SPACE TO THINK

FOR EVERYONE ON THE NETWORK.

Ready to go in any demanding environment, this new generation A4 workgroup printer provides speed with flexible paper handling. A space saving internal duplex unit and network connectivity are standard. Low noise, compact design and cost-effective ECOSYS technology give everyone on a busy network the space to think.

- 35 pages per minute with 1,200 dpi
- 64MB memory standard, upgradeable to 576MB
- PDF direct printing from USB Flash Memory devices
- · Eco-friendly, ozone-free technology
- · Long-life components and easy maintenance

For increased productivity add up to 3 extra 500-sheet universal paper trays and save time refilling paper.

Includes KM-NET utilities, Kyocera's comprehensive print system monitoring tools for both clients and administrators.

FS-3900DN

A4 MONOCHROME WORKGROUP PRINTER

ECOSYS devices are designed to minimise both direct costs

and indirect costs, such as maintenance, administration and consumables. The cartridge-free system requires only the toner to be replaced. The modular design concept allows you to add workflow-enhancing functions and a wide variety of paper handling capabilities as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

System platform:

The FS-3900DN offers USB, parallel and network connectivity as standard and delivers problem-free system administration. Kyocera's single platform technology means that the same driver can be used for every Kyocera PCL/PostScript print device on the network; from single-user desktop printers to high-end multifunctional systems. Only Kyocera offers this effortless combination of IT sophistication and high-performance paper handling expertise.

With the Kyocera page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (even multipart forms) can be created independently of the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

KM-NET for Client/KM-NET Viewer:

The settings of all printers on the network can be checked visually and amended from any Windows® PC. KM-NET for Client enables easy setup and monitoring of the printer status via parallel, USB or network connection. KM-NET Viewer is an advanced printer management software tool using the standardised protocol SNMP.
