Growth Through Agricultural Progress

FRUITS -- NONCITRUS

By States, 1954-59, Revised Estimates, United States, 1949-59,
Production, Use, and Value

This publication presents statistics by States on production, farm disposition, price, value, and utilization of noncitrus fruits for the crop years 1954 through 1959. These statistics are revised on the basis of the 1959 Census of Agriculture and other pertinent data.

Data for apples, cranberries, grapes, and pears were revised back to 1949 to incorporate changes which put the data on a more comparable basis. In recent years the increased importance of cartons and the use of various types of pack of apples and pears have resulted in a declining average net weight per box. To maintain comparability from year to year, it was necessary to convert to an equivalent standard weight unit--the full bushel. In Washington, Oregon, and California, production and prices of apples have been revised to an equivalent 48-pound bushel, the same weight as used in other States. Prior to this, a "box" of fresh apples had been considered equivalent to a bushel without converting to a bushel of a specified weight. In Washington and Oregon, pears also had been handled on the basis of a "box" being equivalent to a bushel. Production and prices of pears in these two States have now been revised to an equivalent 50-pound bushel, the same as used in all other States except California, where the standard weight of a bushel is 48 pounds. Cranberry prices have been revised to reflect equivalent returns at the first receiving station rather than the "as sold" basis formerly shown. Revisions made for grapes during the 1949-54 period affected only prices and values.

For the benefit of those who are interested primarily in a short historical series of U. S. totals, tables are included which show U. S. statistics for 1949 through 1959. Available data by States and for the United States for 1889 to 1944 are shown in Bulletin CS-27 issued in May 1948. Data for 1944-49 are shown in Statistical Bulletin No. 114 issued in October 1952, and data for 1949-54 are shown in Statistical Bulletin No. 192 issued in September 1956.

"Commercial apple production" refers to the total apple crop in the commercial areas of each State. The production of apples by varieties is shown for selected States and areas and for the United States.

"Production" includes fruit harvested plus quantities not harvested for economic reasons. "Production having value" includes quantities sold and quantities used in the farm household but excludes quantities not utilized because of economic conditions, that is, fruit not harvested and excess cullage of harvested fruit.

Statistics on utilization of fruit by commercial processors refer to first utilization, not necessarily the final utilization. For example, frozen fruit which may later be used for preserves is included as frozen fruit.

The season average prices in this report are estimated average returns to growers for all methods of sale except where otherwise noted in the tables. These prices are applied to the production having value to compute value of production and to the quantity sold to compute value of sales.

The value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops for a calendar year.

Prepared by R. P. Handy, George D. Earrell, and Earl L. Park, Fruit and Vegetable Statistics Branch, Agricultural Estimates Division. Primary data were provided by State Statisticians' offices.

FRUITES (Noncitrus): MARKETING SEASONS FOR SPECIFIED CROPS

- Apples : All South Atlantic States, Kentucky, Tennessee, Indiana, Illinois, Missouri, Arkansas, New Mexico, and California, June 1 to May 31; all other States, July 1 to June 30, except Washington and Oregon where the bulk of the crop is marketed August 1 - July 31.
- Apricots : Fresh fruit--May 25 to August 20.
Canning--June 15 to August 15.
Dried--California, June 20 to August 20.
- Avocados : California--October 1 to September 30.
Florida--July 15 to March 15.
- Cherries : Fresh fruit--sweet varieties, May 1 to August 15;
sour varieties, June 15 to August 20.
- Cranberries: September 15 to March 31.
- Dates : August 15 to March 15.
- Figs : Fresh fruit--June 5 to October 15.
Canning--August 1 to October 15.
Dried--California, June 20 to October 30.
- Grapes : Fresh fruit--California, May 25 to April 30;
Arizona, June 5 to July 15; all other States, July 10 to October 31.
Crushed for juice, wine, and brandy--August 1 to December 15.
Dried for raisins--California, September 1 to May 30.
- Nectarines : California, June 10 to August 31.
- Olives : September 25 to March 15.
- Peaches : Fresh fruit--Georgia and South Carolina, May 20 to August 31; other South Atlantic States, South Central States, and California, June 1 to September 30; New England States, New York, Michigan, and Idaho, August 1 to September 30; all other States, July 1 to September 30.
Canning--California, July 1 to September 30.
Dried--California, August 1 to October 10.
- Pears : Fresh fruit--California, July 1 to April 30; Washington and Oregon, August 10 to May 31; other States, July 1 to December 15.
Canning and Dried--California, Washington, and Oregon, August 1 to November 30.
- Persimmons : September 25 to January 10.
- Pineapples : Florida, May 1 to December 31.
- Pomegranates: September 15 to November 10.
- Plums : Fresh fruit--May 25 to September 30.
Canning--June 1 to September 30.
- Prunes : Fresh fruit and Canning--August 10 to October 20.
Dried--August 15 to April 15.

1/ Estimates of the commercial crop refer to production of apples in the commercial areas of each State. 2/ Differences between production and production having value are economic abandonment.

