***Miyakella* nom. nov., a replacement name for *Miyakea* Manning, 1995,
(Crustacea: Stomatopoda: Squillidae), preoccupied by *Miyakea* Marumo, 1933
(Insecta: Lepidoptera: Crambidae)**

³Corresponding author

Manning (1995: 213), in a monograph of the stomatopod crustaceans of Vietnam, proposed the name *Miyakea* for a genus of Indo-West Pacific stomatopods corresponding to the *nepa* group of species in *Oratosquilla* Manning, 1968: *Squilla nepa* “Latreille, 1828” (type species), and *Squilla holoschista* Kemp, 1911 (Manning 1971: 2–4, 7, 8; Ahyong 2001: 278; Ahyong *et al.* 2008: 137). *Squilla nepa* has long been attributed to “Latreille, 1828” but should be correctly attributed to “Latreille, in Latreille, Le Peletier, Serville & Guérin, 1828”, as Low & Ng (2012: 49) argued for the identical case of the name *Cardiosoma* in the same publication of Latreille (*in* Latreille *et al.* 1828).

The name *Miyakea* had been previously proposed by Marumo (1933: 48, 49) for a genus of crambid Lepidoptera, with *Eromene expansa* Butler, 1881, as the type species. *Miyakea* Marumo, 1933, is currently considered to be a valid genus comprising six species (Li & Li 2007: 564). *Miyakea* Manning, 1995, therefore, is a junior homonym of *Miyakea* Marumo, 1933, and needs to be replaced under Article 60.1 of the *International Code of Zoological Nomenclature*, 1999, hereafter, the Code (ICZN 1999). No potentially valid synonyms of *Miyakea* Manning, 1995, are available (Article 60.2 of the Code), and a new name for *Miyakea* Manning, 1995, is therefore required (Article 60.3 of the Code).

To reflect Manning’s (1995) intent to honour the Japanese carcinologist Sadayoshi Miyake, the name *Miyakella* nom. nov. is proposed as a replacement name for *Miyakea* Manning, 1995. *Miyakella* nom. nov. is derived from the name Miyake, and the Latin suffix *-ella*; gender feminine. *Miyakella* nom. nov. currently includes two valid species: *Miyakella nepa* (Latreille, in Latreille, Le Peletier, Serville & Guérin, 1828) comb. nov. and *Miyakella holoschista* (Kemp, 1911) comb. nov. A neotype for *M. nepa* (type locality: Xiamen, China) and lectotype for *M. holoschista* (type locality: Madras, India) were designated by Ahyong (2001) and Ahyong *et al.* (2008), respectively.

We are grateful to Tohru Naruse (University of the Ryukyus, Japan) for assisting with the Japanese literature.
