RE: Revised 2023 and Later Model Year Light-Duty Vehicle Greenhouse Gas Emissions Standards, Docket ID No. EPA-HQ-OAR-2021-0208-0116

Dear Administrator Michael Regan,

The EPA should implement the strongest clean cars rule possible to effectively solve the climate crisis and protect public health. At a minimum, the EPA should reinstate the Obama-Biden era standards and ideally make them even stronger.

This proposed rule is not as strong as the Obama-Biden standards and is riddled with loopholes and giveaways to automakers that undermine otherwise strong emissions reduction targets. The EPA itself has identified a far more effective rule (Alternative #2), which would put 400,000 extra electric vehicles on the road by 2026 and result in 130 million fewer metric tons of greenhouse gas emissions. I urge you to adopt Alternative #2 to help clean our air.

Sincerely,

Adrian Cardwell, Knutsford, AA
