IOMEGA REV FAMILY
REMOVABLE DISK STORAGE PRODUCTS

REV is a reliable, durable and high-performing removable disk solution that provides limitless storage for:

» Backing up and restoring critical data

» Archiving and transporting data for off-site security

» Daily backup rotations using multiple removable disks

▶ **NEW!** Iomega REV 120GB capacity

Built to be as tough as your business, Iomega REV Backup drives are a big solution for small businesses looking to replace cumbersome tape solutions, stationary external hard drives, or fragile CD or DVDs.

The Iomega REV family of products offers removable hard disk solutions to fit a variety of requirements:

▶ Desktop, Servers, Automation, REV Built-in

▶ Available in 120GB, 70GB, and 35GB capacities

Iomega® REV® Desktop Solutions with 120GB, 70GB or 35GB per Disk

Iomega® REV® Backup drives and removable disks provide a reliable, easy-to-use backup and disaster recovery solution to safely secure critical data. The award winning Iomega REV family of products is available in 120GB (240GB compressed**), 70GB (140GB compressed**), and 35GB (70GB compressed**) capacities per disk. REV technology offers the ease of use, reliability and value you've come to expect from Iomega. REV products have the right capacity and features to meet the specific storage needs of small or medium sized businesses. Plus...Iomega REV removable hard disk solutions include industry leading and award winning backup and disaster recovery software and are also compatible with other major 3rd party backup software programs such as those from Symantec® (Veritas™), CA™, Yosemite Technologies™, EMC®, etc..

How REV technology stacks up to the competition

When it comes to transferring, backing up and archiving data, REV is not only a proven technology, it's a complete backup solution.

▶ **Safer, smarter, better than tape** At 8 times faster and at 1/2 the price*; simple & easy to use with drag-and-drop file retrieval, just like a hard drive; saves time and money with no maintenance or cleaning required.

▶ **More flexible than hard drive solutions** Endless expandability with removable disks, perfect for file cataloging and setting up a backup rotation schedule; protects unauthorized data access with password protected media.

▶ **More reliable than optical backup** Offers high-capacity, limitless storage (one 120GB REV disk is equivalent to 170 CDs) with super-durable, scratch-proof, removable disks; Transfers data faster and more reliably than any DVD or CD.

▶ **Compatible with today's most renowned backup sofwares** from Symantec/Veritas, CA, TapeWare, EMC, etc..

Iomega REV Server Solutions

Iomega's professional-level **REV Server Backup Kits**, includes everything needed to create a backup rotation schedule and keep critical data safe and secure while providing great value!

▶ REV USB 2.0, ATAPI or SATA Server Backup Kit with five disks and CA BrightStor ARCserve (single server) Backup software with Disaster Recovery Option

▶ REV SBS Data Protection Solution including 2 REV disks and CA BrightStor ARCserve Backup for Small Business Server (premium edition), SQL & Exchange Agents, 5 licenses of BrightStor ARCserve Backup for Laptops and Desktops and 5 licenses of eTrust Antivirus.

And now you can get an Iomega **StorCenter™ Pro NAS 250d server with REV built-in**. Simply store your data on the server or archive your files off-site on the REV disks. It's the most affordable method of achieving backup, restore and archiving through a single hardware appliance.

Iomega REV Server Automation Solutions

Iomega REV features a multi-disk REV product specifically designed for server backup and rotation.

The Iomega **REV Loader 560GB** incorporates all the advantages of REV 70 technology into this unique automation solution. This product is perfect for small or medium

business with maximum data intensive projects that require backup and protection. With the lowest overall cost per GB in the autoloader category amongst major brands and a USB 2.0 interface, this Loader offers the highest performance REV technology available plus durability and random data access. Iomega REV Loader 560 holds up to 560GB native capacity or 1.12TB with 2:1 compression utilizing the full 8 REV disks for backing up or archiving.
