Built-in appliances 2015 Spring/Summer collection

siemens-home.co.uk | siemens-home.com/ie

Siemens. The future moving in.

The future moving in.

Imagine a world where functional doesn't mean boring, where outstanding becomes the standard and where you are no longer pressed for time. Welcome to the new world of Siemens. For a life less ordinary.

Introducing fully coordinated and intelligently designed appliances, where you can discover the new iQ700 built-in range – for even more flexibility and time-saving solutions that help with our increasingly busy and exciting lifestyles. An oven that saves time, speeding up your cooking by up to 50%. Award-winning dishwashers featuring

the world's first Zeolith® drying system; a technological innovation that sets new standards for performance and energy efficiency. Fridge freezers with food preservation technology and outstanding freezers that never have to be defrosted. All working together to create a spectacular kitchen for your home.

Stunning designs that your friends will envy, clean lines that coordinate with the rest of your living space and high quality materials come as standard with all Siemens appliances. Offering you the perfect balance between modern design and innovative technology, Siemens appliances sit seamlessly together in your home.

Welcome

Ovens

As intuitive as cooking itself.

SIEMENS

Model shown: HN678G4S1B.

Model shown: HN678G451B.

Outstanding taste, cooked in the time you have.

The iQ700 Ovens with varioSpeed.

There are things in life that are worth spending more time on like a business meeting, a weekend adventure or getting to read a few more pages of a bedtime story. Whenever you find yourself in a situation where you want to spend your time differently, but not necessarily cooking, varioSpeed allows you to. No matter whether it's a little snack or a masterful salmon recipe, you can now adjust the cooking time to your own speed of life. Ultimately giving you all the flexibility your less ordinary life requires.

Twice as fast in combination: by choosing the integrated microwave function with a conventional cooking option, you can speed up the preparation of your dishes when you need to – without compromising on the quality you would expect. Save up to 50% of your time, to give you the freedom when you require it.

From desserts to roasts and even frozen food, varioSpeed can be conveniently selected to cook a variety of meals when you want to take your time on other things. For even more flexibility; cooking, reheating or quickly defrosting a meal at the end of the day is fast and efficient thanks to the simultaneous heating using microwaves, and a conventional cooking function such as 4D hot air. Save time in the kitchen when you want to and spend it doing the things you love. For a life less ordinary.

varioSpeed saves up to 50% of your time and allows you to adjust the cooking time to your own speed of life.

Simply the best.

Life's pleasures often lie in the simplest things. A philosophy that is essential to the design of the iQ700 ovens with their easy to use clearText TFT display and time saving activeClean® self-cleaning system. Supreme features that mean you can enjoy cooking even more.

iQ700 Ovens with TFT touchDisplay Plus.

It's never been this easy to keep an eye on your cooking. Bigger size, brighter colours, higher contrast and better resolution. And now controllable with the touch of a finger. The new TFT touchDisplay Plus is the most innovative and intuitive user interface available for an oven.

Say goodbye to multiple dials and printed icons, the **TFT touchDisplay Plus** offers more than just control of your oven. It gives tips and information on each programme, full colour graphics and images, it can even suggest the correct way to cook your dishes with cookControl Plus. Clear to read from any angle, it's advanced yet easy-to-use technology for effortless cooking.

Three types of TFT displays are also now available across the iQ700 oven range. The slightly smaller **TFT touchDisplay** offers all the functionality of a touchscreen display with crisp text and images. Smaller still, the **TFT Display** can be operated with touchControl buttons either side of the screen, yet still has clear programme information. Thanks to the menu structure on all of our ovens, which is optimised for convenient and easy-to-use touch navigation, it's even easier to select the perfect settings. Designed to serve one purpose: giving you full control.

TFT touchDisplay Plus – the most intuitive way to use your oven.

The easiest way to clean an oven: let the oven clean itself.

iQ700 Ovens with activeClean.

Enjoy preparing food without worrying about the consequences. No matter how creative it gets in the oven interior, you no longer need any chemical treatments to get it clean again – only the push of a button. Hassle-free, the oven cleans itself thoroughly with activeClean. It does so by heating up to very high temperatures – turning all residues into ash, which can easily be wiped away. This process is called pyrolysis and is the most convenient and efficient way to clean the whole interior of your oven.

