Subject: Public Comment on February 2023 Agenda Item Wednesday 11a - City of Malibu LCP Amendment No. LCP-4-MAL-21-0073-2 (Sea View Hotel Project)

To whom it may concern:

Please find attached a letter submitted in connection with the February 8, 2023 meeting of the California Coastal Commission, Agenda Item 11.A (Sea View Hotel). We respectfully request that this letter be distributed to the Members of the Commission and be made part of the record for the February 8, 2023 meeting.

Thank you,
Brittani Jackson

Re: February 8, 2023 Meeting of the California Coastal Commission - Agenda Item 11.A. – Sea View Hotel Project

Dear Chair Brownsey and Members of the California Coastal Commission:

This firm represents Mani Brothers Real Estate Group, Mani MBI (DE), LLC, and affiliated companies that own properties in the vicinity of the proposed Sea View Hotel, including the Malibu Beach Inn, located at 22878 PCH; the former Hertz lot at 22853 PCH; and the multifamily properties at 22640 and 22648 PCH, which are located approximately 500 feet from the proposed Sea View Hotel (collectively, the “Mani Brothers”).

The Mani Brothers oppose the Sea View Hotel, and respectfully request that the Commission deny certification of the City of Malibu (“City”) Local Coastal Program (“LCP”) amendment being sought in connection with Agenda Item 11.A. at the February 8, 2023 meeting. The Commission should not certify the LCP amendment because it is not consistent with Coastal Act policy and because it violates CEQA.

1. The Proposed LCP Amendment is Not Consistent with Coastal Act Policies

The Seaview hotel project is an egregious example of excessive fiscalization of land use whereby an applicant and the City throw orderly coastal planning out the window to approve a pet project for financial gain, including millions of dollars in potential hotel tax revenue.

For the last 20 years, since the Commission first certified the City of Malibu LCP, the maximum Floor to Area Ratio (“FAR”) allowed for commercial development has been 0.15.¹ With a development agreement and the provision of “significant public benefits,” the FAR can be increased to a maximum of 0.20 or 0.25, depending on the zone. (LUP, Ch. 5.C.2.)

The Seaview Hotel project **blows these longstanding development limits out of the water** with a 0.52 FAR – **more than double the density allowed anywhere in the City.**² Rather than abide by the

¹ A slightly higher .20 FAR is allowed in the Civic Center “Town Center”. (LIP 3.4.3.)

² The City has previously attempted to downplay the magnitude of the 0.52 project FAR by pointing out the 26,734-square foot hotel incorporates an existing commercial building, comprising 15,392 square feet that

HUESTON HENNIGAN LLP

existing rules, the applicant and City simply adopted a whole new set of rules that apply only to this 1.21-acre site. These rules are inconsistent with the City of Malibu's LCP.

One of the fundamental policies of the Coastal Act is to “[a]ssure orderly, balanced utilization and conservation of coastal zone resources.” (Section 30001.5(b).) This policy requires considered and comprehensively planned patterns of development – not *ad hoc* development where each parcel is treated as an island of its own, with development approvals subject to whatever political winds prevail at a particular moment. California courts have held that adopting special zoning rules for a small parcel of property is unlawful *spot zoning*: “the creation of an island of property with less restrictive zoning in the middle of properties with more restrictive zoning is spot zoning.” (Foothill Communities Coalition v. County of Orange (2014) 222 Cal. App. 4th 1302, 1314.)

In a case involving a similarly narrow proposed amendment to the City of Malibu LCP, an applicant requested a unique zoning designation allowing lot widths of 50 feet rather than the minimum required 80 feet. (Ross v. California Coastal Commission (2011) 199 Cal.App.4th 900). Similar to here, the original proposal only modified the applicant's 2.08-acre property. After allegations of spot zoning, however, the proposal was modified to encompass the entire zone of 733 lots, and the Court of Appeal thereafter upheld the LCP amendment. (Id. at 909-910, 946.)

In contrast to the lot width reduction in Ross, the FAR increase approved by the City for the Seaview Hotel is applicable to only two lots totaling 1.21 acres. The City has overstepped its authority under the LCP and Coastal Act by allowing a project multiple times larger and denser than the LCP and zoning allow in the rest of the City. By granting a huge FAR bonus to the Seaview project (more than three times the standard limit and twice the maximum authorized with community benefits), the City will have either opened the floodgates to massive development across the City (if it gives others the same opportunity) or improperly singled out only one favored developer for special treatment (if it denies the same privilege to others). The Commission should not allow this to proceed.

Your staff report does not address the spot zoning implicated by the amendment, which we raised in our correspondence dated August 19, 2021 during the City hearing process. It is unclear whether you have received our prior correspondence since it was not included in the materials linked on the online Commission agenda. In any event, we have attached the correspondence to this letter. See Exhibit A. In addition to the spot zoning issues, the proposed project violates several policies of the City of Malibu's General Plan Land Use Element, as laid out in more detail in my August 19, 2021 letter.

In recommending certification, the staff report focuses heavily on the negotiated \$800,000 in-lieu fee for affordable coastal accommodations. But the Commission is not a fundraising organization. Rather, the Commission's mission is to “protect[] and enhanc[e] California's coast and ocean...through careful planning and regulation of environmentally-sustainable development, rigorous use of science, strong public participation, education ,and effective intergovernmental coordination.” (California Coastal Commission website, coastal.ca.gov). If the City and Commission wish to abandon the limited-growth LCP land use regime that has been in place for decades and throw the doors open for much greater intensity of development in the City of Malibu, that should be considered in the context of a City-wide visioning and

is already non-conforming. But any grandfathering of the existing office building is forfeited by the change of use and major expansion and modification. (See, e.g. LIP Section 13.5 – Nonconforming Use or Structures.)

HUESTON HENNIGAN LLP

planning process with an EIR and full understanding of the long-term cumulative impacts on traffic, water quality, ESHA, scenic views, and other key features – not on a myopic piecemeal basis as this LCP amendment exemplifies.

2. The Commission Staff Report Fails to Demonstrate CEQA Compliance

As your staff correctly observes on page 33 of the staff report, the “Commission is required, in approving an LCP submittal, to find that the approval of the proposed LCP, as amended, does conform with CEQA provisions, including the requirement in CEQA section 21080.5(d)(2)(A) that the amended LCP will not be approved or adopted as proposed if there are feasible alternatives or feasible mitigation measures available which would substantially lessen any significant adverse impact which the activity may have on the environment.”

