

Barth Syndrome  
Foundation

# PETITION TO FDA

FOR A FAIR, EQUITABLE AND  
APPROPRIATE **NDA REVIEW**

“

—————  
“Because I want the chance to live. **TRULY LIVE.** And not feel like an outcast.”

Christopher Pena Jr, Richland, Mississippi

“I have a 4-year-old son who has been through hell and back already at a young age. He is the 8th child in my family with this disorder and the **ONLY** one to survive. Give people like my son a fair chance to live as normal of a life as possible.”

Stacey Beth, Racine, Wisconsin

# FDA, Please Fairly Review the Only Potential Treatment for Barth Syndrome

Started September 12, 2023

Signatures collected through November 15, 2023

Petition to USA FDA:

Dr Robert Califf, Commissioner

Dr Patrizia Cavazzoni, CDER Director

Dr. Peter Stein, OND Director

Dr Hylton Joffe, OCHEN Director

Dr Norman Stockbridge, DCN Director

## Why this petition matters

Started by [Shelley Bowen](#)

My name is Shelley Bowen, and I am the Director of Family Services for the Barth Syndrome Foundation, representing families worldwide who suffer from a devastating, ultra-rare condition called Barth syndrome. I lost my two sons to this cruel disease, so I know first-hand what this horrible disease can do. Our community is a prime example of an ultra-rare disease that is struggling over the **lack of appropriate and consistent use of the flexibility granted to the FDA by Congress** to review clinical trial data for severe diseases that affect very few patients. This is a **systemic problem** affecting all who seek treatments for ultra-rare diseases.

Stealth BioTherapeutics began a clinical trial for the first-ever potential drug for Barth syndrome, called elamipretide, over five years ago. Very importantly, this drug is known to be **safe**. The treatment showed positive results in the initial trial period and multiple **statistically significant improvements** during the extension period of the study. Follow-on analysis also showed very positive cardiac improvements that **defied the disease's natural history**. And yet, the **FDA has refused to fully review a new drug application**.

Our affected individuals are dying all too young and all too often, and there are no approved therapies for our disease. **They need treatments!**

Below is one case study that further supports the very positive benefits of this drug:

**Declan is a wonderful baby who has Barth syndrome.** At eleven months old, he was admitted to a pediatric intensive care unit in acute heart failure that was so life-threatening that he was placed on a ventricular assist device (a machine that helped pump blood for his failing heart), and he was listed for a heart transplant.

Declan's genetic testing revealed that he has Barth syndrome, an ultra-rare **mitochondrial disease** which results in **cardiac dysfunction, severe skeletal muscle weakness, immune issues, and debilitating fatigue**. His doctors suggested his family consider an experimental drug, elamipretide, which had been tested in Barth syndrome clinical trials but was not yet approved by the FDA.

Less than three months after starting elamipretide, Declan's heart structure and function improved more than doctors ever expected. Declan also regained strength and energy. Now, after eight months on this treatment, Declan has had the ventricular assist device removed (*without* requiring a heart transplant), and he was recently discharged from the hospital. His doctors said that they are not aware of any other patient with Barth syndrome who was able to transition off a ventricular assist device without requiring a heart transplant. **His doctors credit elamipretide with making the difference.**

As we all celebrate Declan's prospect of a better life, we are distressed that his **access to elamipretide may be in jeopardy**. If this elamipretide program is discontinued, access to the drug will be denied to Declan and the other Barth syndrome patients who were in the trial and are still taking the drug. Like Declan's parents, our community worries that this will be disastrous for the health, strength, energy, happiness, and maybe even lives of all those affected by Barth syndrome.

In 2021, the FDA refused to file the new drug application for elamipretide. Several meetings have been held in which patients have voiced their strong desire to be able to try this drug, and much additional evidence has been presented demonstrating that this treatment is safe and delivers very meaningful benefits to Barth syndrome patients. And yet, the **FDA still refuses to consider it for approval**.

**Congress has authorized the FDA to use flexibility in these cases** where there are so few patients who can participate in trials. But there is real inconsistency in the actual use of this authority, and so far, the **FDA has refused to exercise this flexibility for Barth syndrome**.

**Those with Barth syndrome, like Declan, deserve more from the FDA!** We are **asking for a fair, equitable and appropriate review of elamipretide in Barth syndrome by the FDA** before we lose access to this drug, the only medicine currently in development for our life-threatening, ultra-rare disease.

On behalf of Declan, and the entire Barth Syndrome Foundation community, **please help us ask the FDA to incorporate the patients' perspective and fully review all the data now!**

## Signatures: 19,374

[Learn more](#) about Declan's journey from his mother and his doctor, Dr. Amy Goldstein, Medical Director, Mitochondrial Medicine Center, Children's Hospital of Philadelphia.

# Notable Voices

"Two of my cousins had sons with Barth Syndrome. Both boys are doing well but both have had heart replacements before they were even one year old. It's a horrible illness." Debbie Anaya, Borger, Texas

"I am a patient fighting mitochondrial disease daily and I know how life-changing it would be to have a treatment which would offer relief of symptoms. Even small changes to some could be life-giving changes to someone fighting these diseases!" April

Arguin, Jacksonville, Florida

"I'm signing because I have a 4-year-old son who has been through hell and back already at a young age. He is the 8th child in my family with this disorder and the ONLY one to survive. Give people like my son a fair chance to live as normal of a life as possible. To not be in so much pain, to gain weight, to be able to do things like basic hygiene care and not have to take a break or be in pain. ALL lives matter! Please help!" Stacey Beth, Racine, Wisconsin

"Mitochondrial diseases are very real and when they can be treated...DONT ROADBLOCK MEDICATIONS FOR THOSE WILLING TO TRY THEM IF THERE IS A CHANCE THEY WILL HELP!" Lisa Brightwell, Mechanicsville, Maryland

"The FDA inconsistency in exercising Congressional flexibility in the regulatory review process is woefully inadequate for people with ultra-rare conditions like Barth syndrome." Valerie Bowen, Newberry County, South Carolina "

"My boys have Barth syndrome and this could change their life." David Brody, Columbus Junction, Iowa

"Our two sons have Barth syndrome and this could be life changing for them. Please help!" Tracy Brody, New Ulm, Minnesota

"Every child deserves to get the help they need to survive" Dawn Brumley, Cleveland, Tennessee

"As a patient that is in the TAZPOWER study my daily life is so different than just a few years ago....I am thankful for this new quality of life. I look forward to seeing how much it can help others." Walker Burger, Montgomery, Alabama

"Please, we have a special friend that we hope and pray will continue to do well. He is in need of this medication! Please and Thank you!" Jesse Bustos, Monahans, Texas

"My grandson has Barth's syndrome and I want him to have every opportunity to live a full life. He is such a blessing to our lives...a joy!" Martha Clark, Puxico, Missouri

"A drug that has shown promise of safety and efficacy in treating a disease for which there are no other successful treatments should be automatically fast-tracked for review, and approval should that promise hold true. Hopefully the FDA will reconsider, allow review, and be true to their original mission of facilitating the availability of life and health saving medicines to the public." William Cody, Boston

"The alternative is death, or a life that is not worth living. This is exactly the type of flexibility that is required in life-or-death decisions. This is NOT about statistical noninferiority.... Total lack of compassion and common sense." Reuben Cohen, Chesterfield, Missouri

"Declan is my grandson. His progress on Elamipretide has been nothing short of miraculous! We don't want to think about what will happen to him if this drug is taken away! There are no other treatments for Barth Syndrome." Judith Comerford, Monroe Township, Middlesex County, New Jersey

"Children and people in general should be able to get medicine they need especially life altering and lifesaving" Deborah Cornelius, Millington, Tennessee

"I'm signing because I saw Declan's parents and the hospital staff at CHOP go through excruciating efforts just to keep Declan stable. They still fight, but the experimental use of elamipretide has given this family hope for a better future." Alex Delesky, Old Bridge Township, New Jersey

"I have a daughter with a progressive, ultimately fatal, ultra-rare neurodegenerative disease. We are also working toward developing a treatment for her and others with her disease and will need the FDA to reframe how it approaches clinical trials and approvals for ultra-rare disorders. Go Barth community--we are behind you!" Jocelyn Duff, Ipswich, Massachusetts

"Declan is my nephew. I was there day one at CHOP with his Parents, Grandparents and other Uncles in shock and disbelief at what happened and the grim reality of what could transpire for our little guy. Let me tell you firsthand, as an individual who doesn't have much faith in Pharmaceuticals, this drug (as well as his Nurses and Dr's) unequivocally saved my nephew's life. He is thriving. Well beyond any lofty, pie in the sky expectation any involved party had for him, he is thriving.

