## CABLE GLANDS

DOWELL's electrical armoured and unarmoured cable glands are designed for usage in including oil and gas, petrochemical, construction, pharmaceutical, transportation, solar and mining to name a few. Electrical cable glands can be used with a range of cable types, including armoured and unarmoured and are available in nickel plated brass, stainless steel, polyamide.

## CONNECTORS & SHEET TERMINALS

DOWELL's is a pioneer in designing and manufacturing Solderless Electrical tubular connectors. These Connectors are crimped on to a conductor, to facilitate a termination or a straight connection with utmost reliability. These are designed with optimum ductility which is an absolute necessity for connectors that will have to withstand the severe deformation arising when compressed or crimped during the installation. The connectors are available in both aluminium, copper (Electrolytically tin plated to prevent oxidation), Bimetallic and Friction welded (CU to Al). Sheet metal terminals are also available as Ring, Pin & Fork terminals.

## TOOLS & ACCESSORIES

The extensive list of tools and accessories are developed to offer the best equipment for crimping and preparing the connectors. Matched to DOWELL'S connectors and dies for best performance and conformity.

## CONNECTORS FOR 2C,3C,3.5C, 4C SECTOR SHAPED CONDUCTORS

Designed primarily for solid or stranded sector shape conductors for all angular arrangement of 2C,3C,3.5C or 4C cables. Precision fit on the sector conductor, allows for perfect and reliable connection. This eliminated the process of rounding of the conductors for fitment during crimping in case of round connectors. This design also gives an optimum crimping quality with sector shaped dies, making it more reliable and trusted connection.

### Features :

- Reduces contact Resistance > 10%
- Drastic reduction in hot spots when compared with circular connector for the same applications
- Improved conductivity
- Increase in the contact surface area
