Errors, technical changes, and delivery possibilities subject to change. Technical data is based on the specifications of the products only. Features are not guaranteed herewith. Binding data can be found only in drawings in conjunction with product specifications.

Benefit from the Cherry advantage: Nobody has more experience!

Cherry offers expertise built up over several decades of development and manufacturing of computer input devices for pros and end users. No other manufacturer in the world has more experience!

A unique know-how head start from which each individual Cherry product and thus also every individual user benefits down to the smallest detail.

For Cherry products stand for world-class technology and continue to be developed and manufactured, now as before,

with a strong focus on uncompromising quality.

Our products guarantee reliability, long life and safety, all presented in a bold puristic design. This is how we provide functionality for the most demanding user requirements.

We do precisely that
which we do best:
We build perfect keyboards

Links: Norbert Sponer, Director of Operation Europe
Rechts: Günter Murrmann, Geschäftsführer Cherry GmbH

Human beings and technology make a strong team.

High quality standards combined with the development of innovative products, an innate flexibility and reliable cooperation with our customers have turned Cherry into one of the world's largest and most successful manufacturers of data input devices.

As we seek to remain competitive while continuing to adhere to our own stringent quality requirements, the automation of our production processes is gaining steadily in importance.

Finely-tuned manufacturing facilities based on industrial robots, fully-automated assembly lines, integrated process control, and an almost total automation of inspection procedures have been central to Cherry's working practices for a number of years.

At the same time, we have consistently improved working conditions for our employees. For where competence and motivation meet, the best long-term quality and true innovation result.

Our management system (for quality and environmental protection) fulfills all requirements of DIN EN ISO9001:2000, TS16949, and ISO14001:2005.

Distinguished as the best factory in Europe with the Industrial Excellence Award 2005!

Once a year, the "Industrial Excellence Award" is presented to the best factory in Europe.

Scientists from the renowned universities WHU in Germany and INSEAD in France populate the jury. They are supported by the jurors and representatives of our media partners Wirtschaftswoche (Germany) and L'Usine Nouvelle (France).

In 2005, the winner and therefore the best factory in Europe, was Cherry, Auerbach/Opf.!

The key to our proud success is especially our consistently-implemented concept of a holistic production system on through to the incorporation of employees into all important decision-making processes.

The key criterion when it came to evaluating the participating industrial corporations was: "What does an excellent production management have to offer in order to guarantee a company a permanent competitive advantage?"

Activities were recorded along the entire production and logistics chain, whereby it is not just the operative unit itself, but also the entire supply chain from the supplier to the final customer that are evaluated.

Based on the data analyses of a survey, interviews, and on-site visits, Wirtschaftswoche developed a concept of the management quality of our production. Managers can implement this concept directly in concrete activities and programs and thus achieve a decisive competitive advantage.

The juries of the management school INSEAD in Fontainebleau near Paris and the Graduate School of Management in Vallendar near Koblenz were impressed by the determination, energy and inventiveness of our company.

This is a good reason why we can be just a little bit proud. However, a still better reason to remain true to our holistic philosophy in the future is so that you as partner and customer can continue to rely on world-class quality made by Cherry!

Fully-automated keyboard manufacture

Manufacture of keyboards on modern robot line

SMD insertion with automatic visual check

Global visions and values

GLOBAL VISION

The Cherry Corporation develops innovative products that fulfill or exceed our customers' requirements. The delivery of products and customer service are on a world-class level. Complete customer satisfaction and a secure and healthy environment for our employees and our global society are our mission.

GLOBAL VALUES

Cherry's partners commit themselves to a global vision:

- Documentation, communication, and application of the global vision by all interested parties, including customers, suppliers, employees, investors.
- Specification and evaluation of measurable goals that advance our global vision and our global values.
- Constant improvement in everything that we do as a means of reducing costs, improving quality, and providing complete customer service, in each case with the goal of increasing the customer's benefit.
- Absolute adherence to all worldwide and locally-applicable health, safety, and environmental requirements and regulations with a focus on preventative environmental protection.
- Assurance of worldwide success through the advancement of open and active participation of all interested parties.

For us environmental protection is not an obligation ... it's a matter of course!

Many years ago, Cherry GmbH successfully established an integrated management system in accordance with the standards ISO 9001, ISO 14001 and TS16949 in the respective latest versions, and continues to develop this on a rigorous and ongoing basis.