However, your staff report fails to make any reasonable attempt to satisfy these requirements. Instead, the two-paragraph CEQA discussion on page 34 of the report offers nothing but bare and unsupported conclusory statements. The initial study/MND prepared for the City is not attached or summarized for the benefit of the Commission, and there is no discussion of feasible project alternatives such as a smaller project conforming to the FAR limits of the existing LCP. There is no discussion of the environmental impacts of the campground project in Ramirez Canyon that would be funded by the \$800,000 in-lieu payment, and most significantly no discussion of the explosive growth that would be likely to occur citywide if other projects are allowed to effectively “buy their way in” to multiples of otherwise permitted densities.

These mandatory CEQA considerations must be weighed by the Commission and deliberated at the public hearing based on evidence in the hearing record. Accordingly, any certification decision should be postponed to a future date after the Commission and general public have been provided with adequate environmental analysis and a proper record on which the CEQA determinations can be made.

* * * * *

In conclusion, you should refuse to certify the requested LCP amendment for all the foregoing reasons, along with the many other grounds for denial raised in my August 2021 letter.

Sincerely,

Marshall A. Camp

VIA E-MAIL

Hon. Paul Grisanti, Mayor
Members of the City Council
City of Malibu
23825 Stuart Ranch Road
Malibu, California 90265-4861

Re: August 19, 2021 City Council Meeting - Agenda Item 1.A. – Sea View Hotel

Dear Mayor Grisanti and Members of the City Council:

This firm represents Mani Brothers Real Estate and affiliated companies that own properties in the vicinity of the proposed Sea View Hotel, including the Malibu Beach Inn, located at 22878 PCH; the former Hertz lot at 22853 PCH; and the multifamily properties at 22640 and 22648 PCH, which are located approximately 500 feet from the proposed Sea View Hotel (collectively, the “Mani Brothers”).

The Mani Brothers oppose the Sea View Hotel, including the entitlements and approvals sought in connection with Agenda Item 1.A. at tonight’s City Council meeting.

Developers know Malibu as a difficult place to build, and hotels are usually no exception. My clients’ six-year effort to secure City approval for a swimming pool at the Malibu Beach Inn is but one example. Another developer spent over a decade trying to build a resort hotel on 30 acres next to Pepperdine University, only to abandon the effort in the face of sustained resistance and instead develop a cemetery on the site. That hotel project literally ended up in the graveyard.¹

All of which makes it so peculiar that staff and the Planning Commission are recommending approval of the ill-conceived Sea View Hotel proposal, a project which by the applicant’s own admission:

- violates the General Plan designation of the site for community commercial use;
- violates the zoning, which designates the site for community commercial use;
- violates the Local Coastal Plan, which prohibits hotels and motels on this site;
- is inconsistent with height, stories and development standards, overloading the site with more than twice the height and three times the FAR permitted by code (0.52 proposed vs.

¹ See “Hotel Plan Killed, Cemetery Proposal Comes to Life” (The Malibu Times, Sept. 18, 2014), *available online at* https://www.malibutimes.com/news/article_d7fdf70a-3e9a-11e4-ad69-33738f0ce53b.html.

HUESTON HENNIGAN LLP

0.15 allowed), while providing less than a quarter of the parking required by code (86 spaces provided vs. 357 spaces required);

- fails to provide the setbacks, open space and landscaping required by code; and
- includes so many variances and deviations from code that it requires the creation of a special zone (“Seaview Hotel Overlay Zone”) just for this property, to avoid all the rules that would otherwise cause planning staff to immediately toss this application into the recycling bin.

Regardless of any benefits the project might provide in terms of architectural flair and deluxe visitor accommodations, the project must be judged on the basis of its consistency with the City’s adopted plans and policies, which are designed to create cohesive and coordinated development of a scale appropriate to Malibu’s character as a primarily residential community with a rural character. While some higher intensity uses were allowed by the County of L.A. prior to the City’s incorporation, the City’s plans and policies clearly mandate that commercial development should be small in scale in keeping with the City’s rural character.

1. General Plan Inconsistencies. For example, the proposed project clearly violates the following policies of the City of Malibu General Plan Land Use Element:

a. Section 1.1 in the Introduction to the Land Use Element states: “Malibu has remained a primarily residential community. Commercial areas are limited to small neighborhood serving and visitor serving uses interspersed throughout the City” By contrast, the proposed project would be the second largest hotel in Malibu, and with Nobu and Soho House directly across the highway, would magnify what is already the City’s largest, most congested and dangerous (to pedestrians and motorists) cluster of bars and restaurants in the entire City.

b. LU Implementation Measure 67 requires a commercial planned development permit for any commercial development or change of use of existing development to assure compliance with current codes. The applicant here has not sought a planned development permit and the project does not comply with current codes (FAR, setbacks, parking, height, etc.).

c. Section 1.5.4 states that the CV designation proposed for this site provides for uses which serve visitors and residents, such as hotels and restaurants “which respect the rural character and natural environmental setting. Floor-to-Area Ratio (FAR) shall range from a maximum of 0.15 to 0.25 [with development agreement incentives].” By contrast, this project proposes an FAR of 0.52 – three times the 0.15 FAR normally allowed, and twice the maximum 0.25 available with a development agreement.

The applicant’s proposed General Plan Amendment (Exhibit 2 to the Agenda Report) purports to change the designation of the property to “CV” and to change the density limit – for this property only – to 0.52. This kind of land use planning by “special exception” is an unlawful and egregious example of spot zoning and developer favoritism. No sound planning justification has been articulated for providing this particular 1.19 acre plot – out of all 12,800 acres comprising the City of Malibu – with the privilege of developing at more than twice the density allowed on all other property in the City. Moreover, even if the amendment were legally valid, it does nothing to change the other General Plan policies that require small, dispersed commercial and visitor-serving uses that conform to current codes.

HUESTON HENNIGAN LLP

2. Inconsistencies with the LCP and Zoning Code. As noted above, the project violates so many provisions of the LCP and Zoning Code (FAR, height, setbacks, open space, landscaping, parking standards, retaining wall height, etc.) that it needs a new zoning classification, the Sea View Hotel overlay, and revisions to the General Plan, LCP and Zoning Code, for it to be approved. Most of these inconsistencies are openly identified and admitted by planning staff in the 48-page agenda report for this item. But a few of these inconsistencies deserve special note, including some that are misleadingly described or omitted altogether from the report:

a. No Vested Rights. This is not a vested rights project. While the agenda report notes in several places that the existing office building on the rear parcel is “legal non-conforming,” that is very different from saying that the **proposed project** is legal non-conforming. Yet the applicant and even the agenda report attempt to blur this important distinction. For example, the agenda report states on page 28: “Implementation of the project would have similar impacts as the 0.15 project [i.e. a smaller project that meets the 0.15 FAR standard] because the existing commercial building is legal, non-conforming, and no significant, unavoidable impacts would result from the proposed project, including aesthetics, noise, and traffic impacts.”