And now, even the telescopic rails, bars and tray are specially designed to be used with activeClean so you don't need to remove them at all. Only the wire shelf needs to be removed. activeClean makes it possible to forget about the chore of cleaning your oven and gives you back your time to spend on the things you love. For a life less ordinary.

activeClean® – ovens that clean themselves.

Models shown: HN678G4S1B single oven with microwave and pulseSteam, CS658GRS1B compact steam oven and BI630CNS1B warming drawer.

The finest ingredients. For the finest kitchen interiors.

Perfect built-in design.

Seamless design that complements every kitchen. All appliances in the iQ700 Built-in Appliances Range can be combined perfectly with each other. The iQ700 ovens, compact ovens, coffee centres and warming drawers all line up thanks to the coordinated front panels. It doesn't matter whether you arrange the appliances horizontally or vertically: the result always pleases the eye. Even our iQ700 hoods have the same front panel design for a coordinating look throughout your kitchen.

Each oven features blue illuminated hard key buttons, integrated into a sleek, chrome-effect strip that provides the most important operations from turning the oven on to starting your cooking. The central stainless

steel disc control is a constant design feature across the range, with a precise operation that clicks when rotated to give you ultimate satisfaction when using each appliance. Combined with the touchscreen navigation, this method of operation is both familiar and intuitive.

The trend-setting iQ700 ovens feature a smaller profile oven door handle that blends into the stainless steel panels to offer more flexibility with handleless kitchen design, yet still having the highest build quality & feel. While the precise lines of the black glass and stainless steel create a definitive aesthetic worthwhile of any modern, less ordinary kitchen.

More to explore.

Pre-installed settings guarantee the best results for numerous dishes: cookControl Plus.

Simply select the required dish and enter the weight – the cookControl Plus function immediately provides full colour images with individual recommended settings for perfectly cooking the dish you want. Using cookControl Plus you can achieve the best results for a variety of meals with less to worry about and complete peace of mind.

An oven door that opens and closes gently and quietly thanks to the intelligent mechanism: softMove.

For a calmer kitchen, softMove offers softer opening and closing of the oven door without having to push and pull. The intelligent dampers ensure that the oven door is left to open and close gently and quietly. Available on all iQ700 built-in ovens.

Best cooking results regardless of which shelf you choose: 4D hotAir.

Be flexible with your cooking. Choose which shelf you want to cook your food on, now with even more choice. The innovative technology of the fan motor enables optimum heat distribution around the interior of the oven. Your food therefore always turns out perfectly just as you want it, no matter which shelf you choose to place it on.

Everything put in a good light.

Depending on the model, there are different kinds of illumination inside the oven. Whether it's the standard Halogen light, LEDs or the most advanced Multilevel LED strip, they all provide a brilliant view of your dishes without having to open the oven door.

An oven that can detect when the baking process is complete: the bakingSensor.

All that's left for you to do when baking: prepare the pastry or mix and select the required dish. Innovative sensor technology fitted inside the oven can automatically control the baking process for consistently delicious baking. The bakingSensor constantly measures the moisture levels in the oven interior and is therefore able to tell you when the dish is fully cooked and ready.

Achieve the best roasting results – easier than ever before: roastingSensor Plus.

Thanks to three measuring points, the innovative roasting thermometer is able to precisely and reliably measure the core temperature of your dishes. Ideal for meat, poultry and fish, it can even be combined with the integrated microwave and the pulseSteam function. Without the need to keep checking, the roastingSensor gives you the freedom to get on with the rest of your cooking.

Finally, pre-heating is no longer necessary and you can save time: the coolStart function.

Cooking frozen convenience food in the oven is now even faster thanks to the innovative coolStart function. Using an intelligent heating phase, you can now successfully cook frozen food quickly and without the need to wait for the oven to preheat. Simply place the frozen food into the cold oven, press start, and the dish will be ready according to the manufacturers' stated cooking time.

More space in your kitchen and flexibility with your cooking: the integrated microwave.

The iQ700 ovens with integrated microwave can be used in combination with your regular oven or individually as a fully functional microwave, offering more flexibility in your kitchen. This can also free up space due to not needing a separate microwave.

Freedom & flexibility.

More possibilities in the kitchen, all in one appliance.