These quality and environmental standards form the foundation of our corporate philosophy, and they are reflected in our global values.

Quality and environmental protection are not limited to system description; rather, they are anchored in our employees' heads and in their daily behavior.

Stringent process orientation enables us to fulfill or exceed the requirements and expectations of our customers, suppliers, investors, employees and the community at large.

Interested? Then simply visit our Web site at www.cherry.de for more information.

Feel the difference

Keyboard technologies

The most important characteristic of a computer keyboard is, now as before, the actuation force and travel – the key haptics.

Due primarily to its optimal key haptics, contact security, and the high quality of its keyboards, Cherry has maintained its position as market leader in Germany in the business and professional keyboards sector

MX technology

Key benefits

- Mechanical module with individual actuation types (linear, soft tactile feel, and click tactile feel)
- Low bounce times, high switch security, long-lasting reliability, and extremely long service life with sophisticated Gold Crosspoint contacts
- Long service life of individual keys > 50 million actuations
- Reliability (example: standard keyboard G80-3000):
MCBF 1×10^9 actuations
MTBF > 80,000 hours
- Tireless work with comfortable key feel
- Contrast-rich and abrasion-proof keycap labeling

ML technology

Key benefits

- Mechanical module with soft tactile feel
- Low bounce times, high switch security, long-lasting reliability, and extremely long service life with sophisticated Gold Crosspoint contacts
- Ultra-low height (including keycaps less than 12mm)
- Long service life of individual keys > 20 million actuations
- Reliability (example: compact keyboard G84-4100):
MCBF 1×10^9 actuations
MTBF > 90,000 hours
- Contrast-rich, abrasion-proof keycap labeling

Keyword "Multihaptics" (ATK technology) for CyMotion keyboards

While on "normal" keyboards all keys must be pressed with the same force, the forces of the ATK technology have been divided into individual force segments with the "multihaptic technology". Up to 29 special keys, which make Cherry CyMotion Line keyboards very special, customized input tools in comparison with standard IBM keyboards, stand out from the standard keys because of their very special touch when struck. Certain special keys such as the KeyM@n key, which is located between the standard keys, and the <Caps Lock> key have a considerably higher resistance when struck in order to minimize the risk of inadvertent activation. The other CyMotion special keys, the IBM standard function keys F1 to F12 and the <ESC> key also have higher resistances to distinguish them from the rest of the keys.

for many years. Basically, there is a choice between several technologies for Cherry keyboards:

Keyboards with mechanical individual modules on circuit board (MX and ML); foil keyboards with rubber mats (NTK and ATK), hybrid technology (FTSC), scissors technology (SXT) and low profile technology (LPK).

Force-displacement diagram, MX module linear

Force-displacement diagram, MX module soft tactile feel

Force-displacement diagram, MX module click tactile feel

Force-displacement diagram, ML module

FTSC technology

Key benefits

- Mechanical individual keys with membrane contact switches
- Robust system proven millions of times over
- Long service life and high reliability
- Long service life of individual keys > 50 million actuations
- Reliability (example: standard keyboard G81-3000):
MCBF 1×10^9 actuations
MTBF > 80,000 hours
- Contrast-rich, abrasion-proof keycap labeling

NTK technology

Key benefits

- Elastomer keys with membrane contact switch
- Very long service life and reliability with system proven millions of times over
- Service life of the individual key
Standard keys: > 20 million actuations
Special keys: > 5 million actuations
- Reliability (example: Standard keyboard G83-6000):
MCBF 1×10^9 actuations

ATK technology

Key benefits

- Elastomer keys with membrane contact switch
- Multi-haptic technology in CyMotion keyboards
- Very long service life and high reliability
- Service life of the individual key
Standard keys: > 20 million actuations
Special keys: > 5 million actuations
- Reliability (example: CyMotion Master XPress):
MCBF 1×10^9 actuations

SX technology

Key benefits

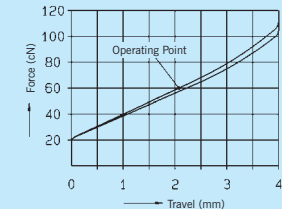

- Individual keys with quadrant modules and membrane contact switches
- Very long service life and high reliability
- Very low construction height
- Service life of the individual key
Standard keys: > 10 million actuations
Special keys: > 1 million actuations
- Reliability (example: CyMotion PRO keyboard):
MTBF > 150,000 hours