Elamipretide is seemingly the fountain of a whole new beginning for Barth patients. To go from being flatlined for the better part of 20 minutes, to a new life at home with his Family and much promise for a long life, within 9 tumultuous months, this seems an undeniable fact. It is absolutely imperative the FDA fairly review this study on elamipretide and allow these Children a fair shake at as normal a life as they could possibly have. I implore you, sign this and share, please."

Mike Dubuque, Hayward, California

"I love my grandson, Declan, and I experienced his fight for life." Alisa Dubuque,  
Manchester Township, New Jersey

"I have a daughter with a progressive, ultimately fatal, ultra-rare neurodegenerative disease. We are also working toward developing a treatment for her and others with her disease and will need the FDA to reframe how it approaches clinical trials and approvals for ultra-rare disorders. Go Barth community--we are behind you!"

Jocelyn Duff, Ipswich, Massachusetts

"I'm aware of someone who has benefited greatly from being treated with this Medication." RICK EASTON, Cornville, Arizona

"My son almost 25, suffers daily from this horrible disease. He's very intelligent, has a great job but most days he DOES NOT feel well. He just wants to be normal. The older he gets his condition worsens not only that he knows his life will be shortened. The mental stress this causes is too much on top of normal life! We want the same opportunity that other rare diseases receive. I'm begging the FDA to give this drug the chance to help as many people as possible."

Julie Fairchild, Roswell,  
Georgia

"As a physician I have seen the problems in Barth syndrome!" Annette Feigenbaum,  
San Diego

"My grandson has Barth Syndrome. To think there is a medication that could possibly help him and other children with Barth, please help them get this drug approved."

Joyce  
Garver, Pittsburgh, Pennsylvania

"PLEASE HELP, THESE CHILDREN NEED YOUR HELP, DONT LET ANOTHER CHILD SUFFER FROM THIS HORRIBLE DISEASE." Joan Gretschel, Waretown, New Jersey

"I signed because my Neighbor's son Wyatt has this horrible disease! I pray every day for Wyatt and that they'll come up with a cure or some way that these kids can live a long somewhat normal life!! ❤️" Lori Hadden, Gibsonia, Pennsylvania

"My family has been devastated by this syndrome and it's taken years to come up with a safe solution. Approve the drug already and save lives instead of playing politics." Chris Holbus, Neenah, Wisconsin

"My dear friend's son suffers from this extremely rare and life-threatening condition. The FDA has the power and responsibility to fairly review the clinical trial data for this medication, which has greatly helped those struggling with this devastating disease. These children and their families deserve a fighting chance! Please do the right thing." Anisha Kansal, Brooklyn, New York

"My nephew has Barth Syndrome and this could possibly save his life or at least make his life longer please don't let this opportunity to help these beautiful children and families" Matt Lackey, Ethel, Louisiana

"I cannot understand the FDA's reasoning, drugs with known serious side effects are approved all of the time, for much less detrimental issues, this is life or death!"

Christopher Loiacano, Fresh Meadows, Queens

"I was able to meet an individual with Barth Syndrome and he has forever changed my perspective on life. Such a positive energy with a passion for photography, who even knowing that he wouldn't spend much time on this earth, had such a joyful and giving soul. I would have loved to see him enjoy life longer." Teresa Loomis, Elyria, Ohio

"It would appear WITH the drug, there is a chance for improvement and survival and WITHOUT, the prospects are dim. FDA, seems like a no-brainer." Peter Mastrovito, Bensalem Township, Pennsylvania

"As a genetic counselor I have worked with boys and men impacted by Barth syndrome for more than 20 years. Treatments are desperately needed and I've seen firsthand the difference this medication can make in patient's lives." Rebecca McClellan, Baltimore, Maryland

"We just need FDA to review the overwhelmingly positive data supporting the efficacy of this drug." Susan McCormack, Wellesley, Massachusetts

"There is a drug that shows great promise for those with Barth syndrome, but it is not getting a fair evaluation at the FDA. This is ONLY because there are so few Barth patients that standard approaches cannot work. The FDA has the authority to use some flexibility for severe, ultra-rare diseases that have no other treatments (like Barth), but, so far, the FDA has refused to utilize this authority. Those with Barth deserve a chance at a brighter future!" Kate McCurdy, Boston, Massachusetts

"I am signing for my son Zephyr and Nephew Jack who were both diagnosed at birth with Barth Syndrome. Both received a heart transplant at 6 months old." TY MCMULLEN, California

"The government has approved Covid vaccines with less data than they normally would. In the case rare diseases, I think they should allow patients to have access to drugs with the understanding that they have had limited sample sizes for testing. if the patients are willing to risk it, let them have it." Laura Miller , Aurora, Illinois

"People with ultra-rare diseases, like Barth syndrome, need a fair chance at life-changing therapies!" Emily Milligan Clark, Colorado

"Come on FDA! It's not as though these kids have a lot of choices! The diagnosis is a death sentence!" Kathleen Mireault, Jamaica Plain, Massachusetts

"Barth syndrome patients have almost nothing to lose and everything to gain from the treatment." Patricia O'Connor Mebane, North Carolina

"My son and those suffering the same have the right to a chance of a healthy and normal life. To the world he may only be one person but to me he's my world! If they don't have to suffer, for this disease to claim their lives then, WHY?" Kristi Pena, Richland, New Jersey

"We feel like FDA is saying because there are only a few, those few don't matter!"  
Christopher Pena Jr, Richland, Mississippi

"My son almost,25, suffers daily from this horrible disease. He's very intelligent, has a great job but most days he DOES NOT feel well. He just wants to be normal. The older he gets his condition worsens not only that he knows his life will be shortened. The mental stress this causes is too much on top of normal life! We want the same opportunity that other rare diseases receive. I'm begging the FDA to give this drug the chance to help as many people as possible."

"Justin and Michael are sailing through life, going to school and working. They are keeping up with their peers and taking their new level of health and energy for granted. My two sons are 25% of the participants in the elamipretide study/trial. This gift of modern medicine should be available to every effected individual who can benefit from this new medication." Ethan Randell, Fremont, California

"A drug exists, but may not ever be available to people living with Barth syndrome. Not because it was deemed unsafe or ineffective; but because the FDA has not reviewed it fairly, consistently, completely, and with flexibility as authorized by Congress." Joanna Slyter, Tulsa, Oklahoma

"This is the one and only drug that has been found to treat patients of Barth Syndrome. The FDA must approve this drug." Wanda Stevens, Webster, Vernon County, Wisconsin

"I have a grandson with Barth Syndrome. It would have been wonderful if this had been available when he was diagnosed over 25 years ago. He got a heart transplant when he was two. And another when he was sixteen and is doing well." Wanda Threadgill, Cypress, Texas

"Our family has had 8 boys affected by Barth." Terry Unterbrink, Milwaukee, Wisconsin

"I've watched my son struggle for 23 years. He's beaten all odds against this deadly disease. The only time in his life he's had a reprieve is when he was on this medication. I know it works! I've seen it. It has no side effects. Just bc we don't have a large community does that mean we matter less? We are people too and deserve the same shake as everyone else! We're asking you to do WHAT IS RIGHT. Review the application!" Amy Wilson, Mississippi

