DUALMIKE

THE SMART MICROPHONE THAT MODULATES FOR TWO

Dual Mike revolutionises the modulation rules, the first CB microphone to allow a dual connection: with the CB, via 4 PIN 48/68 connector (4 PIN, 6 PIN) and with the smartphone, via Bluetooth.

Combined with the CBTalk app, to talk whoever you want, where you want, without distance limits and with an excellent sound quality. Change channel, switch to Dual.

THE FIRST DUAL PTT:

press at the top and transmit on the CB

COMPATIBLE WITH EVERY CB

DUALMIKE is available in 3 versions so that it can be used with many CB models, even not Midland's.

* Check the list of compatibility with competitors' CBs on the midlandeurope.com website

DUALMIKE can be recharged via the USB socket on the microphone or from the CB socket connected to the USB socket of the cable.

CUSTOMIZE THE LIGHT RING OF YOUR DUALMIKE (5 COLOURS)

CB MICROPHONE

Dual mike is compatible with all Midland and the majority of CBs available on the market: choose between the 4 Pin 48, 4 Pin and 6 Pin version.

Choose your favourite color for the Light Ring and start talking with your travel friends.

THE FIRST DUAL PTT:

Press the PTT at the bottom to talk on the App.

DUALMIKE

It combines the analog and digital world thanks to the Bluetooth connection, turning into a multi-purpose instrument: speakerphone, loudspeaker and the first CB (connected to CBTalk) that can communicate without any distance limit.

DUALMIKE has a 3W Super Bass loudspeaker to listen to excellent quality music.

DSP FILTER TO ANSWER YOUR PHONE HANDS-FREE

DSP technology eliminates up to 80% environmental noise. Stop the noise from both windows and engine.

BLUETOOTH MICROPHONE

The CB debuts online! Connect DUAL MIKE to your smartphone via Bluetooth, answer your phone in hands-free mode or listen to your favourite music, thanks to the 3W Bluetooth speaker integrated in the DUALMIKE.

Unlike the other models, **CT3000** can be defined "**professional**" as it has 6 customizable buttons on the front (P1-P6) through which you can set various functions, and not only: 2 functions can be associated to these 6 keys at the same time, divided into 2 groups of menus. To guarantee excellent communications even long range, CT3000 boasts high selectable **transmission power: 25W** (high), **10W** (medium) and **5W** (low).

Its metal chassis makes it an extremely robust radio, suitable for extreme situations, which also ensures better heat dissipation, very useful to prevent the radio from overheating. The IP54 certification ensures high protection against dust and splashes and also allows using the radio outdoors.

CT3000 boasts the "**flip**" function: the radio can be rotated by 180° and the display will still be correct. The display is wide and multicolour.

WATERPROOF

Midland Arctic is a VHF marine portable transceiver combining professional technical features with sturdiness and reliability. Its functions are all at hand, including the button to access emergency channel 16 straight away. The antenna can be removed and thanks to the standard SMA connector, it is possible to use other types of antenna. The management of the Charlie and Alpha channels and functions takes place via optional programming software.

FEATURES

- IP67 waterproof certification
- Aluminium chassis
- Transmission power: 5W
- High/low power selection (5W/1W)
- 57 international channels
- Programmable channels (through software)
- Backlit wide LCD display
- Instant access to the emergency channel 16
- VOX, SCAN function

SWR METER WATTMETERS

KW 505

C1165

KW 505 is a 2-function measurement instrument that operates on 1.5 - 150 MHz frequency range to constantly monitor any antenna.
Power reading on two levels: 0-10W and 0-100W.

KW 520

C530

Suitable for checking transmitter power and antenna adaptation, with two separate measuring lines, one from 1.8 to 200 MHz and the other from 140 to 525 MHz. This enables the simultaneous connection of 2 systems: one in HF/VHF and the other in VHF/UHF and select which to use to take the measurements with the specific switch. The measurement line selected is seen by the specific LED. With the possibility of measuring peak or medium value > Fine calibration of the index > Base scale duplicator button of power from 200 to 400 W.

CAR & TRUCK ANTENNAS

SPACE ANTENNAS: ILLUMINATE WHEN TRANSMITTING

Midland Lux is the genesis of a new line of CB antennas, designed to make the installation of the best "CB radio" on vehicles. The antenna base is fitted with a waveguide that glows when it is crossed by radio frequency. It automatically illuminates when the radio is transmitting, thus signalling the correct operation of the device. It does not need any power and is totally waterproof. LUX1500-S and LUX 1000-S: Anti-theft and protection hinge. LUX 1500-PL e LUX 700-PL suitable for gutter, mirror, centre roof mount (accessories not included). With the KIT they become magnetic (see page 46).