Where a project involves a limited remodel or maintenance of an existing legal non-conforming structure, it may in some cases enjoy a vested right to continue use of that structure. (See e.g. Malibu LCP LIP 13.5.) This project is much more extensive, involving major reconstruction and expansion of the back building so that it extends into the front lot, reconfiguration of structured parking, walls and driveways, etc. Accordingly, the project does not enjoy the benefits of vested rights. The applicant admits as much by seeking to rewrite the General Plan, Zoning Code and LCP, rather than claiming a legal non-conforming exemption for the new hotel project.

As the City’s elected decisionmakers, you should bear in mind that this project is 100% discretionary. You should be guided by the General Plan and existing zoning and LCP standards, without regard for the fact that the site includes an existing oversized office building that would not be approved under today’s codes and policies.

b. Parking. As stated on page 13 of the agenda report, staff has calculated that the Sea View Hotel project would require 357 parking spaces under the current LCP/LIP.² As recommended by Planning Commission, the project provides only 86 spaces – less than 25% of what is required. That inadequacy is exacerbated by the fact that the project is located in an already suffering from an acute parking shortage due to the popularity of the nearby Nobu and Soho House restaurants.

The project plans also reveal that the parking spaces provided do not conform to the stall sizes required by code. Except for the 20% allowed to be compact spaces, all standard stalls must be at least 9’ by 20’. Dimensions called out on the applicant’s plans show the actual dimensions of at least some of the standard stalls are 8’6” by 19’6”. (See e.g., Stall S-10 on the parking plan at page 210 of the agenda packet.) The same plan also shows a dead-end parking aisle with no adequate turnaround as prohibited by code. (See Zoning Code § 17.48.050(D) & LIP 3.14.5(D).)

² 357 spaces would be required as follows: 2 spaces for each room (39 x 2 = 78 spaces); 1 space for the average, per-shift number of employees (11-full time employees per shift = 11 spaces); and 1 space for each 100 square feet of gross floor area used for consumption of food or beverages, or public recreation areas (26,800/100 = 268 spaces).

HUESTON HENNIGAN LLP

c. Spot Zoning. As noted above, to arbitrarily single out this 1.19 acre parcel out of all parcels in the City for special zoning restrictions would constitute unlawful spot zoning. (See *Foothill Communities Coalition v. County of Orange* (2014) 222 Cal. App. 4th 1302, 1314.) Although spot zoning may be permissible when a project is consistent with areawide plans and meets an important public need (such as the affordable senior housing project at issue in the *Foothill Communities* case), the proposed Sea View Hotel is grossly inconsistent with existing land use plans and serves no important public purpose. Far from providing affordable visitor accommodations, this high-end, luxury hotel is designed to capitalize on the glitz and glamour of Carbon Beach and the celebrity “watering holes” (Nobu and Soho House) directly across the street. If approved and challenged in court, this project will literally become a “textbook case” of illegal spot zoning.

3. Other Substantive and Procedural Defects.

a. MND. The City has improperly used a mitigated negative declaration for this project, when an EIR should have been prepared in light of the project’s stark inconsistencies with the General Plan, LCP and Zoning Code. Other topics that were not adequately acknowledged in the MND and would need to be addressed in a recirculated MND or EIR include:

(i) The MND failed to disclose the more than 200-space parking deficit that only came to light upon publication of the agenda report. (See Agenda Report, p. 13.)

(ii) The MND failed to address additional traffic impacts and safety risks associated with the change in use from office to hotel. These include increased nighttime trips, increased nighttime pedestrian crossings of PCH by hotel guests, and increased nighttime left turns into and out of the unsignalized/uncontrolled driveways. Although my clients deal with these issues at the Malibu Beach Inn and believe they can be adequately mitigated, the City disagreed and cited these kinds of alleged PCH safety concerns in denying the Malibu Beach Inn’s pool and offsite parking application. The proposed Sea View Hotel project should be held to the same standard, particularly because of the congestion and greater PCH crossings at the Sea View Hotel location directly across from Nobu and Soho House. Many guests of the Sea View Hotel will walk across the dangerous highway between these venues late into the night and, given the service of alcohol at both the hotel and restaurants, likely in varying states of inebriation. This location on PCH has already experienced years of congestion and safety hazards³ which will only be compounded with the addition of another bustling hotel with restaurant and bar across the highway.

(iii) The MND fails to discuss the growth-inducing impact of displacing the existing office building tenants, who will need to relocate elsewhere, thereby causing demand for additional office space and new office construction elsewhere in the City of Malibu.

(iv) The MND understated the project FAR as being 0.44 (see Agenda Report, p. 354), when it is in fact 0.52.

In conclusion, you should deny the project for all the foregoing reasons, along with the many other

³ See, e.g. May 20, 2019, Planning Commission Agenda Report, Item 6.A. (Nobu Compliance Review) at 1 (“Vehicles queueing, entering, and leaving the property, as well as valet attendants illegally crossing PCH have generated traffic and safety problems in the area which have not been addressed or abated despite the investment of significant staff time in attempts to work with the restaurant operator.”).

HUESTON HENNIGAN LLP

grounds for denial raised in the numerous opposition e-mails and letters submitted in connection with the Planning Commission's hearing in June 2021. Also, if the project is to be brought forward again for further consideration, it should be first revised to be consistent with existing City plans and policies, and then evaluated in an environmental impact report before returning to the Planning Commission for additional hearings.

Sincerely,

A handwritten signature in blue ink, appearing to read "M. Camp", is positioned above the printed name.

Marshall A. Camp

Ventura, CA 93001

February 8, 2023, Agenda Item W11a
City of Malibu Local Coastal Program Amendment No. LCP-4-MAL-21-073-2
(Sea View Hotel Project)

Dear Chair Brownsey and Honorable Commissioners,

The Mountains Recreation and Conservation Authority (MRCA) supports your staff's recommendation in Agenda Item W11a to designate MRCA as the recipient of an in-lieu fee to implement affordable visitor-serving public accommodations along the Malibu coast.

