

12/2023 - 23 January 2023

Third quarter of 2022

Government debt down to 93.0% of GDP in euro area Down to 85.1% of GDP in EU

At the end of the third quarter of 2022, the general government gross debt to GDP ratio in the **euro area** stood at 93.0%, compared with 94.2% at the end of the second quarter of 2022. In the **EU**, the ratio also decreased from 86.4% to 85.1%. For both the **euro area (EA19)** and the **EU**, the decrease in government debt to GDP ratio is due to an increase in GDP outweighing the increase in government debt in absolute terms. Compared with the third quarter of 2021, the government debt to GDP ratio also decreased in both the **euro area** (from 97.3% to 93.0%) and the **EU** (from 89.7% to 85.1%).

At the end of the third quarter of 2022, debt securities accounted for 82.5% of **euro area** and for 81.9% of **EU** general government debt. Loans made up 14.4% and 15.0% respectively and currency and deposits represented 3.1% of both **euro area** and **EU** government debt. Due to the involvement of EU Member States' governments in lending to certain Member States, quarterly data on intergovernmental lending (IGL) are also published. The share of IGL as percentage of GDP at the end of the third quarter of 2022 accounted for 1.7% in the **euro area** and for 1.4% in the **EU**.

These data are released by **Eurostat, the statistical office of the European Union**.

p provisional

Rounding differences may occur

Government debt at the end of the third quarter 2022 by Member State

The highest ratios of government debt to GDP at the end of the third quarter of 2022 were recorded in **Greece** (178.2%), **Italy** (147.3%), **Portugal** (120.1%), **Spain** (115.6%), **France** (113.4%) and **Belgium** (106.3%), and the lowest in **Estonia** (15.8%), **Bulgaria** (23.1%) and **Luxembourg** (24.6%).

Compared with the second quarter of 2022, four Member States registered an increase in their debt to GDP ratio at the end of the third quarter of 2022 and twenty-three a decrease. Increases in the ratio were observed in **Bulgaria** (+1.9 percentage points – pp), **Czechia** (+1.7 pp), **France** (+0.3 pp) and **Sweden** (+0.2 pp), while the largest decreases were recorded in **Greece** (-5.3 pp), **Cyprus** (-3.8 pp), **Portugal** (-3.3 pp), **Italy** (-3.0 pp) and **Croatia** (-2.8 pp).

Compared with the third quarter of 2021, one Member State registered an increase in its debt to GDP ratio at the end of the third quarter of 2022 and twenty-six Member States a decrease. The increase in the ratio was recorded in **Czechia** (+4.7 pp), while the largest decreases were observed in **Greece** (-24.7 pp), **Cyprus** (-15.0 pp), **Croatia** (-11.1 pp), **Portugal** (-9.0 pp), **Denmark** (-8.8 pp), **Ireland** (-8.4 pp), **Lithuania** (-7.3 pp) and **Slovenia** (-7.2 pp).

Geographical Information

Up to 31 December 2022, the **euro area (EA19)** included Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland. From 1 January 2023 the **euro area (EA20)** also includes Croatia.

European Union (EU27): Belgium, Bulgaria, Czechia, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland and Sweden.

The aggregate data series commented on in this news release refer to the official composition of the euro area at the end of the most recent quarter for which data is available. Thus, news releases with data for quarters up to fourth quarter of 2022 comment on EA19 series, while releases with data for first quarter of 2023 onwards will comment on EA20 series.

Methods and definitions

Quarterly data on government debt are collected from the Member States according to European System of Accounts (ESA 2010), see Annex B, ESA 2010 transmission programme, and refer to the Maastricht debt definition, used in the context of the Excessive Deficit Procedure (EDP). Annual EDP data, next to be published in April 2023, are the subject of a thorough verification by Eurostat.

The **general government debt** is defined as the consolidated gross debt of the whole general government sector outstanding at the end of the quarter (at face value). General government debt consists of liabilities of general government in the following financial instruments: currency and deposits (AF.2); debt securities (AF.3) and loans (AF.4), as defined in ESA 2010.

The **debt to GDP ratio** is calculated for each quarter using the sum of quarterly GDP for the four last quarters. Quarterly data on GDP are the most recent ones transmitted by the EU Member States. While quarterly debt figures are consistent with annual debt figures at coinciding publications, differences between quarterly and annual data occur at non-coinciding publications. Differences between annual and quarterly GDP figures also occur.

For the purpose of proper consolidation of general government debt and to provide users with information, Eurostat publishes data on **government loans (IGL) to other EU governments**. The concepts and definitions are based on ESA 2010 and on the rules relating to the statistics for the EDP. The data covered is the stock of loans related to claims on other EU Member States, including loans made through the European Financial Stability Facility (EFSF). The valuation basis is the stock of loans at face value outstanding at end of each quarter. From the first quarter of 2011 onwards, the intergovernmental lending figures relate mainly to lending to Greece, Ireland and Portugal and include loans made by the EFSF.

For stock data such as general government debt, end of period exchange rates are used in the compilation of the EU aggregates. For flow data, such as GDP, average exchange rates are used. The EU aggregates, denominated in euro, can fluctuate as a result of exchange rate movements between the euro and other EU currencies.

All quarterly government finance statistics data for the first three quarters of 2022 have been labelled provisional, due to an increased likelihood of future revisions.
