

MONARCH JOINT VENTURE

Partnering across the U.S. to conserve the monarch migration

www.monarchjointventure.org

The Monarch Joint Venture is a partnership of federal and state agencies, non-governmental organizations, and academic programs that are working together to protect the monarch migration across the lower 48 United States.

MISSION

Recognizing that North American monarch (*Danaus plexippus*) conservation is a responsibility of Mexico, Canada and the U.S., as identified in the North American Monarch Conservation Plan, this Joint Venture will coordinate efforts throughout the U.S. to conserve and protect monarch populations and their migratory phenomena by developing and implementing science-based habitat conservation and restoration measures in collaboration with multiple stakeholders.

Our mission will be achieved by coordinating and facilitating partnerships and communications in the U.S. and North America to deliver a combination of habitat conservation, education, and research and monitoring.

VISION

The vision of this Joint Venture is abundant monarch populations to sustain the monarch migratory phenomena into perpetuity, and more broadly to promote monarchs as a flagship species whose conservation will sustain habitats for pollinators and other plants and animals.

Plant Milkweed for Monarchs

Monarchs cannot survive without milkweed. Monarch caterpillars need milkweed plants (*Asclepias* spp.) to grow and develop, and female monarch butterflies only lay their eggs on milkweed. With shifting land management practices, we have lost much milkweed from the landscape. Please plant milkweed to support monarch populations, and their incredible migration! Planting milkweed is a great way to help other pollinators too, as milkweed provides nectar resources to a diverse suite of bees and butterflies.

Dave Wendelken

Northeast Region Milkweed Species

Common Milkweed
Asclepias syriaca
Well drained soils.
Photo by Louis-M. Landry

Swamp Milkweed
Asclepias incarnata
Damp, marshy areas.
Photo by Janet Allen

Butterfly Weed
Asclepias tuberosa
Well drained soils.
Photo by Thomas Muller, Lady Bird Johnson Wildflower Center

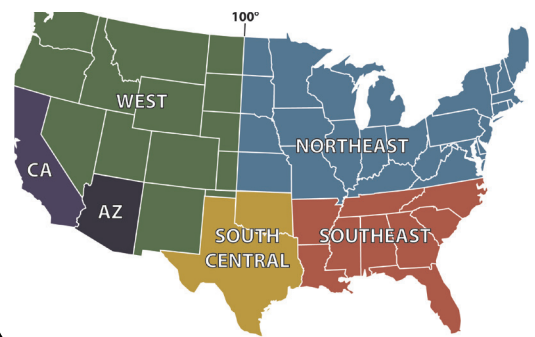

Whorled Milkweed
Asclepias verticillata
Prairies and open areas.
Photo © Kim Davis & Mike Stangeland

Poke Milkweed
Asclepias exaltata
Woodland areas (except in NE, KS, MO, ND & SD).
Photo by David Smith

Milkweed Regions

There are many native milkweed species in each of the six "Milkweed Regions" shown on this map. The species highlighted are known to be used by monarchs, and are easy to establish. Please try to find plants grown as close as possible to where you'll be planting them, and from the closest possible seed source.

Note: Although commercial availability is limited, *A. purpurascens* and *A. sullivantii* are also recommended in the Northeast region.

South Central Region Milkweed Species

Green Antelopehorn Milkweed
Asclepias viridis
Dry areas and prairies. Also known as green milkweed.
Photo by Harlen Aschen

Antelopehorns Milkweed
Asclepias asperula
Desert and sandy areas.
Photo by Kip Kiphart

Zizotes Milkweed
Asclepias oenotheroides
Sandy/rocky prairies and fields.
Photo by Jennifer Kleinrichert

Southeast Region Milkweed Species

Butterfly Weed
Asclepias tuberosa
Well drained soils.

Photo by Thomas Muller, Lady Bird Johnson Wildflower Center

Whorled Milkweed
Asclepias verticillata
Prairies and open areas.

Photo © Kim Davis & Mike Stangeland

White Milkweed
Asclepias variegata
Thickets and Woodlands.

Photo by Melton Wiggins

Aquatic Milkweed
Asclepias perennis
Hydrated soils.

Photo © Kim Davis & Mike Stangeland

Sandhill/Pinewoods Milkweed
Asclepias humistrata
For use in some regions of FL. Dry sandy areas and soils.

Photo © Kim Davis and Mike Stangeland

Note: *Asclepias syriaca* and *Asclepias incarnata* are native to parts of this region and may also be suitable species to plant. More details on the native range of each species can be found at: <http://bonap.net/NAPA/TaxonMaps/Genus/County/Asclepias>

Western Region Milkweed Species

NOTE: Excludes Arizona; see below for Arizona milkweed.

Mexican Whorled Milkweed
Asclepias fascicularis
Dry climates and plains, except in CO, UT, NM & AZ.

Photo by Christopher Christie

Showy Milkweed
Asclepias speciosa
Savannahs and prairies.

Selecting and Finding Milkweed Plants

While any of the species listed here can be grown in garden settings, please use species that are native to your county for larger restoration projects. You can find more information about milkweed, together with a directory of native plant vendors that sell milkweed plants and seeds, on our website:

www.plantmilkweed.org

Arizona Milkweed Species

Butterfly Weed
Asclepias tuberosa
Well drained soils.

Photo by Gail Morris

Antelopehorns Milkweed
Asclepias asperula
Desert and sandy areas.

Photo by Kip Kiphart

Rush Milkweed
Asclepias subulata
Desert areas.

Photo by Gail Morris

Arizona Milkweed
Asclepias angustifolia
Riparian areas and canyons.

Photo by Morris Family

California Milkweed Species

Mexican Whorled Milkweed
Asclepias fascicularis
Dry climates and plains.

Photo by Christopher Christie

Showy Milkweed
Asclepias speciosa
Savannahs and prairies.

Photo by Robert Potts © California Academy of Sciences

Desert Milkweed
Asclepias erosa
Desert regions.

Photo by Christopher Christie

California Milkweed
Asclepias californica
Grassy areas.

Photo by Christopher Christie

Heartleaf Milkweed
Asclepias cordifolia
Rocky slopes.

Photo by Dee E. Warenaicia

Woolly Milkweed
Asclepias vestita
Dry deserts and plains.

Photo © 2010 Neal Kramer

Woolly Pod Milkweed
Asclepias eriocarpa
Clay soils and dry areas.