Your staff report states that the applicant for the Sea Vista Hotel Project is unable to develop and provide lower-cost overnight visitor accommodations on- or off-site. The applicant offered to pay an in-lieu mitigation fee of \$800,000 (\$133,000 per room) to MRCA for the provision of affordable overnight accommodations in the Santa Monica Mountains Coastal Zone.

MRCA is currently developing a Malibu Lower Cost Accommodations Public Works Plan (MLCA PWP) to address the lack of affordable visitor serving accommodations along the Malibu coast. The MLCA PWP is well underway and MRCA expects to provide in late 2023 or early 2024 its Draft Environmental Impact Report for public review and consideration.

We appreciate the opportunity to partner with the Coastal Commission to remove one of the most significant barriers to equitable coastal access, the lack of affordable overnight accommodations along the Malibu coast.

Sincerely,

Elena Eger
Coastal Projects Special Counsel

San Francisco CA 94105

RE: City of Malibu LCP Amendment No. LCP-4-MAL-21-0073-2 (Sea View Hotel Project)

Dear Honorable Commissioners:

I am the applicant and the owner of the property, and I have been working for seven years to convert my office building into a small hotel in Malibu. The City of Malibu has already approved the 39 room Sea View Hotel, and it is now scheduled to be on the Coastal Commission's February 8 agenda.

After you have read the Coastal Commission Staff's recommendation for approval of the proposed Sea View Hotel, I would like to personally answer any questions that you may have, and to emphasize how unique the project is. I agree to all of the conditions and modifications recommended by Staff. A few of the unique facts and benefits of the hotel are stated below:

1. Land Use:

Although hotels and motels are referenced in Malibu's LCP as the highest priority land use, there are only two parcels in Malibu zoned for hotel use: one parcel is the location of the 47-room Malibu Beach Inn, which was approved almost 40 years ago before Malibu incorporated and adopted some very restrictive development standards; the other parcel was recently approved for a cemetery.

The proposed Sea View Hotel will be the third parcel zoned for a hotel use in Malibu, and, if the Commission approves it, will be the first new hotel approved for construction since Malibu's incorporation 32 years ago. The zone change requires an amendment to Malibu's LCP.

2. Hotel Structure:

65%± of the hotel structure is already existing in the form of a commercial building that will be remodeled into 22 rooms. The remaining 17 rooms will be located on an adjacent parcel, which is the site of an abandoned Shell gas station. Most of the hotel structure already exists and will simply undergo an interior remodel.

3. Parking:

The project provides more parking places on site than are required, and all hotel workers and guests must park on site, so the hotel will not reduce public parking available on the street.

4. Location:

The hotel is in the center of many visitor serving uses including 17 restaurants a short walk away, a 10 foot wide public access path to the beach within 225 feet of the hotel with a stoplight and pedestrian crosswalk for safely crossing Pacific Coast Highway, and is a short walk to Malibu Pier, Surfrider Beach, the Adamson House, the Malibu Lagoon, etc.

5. Low and Moderate Overnight Accommodations:

It is noted that the Coastal Commission prepared and adopted Malibu's LCP in 2002, which gave the owner of a hotel or motel an option to provide 15% of the rooms at low and moderate rates or pay a very specific in-lieu fee. The City accepted the in-lieu fee and approved the hotel. At the request of Coastal Staff, including Executive Director Ainsworth, I have agreed to increase the in-lieu fee by 700% and to make it available to the Mountains Recreation & Conservation Authority to be used to construct overnight accommodations in the Coastal Zone for over 50 to 70 people, which is much more low income overnight accommodations than all of the rooms in the hotel.

6. Access to Malibu's Beaches for Underprivileged Children from East Los Angeles:

In addition to the low and moderate overnight accommodations referenced above, I will be donating \$250,000 to an organization that provides access to Malibu beaches for kids from underprivileged areas in East Los Angeles. The program provides free access to the beach and free surfing lessons for children from very low income areas. Giselle Carillo, the program's founder, is a teacher who grew up in the East Los Angeles area; she wants to expand the program and needs financial support for a 40 to 50 seat bus and a licensed bus driver, and she needs to pay the California Surfrider Foundation to provide the surfboards, wetsuits, and surf instructors. Some of the children who participate in the program have never been to a beach. The program also teaches the children the importance of protecting the coastal resources, and, where possible, restoring them.

I have agreed to provide Ms. Carillo's organization \$250,000 to purchase a 40+ seat bus and to hire a grant writer, lunches for the kids, etc. The \$250,000 will keep the program going for four years, and if the grant writer has any success the seed money provided will keep the program going for much longer than four years. This program is important because these kids will be the protectors of the coastal resources in the future.

January 30, 2023

Page 3

7. Union Workers:

I have reached an agreement with the United 11 Union to have union workers at the hotel. The hotel has the support of the United 11 Union, and the MRCA.

8. Additional Support:

The hotel has the support of the Mountains Recreation & Conservation Authority.

If you have time for a short chat by phone, I would be delighted to answer any questions you may have and to describe the additional unique elements of the project.

My telephone number is 310-456-5515, and I'm available anytime. My email address is norm@blueonyxdesign.com.

Thank you for your consideration.

Sincerely,

Norman R. Haynie

RE: City of Malibu Local Coastal Program Amendment No. LCP-4-MAL-21-0073-2 for the Seaview Hotel Project.

Dear Commissioners,

On behalf of the Southwest Mountain States Regional Council of Carpenters (“**Southwest Mountain States Carpenters**” or “**SWMSRCC**”), my Office is submitting these comments for the Coastal Commission Meeting for the City of Malibu’s (“**City**”) Sea View Hotel Project Local Coastal Program Amendment No. LCP-4-MAL-21-0073-2 (“**Project**”).

The Southwest Mountain States Carpenters is a labor union representing 63,000 union carpenters in 10 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

Individual members of SWMSRCC live, work, and recreate in the City and surrounding communities and would be directly affected by the Project’s environmental impacts.

The Southwest Mountain States Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

The Southwest Mountain States Carpenters incorporates by reference all comments raising issues regarding the Environmental Impact Report (EIR) submitted prior to

certification of the EIR for the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project’s environmental documentation may assert any issue timely raised by other parties).

Moreover, the Southwest Mountain States Carpenters requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law (“**Planning and Zoning Law**”) (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency’s governing body.

