

# Striker Regenerator Ryegrass blend

Turf and lawns

Excellent wear tolerance

Extremely strong  
and fast turf

Medium to  
dark-green colour

Beautiful leaf texture

## Added value trait

Striker Regenerator's outstanding wear tolerance, quality, high endophyte gives your fields the best performance for year round wear and tear.

Striker Regenerator has been designed to give end users 'the best of both worlds'. It comprises, the revolutionary mobile technology and superior wear tolerance of RPR and the exceptional turf characteristics of Derby Xtreme ryegrass.

RPR - Regenerating Perennial Ryegrass is the first perennial ryegrass having the specific characteristic of spreading horizontally via determinate stolons #Strong as Iron. This characteristic makes RPR many times stronger than other types of perennial ryegrass, while also growing at the same rate. The result is a regenerating perennial ryegrass with the highest wear tolerance, perfect for use in sports pitches eg. Blundstone Stadium Tasmania.

Trialled in Australia, Derby Xtreme has proven excellent turf performance in the field and in independent trials, conducted by John Neylan. This variety has high endophyte, deep green colour, very dense tillering and strong disease tolerance.

## Key features

- Excellent wear tolerance!
- Revolutionary perennial ryegrass with stolons!
- Extremely strong and fast turf
- Medium to dark-green colour with beautiful leaf texture
- High endophyte providing excellent disease and insect resistance

## Key benefits

- Two of the best Derby Xtreme and RPR
- This mix allows for heavy wear tolerance and longer hours of use
- Ideally suited for long term sports fields and golf tees with recovery post games
- Less overseeding costs and worn out areas

## Composition

Species	%
RPR-Regenerating Perennial Ryegrass ( <i>Lolium perenne stoloniferum</i> )	50
Derby Xtreme Ryegrass ( <i>Lolium perenne</i> )	50

Striker Regenerator has superior wear tolerance and regeneration compared to other grasses thanks to RPR's unique pseudo-stolons. Combined with Derby Xtreme ryegrass, this blend has exceptionally high turf quality. With a deep green colour, highest density, and exceptional drought tolerance this blend is in a class of its own.

## Uses

- Permanent cool season grounds
- Oversowing warm season bermudagrass fields
- Football/soccer and rugby pitches in Australia and NZ
- Golf tees, fairways and surrounds
- Landscaping and home lawns

## Suggested sowing rates

**New field:** 400–500kg/ha

**Oversowing bermudagrass:** 250–500kg/ha

*There are some things you just have to see for yourself to believe them.  
Stoloniferous perennial ryegrass was a good example of something like that,  
but now that I've seen RPR I really am a believer.*

*Andy Newell - Head of Turfgrass Biology, STRI*