LPK technology

Key benefits

- Elastomer keys with membrane contact switch
- Full travel technology proven a million times over
- Flat design by special key shape
- Service life of the individual key
Standard keys: > 10 million actuations
Special keys: > 1 million actuations
- Contrast-rich, abrasion-proof keycap labeling
- Reliability (example: eVolution CONTROL):
MTBF > 150,000 hours

Ultra-flat MultiMedia keyboard with convenient, freely assignable hotkeys

Ergonomic laser mouse for right handers with pleasant soft touch surface and Teflon sliding surfaces

eVolution
MARLIN
Wireless Laser MultiMedia-Desktop

Decoration for your PC

High-end design for people looking for that something special. Extremely flat, stylish and elegant – with minimal key height for added convenience and comfort with standard keyboard layout. Absolutely interference-free radio transmission and ultra-silent handling.

Whether in a sophisticated home office or for an executive secretary – these keyboards allow you to offer exacting customers stylish design and no-compromise technology.

Ultra-flat, modern design with pleasant-to-touch keys

Multiple use + Ergo-laser-mouse

FACTS & FEATURES

- Multiple use – problem-free operation of several desktops due to pre-coding without channel setting required
- Ergo-laser-mouse** for right-handed use with 7 freely programmable keys
 - mouse charging function via USB charger cable – incl. during use. Charging status displayed via illuminated scroll-wheel
 - accurate scanning of the surface for exact positioning of the cursor due to modern laser technology
 - pleasant soft-touch surface and Teflon sliding surfaces
- Latest wireless technology with 2.4 GHz for extremely large range (up to 10 m)
- Tap-proof due to coded data transmission
- Ultra-silent. Whisper keystroke for particularly low-noise use.
- 10 HotKeys. Simple, free allocation of HotKeys thanks to the accompanying KeyM@n Software (also under Linux).
- Ultra-flat, modern design with pleasant-to-touch keys
- Standard keyboard layout (incl. cursor and number block)
- Linux compatible

TECHNICAL SPECIFICATIONS

ERGO-SHARK
Right-hand laser Mouse - corded

Warning - might bite!

With these high-performance mice the benefits are obvious: top ergonomic design and high-precision laser technology for absolutely effective no-compromise working. For right-handed use and also specially for left-handed use. These mice ensure more action at your desk not only due to their dynamic Ergo design. With high-end laser technology and up to 7 buttons they offer pure performance!

Special right hand Ergo Design

FACTS & FEATURES

- Designed for right-handed use
Adapted to suit the requirements of right-handed use
- Charging function of the mouse via USB charger cable - incl. during use. Charging status displayed via illuminated scroll-wheel
- Multiple use - problem-free operation of several mice with no channel setting required
- Exact and rapid positioning of the cursor thanks to modern laser scanning
- Latest wireless technology with 2.4 GHz for extremely large range (up to 10 m)
- High-end Teflon sliding surfaces for easy movement of the mouse
- Soft-touch surface for pleasant handling
- 7 buttons, all freely programmable thanks to easy-to-use KeyM@n-Software
- 4-way scroll function
- Ready for immediate use thanks to pre-charged batteries
- Activator/deactivator switch for transportation purposes

It's a pity to have to let them go again

The days when mice only had to just work are over.

Top precision, clever detail features and maximum reliability are attributes which should be obvious.

When users are clearly delighted by the design and haptic, it must be a real Cherry product – just like

these symmetrical mice from Cherry with an elegant soft touch surface.

Smart card reader, approved for the German health insurance card!

FACTS & FEATURES

- Individual keys with Gold Crosspoint contacts (MX technology)
- Smart card reader approved for use with German health insurance cards and other smart cards
- PC/SC and MKT1.0, serial/PS/2-compatible
- Secure PIN entry (class 2 reader)
- Support of the PC/SC 1.0 standard
- Reading/writing of ISO 7816-compatible smart cards
- Protocols: T=0, T=1, S=8, S=9 and S=10
- ITSEC E2 low-certified
- Fully-compatible with predecessor keyboard G80-1501

TECHNICAL SPECIFICATION

Cable length	approx. 1,75 m
Weight (incl. packaging)	approx. 1600 g
Dimensions	470 x 220 x 64 mm
Current consumption	approx. 100 mA
Read cycles (smart card reader)	approx. 200.000
Manufacturer guarantee	2 years