The iQ700 Oven with microwave and pulseSteam offers a truly flexible cooking experience to give you choice like never before. Choose to speed up your dishes by up to 50% using varioSpeed. Or add steam for tastier dishes at the touch of a finger, with the intuitive TFT touchDisplay Plus. The sleek design fits perfectly into any modern kitchen and houses an impressive range of state-of-the-art features like activeClean and coolStart to help you save time and lead a life less ordinary.

The larger TFT touchDisplay Plus.

Cutting-edge design meets time-saving technology. For a life less ordinary.

Save up to 50% of your time.

Whenever you want to take your time, varioSpeed lets you. Using the microwave and conventional cooking function in combination, varioSpeed is fast and effective at cooking your meal in up to half the time it would normally take, without any loss of quality.

You can choose to add steam.

The benefits of adding steam are now available with the Siemens iQ700 oven with microwave. Prepare perfectly crispy and juicy dishes with pulseSteam, ideal for adding moisture and avoiding dried out food when reheating. pulseSteam offers more flexibility in just one appliance.

No more waiting.

With coolStart, waiting for the oven to preheat is a thing of the past. coolStart cooks frozen convenience food directly from the freezer without having to preheat your oven. Simply time the food according to the cooking time on the packet. Perfect for a quick and easy meal that you don't have to wait around for.

Advanced cooking.

Innovations behind every door.

No matter which model you choose from the iQ700 range of ovens, they each come equipped with the latest innovations that save you time and hassle. activeClean cleans the oven for you while the coolStart programme can cook frozen food without the need to preheat. And everything is controlled by the bright and crisp TFT touchDisplay with full colour images and touch navigation. Not to mention the sleek, sharp and fully coordinated design.

activeClean® – no need for cleaning products.

Cleaning the oven has never been so easy.

The new generation of iQ700 Ovens come with the self-cleaning activeClean function. This heats the oven to high temperatures, turning all residues into ash to wipe away. To save even more time, the telescopic rails, bars and trays can be used with activeClean – you only have to remove the wire shelf and get on with life.

Full control at a touch.

Keep an eye on your cooking with the new TFT touchDisplay. With clear text and images so you can quickly glance at the screen, discover each programme and option with ease. Intuitively select each function using the touch navigation and scroll through each option with the central control dial, making precise adjustments with minimal effort.

A smoother action for all.

Every oven in the new iQ700 range features softMove: softer opening and closing of the oven door thanks to an intelligent damper mechanism. The oven door will always close gently and quietly.

Double bake.

Beautiful innovative double ovens.

Our stylish double ovens are definitely worth a second look. Designed for use in built-in units or built-under a counter top they will sit beautifully in any kitchen design. The ecoClean® programme and 3D hot air function is standard across the range, whilst selected models feature multi-functions. If you're looking for extra capacity with a separate grill and oven you will never be short of space.

Main lower oven Secondary upper oven

ecoClean® – excellent cleaning performance.

Cutting corners to achieve perfect results

Experience unprecedented convenience with 3D hot air. 3D hot air is the perfect time saver for dinner parties, allowing you to cook sweet and savoury at the same time. This function gives great results whether you're cooking on one, two or three shelves as you have no intermingling of flavours.

What's the best way to clean the oven? Automatically

ecoClean® uses liners to absorb grease and dirt, keeping the oven aesthetically pleasing on the inside. ecoClean® liners are four times more efficient than standard catalytic liners, providing excellent cleaning performance time after time.

Energy-efficiency never tasted so good.

hotairEco provides perfect results for one-shelf cooking, at 30% less energy than the maximum allowed for an A rated oven. Experience delicious food whilst being kinder to the environment.

All the extra capacity you need, with design details that will sit beautifully in your kitchen.

Oven accessories.

The perfect accessories, designed especially for your new oven. Why look elsewhere when we can supply original accessories that help you with your cooking. Great for tailoring your oven to your individual needs, you can choose between the telescopic rails, deep roasting pan or even a quality ceramic oven to table dish.

Thanks to the new design of our iQ700 oven and compacts range, roasting pans and wire racks are now universal and interchangeable between all enamelled oven cavities.

Telescopic rails

Convenient and easy to use, all Siemens iQ700 ovens with microwave feature a telescopic rail system with stop function as standard. For all other models, you also have the option to upgrade, with up to three levels. To make cleaning the oven even easier, all telescopic rails and bars are now pyrolytic-proof so they can be kept in the oven during the self-cleaning process. The shelves glide out effortlessly and safely so you don't have to reach inside a hot oven to check your food.