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY’S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The City should require the Project to be built using a local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.¹

Furthermore, workforce policies have significant environmental benefits given that they improve an area’s jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that that the “[u]se of a local state-certified apprenticeship program” can result in air pollutant reductions.²

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.³

¹ California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, *available at* <https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf>.

² South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, *available at* <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10>.

³ California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, *available at* <https://cproundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf>

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.⁴ Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city's First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 (“**AB2011**”). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

⁴ Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, available at <http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf>.

II. THE CITY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT'S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupational Safety and Health Administration. Recently, several construction sites have been identified as sources of community spread of COVID-19.⁵

Southwest Mountain States Carpenters recommend that the Lead Agency adopt additional requirements to mitigate public health risks from the Project's construction activities. SWMSRCC requests that the Lead Agency require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

In particular, based upon Southwest Mountain States Carpenters' experience with safe construction site work practices, SWMSRCC recommends that the Lead Agency require that while construction activities are being conducted at the Project Site:

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.
- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.
- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social

⁵ Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, available at <https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx>.

distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.

- There will be clear signage posted at the project site directing you through temperature screening.
- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be

allowed to enter the Project Site. DHS will also instruct the individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.⁶

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The Agency should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

Southwest Mountain States Carpenters has also developed a rigorous Infection Control Risk Assessment (“**ICRA**”) training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to

⁶ See also The Center for Construction Research and Training, North America’s Building Trades Unions (April 27 2020) NABTU and CPWR COVID-19 Standards for U.S. Construction Sites, available at https://www.cpwr.com/sites/default/files/NABTU_CPWR_Standards_COVID-19.pdf; Los Angeles County Department of Public Works (2020) Guidelines for Construction Sites During COVID-19 Pandemic, available at https://dpw.lacounty.gov/building-and-safety/docs/pw_guidelines-construction-sites.pdf.

protect themselves and all others during renovation and construction projects in healthcare environments.⁷

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

The City should require the Project to be built using a workforce trained in ICRA protocols.

III. THE PROJECT WOULD BE APPROVED IN VIOLATION OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT

A. Background Concerning the California Environmental Quality Act

The California Environmental Quality Act is a California statute designed to inform decision-makers and the public about the potential significant environmental effects of a project. 14 California Code of Regulations (“**CEQA Guidelines**”), § 15002, subd. (a)(1).⁸ At its core, its purpose is to “inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made.” *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564.

1. Background Concerning Environmental Impact Reports

CEQA directs public agencies to avoid or reduce environmental damage, when possible, by requiring alternatives or mitigation measures. CEQA Guidelines, § 15002, subds. (a)(2)-(3); see also *Berkeley Keep Jets Over the Bay Committee v. Board of Port Comes* (2001) 91 Cal.App.4th 1344, 1354; *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553; *Laurel Heights Improvement Assn.*, 47 Cal.3d at p. 400. The EIR serves to provide public agencies and the public in general with information about the effect that a proposed project is likely to have on the environment and to “identify ways that environmental damage can be avoided or significantly reduced.” CEQA Guidelines, § 15002, subd. (a)(2). If the project has a significant effect on the

⁷ For details concerning Southwest Carpenters’s ICRA training program, *see* <https://icrahealthcare.com/>.

⁸ The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 et seq., are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. Cal. Pub. Res. Code, § 21083. The CEQA Guidelines are given “great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous.” *Center for Biological Diversity v. Dept. of Fish & Wildlife* (2015) 62 Cal.4th 204, 217.

environment, the agency may approve the project only upon finding that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns” specified in Public Resources Code section 21081. See CEQA Guidelines, § 15092, subs. (b)(2)(A)-(B).

While the courts review an EIR using an ‘abuse of discretion’ standard, the reviewing court is not to *uncritically* rely on every study or analysis presented by a project proponent in support of its position. *Berkeley Jets*, 91 Cal.App.4th at p. 1355 (quoting *Laurel Heights Improvement Assn.*, 47 Cal.3d at pp. 391, 409 fn. 12) (internal quotations omitted). A clearly inadequate or unsupported study is entitled to no judicial deference. *Id.* Drawing this line and determining whether the EIR complies with CEQA’s information disclosure requirements presents a question of law subject to independent review by the courts. *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 515; *Madera Oversight Coalition, Inc. v. County of Madera* (2011) 199 Cal.App.4th 48, 102, 131. As the court stated in *Berkeley Jets*, prejudicial abuse of discretion occurs if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process. 91 Cal.App.4th at p. 1355 (internal quotations omitted).

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. *Communities for a Better Environment v. Richmond* (2010) 184 Cal.App.4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449-450). The EIR’s function is to ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. *Id.* For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is made. *Id.*

A strong presumption in favor of requiring preparation of an EIR is built into CEQA. This presumption is reflected in what is known as the “fair argument” standard under which an EIR must be prepared whenever substantial evidence in the record supports a fair argument that a project may have a significant effect on the environment. *Quail*

Botanical Gardens Found., Inc. v. City of Encinitas (1994) 29 Cal.App.4th 1597, 1602;
Friends of “B” St. v. City of Hayward (1980) 106 Cal.3d 988, 1002.

The fair argument test stems from the statutory mandate that an EIR be prepared for any project that “may have a significant effect on the environment.” PRC, § 21151; see *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.App.3d 68, 75; accord *Jensen v. City of Santa Rosa* (2018) 23 Cal.App.5th 877, 884. Under this test, if a proposed project is not exempt and may cause a significant effect on the environment, the lead agency must prepare an EIR. PRC, §§ 21100 (a), 21151; CEQA Guidelines, § 15064 (a)(1), (f)(1). An EIR may be dispensed with only if the lead agency finds no substantial evidence in the initial study or elsewhere in the record that the project may have a significant effect on the environment. *Parker Shattuck Neighbors v. Berkeley City Council* (2013) 222 Cal.App.4th 768, 785. In such a situation, the agency must adopt a negative declaration. PRC, § 21080, subd. (c)(1); CEQA Guidelines, §§ 15063 (b)(2), 15064(f)(3).