Compatible with Windows Vista™

SMARTREADER

SR-4044

For more security on the road

FACTS & FEATURES

- PCMCIA smart card reader for notebooks (PC card type II)
- Corresponds to all current standards
- PC/SC smart card reader
- CT-API and OCF support
- EMC 2000 terminal Level 1-approved

TECHNICAL SPECIFICATION

Protocols	T=0, T=1 I²C (S=8) 2-wire SLE4432/42 (S=10) 3-wire SLE4418/28 (S=9)
Smart Card Speed	up to 412.903 bps
Pulse frequency	up to 8 MHz
Interface	PCMCIA with 16 Mbps
Card current	max. 60 mA
Manufacturer guarantee	2 years

Order code	Color	Connection

- G83-14400
- G83-14500

Capacitive fingerprint sensor

PC/SC-smart card reader

Here you have security perfectly in hand.

Forget numeric codes and passwords.

The human fingerprint is unique and thus one of the most secure identification characteristics overall. With this Cherry card reader and biometric keyboard and the Fingertip mouse, you use the most modern biometric technology in order to protect your data against unauthorized access and to distribute access rights purposefully without risk.

Fingerprint biometry for every application

FACTS & FEATURES G83-14200/14300

- USB keyboard with fingerprint sensor and optional PS/SC smart card reader
- Capacitive fingerprint sensor by AuthenTec with True Print® technology
- PC/SC smart card reader CardMan 3121-compatible (only with G83-14200)

FACTS & FEATURES G83-14400/14500

- USB keyboard with fingerprint sensor and optional PS/SC smart card reader
- Capacitive fingerprint sensor TCS1CD by UPEK (ST-Micro) with TouchChip® technology 256 x 360 pixels
- PC/SC smart card reader CardMan 3121-compatible (only with G83-14400)

TECHNICAL SPECIFICATION

You will find applications under www.cherry.de/deutsch/Partner/Partner_Solution.htm

With the right technology, you always have good cards!

When it comes to the secure processing of personal data, there can be no compromises. Precisely for this reason, our engineers have developed these USB keyboards with high-end smart card readers. Strong performance, high reliability, and perfect handling in practice ... With Cherry's globally-unique competence, security can be this easy!

MULTIBOARD G81-7000

MULTIBOARD G81-8000

Programmable magnetic card reader

43 programmable keys

Multifunctional keyboard with integrated magnetic card reader. For commercial use and for all applications that require a versatile, robust keyboard.

FACTS & FEATURES G81-7000/-8000

Available as standard or compact version

- Mechanical individual keys (Cherry FTSC technology)
- Designed for continuous use – more than 50 million presses per key
- Programmable magnetic card reader
- 43 programmable keys
- OPOS and JavaPOS for Windows® and Linux (see page 55)
- Supports client-server architectures
- Efficient configuration with professional "Cherry-Tools" software (see page 54)
- G81-7000 as space-saving variant - only 405 mm wide

PS/2 keyboard

- Integrated memory
- Optional programmable barcode decoder

USB keyboard

- 2 USB downstream ports on the rear right
- USB 2.0

Magnetic card reader

- 2 or 3 track reader
- Freely-programmable header and terminator per track
- Filtering and replacement of magnetic card data (USB keyboard)
- Increased security with programming of expanded hex codes
- Adjustable transmission of the start and end characters (sentinels) (USB keyboards)
- Freely-selectable output sequence of the tracks (USB keyboard)
- Easy handling of the configuration file with Windows® Explorer
- Support of Windows® system functions

TECHNICAL SPECIFICATION

Cable length	approx. 1,75 m
Weight (incl. packaging)	G81-7000: max. 2000 g G81-8000: max. 2300 g
Dimensions	G81-7000: 405 x 220 x 64 mm G81-8000: 470 x 220 x 64 mm
Current consumption	PS/2: typ. 35 mA USB: max. 400 mA
Current output	USB max. 100 mA per downstream port
Magnetic card reader Standards	ISO 7811/-12, AAMVA, Gemini, JIS 1, additional on request
Magnetic head	up to 1.000.000 Read cycles
Read speed	8 – 318 cm/s at 30 Bit/cm 8 – 127 cm/s at 83 Bit/cm
Manufacturer guarantee	2 years

