T-line

With the new T-line panel, design makes way even outside the building.

Sophisticated and modern, the panel attracts attention firstly for its extra slim proportions: only 190 x 100 x 36 mm. The perfectly blended blue backlighting is an original solution for both the video and audio versions.

Furthermore, the name tags are particularly large meaning that longer names can be written. The panel may be easily wall-mounted or fitted on 100mm wide pillars.

Villa Audio Kits

A solution for all doorphones and video doorphone needs, with one and two buttons, for all system types.

Bitron Video's villa kits are ideal for one- and two-family buildings, the comprehensive product range includes various stylish solutions, all cutting-edge and customisable, with a view to simple installation: replacing an old bell system with a modern, high-tech, audio kit is quick and easy.

The T-line kit includes the new T-line panel and the new range of T-line doorphones.

Villa Video Kits

Bitron Video's video villa kits come with a choice of mono or colour camera's in the T-line panels. The video doorphone can be hands free or traditional handset type. There are two wire video kits where cables are in place, such as replacing a bell on existing cables.