“Significant effect upon the environment” is defined as “a substantial or potentially substantial adverse change in the environment.” PRC, § 21068; CEQA Guidelines, § 15382. A project may have a significant effect on the environment if there is a reasonable probability that it will result in a significant impact. *No Oil, Inc.*, 13 Cal.3d at p. 83 fn. 16; see *Sundstrom v. County of Mendocino* (1988) 202 Cal.App.3d 296, 309. If any aspect of the project may result in a significant impact on the environment, an EIR must be prepared even if the overall effect of the project is beneficial. CEQA Guidelines, § 15063(b)(1); see *County Sanitation Dist. No. 2 v. County of Kern* (2005) 127 Cal.App.4th 1544, 1580.

This standard sets a “low threshold” for preparation of an EIR. *Consolidated Irrigation Dist. v. City of Selma* (2012) 204 Cal.App.4th 187, 207; *Nelson v. County of Kern* (2010) 190 Cal.App.4th 252; *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 928; *Bowman v. City of Berkeley* (2004) 122 Cal.App.4th 572, 580; *Citizen Action to Serve All Students v. Thornley* (1990) 222 Cal.App.3d 748, 754; *Sundstrom*, 202 Cal.App.3d at p. 310. If substantial evidence in the record supports a fair argument that the project may have a significant environmental effect, the lead agency must prepare an EIR even if other substantial evidence before it indicates the project will have no significant effect. See *Jensen*, 23 Cal.App.5th at p. 886; *Clews Land & Livestock v. City of San Diego* (2017) 19 Cal.App.5th 161, 183; *Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 150; *Brentwood Assn. for No Drilling, Inc. v. City of*

Los Angeles (1982) 134 Cal.App.3d 491; *Friends of “B” St.*, 106 Cal.App.3d 988; CEQA Guidelines, § 15064(f)(1).

2. *Background Concerning Initial Studies, Negative Declarations and Mitigated Negative Declarations*

CEQA and CEQA Guidelines are strict and unambiguous about when an MND may be used. A public agency must prepare an EIR whenever substantial evidence supports a “fair argument” that a proposed project “may have a significant effect on the environment.” Pub. Res. Code, §§ 21100, 21151; CEQA Guidelines, §§ 15002, subds. (f)(1)-(2), 15063; *No Oil, Inc.*, 13 Cal.3d at p. 75; *Communities for a Better Environment v. California Resources Agency* (2002) 103 Cal.App.4th 98, 111-112. Essentially, should a lead agency be presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR even though it may also be presented with other substantial evidence that the project will not have a significant effect. CEQA Guidelines, §§ 15064, subds. (f)(1)-(2); see *No Oil Inc.*, *supra*, 13 Cal.3d at p. 75 (internal citations and quotations omitted). Substantial evidence includes “enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached.” CEQA Guidelines, § 15384(a).

The fair argument standard is a “low threshold” test for requiring the preparation of an EIR. *No Oil Inc.*, *supra*, 13 Cal.3d at p. 84; *County Sanitation Dist. No. 2 of Los Angeles County v. County of Kern* (2005) 127 Cal.App.4th 1544, 1579. It “requires the preparation of an EIR where there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial[.]” *County Sanitation*, *supra*, 127 Cal.App.4th at p. 1580 (quoting CEQA Guidelines, § 15063(b)(1)). A lead agency may adopt an MND only if “there is no substantial evidence that the project will have a significant effect on the environment.” CEQA Guidelines, § 15074(b).

Evidence supporting a fair argument of a significant environmental impact triggers preparation of an EIR regardless of whether the record contains contrary evidence. *League for Protection of Oakland’s Architectural and Historical Resources v. City of Oakland* (1997) 52 Cal.App.4th 896, 904-905. “Where the question is the sufficiency of the evidence to support a fair argument, deference to the agency’s determination is not

appropriate[.]” *County Sanitation*, 127 Cal.App.4th at 1579 (quoting *Sierra Club v. County of Sonoma* (1992) 6 Cal.App.4th 1307, 1317-1318).

Further, it is the duty of the lead agency, not the public, to conduct the proper environmental studies. “The agency should not be allowed to hide behind its own failure to gather relevant data.” *Sundstrom*, 202 Cal.App.3d at p. 311. “Deficiencies in the record may actually enlarge the scope of fair argument by lending a logical plausibility to a wider range of inferences.” *Id.*; see also *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359, 1382 (lack of study enlarges the scope of the fair argument which may be made based on the limited facts in the record).

Thus, refusal to complete recommended studies lowers the already low threshold to establish a fair argument. The court may not exercise its independent judgment on the omitted material by determining whether the ultimate decision of the lead agency would have been affected had the law been followed. *Environmental Protection Information Center v. Cal. Dept. of Forestry* (2008) 44 Cal.4th 459, 486 (internal citations and quotations omitted). The remedy for this deficiency would be for the trial court to issue a writ of mandate. *Id.*

Both the review for failure to follow CEQA’s procedures and the fair argument test are questions of law, thus, the de novo standard of review applies. *Vineyard Area Citizens for Responsible Growth v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 435. “Whether the agency’s record contains substantial evidence that would support a fair argument that the project may have a significant effect on the environment is treated as a question of law. *Consolidated Irrigation Dist.*, 204 Cal.App.4th at p. 207; Kostka and Zischke, *Practice Under the Environmental Quality Act* (2017, 2d ed.) at § 6.76.

In an MND context, courts give no deference to the agency. Additionally, the agency or the court should not weigh expert testimony or decide on the credibility of such evidence—this is one of the EIR’s responsibilities. As stated in *Pocket Protectors v. City of Sacramento*:

Unlike the situation where an EIR has been prepared, neither the lead agency nor a court may “weigh” conflicting substantial evidence to determine whether an EIR must be prepared in the first instance. Guidelines section 15064, subdivision (f)(1) provides in pertinent part: if a lead agency is presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR

even though it may also be presented with other substantial evidence that the project will not have a significant effect. Thus, as *Claremont* itself recognized, [c]onsideration is not to be given contrary evidence supporting the preparation of a negative declaration.

(2004) 124 Cal.App.4th 903, 935 (internal citations and quotations omitted).

In cases where it is not clear whether there is substantial evidence of significant environmental impacts, CEQA requires erring on the side of a “preference for resolving doubts in favor of environmental review.” (*Mejia v. City of Los Angeles* (2005) 130 Cal.App.4th 322, 332.) “The foremost principle under CEQA is that the Legislature intended the act to be interpreted in such manner as to afford the fullest possible protection to the environment within the reasonable scope of the statutory language. (*Friends of Mammoth v. Board of Supervisors* (1972) 8 Cal.3d 247, 259.)