# Alabama Voices - 135 petitioners

"As a patient that is in the TAZPOWER study my daily life is so different than just a few years ago. Now that I've been on the open label extension for nearly 4 years now, I'm just happier and more pleasant to be around I'm enjoying life more. I enjoy exercising an hour every other day. I am able to walk one mile without taking a break - that's four times longer than before. If someone were to ask me today "Do you have Barth Syndrome? I would say no, I HAD Barth Syndrome." I am thankful for this new quality of life. I look forward to seeing how much it can help others." Walker Burger, Alabama 36106

Listen to Walker [here](#)

"Elamipretide must be made and granted to the families of young children who are faced with Barth Syndrome. Help the families and doctors save these children." Darby Stone, Alabama 35749

"This medicine is needed NOW!" Susan Patterson, Alabama 35173

## Arizona Voices - 405 petitioners

" At 11-months-old, when we learned of his diagnosis, it sounded like there couldn't be a worse sentence for our baby. When offered the rare opportunity to receive the drug under compassionate use, we went into the process hopeful, but anticipated seeing only some heart improvement over time. It was always our intention to raise our son holistically. Giving him a shot every day of a drug or any drug was a huge leap of faith for us. A notable driving factor in our decision was that there have been extremely rare to no side effects reported with use. What we have received from accepting this opportunity turned out to be much more significant to Declan's hospitalization, recovery journey and quite frankly his existence. We expected to see our son struggle with the symptoms related to Barth, fatigue, muscle weakness as well as life-threatening cardiomyopathy, which historically would lead to transplant in an individual with the heart failure that Declan had. However, what we have observed in the last seven months is a child who doesn't have anything holding him back from living his precious life. He is not dealing with an energy deficiency or a debilitating disease. And the story of his heart recovery is one for the books. On May 1st, three and a half months on the drug, his heart was back to normal size and function. It is our understanding that it was very early to see improvement in a heart as sick as Declan's. Today, at 18-months-old, Declan is just days away from being discharged from PCH with his native heart, all while living his life with the energy and spirit of a healthy child. If this drug were no longer available for our son, it would devastate his ability to thrive and live the full and pain-free life that he deserves and has experienced over the course of his time on elamipretide. When I watch Declan live his life, I don't see a child with Barth syndrome. Because we have to as human beings to take care of our children." **Jamie**

Dubuque, Arizona 86335, speaking at Barth Syndrome Foundation advocacy event in August 2023

Listen to Declan's mother and doctor tell his story [here](#)

"Because we have to as human beings to take care of our children." Leslie Brehm, Arizona 86403

"I'm aware of someone who has benefited greatly from being treated with this Medication." Rick Easton, Arizona 86325

"It's important for these patients to have access to an effective treatment." Rosalie Malter, Arizona 86326

"No one much less a child should be denied medication." Kerry Reason, Arizona 86326

## California Voices - 2,447 petitioners

"To keep kids alive and thriving." Scott Anderson, California 94118

"Although my child doesn't have Barth syndrome, I know all too well what it's like to have a child with a rare disease and no treatment. These children deserve treatments and a fighting chance." LeeAndra Archdeacon, California 95682

"I am signing because I myself suffer from immune diseases and I suffer day and night from all the symptoms that come with this illness, and no cure only medicine to relieve some symptoms 20 years + years and still hope one day I will get better before I die with a medication that heals me completely. That's why I want to see this baby continue getting better and hope FDA thinks twice before ignoring this treatment that can save life's maybe one day it will be their family member that needs a saving life treatment." Manuela Ayard, California 90660

"Babies (or anyone) with a fatal condition should have access to experimental life-saving drugs during the trial period." Kae Bender, California 93536

"This is obviously very much needed..." Gayle Bottom, California 92376

"WE PAY YOU TO PROTECT, NOT TO PLAY GOD WITH CHILDREN'S LIVES SO APPROVE THIS NOW...!" Heather Brody, California 93110

"I believe children need to have every chance to survive possible." Metta Brown, California 96880

"I think this is an extremely important drug that could help the patients and families affected by the disease." Anthony Castaneda, California 94661

"My son has a different rare disease with no cure so I understand the importance of getting drugs that are helping approved. It is only right." Julie Cosgrove-Garcia, California 95819

"Declan is my nephew. I was there day one at CHOP with his Parents, Grandparents and other Uncles in shock and disbelief at what happened and the grim reality of what could transpire for our little guy. Let me tell you firsthand, as an individual who doesn't have much faith in Pharmaceuticals, this drug (as well as his Nurses and Dr's) unequivocally saved my Nephews life. He is thriving. Well beyond any lofty, pie in the sky expectation any involved party had for him, he is thriving. Elamipretide is seemingly the fountain of a whole new beginning for Barth patients. To go from being flatlined for the better part of 20 minutes, to a new life at home with his Family and much promise for a long life, within 9 tumultuous months, this seems an undeniable fact. It is absolutely imperative the FDA fairly review this study on elamipretide and allow these Children a fair shake at as normal a life as they could possibly have. I implore you, sign this and share, please." Mike Dubuque, California 94544

"As a physician I have seen the problems in Barth syndrome!" Annette Feigenbaum, California 92120

"Saving lives is the reason that should drive the FDA..." Stephanie Horsley, California 90027

"I am signing for my Son Zephyr and Nephew Jack who were both diagnosed at birth with Barth Syndrome. Both received a heart transplant at 6 months old." Ty McMullen, California 91710

"Justin and Michael are sailing through life, going to school and working. They are keeping up with their peers and taking their new level of health and energy for granted. My two sons are 25% of the participants in the elamipretide study/trial. This gift of modern medicine should be available to every effected individual who can benefit from this new medication." Ethan Randell, California 94539

"Dear FDA, Over 10 years ago I was assigned to a baby admitted to our Pediatric Critical Care Unit in CHF, which turned out to be Barth Syndrome! I do not understand why you refuse to accept this drug for review. Please fully review this new drug application!!" Kathleen Shiring, California 94702

"Every person deserves the chance to live so I'm requesting that this is granted ASAP." Valentina Vazquez, California

"Trial meds should be allowed for all diseases and conditions." Troy Wanstreet, California 95112

## Colorado Voices - 330 petitioners

"To save lives" Nathan Frihauf, Colorado 80654

"The world we live in now is cruel and unfair enough as is. FDA....do the right thing and give all of the people/children a chance to live the happy and pain free life they deserve!!"  
Janet Green, Colorado 81401

"We need to give every ounce of our knowledge and support to our babies to make sure they live a healthy life as soon as possible" Tara Gray, Colorado 80228

"Babies w this rare disease should have the chance they need to live" Kimberly Koury, Colorado 80241

"People with ultra-rare diseases, like Barth syndrome, need a fair chance at life-changing therapies!" Emily Milligan, Colorado 80428

Listen to Emily's testimony to Senate Aging Committee [here](#)

"My 10-month-old son passed from ACAD9 Deficiency the day he was supposed to start Elamipretide. We were told he couldn't start it until 1 year but I advocated for earlier because his EF was 17%. I wish we could have started it when it was still 34%! There shouldn't be so much red tape on all of these life-saving drugs for our babies!!" Hannah Rushing, Colorado 80214

## Delaware Voices - 50 petitioners

"That beautiful little boy deserves to live. And his Mom is my niece." Greg Arena, Delaware 19709

"Ultra rare diseases need representation! The FDA should review the drugs even though they may save few babies they each deserve a chance." Carol Taylor, Delaware 19968

## Florida Voices - 1,243 petitioners

Listen to Deacon's story (his parents Brandi and Nick are signatories) [here](#)

October 19, 2023 Thank you to Congressman Bilirakis (FL-12) for meeting with our Barth syndrome advocates in New Port Richie, FL on October 16, 2023.

As the Co-Chair of the Rare Disease Congressional Caucus, Congressman Bilirakis has been working with his legislative colleagues to improve policy and uniformity across the FDA for the review of rare disease therapy and product applications. The vast majority of the more than 10,000 rare diseases, which includes Barth syndrome, collectively impact more than 30 million Americans, yet have no FDA-approved treatment. BSF applauds the Congressman for

his leadership in working with the FDA to address the challenges associated with developing treatments and hopes his work will pave the way for consistency and fairness in the review process of new drug applications.

