ECONOMIC INTEGRATION IN LATIN AMERICA:
AN ANNOTATED BIBLIOGRAPHY, 1959-1969

Note: In most instances when publications are included without an annotation, the volume was not available for evaluation during the preparation of the bibliography.

General

"Adios" to Latin tariff barriers. Business week, June 9, 1962: 78-80.
Two free trade blocks south of the border seek to encourage industrial and economic growth among members, and to open the way to a vast home market.

After the "Summit" - Latin America now ready to get moving? U.S. news & world report, v. 62, April 24, 1967. 52-54, 57.

Alexander, Robert J. Economic union and political reunion in Latin America. Inter-American economic affairs, v. 21, spring 1968: 19-33.
The author believes Latin American unity is unlikely and concentration on it is undesirable.

Baranson, Jack. Integrated automobiles for Latin America? Finance and development, v. 5, December 1968: 25-29.
"This article attempts to evaluate the obstacles that stand in the way of economic integration of the automobile industry under the Montevideo Treaty governing the Latin American Free Trade Association."

(Arnold Foundation. Monographs 17).

Committee for Economic Development. Regional integration and the trade of Latin America. [New York] 1968. 104 p. (Its Supplementary paper, no. 22)

Analysis of problems of integration largely from the standpoint of their effect on foreign trade. Good statistics.

A common market for Latin America? U.S. news & world report, v. 58, May 3, 1965: 93-94.

"Plans are taking shape for a new common market, this time in Latin America.

The idea: to cut and eventually remove tariffs within the area, set common tariffs on imports from outside, promote new industries, new markets."

Dell, Sidney. A Latin American common market? London, Oxford University Press, 1966. 336 p.

In describing various schemes for economic integration, Dell points out that they cannot compensate for political and social problems, but can increase the power of economic forces for development. Appendices include charts and texts of the main treaties and other documents relating to integration.

Thoughtful analysis of the possibilities and the problems of economic integration in Latin America.

Griffin, Keith B. The potential benefits of Latin American integration. Inter-American economic affairs, v. 17, Spring 1964: 3-20.
Although there are certain obstacles the author believes that the potential gains are worth the effort involved.

Griffin, Keith and Ricardo French-Davis. Customs unions and Latin-American integration. Journal of Common Market studies, v. 4, October 1965: 1-21.

"The essay is divided into four parts. Part I consists of a short section describing optimum and sub-optimum conditions and the relationship of the theory of the 'second-best' to the theory of customs unions. In Part II we consider the theoretical sources of an increase in economic welfare resulting from the creation of various types of integration. Both once-for-all and continuous gains are treated. Part III is devoted to a discussion of the problem of dynamic adjustment and the policy steps necessary to prevent each of the member nations from experiencing a decline in welfare. Thus the focus is on the distribution of the benefits of integration. In the final section, Part IV, we discuss the applicability of the theory to the Latin American case."

Haas, Ernst B., and Philippe C. Schmitter. Economics and differential patterns of political integration: projections about unity in Latin America. International organization, v. 18, Autumn 1964: 705-737.

"Does the economic integration of a group of nations automatically trigger political unity? Must economic unions be perceived as 'successful' in order to lead to political unification?..."

Kung, S. W. South and Central America-perspective and problems. Commercial and financial chronicle, v. 200, December 31, 1964: 3 (2507), 20-22 (2524-26).

"Dr. Kung recently completed an on-the-spot assessment of the principal South and Central American economies. His survey reports on steady economic and social progress made, trade and investment opportunities ignored by American businessmen but not by Japanese and Republic of China businessmen, the real problems that must still be solved even when primary producing countries' terms of trade are corrected, and the problems facing the Latin American Free Trade Assn. and the Central American Common Market. He also digests the achievements and problems of the individual countries South of our border, and stresses what must be done if they are to edge closer to a modern society even when growing at the rate the Alliance for Progress favors."

Lagos, Gustavo. The political role of regional economic organizations in Latin America. Journal of Common Market studies, v. 6, June 1968: 291-309.

The author attempts to analyze some aspects of the political role played by regional economic organizations.

"In the following pages, an attempt will therefore be made to provide a brief historical sketch, structured along somewhat arbitrarily divided periods, of the factors affecting Latin America's imminent and momentous decision, and to extrapolate its consequences."

Latin American integration. World business, No. 6, May 1967: 10-11.

To become a common market, Latin American nations must overcome formidable obstacles. A brief summary of some stumbling blocks.

Latins try togetherness. Business week, no. 1963, April 15, 1967: 104-105, 108, 110, 115-118, 120, 122, 125-126, 128.

"The republics south of the border face huge economic problems brought on by poverty, inflation, and payments imbalance. Many of their leaders see economic integration--formation of a Latin American Common Market--as their best hope for internal stability and protection of their industries."

Lens, Sidney. Uncommon common market. Commonweal, v. 86, June 23, 1967: 387-389.

Lens believes that the common market movement for Latin America is a "thin disguise for a foreign industrial invasion."

Lower, Milton D., Raymond R. Hannigan and Rudolf K. Jansen. Some aspects of Latin-American trade policies: three essays. Austin, University of Texas, 1964.

Contains three thoughtful studies: "Economic integration in Latin America: a dynamic assessment"; "Influence of Latin American trade policy on U.S. agricultural exports"; and "sino-Soviet trade with Latin America".

Lukes, Frank. Basic legal research and sources on the Latin American economic integration. Law library journal, v. 58, August 1965: 270-287.

Navarrete, Jorge E. Latin American economic integration - a survey of recent literature. Journal of Common Market studies, v. 4, December 1965: 168-177.

"The purpose of this brief article is to present a general survey of this literature, not listing everything published, but rather selecting only the most significant or representative contributions to the subject." Bibliography: pp. 175-177.

Mitchell, Christopher. Common Market: the future of a commitment: Punta del Este and after. Inter-American economic affairs, v. 21, Winter 1967: 73-87.

The author has "attempted to sketch some of the problems and prospects which lie ahead for the Latin American Common Market".

Mikesell, Raymond F. The movement toward regional trading groups in Latin America in Albert O. Hirschman. Latin American Issues: essays and comments. New York, Twentieth Century Fund, 1961: 125-151.

Concerned largely with Latin American Free Trade Area, but some attention is given to Central America.

Odell, Peter R. Economic integration and spatial patterns of economic development in Latin America. Journal of Common Market studies, v. 6, March 1968: 267-286.

Moves toward Latin American economic integration have possible adverse consequences. There is a tendency, which has been overlooked by most economists, for the main effects of integration to appear only in many spatial areas rather than in the whole country. Author analyzes this problem.

Perloff, Harvey S. Regional economic integration in the development of Latin America; reference document. Washington, Pan American Union, 1963. 39 p.

The authors believe that the rapid economic development of Latin America is contingent upon economic integration.

"The 'integrated industries' scheme has three objectives. The first and principal objective is to encourage or induce the establishment or expansion of industries which require (or are believed to require) immediate free access 'to the entire Central American market [and other benefits and protections] in order to operate under reasonably economic and competitive conditions even at minimum capacity.' The second objective of the scheme is to promote a 'rational' use of development resources.. The third objective is to ensure that industrial development is distributed to some degree throughout the region."