3. Background Concerning CEQA Exemptions

Where a lead agency chooses to dispose of CEQA by asserting a CEQA exemption, it has a duty to support its CEQA exemption findings by substantial evidence, including evidence that there are no applicable exceptions to exemptions. This duty is imposed by CEQA and related case law. (CEQA Guidelines, § 15020 [The lead agency shall not knowingly release a deficient document hoping that public comments will correct the defects.]; see *Citizens for Environmental Responsibility v. State ex rel. 14th Dist. Agriculture Assn.* (2015) 242 Cal.App.4th 555, 568 [The lead agency has the burden of demonstrating that a project falls within a categorical exemption and must support the determination with substantial evidence.]; accord *Association for Protection etc. Values v. City of Ukiah* (1991) 2 Cal.App.4th 720, 732 [The Lead agency is required to consider exemption exceptions where there is evidence in the record that the project might have a significant impact.])

The duty to support CEQA and exemption findings with substantial evidence is also required by the Code of Civil Procedure (“CCP”) and case law on administrative or traditional writs. Under the CCP, an abuse of discretion is established if the decision is unsupported by the findings, or the findings are unsupported by the evidence. CCP § 1094.5(b). In *Topanga Assn. for a Scenic Community v. County of Los Angeles*, our Supreme Court held that implicit in CCP section 1094.5 is a requirement that the agency which renders the challenged decision must set forth findings to bridge the analytic gap between the raw evidence and ultimate decision or order. (1977) 11

Cal.3d 506, 515 (internal citations and quotations omitted). The lead agency’s findings may be determined to be sufficient if a court has no trouble under the circumstances discerning the analytic route the administrative agency traveled from evidence to action. (*West Chandler Blvd. Neighborhood Assn. vs. City of Los Angeles* (2011) 198 Cal.App.4th 1506, 1521-1522 [internal citations and quotations omitted].) However, “mere conclusory findings without reference to the record are inadequate.” (*Id.* at p. 1521 [finding city council findings conclusory, violating *Topanga Assn. for a Scenic Comm., supra*, 11 Cal.3d at 515].)

Further, CEQA exemptions must be narrowly construed to accomplish CEQA’s environmental objectives. *Cal. Farm Bureau Federation v. Cal. Wildlife Conservation Bd.* (2006) 143 Cal.App.4th 173, 187; *accord Save Our Carmel River v. Monterey Peninsula Water Management Dist.* (2006) 141 Cal.App.4th 677, 697 (“These rules ensure that in all but the clearest cases of categorical exemptions, a project will be subject to some level of environmental review.”).

Finally, CEQA procedures reflect a preference for resolving doubts in favor of environmental review. *See* Pub. Res. Code, § 21080(c) (an EIR may be disposed of only if there is no substantial evidence, in light of the entire record before the lead agency, that the project may have a significant effect on the environment or revisions in the project); CEQA Guidelines §§ 15061(b)(3) (common sense exemption only where it can be seen *with certainty*); 15063(b)(1) (prepare an EIR if the agency determines that there is substantial evidence that any aspect of the project, either individually or cumulatively, may cause a significant effect on the environment, regardless of whether the overall effect of the project is adverse or beneficial); 15064(h) (the agency must consider cumulative impacts of past, current, and probable future projects); 15070 (a negative declaration may be prepared only if there is no substantial evidence, in light of the whole record, that the project may have a significant effect on the environment, or project revisions would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, and there is no substantial evidence, in light of the whole record, that the project as revised may have a significant effect on the environment); *No Oil, Inc., supra*, 13 Cal.3d at p. 83-84 (significant impacts are to be interpreted so as to afford the fullest possible protection).

B. The Project Would be Approved in Violation of CEQA as the Project Would Result in a Significant Environmental Impact Related to Construction Noise

“The Legislature has declared in CEQA that “it is the policy of the state” to “[t]ake all action necessary to provide the people of this state with ... freedom from excessive noise.” PRC § 21001(b).) The Legislature has further declared that it is the state's policy to “[r]equire governmental agencies at all levels to consider *qualitative* factors as well as economic and technical factors ...” PRC § 21001(g), italics added. Thus, through CEQA, the public has a statutorily protected interest in quieter noise environments.” *Berkeley Keep Jets Over the Bay Committee v. Board of Port Com'rs* (2001) 91 Cal.App.4th 1344, 1379–1380.

According to the MND, “[c]onstruction activity would result in temporary increases in ambient noise in the project area on an intermittent basis and, as such, would expose surrounding noise-sensitive receivers to increased noise. The nearest sensitive receivers to the site are single-family residences to the north, approximately **160 feet** from the project’s northern property line. Commercial uses are **adjacent** to the project site to the east and west.” MND, p. 98 (emphasis added).

“Using the FHWA RCNM, construction noise was modeled at **280 feet** from adjacent residences with a conservative -3 dBA offset to account for shielding provided by the building on Parcel B. Project construction noise was modeled at 50 feet from the adjacent commercial uses.” MND, p. 99 (emphasis added).

Since noise impacts should have been evaluated at a distance of 160 feet for single family homes and hotel sensitive uses. Noise impacts for commercial uses should have been modeled at 0ft, since they are located immediately adjacent to the Project site.

Therefore, the Project’s impacts related to construction noise has not been properly evaluated or mitigated.

IV. THE PROPOSED PROJECT IS INCONSISTENT WITH THE COASTAL ACT

A. The Project Does Not Conform to the Public Access Provisions Set Forth by the California Coastal Act

In enacting the California Coastal Commission Act, the Legislature "sought to '[a]ssure orderly, balanced utilization and conservation of coastal zone resources

taking into account the social and economic needs of the people of the state.' "

Carstens v. California Coastal Commission (1986) 182 Cal.App.3d 277, 290, quoting PRC § 30001.5(b).

According to the Coastal Act, “Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred.” PRC § 30213.

"The use of private lands suitable for visitor-serving commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development” PRC § 30222.

In *San Diego Unified Port Dist. v. California Coastal Com.* (2018) the court’s opinion clarified Section 30222 of California Coastal Act, holding that “[t]he statute itself refers to visitor facilities as places for overnight lodging. And such an interpretation is consistent with statewide coastal policy—reflected in amendments effective in 2018—that lower cost overnight accommodations “including hotels, motels, hostels, cabins, and camping opportunities, are essential elements of coastal ... access” because “[a] lack of affordable accommodations remains a barrier to coastal access.” PRC § 31411.” 27 Cal.App.5th 1111, 1142.