Model with barcode decoder:
Decodable barcodes: Code39, Code93, Code128, Code16k, Plessey, Industrial 2/5, Matrix 2/5, Codabar, Interleaved 2/5, Code11, UPC/EAN/JAN (automatic code recognition)

Interfaces: barcode input: 6-pin DIN 240° plug on the right side and 9-pin SUB-D plug at the right rear (independent of one another)

Compatible with Windows Vista™

MULTIBOARD G81-7040

MULTIBOARD G81-8040

Programmable magnetic card reader

43 programmable keys

With magnetic card and smart card reader

These MultiBoards are especially well-suited for payments with credit and debit cards, network/PC login, digital signatures, and home banking.

For banks, at the point of service, and in customer-specific applications (e.g. payment with system login).

High security standard and maximum flexibility are not exclusive of one another. Individually-programmable readers and keys, various models and many additional features ensure custom-tailored functionality in practice without compromises with respect to security.

Multifunctional USB keyboard with integrated magnetic card reader and EMC 2000-approved smart card reader for use with storage and processor chip cards.

FACTS & FEATURES G81-7040/-8040

Available as standard or compact version

- Mechanical individual keys (Cherry FTSC technology)
- Designed for continuous use – more than 50 million presses per key
- Programmable magnetic card reader
- PC/SC smart card reader with EMV 2000 approval (CCID and ISO 7816-compatible)
- 43 programmable keys
- OPOS and JavaPOS for Windows® and Linux (see Page 55)
- Supports client-server architectures
- Efficient configuration with professional "Cherry-Tools" software (see Page 54)

JAVAPOS™

Compatible with Windows Vista™

MULTIBOARD

G80-8113

High-quality touchpad

Programmable magnetic card reader

59 programmable keys

You can take the term "multifunctional" literally.

For Cherry MultiBoards offer you precisely the right solution for nearly any area of application.

With any quantity of programmable keys, diverse connection and card reader variants, optional

programmable barcode decoder and many other

clever features ... with Cherry you're sure to make

the right choice!

Multifunctional keyboard with integrated touchpad, magnetic card reader and expanded layout!

FACTS & FEATURES

- Individual keys with Gold Crosspoint contacts (Cherry MX technology)
- Designed for continuous use – more than 50 million presses per key
- Integrated touchpad
- Programmable magnetic card reader
- Expanded layout (120/121 keys)
- 59 programmable keys (of these 41 can be inscribed)
- Efficient configuration with professional "Cherry-Tools" software (see Page 54)
- OPOS and JavaPOS for Windows® and Linux (see Page 55)
- Supports client-server architectures

ALPHANUMERIC KEY LAYOUT
SPOS
G86-61411

30% smaller than standard keyboards

Optionally with integrated magnetic card reader

Labelable, exchangeable keys

Keyboard family for point of service

Premium service is where the customer is.

Where things happen. Everything has to be quick

and easy to operate. In trade, hotels, at filling

stations, car rentals, travel offices,

...Our new SPOS family maximizes productivity

and guarantees customer satisfaction. Unlimited

data input even in demanding environments and

confined spaces.

Multifunctional, fully programmable USB keyboards with enhanced Alphanumeric Key Layout. Option for Magnetic Stripe Reader and/or Touchpad.

FACTS & FEATURES

- Full Alphanumeric Layout incl. Numeric Keypad
- Compact – only 360 mm width
- User-friendly unstinted standard 19 mm key spacing
- IP54 rated spill and dust resistant key section
- Fully programmable USB 2.0 keyboard
- 3-Track Magnetic Stripe Reader (optional)
- Touchpad with 2 mouse keys (optional)
- Flexible layout customization with exchangeable relegendable keys
- Comprehensive UPOS support
- Integrated memory
- Cut-out mounting capabilities (circumferential rim)
- Pluggable feet

TECHNICAL SPECIFICATION

Cable length	approx. 1,85 m
Weight (incl. packaging)	approx. 1600 g
Dimensions	360 x 198 x 38 mm
Current consumption	max. 100 mA
Key spacing	Standard 19 mm
Life endurance of single keys	
Standard keys (1x1):	> 25 million presses
Multiwide keys (1x2, 2x1, 2x2):	> 20 million presses
Magnetic card reader	
Standards	ISO 7811/-12, AAAMVA, JIS, additional on request
Read cycles	> 1.000.000
Read speed	6,3 – 250 cm/s for standard 75 to 210 bpi
Manufacturer guarantee	2 years

