에 알리는 일에서 출발합니다.

산림청 국립수목원은 2015년 광복 70주년을 맞아 우리 식물의 정체성을 확립하고 그 가치를 세계에 알리기 위해 아래와 같이 한반도 자생식물의 영어이름을 정리한 바 있습니다. 이후 산림청 국립수목원은 체계적인 산림식물종 연구를 통하여 국가표준식물목록(자생식물)을 지속적으로 개정하였으며, 새롭게 추가된 자생식물을 대상으로 영어이름을 새롭게 정리했습니다.

- 한반도가 식물분포의 중심지이나 다른 국가명이 들어간 식물
- 우리 문화·생활과 밀접한 관계가 있는 식물
- 한반도에만 살고 있는 특산식물
- 세계적으로 넓게 분포함에도 불구하고 특정 국가명이 들어간 식물

- ① 우리나라에 자생하는 관속식물 3,915 종류를 대상으로 하였으며, 목록의 배열은 국명의 한글 및 학명의 알파벳 순으로 각각 표기하였다.
- ② 분류군에 대한 학명과 국명은 국가표준식물목록(KPNI, The Korean Plant Names Index)을 기준으로 하였으며, 일부 분류군의 계급의 변화나 이명 처리 등에 대해서는 Tropicos, The Plant List 와 기타 문헌을 이용하여 보완 및 수정하였다.
- ③ 국명의 로마자는 국립국어원의 '국어의 로마자 표기법'에 따라 표기하였으며, 각 음절은 붙임표(-) 부호를 사용하여 구분하였다.

지네발란 (Ji-ne-bal-ran)

광릉골무꽃 (Gwang-reung-gol-mu-kkot)

- ④ 영문이름은 가능한 한자어나 일본어의 영향을 받은 용어를 배제하고, 학명, 국명, 식물의 형태, 생태적 특성 및 분포 등을 반영하여 작성함을 기본으로 하였으나, 이미 전 세계적으로 널리 통용되고 있을 경우 미국 농무부 자연 자원보전 서비스의 식물 데이터 베이스 (USDA, United States Department of Agriculture, Natural Resources Conservation Service, Plants Database), 위키백과(Wikipedia), 영국왕립원예학회의 가드닝 사전 (The New RHS Dictionary of Gardening) 등을 참고하여 반영하였다. 다만, 여러 종에서 영문이름이 혼용되는 경우에는 일부 수정하여 사용하였다.

일러두기

⑤ 지명이 포함된 식물의 영문이름은 지명을 나타내는 단어의 첫 글자를 대문자로 표기하되, 국명에서 사용된 지명을 그대로 반영함을 원칙으로 하였다. 국명에는 지명이 표시되지 않았으나, 분포지역을 근거로 작성한 영문명의 경우, 지명 전체(~도, ~산)를 포함하여 영문이름에 표기하였다.

INTRODUCTION

The pine tree that have shared the fate with Korean people is called a Japanese red pine in English. It means 'Japanese pine tree with red trunk'. Internationally, it is known that the Korean peninsula is the center of pine tree habitat, but the Japanese pine tree was reported to the world before. Now is the time to inform the world that the pine trees are the main tree of Korean peninsula.

Besides Korean plants known as other country's plants, there are plants without any English common names at all. To secure the plants' sovereignty, we have to start make the world understand that our plants 'Korean plants'.

The Korea National Arboretum have classified English names of Korean peninsula to establish the identity of our plants and to inform the world their value.

- The name of plants which their habitat is Korean peninsula, but have other country's name
- The name of plants closely related to our culture and our life
- The name of plants indigenous of Korean peninsula
- The name of plants widespread worldwide but have specific country's name

- ❶ It is targeted on the 3,915 species of vascular plants that inhabit in Korea, and the arrangement of the index is in Korean name order and alphabetic order of the scientific names.
- ❷ The scientific names and Korean names of the taxon are based on the Korean Plants Names Index, and in case of the change of class and giving a synonym to a part of taxon, we used the Tropicos, The Plant List and other documentary records for the complementation and revision.
- ❸ In case of romanization of Korean names, we have inscribed following the 'Romanization of Korean' and we used hyphen between syllables.

지네발란 (Ji-ne-bal-ran)

광릉골무꽃 (Gwang-reung-gol-mu-kkot)

- ❹ In case of English names, we have excluded the Chinese and Japanese terms as possible, and we have worked based on the scientific names, Korean Names, morphological and, ecological characteristics and distribution, but if the names were already common around the world, we have referred to the USDA (United States Department of Agriculture, Natural Resources Conservation Service, Plants Database), Wikipedia, The New RHS Dictionary of Gardening. But in case of English names used in several species, we have partly modified the names.

일러두기

- ⑤ In case of English names with geographical names, we have used the capital letter for the first letter of the geographical name, and we used the Korean geographical name literally same in English. In case of the English names based on the habitat but no geographical names within the Korean name, we have used full geographical names (~do, ~san) in English names.

Geo-mun-do-dak-na-mu (거문도닥나무)	Geomundo false ohelo
Geo-mun-cheon-nam-seong (거문천남성)	Geomun jack-in-the-pulpit

Han-ra-go-deul-ppae-gi (한라고들빼기)	Halla lettuce
Seom-si-ho (섬시호)	Ulleungdo hare's ear
Seom-mae-bal-top-na-mu (섬매발톱나무)	Jejudo barberry

- ⑥ We have excluded a person's name as possible in the English names, but if necessary and if needed in the meaning, we have put 's' after the person's name.