RAINPROOF

Bike Guardian, the new motorcycle camera with FullHD resolution, designed and made to be another "eye" that records everything that happens while you are riding.

Highly useful in the event of an accident to prove who was involved and who was to blame Bike Guardian is the first motorcycle camera with continuous recording.

Connected to the motorcycle USB socket with the cable supplied, **it starts recording automatically when the bike is switched on and turns itself off when it is switched off.**

Bike guardian can be used also as a traditional **action cam** and, thanks to its integrated battery, allows up to 2 hours recording. Integrated microphone and speaker.

RAINPROOF

Bike Guardian is able to withstand bad weather, mud and dust, ensuring a video without interruptions. Even the cable, which connects the camera to the bike socket, is rainproof.

PACKAGING AND CODES

Camera, lock mount, handlebar mount, bi-adhesive flat mount, bi-adhesive curved mount, quick mount, screw, GO-PRO adaptor, strap mount, USB cable, USB rainproof cable, wrist belt.

DASH CAM

Street Guardian Flat is the thin **FullHD** camera with a discreet design for those who want to feel safe while driving, thanks to **video recordings complete with sounds**, without giving up a clean windscreen with complete vision.

Integrated microphone and speaker.

It connects to the cigarette lighter socket via the 12 V cable and can be easily installed on two cars, thanks to the adhesives included in the package.

WI-FI

It is possible to use the Wi-fi to place the camera and set it up during the assembly/ installation on the car.

The Wi-fi also allows the review and download of the clips directly onto the smartphone without having to connect the camera to a PC (thus avoiding removal from the vehicle).

Recommended apps: FinalCam and LuckyCam.

BLACK BOX AND MOTION DETECTION

The Black Box function makes the camera save and automatically protect the clips in case of an accident. The Motion Detection function allows the camera to start recording every time it detects a motion in the viewing range (requires the camera to be powered).

PARKING FUNCTION

The parking function enables the camcorder to automatically start recording whenever it detects a collision. No more unpleasant surprises for your parked car!

PACKAGING AND CODES

Camcorder, **2 adhesive supports**, cable with 12V cigarette lighter socket, USB cable to connect to a PC.

Street Guardian GPS + is the car camcorder with **built-in GPS** that identifies geographically every second of your route on a dedicated map, containing the **coordinates of all recordings**. Safety is therefore guaranteed not only by video and audio recordings (with integrated speaker and microphone) but also by monitoring the route. Quick to install, it is placed in the centre of the windscreen thanks to the handy suction cup and connects to the power supply with the 12 V cigarette lighter socket.

BLACK BOX AND MOTION DETECTION

Like the other Street Guardian models, it is equipped with Black Box technology, which automatically saves and protects videos in the event of an accident and with Motion Detection, that starts recording any external movement within the camera range.

POSITION SIGNALLING

The built-in GPS indicates the location where you are, the speed you are going to and follows you step by step along the way.

INTERCOM

MIDLAND®

13 YEARS OF INTERCOM COMMUNICATION.

Since 2006 Midland has specialized in intercom devices improving motorcycle communication. After the launch of the revolutionary firmware MWE in 2018, which erases background noise, Midland introduces an important **innovation in 2019**.

MIDLAND MESH CONFERENCE

Midland Mesh Conference™ is the technology that allows a perfect intercom communication in full duplex up to 10 people at the same time.

Each user can exit from the conversation and join it again whenever he desires, through an automatic connection with the complete group without “chains”.

BT MESH.

THE INTERCOM WITH MMC™ TECHNOLOGY

Communication up to 10 people in full duplex.
Up to 1.4 km.

Compatible with every Midland model via Bluetooth.

Compatible with other brand models through the **Universal Intercom function**.

MIDLAND®

ANNIVERSARY | 6 YEARS
1959-2019

MIDLAND, born in 1959 in a small factory in Kansas City, is today world leader in the radiocommunication and consumer electronics.

CTE International became part of Midland history in the 1970s thanks to an European commercial strategy and, in the 1990s, by acquiring a significant share of the American company, contributing to the brand success, all over the world.

A Group composed by over **15 branches and strategic partners**, and a network in over 90 countries, all under the leadership of the **Italian Headquarters**, based in Reggio Emilia.

It is the heart of Research and Development Department that has been carrying on the mission with a strong commitment:

“To realize a world where communicating is easy, fun and approachable to everybody”.

Midland produces with passion products of quality, technologically innovative. Products that respond to the real need of all of us: to communicate.

A success that has been going on for 60 years.
