

PosiSep™ and PosiSep™ X are indicated for use as intranasal splints intended to minimize bleeding and edema and to prevent adhesions between the septum and the nasal cavity. They are placed in the nasal cavity after surgery or trauma. The PosiSep™ line is constructed of a patient-comfortable sponge which is manufactured from naturally occurring Chitosan polymers.

- Dissolves naturally or can be easily removed with gentle irrigation and aspiration
- Biocompatible – made of Chitosan-based polymers
- Minimizes bleeding and edema after surgery
- Foam easily conforms to nasal anatomy
- Easy to apply – no mixing or additional prep time necessary
- No special storage conditions required

PosiSep™ and PosiSep™ X are manufactured from naturally occurring Chitosan polymers.

### What is Chitosan?

Chitosan (ky-toe-san) comes from a substance known as chitin, an amino-polysaccharide removed from the powdered shells of crustaceans.

### Two Different Platforms for Your Individual Needs

When PosiSep™ is hydrated, its smooth gel action separates sinus mucosal tissue.

When PosiSep™ X is hydrated, it expands to fill the space preventing post-op adhesions.

Each PosiSep™ is available in two sizes. See ordering information below.