"I am a patient fighting mitochondrial disease daily and I know how life-changing it would be to have a treatment which would offer relief of symptoms. Even small changes to some could be life-giving changes to someone fighting these diseases!" April Arguin, Florida 32207

"This drug warrants review by the FDA. The patients deserve this." Brandi Dague, Florida 33021

"For Milosch." Tim Edwards, Florida 33324

"Every child deserves a chance at life." Anne Ehrlichmann, Florida

"Treatment needs to be ramped up and offered to protect those with this disease. The trial study showed promise and should be released." Lynn Goettel, Florida 33668

"I am signing because while rare, Barth Syndrome has affected my friends and their family. You may know someone too. Elamipretide is the only potential treatment. FDA, give it a fair review!" Jennifer Lee, Florida 34990

"We need a treatment!" Rachel Leonard, Florida 32514

"In a brief review of related literature this treatment as stated in the petition appears to be the ONLY treatment in trials that has produced positive improvements in various animal and human trials. As it's estimated that Barth syndrome affects roughly 1:300,000-1:450,000 and may go undiagnosed or incorrectly diagnosed with traditional treatments treating symptoms only, I believe it would be criminal not to pursue further clinical human trials. If elamipretide actually improves heart function and development as data suggest

from essentially genetic treatment of mitochondria it has the potential to truly heal those with Barth's syndrome at a very young age. Many with Barth's syndrome see significant improvements after puberty. Barth syndrome patients typically have average intelligence but often have mild to moderate learning disabilities. If the disease can be treated prior to children entering the education system they will like have less of a burden to the education system..." Viron Payne, Florida 32922

"If it helps the people with a rare condition, why not? How will we know if we don't try it? Who knows, this may lead to a breakthrough with another similarly rare disease." Lorraine Roy, Florida 32792

"SIMPLY THE RIGHT THING TO DO!!" Howard Stafford, Florida 34482

"These children should be given every chance" Stephanie Smith, Florida 32211

"THESE Families Need This...I Support Families." Kathy Sutter, Florida 33463

"FDA needs to approve this drug - not only for the benefit of those with Barth Syndrome, but also for all those affected by mitochondrial disorders (Long-COVID, Myalgic Encephalomyelitis, etc) who might also be helped by this drug. If FDA can approve that new Alzheimer's drug with minimal scientific information (and then allow it to be pushed onto patients by Medicare), then the FEA can certainly approve this drug to help those in great need Mitochondrial disorders are proving to not be as rare as previously thought - it's just that the various foundations haven't yet linked up - so these diseases might not be as rare or "ultra rare" as previously thought. FDA approving this drug helps improve health research and care. Please approve it now." S Young, Florida 32607

## Georgia Voices - 468 petitioners

"My son, almost 25, suffers daily from this horrible disease. He's very intelligent has a great job but most days he DOES NOT feel well. He just wants to be normal. The older he gets his condition worsens not only that he knows his life will be shortened. The mental stress this causes is too much on top of normal life! We want the same opportunity that other rare diseases receive. I'm begging the FDA to give this drug the chance to help as many people as possible." Julie Fairchild, Georgia 30075

"My daughter has a genetically confirmed disease called MEGDEL Syndrome. It is caused by mutations in SERAC1 gene which is a nuclear gene. The disease is also a disorder of phospholipid metabolism. It is ultra rare like Barth Syndrome. The published statistics are not accurate as I have found many diagnosed with MEGDEL since 2018. Many found have died already. So it seems like the FDA does not want to invest in finding a treatment for a small population, but I believe that the population it could help is much larger! My daughter's life is important! Finding a cure for any amount of people is important!" Maria Famularo-Romesburg, Georgia 30044

"A friend's son lives with this - this can make easier." Kristi Moore, Georgia 30022

"My friend's son needs this medicine!!!" Jeanne Ryan, Georgia 30076

"This is a much-needed medicine to help children afflicted with this terrible disease." Katrina Smith, Georgia 30092

"It's just the right thing to do. I hope the FDA gets a conscience and does the right thing, too." Neva Wise, Georgia 30309

## Hawaii Voices - 76 petitioners

"The FDA must do its job and stop horsing around. It is crucial that they do testing on this drug. Children are dying from Barth Syndrome and this drug miraculously worked for Declan, and will likely work on others. This could possibly be the miracle cure for this disease so the FDA must do everything it can to expedite testing on this drug. It's a matter of life or death, and they need to take this experimental drug seriously. I pray that they immediately do whatever it takes to study this drug in hopes that it could help everyone suffering from this deadly disease." Joslynn Young, Hawaii 96732

"While I am not personally affected by Barth syndrome, I can closely relate because I have a loved one who also suffers from a different multi-system disease. Everyone deserves a chance to try a therapy with the potential to make their lives fuller and experience some sense of normalcy. FDA, please fairly review elamipretide. It has been life-changing for so many with Barth syndrome." Melissa Huang, Hawaii 96813

## Illinois Voices - 677 petitioners

Wally, who lost an older brother to Barth syndrome, has had a heart transplant. Listen to his and his family's story [here](#) - Wally and his parents live in Chillicothe, IL and have signed the petition.

"I have what looks to be zero negative Myasthenia Gravis and as RN have gone through hell to get care, currently only symptomatic medication. My cane and I stand with anyone facing a rare disease struggling to be recognized, treated. hugs." Cheryl Carlson, Illinois, 61832

"Good luck with this cause." Eric Lyons, Illinois 60012

"The government has approved Covid vaccines with less data than they normally would. In the case of rare diseases, I think they should allow patients to have access to drugs with the

understanding that they have had limited sample sizes for testing. If the patients are willing to risk it, let them have it." Laura Miller, Illinois 60502

## Indiana Voices - 261 petitioners

"There are over 7,000 rare, progressive, and serious diseases known to man. It is estimated that 95 percent lack treatment. Yet in my time as a Senator, there has not been one Senate hearing to examine access to promising therapies for people with rare, progressive, and serious diseases. This room is packed with people, patients, and caregivers that live this reality every single day. There are:

People that watch their bodies deteriorate in real time.

Family members who have seen their loved one go from the picture of health to knocking on death's door.

Parents that buried their children before they'd even started school.

I want to recognize and thank each one of you here in the audience. Chairman Casey, in response to this hearing, our Committee has received over 350 letters from Americans across 44 states sharing stories about their personal experiences with rare, progressive, or serious illnesses. I ask unanimous consent to enter these letters into the record. A wide variety of disease groups are represented in these submissions, including ALS, DIPG- an extremely aggressive pediatric cancer, and Barth Syndrome-an ultra-rare genetic disorder that regularly results in death from heart failure before a child's fifth birthday.

Importantly, none of the diseases that our constituents have contacted us about have any form of FDA-approved treatment. These diseases are relentless, widespread, and

devastating. Most are considered a death sentence. But they are not invincible, and our constituents are not hopeless. Patients deserve a promising pathway at the FDA." Listen [here](#) to Senator Braun's full remarks.

"If there is a potential treatment for this no matter the stage of trials you should be able to participate. It's devastating to watch someone die when there are trials that may be able to help or stop a disease." Tom Roberts, Indiana, 46074

"I care about someone who has Barth Syndrome!" Ann Smith, Indiana 46201

"If the FDA can approve a vaccine that didn't even work and caused more harm for a brand-new virus, then these parents deserve the opportunity to try this drug with their children born with a death sentence." Kelli White, Indiana 47374

"Needs attention." Donald Wleklinski, Indiana 47803

"My friend's oldest son suffers from this life-threatening disease. I am signing this petition directed at the FDA asking them to fairly review a lifesaving medicine. There's virtually zero side effects...it can help not only her son but other boys/men around the US &...throughout the world, live a normal life." Melanie Yates, Indiana 47130

## Kansas Voices - 155 petitioners

"We simply cannot comprehend why FDA holds ultra-rare disease populations to the same definitionally impossible standards as they do with diseases like cancer that affect tens and hundreds of thousands of people," said Bryan D (Kansas 66219), father of Abram who has Barth syndrome, at his meeting with Congressional legislators in 2022 ([here](#)). "We need Accelerated Approval by the FDA to realize the first-ever life-enhancing therapy for our boys with Barth syndrome."