1 level pyrolytic-proof telescopic rail set – HZ638170

Compact appliances

For a less ordinary kitchen

Clockwise from left to right: CT636LE51 compact45 coffee centre, CN678G451B compact45 oven with microwave, HN678G451B single oven with microwave, pulseSteam and roastingSensor Plus, HM678G451B single oven with microwave and pulseSteam.

Models shown: CT636LES1 compact45 coffee centre, CS658GRS1B compact45 hot air steam oven, CM678G4S1B compact45 multi-function oven with microwave, CS658GRS1B compact45 hot air steam oven.

Designed around you.

Above (clockwise from top left): Multi-functional cooking, multi-functional ovens – Siemens compact45. Elegant impressions and perfect coordination, come as standard: An ideal solution for warming plates – the Siemens Warming Drawer; Advanced technology for effortless cooking – the TFT touchDisplay.

The iQ700 range of compact45 appliances give you the freedom and flexibility to design your kitchen to your needs and cook how you want to. For a life less ordinary.

Featuring time-saving programmes such as varioSpeed and coolStart, or flexible cooking functions like fullSteam and pulseSteam, the functionality of our compact45 appliances match our iQ700 single oven range.

Whether you choose a steam oven or a coffee centre, the iQ700 compact45 appliances are all beautifully synchronised in looks – creating the perfect line up whether placed side by side or above and below. This is achieved by a clean-cut and consistent front panel design. And because they feature the exact same fascia as the iQ700 single oven range, there are even more possibilities in selecting a combination of ovens that do more than just look good.

Giving you more choice, the Siemens range of iQ700 compact45 appliances can be combined to suit your lifestyle.

Innovations come as standard across the range: the sharper and brighter TFT touchDisplay Plus – the largest touch navigation display available – offers an easier way to control your appliance with full colour icons and graphics. While the fascia panel lifts automatically to reveal a more convenient way to fill the water tank for healthy steam cooking.

For the ultimate kitchen experience, choose warming drawers to perfectly fit under each compact45 appliance. And for those who love coffee and love to entertain, the sleek iQ700 coffee centre allows you to enjoy an even larger selection of coffees. Even your own personalised coffee is available with the myCoffee function, selected using the advanced TFT touchDisplay.

Cooking with steam.

The healthy alternative for more flexibility in the kitchen.

The iQ700 compact45 steam ovens offer even more possibilities to prepare perfectly tasty dishes with ease. Use fullSteam to cook vegetables, fish or potatoes, without losing taste, colour or vitamins. And since no oil is needed, you can cook in the healthiest possible way. Since all compact45 appliances are coordinated in design, match with the iQ700 single oven with microwave and pulseSteam (model HN678G4S1B) for all the functions you could need.

Convenient access to the water tank.

More cooking possibilities.

Our steam ovens are multi-functional meaning you can cook as a conventional oven or in combination with the pulseSteam function. Whether it's a quick and healthy meal after work or an impressive weekend fish dish, a Siemens compact45 steam oven lets you choose how you want to cook your food.

The easiest way to cook with steam.

Cooking with steam is simple with an iQ700 compact45 steam oven. Open the fascia with the touch of a finger and the front panel automatically lifts to reveal the 1 litre capacity water tank. As the water tank is outside of the oven cavity, it's now possible to refill the tank while cooking, without losing any steam or disturbing your cooking.

The many benefits of steam.

As well as healthy cooking, steam is ideal for reheating and defrosting food. As the process gently adds moisture, you can reheat dishes when in a hurry, without losing taste, or spontaneously defrost food quickly.

Steam opens up a whole new world of cooking.

Better together.

Cook faster, using the microwave and conventional function.

Get more from your oven with the iQ700 compact45 oven with microwave. Choose to cook using varioSpeed and you could save up to 50% of your time. Or use as a conventional oven or solely as a microwave, adapting to whatever situation you may find yourself in. Not to mention the fully coordinated design and intuitive TFT touchDisplay, you'll be cooking in no time.

The perfect lineup.

Save up to 50% of your time.

Whenever you want to take your time, varioSpeed lets you. The function is fast and effective at cooking your favourite dishes in up to half the time it would normally take, without any loss of quality or taste.