3-Track Magnetic Stripe Reader (optional)

- Freely programmable Headers and Terminators for each Track
- Adjustable transmission of start/stop characters (sentinels)
- Filtering and exchange of card data
- Enhanced card processing security with selection of non-keyboard hex codes
- Dual insertion and bidirectional swipe of Magnetic Stripe Card
- Audible and visual indication of Magnetic Stripe Card good read
- Free selectable output order of the Tracks
- Data decoding as keyboard scan codes

Programmable & Relegendable Keys

- Additional Accessory Kit available including 1x2, 2x1, 2x2 Multiwide Keys and Blanks for flexible change of layouts
- Customized Key Layouts (on request)
- Unlimited programmability of all Keys up to 3 layers (optional)
- Supports the 'Moving of Modifier Keys'
- Prompt display of Key configuration via hotkey

Professionelle Software

- Programming physically (built-in memory) or via software macros with powerful configuration software 'Cherry Tools'
- Plug 'n' Play configuration
- UPOS support for Windows™ and Linux; Support of Client-Server architectures
- Supports Windows™ system functionalities
- Easy configuration file transfer with Windows™ Explorer
- Remote Network and immediate installation with 'Cherry Tools Runtime' version

Standard keys (1x1):	> 20 million presses
Multiple keys (1x2, 2x1, 2x2):	> 20 million presses
Magnetic card reader Standards	ISO 7811/-12, AAAMVA, JIS, additional on request
Read cycles	> 1,000,000
Read speed	6,3 – 250 cm/s for standard 75 to 210 bpi
Manufacturer guarantee	2 years

3-Track Magnetic Stripe Reader (optional)

- Freely programmable Headers and Terminators for each Track
- Adjustable transmission of start/stop characters (sentinels)
- Filtering and exchange of card data
- Enhanced card processing security with selection of non-keyboard hex codes
- Dual insertion and bidirectional swipe of Magnetic Stripe Card
- Audible and visual indication of Magnetic Stripe Reader good read
- Free selectable output order of the Tracks
- Data decoding as keyboard scan codes

Programmable & Relegendable Keys

- Additional Accessory Kit available including 1x2, 2x1, 2x2 Multiwide Keys and Blanks for flexible change of layouts
- Customized Key Layouts (on request)
- Unlimited programmability of all Keys up to 3 layers (optional)
- Supports 'Moving of Modifier Keys'
- Prompt display of Key configuration via hotkey

Professional Software

- Programming physically (built-in memory) or via software macros with powerful configuration software 'Cherry Tools'
- Plug 'n' Play configuration
- UPOS support for Windows™ and Linux; Support of Client-Server architectures
- Supports Windows™ system functionalities
- Easy configuration file transfer with Windows™ Explorer
- Remote Network and immediate installation with 'Cherry Tools Runtime' version

Brilliantly simple solutions that make your keyboard or mouse much more versatile.

KeyM@n

KeyM@n is high-performance, extensive software. It allows you to freely program the additional keys on the keyboard and mouse. You can assign these links, programs, system functions, and even any text you wish. Thus you are in a position to call up frequently-used functions with the touch of a button.

KeyM@n for Windows®

Current software Version 3.0
Operating systems: Windows 2000, Windows XP, 2003 Server
Languages: English, German, French, Spanish, Italian

KeyM@n for Linux

Current software Version 1.0
Operating systems: SuSE Linux 9.1 und 10.0, Mandrake 10.1, Debian 3.1, Fedora 4.0
Desktop environment: KDE or Gnome (depending on distribution)
Distribution in source code under the GNU General Public License
Languages: English, German, French

Software updates

The current version of our software is available for free downloading at <http://support.cherry.de>.

Protector Suite™ QL

The Protector Suite™ QL is a security software for notebooks and desktop computers. The user can manage the Logon operating system securely. He can also replace passwords on Web sites with fingerprint and save confidential information in encrypted form. An intuitive user guidance minimizes the support costs and promotes user acceptance.

Secure Password bank – “learns and saves” passwords for single sign-on (SSO) to Web sites and Windows® applications.

MySafe – enables the authorized fingerprint users to make files and folders with confidential information accessible by drag&drop or direct saving in the coded private folder MySafe.