Learn about Abe, whose parents Erin and Bryan are petitioners, [here](#)

"It's the right thing to do." Amy Schroeder, Kansas 66062

## Maryland Voices - 337 petitioners

"I'm really disturbed.... What on Earth do we have to do to let people with fatal diseases get access to whatever drugs they think will help them as long as they sign a waiver of responsibility. Go ahead and ask [FDA] what they'd do if they were in the situation where someone had a cure, but wouldn't allow them to have it, despite having no responsibility if it failed to work. Also, write your Congressman and Senators. They should be holding hearings." Bob Braunstein, Maryland 20814

"Mitochondrial diseases are very real and when they can be treated...DONT ROADBLOCK MEDICATIONS FOR THOSE WILLING TO TRY THEM IF THERE IS A CHANCE THEY WILL HELP!" Lisa Brightwell, Maryland 20659

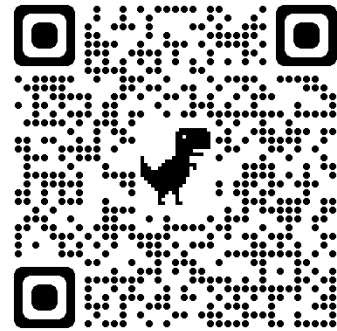

"Please help my nephew live a full childhood. His family has endured more than any family should, and it's been miraculous he's made it this far. This petition can help him to the finish line. Please take 5 minutes to share the link with your family and friends." Thomas Comerford, Maryland 21054

Listen to Dr. Hilary Vernon, who runs one of only two multi-disciplinary clinics treating Barth syndrome worldwide at Johns Hopkins Kennedy-Krieger Institute, speak to the Senate Aging Committee on October 26, 2023 [here](#)

Dr Vernon has published extensively on the natural history of Barth syndrome including [here](#) and [here](#) and [here](#) and on elamipretide clinical trial data including [here](#) and [here](#) and [here](#)

Meet Conor, living with Barth syndrome, [here](#)

## Massachusetts Voices - 556 petitioners

"A drug that has shown promise of safety and efficacy in treating a disease for which there are no other successful treatments should be automatically fast-tracked for review, and approval should that promise hold true. Hopefully the FDA will reconsider, allow review, and be true to their original mission of facilitating the availability of life and health saving medicines to the public." William Cody, Massachusetts 02124

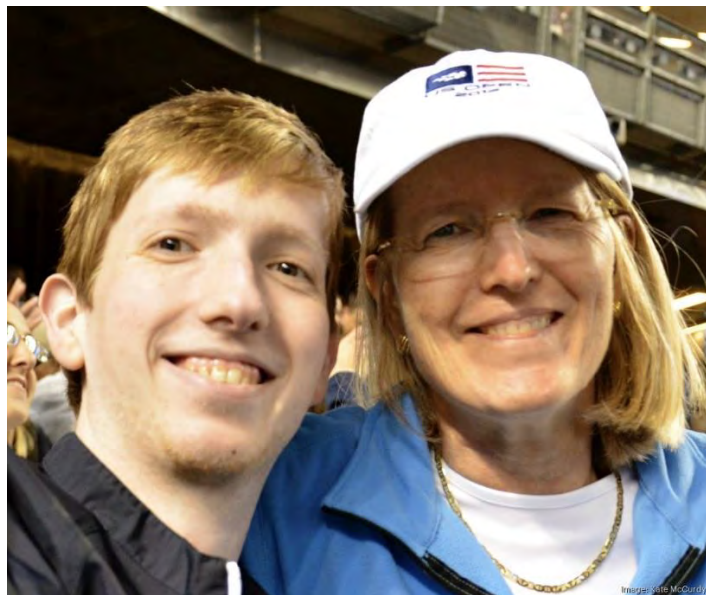

"Come on FDA! It's not as though these kids have a lot of choices! The diagnosis is a death sentence!" Kathleen Mireault, Massachusetts 02130

"EVERYONE needs a fair chance in life!!" Daniel Castro, Massachusetts 02210

"I have a daughter with a progressive, ultimately fatal, ultra-rare neurodegenerative disease. We are also working toward developing a treatment for her and others with her disease and will need the FDA to reframe how it approaches clinical trials and approvals for ultra-rare disorders. Go Barth community--we are behind you!" Jocelyn Duff, Massachusetts 01938

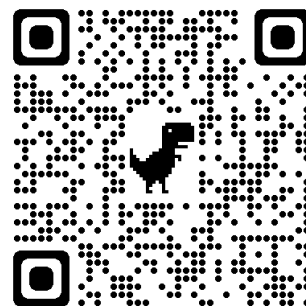

"I have a rare immune deficiency not as serious as Declan but I understand the need for access to life saving drugs. If a disease is pretty much a death sentence then there is absolutely no reason whatsoever to not push through, approve and make a drug available that shows any improvement. It's not risking anything. What's the logic in not letting them at least try? Give them a chance, give them hope." Carolyn King, Massachusetts 02324

"There is a drug that shows great promise for those with Barth syndrome, but it is not getting a fair evaluation at the FDA. This is ONLY because there are so few Barth patients that standard approaches cannot work. The FDA has the authority to use some flexibility for severe, ultra-rare diseases that have no other treatments (like Barth), but, so far, the FDA has refused to utilize this authority. Those with Barth deserve a chance at a brighter future!" Kate McCurdy, Massachusetts 02116

Read Kate's opinion on why FDA's rare disease approvals are imperiled [here](#)

"We just need FDA to review the overwhelmingly positive data supporting the efficacy of this drug...!" Susan McCormack, Massachusetts 02481

Susan and Tyler, living with Barth syndrome, met with Rep Auchincloss in August, 2023. Read Tyler's perspective [here](#).

## Mississippi Voices - 266 petitioners

"❤️ bad treatment options are approved all the time...why when something [that seems to be] safe and effective comes along that actually helps people does it not get approved. Prayers for your baby!" Laine Bailey, Mississippi 39211

"I have 2 loved ones with a rare disease and they are being looked over by the FDA and upper administration" Krystal Bell, Mississippi 39208

"Because this is a drug that is proven to help . Monica Cochran, Mississippi 39208

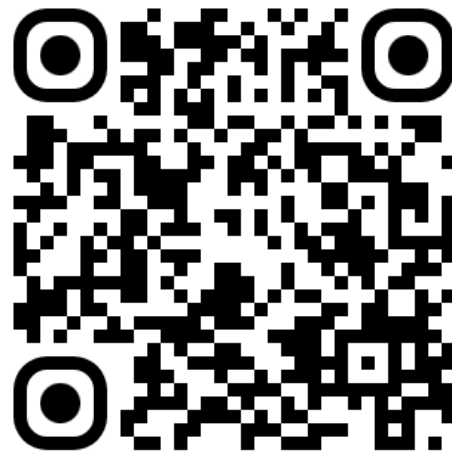

"For Christopher and Jacob!" Kristen Fanshier, Mississippi 39071

"We shouldn't have to sign a petition for this our children should be our number one priority!" Theresa Kelly, Mississippi 39145

"Cause I know more than one kid that needs this medicine!! If the medicine works give it to them!!" Jessica Nicole, Mississippi 39208

"Because I want the chance to live. TRULY LIVE. And not feel like an outcast." Christopher Pena Jr, Mississippi 39218

Christopher's mother writes: "This is how I see him more often than not...This disease is physically debilitating as well as isolating and it affects him mentally and emotionally in addition to the life-threatening state he lives in daily." Learn about Christopher's story [here](#)