Full control at a touch.

Keep an eye on your cooking with the new TFT touchDisplay. With clear text and images so you can quickly glance at the screen, discover each programme and option with ease. Intuitively select each function using the touch navigation and scroll through each option with the central control dial, making precise adjustments with minimal effort.

Never manually clean the oven again.

Siemens iQ700 compact45 Ovens come with the self-cleaning activeClean programme, or ecoClean Direct coated side liners, ceilings and back panels. This special coating makes cleaning the oven easy. The coated areas clean themselves while the oven is on or can be activated with a cleaning programme.

varioSpeed saves up to 50% of your time.

Always pleases the eye.

The same coordinated design, throughout the iQ700 range.

Different models come with different functionalities, however with the iQ700 range of compact45 appliances, the design and style is always coordinated to offer more flexibility when designing your kitchen.

The TFT Display clearly shows programme information and is controlled by touch buttons either side.

The iQ700 compact45 range: the perfect solution for complete coordination in your kitchen.

Every appliance upgraded.

No matter which model you choose from the iQ700 range, they all feature a TFT display to show programme information. The smallest TFT Display is operated by touch-control buttons either side of the screen and can be read from any angle. No more confusing icons, the screen displays text to make it even easier to use your appliance.

A smoother action for all.

Every oven in the new iQ700 range features softMove: softer opening and closing of the oven door thanks to an intelligent damper mechanism. The oven door will always close gently and quietly. For a calmer kitchen.

More options in one.

As well as multifunction ovens with microwave, the iQ700 range can also be used as microwaves on their own. Power levels ranging from 90W to 1000W mean the microwave function can be used for gently defrosting food, reheating, cooking and quickly heating up drinks.

Coffee indulgence.

Extra convenience for those passionate about coffee.

Compact appliances

The finishing touch for your kitchen or dining area, a Siemens coffee centre is the ultimate appliance for coffee lovers and those who like to entertain. Enjoy a better selection of coffee with the touch of a finger, all made to the optimum temperature to release the best taste and aroma using the intelligent sensoFlow heater inside.

Perfect results and at the size you want.

No more waiting around thanks to a fastest first cup every time.

Coordinate your coffee.

The iQ700 coffee centre creates a sensational line up in your kitchen with other iQ700 compact45 appliances and ovens. The design of the central control dial and TFT touchDisplay continues the clean lines of other Siemens appliances, while the milk container is now hidden behind the front panel for a less cluttered look.

No mess or fuss.

Designed with easy access to the water tank, bean holder and insulated milk jug, the coffee centre has front access thanks to a hinged front panel – so it's quick to replace the water or beans. The milk tubes are also cleaned with steam after every coffee with milk.

Two of your favourites at the same time.

The new oneTouch DoubleCup function means you can make two of the same coffees simultaneously, even those that use milk, so you can enjoy coffee with family or friends quickly and easily. You can save your favourite coffee settings to your name using the myCoffee menu on the TFT touchDisplay.

The ideal solution.

Great for storing plates.
Perfect for keeping them warm.

A sleek design and a flush finish make these drawers at home in any kitchen, whether they're simply used as extra storage or as a warming drawer. The warming drawers are ideal for heating coffee cups to the optimum temperature before use, as well as being able to keep food warm for up to an hour – perfect for a demanding lifestyle.

Keeps food hot for up to an hour.

Dinner party guests are running late?

A warming drawer is the ideal solution. With an adjustable temperature range of 40°C – 80°C, the warming drawer will warm dinnerware, but it can also keep food hot for up to 1 hour, safely and hygienically. Not only that, but you can use your warming drawer to prove dough, gently thaw delicate items and warm-up breads and pancakes.

Cleaning made simple

The warming drawer's easy to clean smooth and hard wearing ceramic glass base is recessed, which allows for any spills to be easily contained.

Easy access

The fully extendable pull-out drawer allows easy access to the contents and can accommodate up to 25kg.

An elegant handleless design to complement our other compact45 appliances.

Induction & ceramic hobs

Easy to clean, easy to cook with.

Model shown: EH675MV17E flexInduction hob with griddle pan accessory (HZ390522).

Enjoy a new cooking experience.