In approving this Project-specific LCP amendment, the Commission is empowered to not only determine whether a site development permit within the coastal commission overlay district conforms with the Act's policies, but that the Project *carries out* those policies. It exercises its independent judgment as to whether the City’s proposed Project reflects "actual compliance" with state standards and policies. See *Charles A. Pratt*, at pp. 1075-1076; see also *City of Chula Vista*, *supra*, 133 Cal.App.3d at p. 490.

The Coastal Commission has a statutory mandate to "consider and encourage the utilization of innovative access management techniques" PRC § 30214(c); see *Surfrider Foundation v. California Coastal Commission* (1994) 26 Cal.App.4th 151, 158, fn. 2, and account for "the need to regulate the . . . manner of public access" on a case-by-case basis. PRC § 30214, subd. (a). In doing so, it is permitted to "tak[e] into account the social and economic needs of the people of the state" PRC § 30001.5(b)) and "ensure that state policies prevail" over local concerns. See *Pacific Palisades Bowl Mobile Estates, LLC v. City of Los Angeles*, (2012) 55 Cal.4th 794; *City of Dana Point v. California Coastal Commission* (2013) 217 Cal.App.4th at p. 186.

Here, the proposed project specific LCP amendment is not consistent with the Coastal Act because the cost of overnight stay at a luxury hotel makes it not available to the general public. visitor-accommodation facilities in the coastal zone include lower-cost accommodations.

Approval of the Project would guarantee that the public at large have no access to the cost-prohibitive development; this is coupled with the fact that there are no lower-cost overnight lodge in the area.

“To provide an effective alternative mechanism for the hotel project proponent to provide a component of lower cost overnight visitor accommodations through an up-to-date in-lieu mitigation fee”⁹ While it is arguable that a mitigation fee may serve to reduce the Project’s environmental impacts; There is no explanation, however, as to how the \$800,000 amount would serve to mitigate the Project’s inconsistency with the Coastal Act.

Therefore, approval of this Luxury Hotel would defeat not only the California Coastal Act’s core principle to maximize public access and recreational opportunities in the coastal zone, but also the City’s Local Coastal Program’s policy to protect low-cost overnight lodging for this same purpose.

Sincerely,

Mary Linares

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise (“SWAPE”) is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas (“GHG”) emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model (“CalEEMod”) is a “statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects.”¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

¹ “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

² “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁵ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.

⁶ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

⁷ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	16.47	11.17
Minimum	10.80	10.80
Maximum	19.80	14.70
Range	9.00	3.90

⁹ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

¹⁰ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

¹¹ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.

¹² “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8- miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7- miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

¹⁴ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-85.

Los Angeles-South Coast County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

<i>% Decrease in Construction-related GHG Emissions</i>	17%

EXHIBIT B

Paul Rosenfeld, Ph.D.

Principal Environmental Chemist

Chemical Fate and Transport & Air Dispersion Modeling

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Rosenfeld, P.E., C.L. Henry. (1998). Characterization, Quantification, and Control of Odor Emissions from Biosolids Application To Forest Soil. *Biofest*. Lecture conducted from Lake Chelan, Washington.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS “Conti Perdido”
Defendant.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosiences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward
DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City
Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas
Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.
Case Number cc-11-01650-E
Rosenfeld Deposition: March and September 2013
Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio
John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*
Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)
Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division
Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.
Case 3:10-cv-00622
Rosenfeld Deposition: February 2012
Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland
Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants
Case Number: 03-C-12-012487 OT
Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt’s responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt’s duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Ventura, CA 93001-2801

RE: Support – Item 11.a - City of Malibu LCP Amendment No. LCP-4-MAL-21-0073-2 (Sea View Hotel Project)

Dear Honorable Chair Brownsey and Commissioners:

On behalf of the 32,000 hotel and food service members of UNITE HERE Local 11, we are writing to recognize the improvements the developer has proposed in The Sea View Hotel Project in Malibu. One of the goals of our Union in the development process is to try to find opportunities that combine excellent jobs with environmentally responsible projects that ensure working class people can afford to visit and live near the coast, not just to work there. We are happy to see the steps the taken toward those goals in Sea View Hotel Project.

We are concerned not only with maximizing public access to our coast in general, but specifically with ensuring access for those who have historically been given less opportunity to enjoy the coast. To that end, we are strong supporters of on-site provision of affordable overnight accommodations where appropriate. The Malibu LCP is quite clear, however, that developers have the right to pay small in-lieu fees to avoid providing affordable lodging on-site.¹

The developers of the Sea View have committed to provide benefits to help working people access the coast that go significantly beyond the requirements of the Malibu LCP. They have agreed to commit \$800,000 to assist in funding affordable overnight accommodations in the Malibu coastal zone, consistent with Land Use Plan Policy 2.35, comparable to the amounts required by the Commission for similar projects.² The developers are providing \$250,000 to the nonprofit organization Los Courage Camps to further its work providing free surf lessons and transportation to beaches in the Malibu area for children in underserved communities,³ which is also an investment in access to the coast for all, as encouraged by Land Use Plan Policy 2.37. The developers are also providing another \$800,000 for public benefits in the city of Malibu,⁴ such as open space, trails, and parks, expanding and enhancing recreational opportunities in nature as encouraged by Land Use Plan Policy 2.23. These additional free amenities combined with the previously mentioned proposed affordable stay options and community partnerships would create more reason and opportunity for the working class to enjoy our coastline.

¹ Coastal Commission [Staff Report](#) p 3.

² Coastal Commission [Staff Report](#) pp 25-28

³ Coastal Commission [Staff Report](#) p 28.

⁴ City of Malibu City Council [Staff Report September 27](#) pp 1, 10

The sustainability of this project is also relevant. The project proposes native plant and drought resistant centered landscaping,⁵ another important part of beautifying and safeguarding our coasts. UNITE HERE Local 11 will continue to push for environmentally responsible development: here, these landscaping features of the project, when combined with the improvements in coastal access and funding of affordable accommodations, advance the Union's environmental goals.

Finally, the Sea View Hotel would provide an alternative to short-term rentals of homes and apartments. We support Malibu's continued efforts to regulate short-term rentals to protect housing stock from conversion into hotel rooms. The Sea View Hotel's provision of new rooms and funding for affordable accommodations will help provide coastal access without the loss of housing.

For these reasons, UNITE HERE Local 11 supports the Sea View Hotel Project's efforts to improve coastal access for working families and the general public in an environmentally sustainable way.