"These children who are left have already withstood so many things to get as far as they have unfortunately there has been alot that hasn't... they don't get many chances for change... please help these children and their families realize there is still Hope and give this medication a chance...it can't hurt worse than being faced with the daily situations in life they already have currently..." Lindsey Graham, Mississippi 39073

"I went to School with 2 great sisters who both have kids with Barth Syndrome." Stephanie Lucas-Nelson, Mississippi 39657

"My son and those suffering the same have the right to a chance of a healthy and normal life. To the world he may only be one person but to me he's my world! If they don't have to suffer, for this disease to claim their lives then, WHY?" Kristi Pena, Mississippi 39218

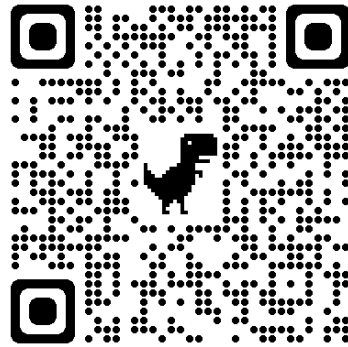

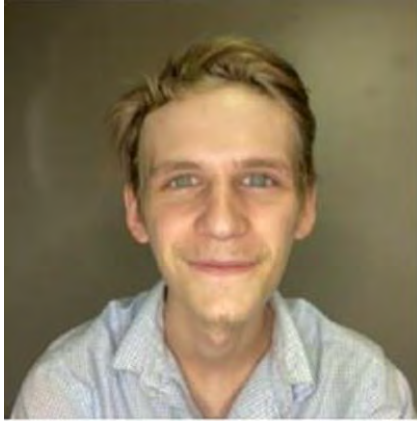

Listen to Kristi [here](#)

"Please help my friend Amy and her son Jacob ❤️" Tiffany Phillips, Mississippi 39401 USA

"There is a need for someone I know to have a better quality of life! And he deserves that opportunity." Alicia Sanford, Mississippi 39042

"All children deserve to enjoy life as it's lived everyday by the majority of people but not those with Barth. Please get these children the help they need." Sandi Tucker, Mississippi 39042

"I know this medication works. I've seen it with my own eyes. No side effects. Yes our community is small in numbers but why should we matter less? I'm tired of seeing our people struggle to get by and even live. Do what is right and REVIEW THE APPLICATION. Please I do not want to bury my child. Think if it was your child, grandchild, nephew, niece, husband, wife, etc. how would you feel? I would love to sit down and ask the people face to face, what would they do if this was their child, grandchild, spouse, etc.? These people may not matter to them and they think oh well not so many but to us, these people are our WORLD?!? How can you sleep at night knowing you are legally murdering our loved ones?!? You are being paid by us! Do your job. Review the data! We have jumped through every hoop you've asked us to. Now, it's time do do what is right, what we've been asking for 5 years now! I've watched my son struggle for 23 years. He's beaten all odds against this deadly disease. The only time in his life he's had a reprieve is when he was on this medication. I know it works! I've seen it. It has no side effects. Just bc we don't have a large community does that mean we matter less? We are people too and deserve the same shake as everyone else! We're asking you to do WHAT IS RIGHT. Review the application!" Amy Wilson, Mississippi 39042

## Missouri Voices - 306 petitioners

"My grandson has Barth's syndrome and I want him to have every opportunity to live a full life. He is such a blessing to our lives...a joy!" Martha Clark, Missouri 63960

"Please approve" Erin Goth, Missouri 64735

"Rare diseases need attention - even though they don't "bring in the money and accolades" that major diseases do. Let families choose these options - they MUST try every option to save their loved one's - or their own - lives. FIND A WAY TO ALLOW FOR THIS!!!" Carole Scott, Missouri 63130

"The alternative is death, or a life that is not worth living. This is exactly the type of flexibility that is required in life-or-death decisions. This is NOT about statistical noninferiority.... Total lack of compassion and common sense." Reuben Cohen, Missouri 63005

"This is the humane thing to do. Best wishes to all of these families." Sherry Samples, Missouri 64167

"When my aunt died I remember my grandmother saying that "In this day and age no mother should have to bury her child." But we know it happens for many reasons and far too often. This, however, might be an example of deaths which could be stopped. That's why I'm signing." Teresa Myers, Missouri 65807

## Montana Voices - 32 petitioners

"Since there is no alternative medicine, and if the families of those receiving it are willing to sign a hold-no-fault document, I can see no reason to not pursue this possible live saving medication for those who could benefit." Barbara Cole, Montana, 59474

## New Jersey Voices - 957 petitioners

"Declan is my grandson. His progress on Elamipretide has been nothing short of miraculous! We don't want to think about what will happen to him if this drug is taken away! There are no other treatments for Barth Syndrome." Judith Comerford, New Jersey 08831

"God Bless!" Mark Cedrone, New Jersey 08850

"En solution pour les enfants atteints de cette maladie" Virginie Delwart, New Jersey 07922

"I'm signing because I saw Declan's parents and the hospital staff at CHOP go through excruciating efforts just to keep Declan stable. They still fight, but the experimental use of elamipretide has given this family hope for a better future." Alex Delesky, New Jersey 08857

"I love my grandson, Declan, and I experienced his fight for life. I've been trying to get more people to sign this petition every day because that's all I can do for my grandson Declan. You see, he lives thousands of miles from me and I'm always worried I may not be able to hold him again. Thank God he's still getting his medicine and is still doing well. However, if this drug becomes unavailable to him, I'll be crying every day." Alisa Dubuque, New Jersey 08759

"I have a daughter with Jordan's syndrome... an ultra rare disease and we are seeking a cure. All our children deserve better from the FDA" Andrew Fruhschien, New Jersey 07016

"PLEASE HELP, THESE CHILDREN NEED YOUR HELP, DONT LET ANOTHER CHILD SUFFER FROM THIS HORRIBLE DISEASE." Joan Gretschel, New Jersey 08758

"I believe in the drug." Randell Hollingsworth, New Jersey, 08820

"This drug is helping others." Mandi Kautz, New Jersey 08609

"This should be available for Declan!" Kelly Larkin, New Jersey 08638

"Sounds like the medication has helped kids. Is Bureaucratic red tape holding up action? Children are dying from this disease. Get a move on already." Marilyn Lesslie, New Jersey 07042

"Rare diseases need funding! Our children are worth it!" Joy Safro, New Jersey 07652

"My friend's grandson almost died from Barth's. He wasn't even a year old, yet. This medication has helped to heal his heart & has finally allowed him to leave the hospital to lead a normal life." Kristine Schmidt, New Jersey 08618

"[Expletive] red tape bull\_\_\_\_." Dylan Wagner, New Jersey 07071

"My friend's beautiful little grandson, Declan's life literally depends on his access to this drug. I truly hope and pray that you approve this drug so Declan may live. Barth Syndrome is very rare and I hate to think that it would not be approved because the margin for profit would be low. Approve this drug! Thank you." Jacklyn Winters, New Jersey 08753

## New Mexico Voices - 109 petitioners

"FDA-You Work for the People. Get the Lead Out and Immediately Review All Data for elamipretide, the Only Medicine Available for Life Threatening Ultra Rare Diseases like Barths Syndrome. It Seems A No-Brainer To Consider and Incorporate the Parents' Perspective. WHY Didn't You File the New Drug Application for Elamipretide In 2021? Get With The Program, FDA Slackers. We're Watching." Elizabeth Trujillo, New Mexico 87531

## New York Voices - 1,200 petitioners

Read about Lynda, mother of two boys affected by Barth syndrome (one deceased), and her advocacy efforts with Rep Tonko, leading to recognition of Barth Syndrome Awareness Day on April 5, 2023 [here](#)

"I CARE." Lori Alicie, New York 14607

"My dear friend's son suffers from this extremely rare and life-threatening condition. The FDA has the power and responsibility to fairly review the clinical trial data for this medication, which has greatly helped those struggling with this devastating disease. These children and their families deserve a fighting chance! Please do the right thing." Anisha Kansal, New York 11217