3/ Mostly crushed for vinegar, cider, and juice. For some States, some quantities canned, dried, and frozen are included to avoid disclosure of individual operations.

4/ Included in "Other processed" to avoid disclosure of individual operations.

5/ New Jersey, Delaware, Maryland, and North Carolina.

6/ Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, Nebraska, Kansas, Kentucky, Tennessee, and Arkansas. 7/ Montana, Idaho, Colorado, New Mexico, and Utah.

Table 13--Apples, commercial crop ^{1/}: Production by varieties,

United States, 1949-59

(In thousands of bushels)

Footnotes for table 14.

1/ Estimates of the commercial crop refer to total production of apples in the commercial areas of each State.

2/ Minnesota, Iowa, Nebraska, Kansas, Kentucky, Tennessee, and Arkansas.

3/ Montana, New Mexico, and Utah.

4/ Included with "other summer varieties."

5/ Included with "other fall varieties."

6/ Included with "other winter varieties."

7/ Included with Delicious.

1/ Differences between production and production having value are economic abandonment.

2/ Includes some quantities used for juice, wine, brandy, canning, freezing, etc.

3/ New York, Pennsylvania, Ohio, and Michigan.

4/ Some quantities frozen are included with brined to avoid disclosure of individual operations.

5/ Montana, Idaho, Colorado, and Utah.

6/ Some quantities canned are included with fresh sales to avoid disclosure of individual operations.

1/ Differences between production and production having value are economic abandonment except for 1959 when the differences included economic abandonment, cranberries confiscated, and cranberries dumped which did not qualify for payment under the Cranberry Payment Program, AMM 181a.

2/ Quantities used in farm household negligible. Production having value and sales are the same except in 1959 when some quantities were dumped and paid for under the Cranberry Payment Program AMM 181a.

3/ Equivalent returns at first receiving station. For 1959, includes returns to growers for cranberries dumped which qualified for payment under the Cranberry Payment Program, AMM 181a.

4/ Value of sales same as value of production except for 1959 when value of production included those berries dumped and paid for under the Cranberry Payment Program AMM 181a.

Table 23--Dates, California: Production, farm disposition, season average price per ton to growers, value, and utilization, 1954-59

Season	Production 1/	Farm disposition		Price 2/	Value of --

^{1/} Differences between production and production having value are economic abandonment.

^{2/} Connecticut, New York, Pennsylvania, Virginia, West Virginia, North Carolina, Georgia, Ohio, Illinois, Michigan, Missouri, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas. Massachusetts, Indiana, Kansas, South Carolina, and Florida are included through 1954; estimates for these States discontinued beginning with 1955.

^{3/} Idaho, Colorado, Utah, Washington, Oregon, and California.

^{4/} Some quantities canned or otherwise processed are included in fresh sales to avoid disclosure of individual operations.

^{5/} Some quantities otherwise processed are included with canned to avoid disclosure of individual operations.

^{6/} Some quantities canned and/or dried are included with other processed to avoid disclosure of individual operations.

^{1/} Differences between production and production having value are economic abandonment.

^{2/} Some quantities canned and dried are included in other processed to avoid disclosure of individual operations.

^{3/} Some quantities otherwise processed are included with canned to avoid disclosure of individual operations.

^{4/} Some quantities canned, dried, or otherwise processed, are included in fresh sales to avoid disclosure of individual operations.

^{5/} Included in totals of other than Bartlett and of all varieties.

^{1/} Apples (commercial crop), peaches, nectarines, pears, grapes, cherries, plums, prunes, apricots, figs, olives, avocados, dates, cranberries, persimmons, pomegranates, and pineapples. (Pineapple estimates discontinued beginning with the 1959 crop.)

^{2/} Differences between production and production having value are economic abandonment.

^{3/} For cranberries, production of value includes in addition to quantities sold: cranberries dumped which were paid for under the 1959 Cranberry Payment Program, AMM 181 a.

^{4/} Used for jellies, juices, wine, etc.

1/ Estimates of commercial crop refer to production of apples in the commercial areas of each State.

2/ Differences between production and production having value are economic abandonment.

3/ Mostly crushed for vinegar, cider, and juice. For some States, some quantities canned, dried, and frozen are included to avoid disclosure of individual operations.

Table 72--Apricots: Production, utilization, season average price per ton to growers, and value, for the United States, 1949-59

1958....	20,920	1,165,600	1,165,600	459,700	705,900	11.60	13,537
1959....	21,340	1,251,700	1,232,800	288,000	357,800	9.06	11,167

1/ Differences between production and production having value are economic abandonment except for 1959 when the differences included economic abandonment, cranberries confiscated, and cranberries dumped which did not qualify for payment under the Cranberry Payment Program, AMM 181a. 2/ Quantities used in farm household negligible. Production having value and sales are the same except in 1959 when some quantities were dumped and paid for under the Cranberry Payment Program, AMM 181a. 3/ Equivalent returns at first receiving station. For 1959, includes returns to growers for cranberries dumped which qualified for payment under the Cranberry Payment Program, AMM 181 a.

Table 76--Dates: Production, utilization, season average price per ton to growers, and value, for the United States, 1949-59