Protector Suite QL is only suitable for Windows 2000 and Windows XP. Windows Vista is not supported.

Cherry Tools

Configuration and Driver Software

With the Cherry Tools you can edit the configuration of your keyboard, the keys, the magnetic card and barcode readers. The settings can be saved as a file, whereby the keyboard does not absolutely have to be connected to the computer.

Functions:

- Configuration of the keyboard and integrated devices (magnetic card readers, barcode readers)
- Programming of keys or function keys
- Update of the keyboard firmware.
- Operation of the magnetic card reader by MultiBoard USB keyboards.

Supported keyboards:

- MultiBoard (series G8x-7xxx and G8x-8xxx)
- Keypad G84-4700

Can be used under MS Windows® 98 SE, ME, 2000, XP

Cherry Tools Runtime

Configuration and Driver Software without User Interface

Cherry Tools Runtime ports existing configuration files to other computers. It supports software (virtual) programming. If you change to another computer with your keyboard, with a virtually-programmed keyboard, the configuration remains on the original computer. The Cherry Tools Runtime Setup installs your configuration and all necessary drivers on the target computer. It does not install a user interface (GUI - Graphical User Interface) and cannot change any configurations.

Functions:

- Installs configuration files when changing to another computer (only virtual programming)
- Operation of the magnetic card reader by MultiBoard USB keyboards.

Can be used under MS Windows® 98 SE, ME, 2000, XP

Cherry OPOS Support

OPOS (OLE for POS) allows the easy integration of various point of sale (POS) hardware into corresponding applications. Win32 components according to UnifiedPOS specification V1.8.

Content: Service objects and demo applications

Device classes:

- Magnetic Stripe Reader
- Keyboard
- Barcode-Scanner
- Keypad

Setup variants:

Local Edition: For installation on standalone systems under the operating systems MS Windows® 98, ME, NT4 SP6, 2000, XP, XP embedded (no client/server support)

Client Edition: For installation on clients under the operating systems Windows 2000, XP, XP embedded (supports Citrix Metaframe and MS Windows Terminal Server)

Server Edition: For installation on servers under the operating systems Windows 2000 Server, 2003 Server (supports Citrix Metaframe and MS Windows Terminal Server)

OPOS-capable Cherry keyboards:

MultiBoard (series G8x-7xxx and G8x-8xxx)

Can be used under MS Windows® 98, ME, NT4 SP6, 2000, XP, XP embedded.

JavaPOS support for Windows®

JavaPOS (Java for POS) allows the easy integration of various point of sale (POS) hardware into corresponding applications. Components according to UnifiedPOS specification V1.8

Content: Service objects and demo applications

Device classes:

- Magnetic Stripe Reader
- Keyboard
- Keypad

Setup variants:

Local Edition: For installation on standalone systems under the operating systems MS Windows® 98, ME, NT4 SP6, 2000, XP, XP embedded (no client/server support)

Client Edition: For installation on clients under the operating systems Windows 2000, XP, XP embedded (supports Citrix Metaframe and MS Windows Terminal Server)

Server Edition: For installation on servers under the operating systems Windows 2000 Server, 2003 Server (supports Citrix Metaframe and MS Windows Terminal Server)

JavaPOS-capable Cherry keyboards:

MultiBoard (series G8x-7xxx and G8x-8xxx)

Runs with IBM JRE V1.3 and SUN JRE V1.4.

JavaPOS support for Linux

JavaPOS (Java for POS) allows the easy integration of various point of sale (POS) hardware into corresponding applications. Components according to UnifiedPOS specification V1.8

Content: The package contains service objects and the corresponding kernel modules

Device classes:

- Magnetic Stripe Reader
- Keyboard
- Keypad

JavaPOS-compatible Cherry keyboards:

MultiBoard (series G8x-7xxx and G8x-8xxx)

Can be used under SUSE Linux V8.1 – 9.2 / kernel 2.4 and 2.6
Runnable with IBM JRE V1.3 and SUN JRE V1.4

MultiBoard USB magnetic card reader Support for Linux

Content: The package contains a USB kernel module

Functions:

Header and terminator configuration per spur
Activation / Deactivation of spurs
Activation / Deactivation of sentinels

Applicable for Cherry keyboards:

MultiBoard USB (series G8x-7xxx and G8x-8xxx)

Can be used under SUSE Linux V9.0 – 9.2 / kernel 2.4 and 2.6