"I care for children." Taran Kaynes, New York 10003

"It is vital that FDA provide access to medication that has been proven to work! All who suffer deserve access." Julie Kinch, New York 10538

"I believe this can save lives." Michele Lewis, New York 10538

"I cannot understand the FDA's reasoning, drugs with known serious side effects are approved all of the time, for much less detrimental issues, this is life or death!" Christopher Loiacano, New York 11365

"My son is affected by Barth syndrome." Joanna Patsalos, New York 11772

## North Carolina Voices - 474 petitioners

"Access to treatment for someone with a severe disease should not be limited by how many other people have the same disease." Lisa Burger, North Carolina 27529

"Babies are worth saving there shouldn't be another one lost to this when there is medicine. If you can shove a vaccine through for COVID you can surely after years of testing approve this life saving medication." Leigh Ann Christian, North Carolina, 28314

"It is an important matter." Marilyn Ewewe, North Carolina 27215

"Barth syndrome patients have almost nothing to lose and everything to gain from the treatment." Patricia O'Connor, North Carolina 27302

"Rare diseases need treatments!" Maria Decavi, North Carolina 27376

## Ohio Voices - 464 petitioners

"My dear friend Milosh has Barth Syndrome." Leslie Dahring, Ohio 45202

"I was able to meet an individual with Barth Syndrome and he has forever changed my perspective on life. Such a positive energy with a passion for photography, who even knowing that he wouldn't spend much time on this earth, had such a joyful and giving soul. I would have loved to see him enjoy life longer." Teresa Loomis, Ohio 44035

"They have their people there who have the disease they can follow their progress. It looks promising and a no brainer. Give them hope" Mike Weldon, Ohio 43209

"Recognize Barth syndrome as an awful disease." Hermine Willey, Ohio 43213

## Oklahoma Voices - 121 petitioners

"A drug exists, but may not ever be available to people living with Barth syndrome. Not because it was deemed unsafe or ineffective; but because the FDA has not reviewed it fairly, consistently, completely, and with flexibility as authorized by Congress." Joanna Slyter, Oklahoma

"I know someone with Barth Syndrome." Ashley Stanton, Oklahoma 74037

## Oregon Voices - 237 petitioners

"Helping children be as healthy as possible is a human right!" Brennan Armacost, Oregon 97212

"My sons have left ventricular dilated cardiomyopathy due to Barth Syndrome. They are taking elamipretide injections through an extended label research study through Johns Hopkins Medical Center and Stealth Biopharmaceuticals. This medication is keeping them medically stable. Due to having a rare disease and the limitations to qualify as a participant in the study there were only eight subjects. The FDA has the ability to evaluate data for rare diseases but is putting their brakes on." Jay Randell, Oregon 97330 (on social media requesting support for petition.)

"Important petition. I would want to know what issues the FDA has with this drug" Terry Weiss, Oregon 97330

## Pennsylvania Voices - 823 petitioners

"Everyone deserves a fighting chance." Terry Eckendahl, Pennsylvania 15044

"My grandson has Barth Syndrome. To think there is a medication that could possibly help him and other children with Barth, please help them get this drug approved." Joyce Garver, Pennsylvania 15044

"I signed because my Neighbor's son Wyatt has this horrible disease! He's the most caring, loving and all around great kid you'll ever meet!! His heart is pure!! It makes me so sad when I know he's not able to do things because he's either so tired or he's sick!! I pray every day for Wyatt and that they'll come up with a cure or some way that these kids can live a long somewhat normal life!! ❤️" Lori Hadden, Pennsylvania 15044

"I would like to Declan get the help he needs." Gail Lupo, Pennsylvania 19104

"Family !" Angel Maldonado, Pennsylvania 19114

"It would appear WITH the drug, there is a chance for improvement and survival and WITHOUT, the prospects are dim. FDA, seems like a no-brainer." Peter Mastrovito, Pennsylvania 19020

"Every child needs a chance to live a productive life." Beata Miller, Pennsylvania 16364

"I love life ❤️." Claudia Stierheim, Pennsylvania 15108

Advocating for Fair and Appropriate FDA Review of Elamipretide

South Carolina  
Walker Truluck and Grant Singleton  
Aaron Larson

"The FDA inconsistency in exercising Congressional flexibility in the regulatory review process is woefully inadequate for people with ultra-rare conditions like Barth syndrome." Valerie Bowen, South Carolina 29108

Listen to Shelley's plea to FDA [here](#). Read about Shelley's participation in an FDA listening session [below](#)

**BSF Listening Session With the FDA:**  
 Barth syndrome patient and caregiver perspectives on tolerance for less certainty of treatment benefit.

In making any health care decision, each individual and his/her family must consider risks and benefits associated with various courses of action. But generally, we spend most of our time and effort thinking about the risk side of that equation: What is the safety profile of the product? How likely am I to experience adverse side effects? What if there is some unknown risk? In serious and life-threatening conditions, the choice to forego treatment itself comes with its own risks – the risks of continued or progressive morbidity and disability in addition to potential severe clinical events and even death. It is well-established that patients living with such chronic serious and life-threatening conditions have a higher tolerance for safety risks, both known and unknown.

On March 3, 2021, the Barth Syndrome Foundation (BSF) held a Listening Session with 28 participants from various areas within the U.S. Food and Drug

Administration (FDA) to discuss just this topic. In attendance were representatives from both the Center for Drug Evaluation and Research (CDER) Division of Cardiology and Nephrology and the Division of Rare Diseases and Medical Genetics, as well as representatives from the Center for Biologics Evaluation and Research (CBER). BSF and the global Barth syndrome (BTHS) community requested a meeting, which the FDA welcomed, and then a carefully considered list of specific and highly thought-provoking questions for BTHS patients and caregivers to address was created. This provided first-hand accounts of whether and to what degree the BTHS-patient community would be willing to tolerate benefit uncertainty relative to that which is typically demonstrated in more common conditions for which multiple, large studies are able to be conducted.

But there is another side to all this – the uncertainty of a treatment's benefit. What

if it is not clear exactly what the benefit might be or whether, even if there is positive outcome for some people, it might not occur in all individuals? **This is a common situation that is faced in the rare disease community.** In most rare disease clinical trials, the number of participants involved simply cannot be large enough to produce the high levels of statistical confidence we all strive to achieve. However, patients have not systematically had the opportunity to provide their preferences around their tolerance for less certainty of treatment benefit.

The Barth syndrome community fully understands and completely concurs with a comment made by Dr. Norman Stockbridge (Director, Division of Cardiology and Nephrology, CDER, FDA) during the meeting that not all approved drugs work for everyone. Yet we know that drugs are approved even with this uncertainty, Kate McCurdy pointed out that, by her records, her son tried 92 different medications (79 of which were prescriptions drugs) during his 28-year life, and they surely did not all give him benefit. If they didn't work, he would move on, but he was very accustomed to that kind of uncertainty and would keep trying new approaches to see what might help him.

She emphasized a point made by one of the discussants in slightly different words: that our community is very concerned about the possible commission of a Type 2 error, also known as a false negative conclusion, in which a drug really works but it is concluded that it doesn't. It would be a tragedy to let a relatively safe, potentially very helpful medication for an ultra-rare disease with no treatments pass by just because the data could not provide confidence levels on a par with those for common diseases. The patients should be given a choice as to whether or not they

want to try such a treatment to see if it offers them any benefit.

**Representatives of the Barth syndrome community conveyed the following messages:**

- There is a dire unmet need for a treatment for our serious and life-threatening ultra-rare disease.
- We are an informed, thoughtful and engaged patient community who are willing to participate in clinical studies and trials.
- There is a high tolerance for uncertainty, including uncertainty of treatment benefit.
- Life itself is a basic human goal, but quality of life also is crucial. Reflecting just how challenging and life-constraining Barth syndrome can be, a number of patients and caregivers even stated that they would choose a better, somewhat shorter life to a much more difficult, longer one.
- We understand that not everything will work for everyone but there is an eagerness to have treatments to try, given the very bleak alternative.

The BTHS community thanks the FDA very much for this opportunity, particularly Chris Melton (Professional Affairs and Stakeholder Engagement Staff, CDER, FDA), Dr. Norman Stockbridge, and Dr. Patroula Smpokou for their partnership in planning this meeting. We are especially grateful for the interesting and truly thought-provoking questions that the FDA posed to us, as well as the time to discuss our patient and caregiver perspectives.

## Texas Voices – 1,646 petitioners

"Two of my cousins had sons with Barth Syndrome. Both boys are doing well but both have had heart replacements before they were even one year old. It's a horrible illness." Debbie Anaya, Texas 79007

"I care." Gaylene Blalock, Texas 79756

"Pharma can make big money later, save babies NOW!" Keira Brewer, Texas 76541

"Please, we have a special friend that we hope and pray will continue to do well. He is in need of this medication! Please and Thank you!" Jesse Bustos, Texas 79756

"I pray for the kids and families thru this disease, why suffer when help is available? Someone I know needs help! I have a heart to do what I can to sign this petition and help get it done!" Rosie M Covington, Texas 79762

"I have a young friend, that has done very well with this regime! Please help him to continue!" Nancy CROZIER, Texas 79752

"The FDA needs to approve this" Jeannie Jackson, Texas 79756

"Here's the chance to do something good, that NO ONE (in their right mind) will argue about! Let's go FDA!!!" Peter Jewett, Texas 78006

"We love this young man and his family. I was honored to teach Ben 1/2 of a year in kindergarten. Even at a young age, you were able to see the quality of character that he demonstrated. He had wonderful people skills at such a very young age. He encouraged others in class and was a leader in my room. He spreads a little sunshine everywhere he goes. Blessed with a caring, beautiful personality! We want to support this petition and see it go through so that young men like Ben can continue to receive this medication." Autumn Nichols, Texas 79756

"The people with this rare disease need this drug approved and to continue their treatment" Welima Spradling, Texas 79007

"I have a grandson with Barth Syndrome. it would have been wonderful if this had been available when he was diagnosed over 25 years ago. He got a heart transplant when he was two. And another when he was sixteen and is doing well." Wanda Threadgill, Texas 77429

"I'm signing because we love Ben Holly. He has worked too hard and come too far for this to just be thrown out the window." Melanie Williams, Texas 79756

"With hopes that those who have Barth Syndrome will have a better and longer life with approval of this drug elamipretide." Jamie Windham, Texas 79772

"When I was designing a therapeutic shoe to prevent diabetic foot ulcers as a former academic, I had to encounter naysayers who tried to block our efforts by saying not many pts would wear the shoes. Yes but how about the pts that will wear the shoes? A similar logic applies here. Why block a medication even if it will save the lives of only a few kids??" Metin Yavuz, Texas 75074

## Virginia Voices – 451 petitioners

"Every child deserves a chance, especially when there are safe drugs known to be beneficial. Patients should be considered , those with rare diseases are often given a death sentence! This is not the medieval times!" Ruth Hoosier, Virginia 23111

"I have mitochondrial disease and I support all research" Darby Thoden, Virginia 20109

## Wisconsin Voices – 628 petitioners

"I'm signing because I have a 4-year-old son who has been through hell and back already at a young age. He is the 8th child in my family with this disorder and the ONLY one to survive. Give people like my son a fair chance to live as normal of a life as possible. To not be in so much pain, to gain weight, to be able to do things like basic hygiene care and not have to take a break or be in pain. ALL lives matter! Please help!" Stacey Beth, Wisconsin 53402

"This is important to those who have this condition." Laura Gessert, Wisconsin 53711

"My family has been devastated by this syndrome and it's taken years to come up with a safe solution. Approve the drug already and save lives instead of playing politics." Chris Holbus, Wisconsin 54956

"I care." Nancy Lockwood, Wisconsin 53051

"This is the one and only drug that has been found to treat patients of Barth Syndrome. The FDA must approve this drug." Wanda Stevens, Wisconsin 54893

"Our family has had 8 boys affected by Barths." Terry Unterbrink, Wisconsin 53208

## Worldwide Voices – 591 petitioners

"Declan is my little cousin and I've witnessed firsthand how he went from death's door to thriving. Please give him a chance. Do a fair review!" Teresa Arena, Central District, Hong Kong

"I have seen parents go through the pain of their child dying with this disease" Lisa Armstrong, United Kingdom

"We really value our friend and his life" Andrea Bomanson, United Kingdom

"Pour notre petit Marius et bien d'autres enfants." Géraldine Buton, France

"My friend has a child with Barth." Lucinda Charlton, United Kingdom

"My grandson in Canada is affected and we can't do anything until the US does something." Elizabeth Champagne, Canada

"My son could benefit from this drug, diagnosed in 1994." Helen Coleman, France

"I work in a pharma manufacturing and the patient is the most important purpose. He needs his treatment to have a normal life." Sandra Debois, Belgium

"I have Barth Syndrome" Jason Downard, Canada

"Weil mein Neffe auch am Barth Syndrom erkrankt ist!" Maike Engel, Germany

"Beaucoup de courage à toutes les familles concernées et souhaitons de tout cœur que tout ceci avance vite .... Très très vite ....." Yvette Gaultier, France

"Pour Marius et bien d'autres enfants...courage et force." Mélanie Guillet, France

"I lost my son to Barth syndrome, there is nothing to lose by offering this treatment when the other option is no treatment and death !" Yousif Hamdoun, Syria

"My Great Nephew suffers from this." Diana Humphreys, United Kingdom

"I am a 37 year old affected individual, I participated in the initial clinical trial at Johns Hopkins, and while I do not feel that it had a significant improvement in my day to day life, if this can help the younger affected individuals have a better life I feel that it should be given a proper review by the FDA." Robert Hope, Canada

"One of my favourite people has Barth and brings joy to the world. Everyone deserves the ability to live their best life and all access support needed, whenever needed." Jennifer James, Canada

"I am the partner and wife of a Barth individual, one of the rare few. So many do not make it into their adult years because, while this small community fights for better research and care, it is "too small" for major organizations to take a strong interest in. While they passed before a diagnosis could be given, his brother and uncle were likely victims of Barth as infants. While we have been very lucky that his health has been relatively good in his adult years, the effects on daily life are very obvious. From the pure exhaustion to the increasing muscular skeletal pain he's experiencing daily, research and approval by the FDA for life changing treatment options is crucial to being able to continue a "normal" life. For those families who have their littles, this could be world changing for them. It is additionally important to keep in mind that the decisions of the American FDA can greatly affect and benefit more than affected individuals in the US but around the world as a whole. Those of us beyond" Jessica Barrie James, Canada

"To support the fair review of this disease." Leah King, Canada

"Cette cause me touche." Régis Macé, France

"My grandson suffers with Barth syndrome and the charity is amazing and needs all the help it can get." Dawn Romford Marcham, United Kingdom

"I know a cracking lad with this condition, and he and all others deserve this." Jennifer Copplestone Mathers, United Kingdom

"Everyone deserves treatment options despite being rare." Sharon McClements, Australia

"More education is needed and the devastation from this disease is overwhelming." Wendy Piercey, Canada

"I believe this support is needed." Theresa Trapp, United Kingdom

"I feel more information needs to be found about Barths syndrome" Kirsty Ward, United Kingdom

"My brother-in-law has Barth Syndrome." Jeffrey Ware, Canada

Barth Syndrome  
Foundation

# PETITION TO FDA

FOR A FAIR, EQUITABLE AND  
APPROPRIATE **NDA REVIEW**

“

“Because I want the chance  
to live. **TRULY LIVE**. And not  
feel like an outcast.”

Christopher Pena Jr, Richland, Mississippi

“I have a 4-year-old son who has been through hell  
and back already at a young age. He is the 8th  
child in my family with this disorder and the **ONLY**  
one to survive. Give people like my son a fair chance  
to live as normal of a life as possible.”

Stacey Beth, Racine, Wisconsin