The Siemens hob range combines eye-catching design with razor-sharp looks, together with innovative technology and ergonomic design. All created to coordinate beautifully with other Siemens appliances.

Single flexInduction – model shown EH675MN27E.

flexInduction

A hob that fits in with your lifestyle, flexInduction is no-compromise cooking at its best.

Siemens flexInduction hobs are a must for diverse cooking. The cooking area can be tailored to your needs, enabling you to use a small area as traditional induction hobs with four or five separate zones, for boiling rice, for example, or you can choose to link the zones together to form one zone for larger cooking pans. The new extended cooking surface can

accommodate pans of any size, even several pans placed anywhere on the surface at the same time. With all the advantages of induction cooking, flexInduction also includes boost settings, automatic pan recognition and touchSlider controls.

Each flexInduction zone uses four innovative elongated oval inductors beneath the glass, each of which can act independently to sense the presence of cookware on the hob. Only if cookware is detected will the individual

inductors work, ensuring efficient operation whether a 10cm diameter milk pan is placed in one corner or a large griddle plate covers the whole zone. With only specific areas active at any particular time, no energy is wasted. And for an even more versatile cooking experience the newly designed triple flexInduction hob provides the ultimate in flexible cooking with three flexInduction zones, fitting in with your lifestyle, flexInduction is no-compromise cooking at its best.

Hob accessories

For additional cooking flexibility Siemens provide a range of accessories for our flexInduction hobs.

For more details on the range of accessories available please ask your retailer or visit siemens-home.co.uk/store

Stop making dinner and start enjoying a cooking experience.

Teppan yaki – Heating extremely quickly the Teppan yaki is great for fast Japanese cooking. Perfect for a cooked breakfast or a healthy stir-fry, the pan comes in two sizes that fit across either three or four flexInductors.

Accessories code:
2 sizes available 40x20cm HZ390512 and 30x20cm HZ390511.

Griddle pan – Specially designed for use across four flexInductors the griddle pan maintains an even heat, perfect for frying steak.

Accessories code:
HZ390522.

Roasting dish with steamer – Perfect for use with flexInduction hobs this multipurpose dish is a must when cooking for a crowd. A removable steamer insert is available to compliment this dish and perfect for steaming vegetables.

Accessories code:
Roasting dish HZ390011 and steamer insert HZ390012.

IN
boost

Speed. Energy-efficiency. Style.

Our traditional induction hob range feature automatic pan recognition ensuring that only the pan in contact with the surface heats up. Induction cooking is quicker than gas and much more energy efficient, allowing you to enjoy speedy food whilst being kinder to the environment.

Model shown: EH875FM27E Induction hob.

Induction cooking

Induction cooking is recognised as being one of the quickest, safest and most efficient methods of cooking available. When a pan with a ferrous or magnetic metal base is placed on the hob, the coil situated below the ceramic surface uses an electromagnetic field to create heat, almost instantly heating the pan. With only the base of the pan heated the cooking zone stays cooler.

Easier to clean and safer to use, because the ceramic cooking top is warmed only by the heat transferred back from the cookware and its contents, spillages are less likely to burn on, and there is normally no need to wait for the glass to cool down before simply wiping it over with a cloth. And if you turn on an induction hob without having a pot or pan on it, there is no risk of burning yourself, because the hob itself doesn't heat up.

Easier to clean and safer to use, Siemens induction hobs stand out in your kitchen.

Automatic pan recognition

Energy-efficiency is at the heart of Siemens products, and is at the heart of automatic pan recognition. Only the area of the hob in contact with the pan receives energy, meaning energy isn't wasted by heating the entire unit. Not only will this lower your carbon footprint, but it will also reduce your utility bills.

Faster cooking made quicker

Power boost increases the power output of selected zones by 50%, allowing precision heat when you need it most – perfect when time is of the essence.

Precision control at the touch of a button.

Model shown: EH975SK11E.

The stylish design of the touchSlider sits flush to the appliance; similar to the touch pad of a laptop, technology and design enthusiasts alike will revel in its functionality. Not only does the touchSlider allow for a great degree of cooking control, it's also easy to clean as there are no protruding parts.

Designed with sleek controls that are simple to use, and state-of-the-art technology that gives you a precise control over your hob. When activated, the power level is displayed for each zone, allowing you to monitor their status at a glance.

The stylish and ergonomic touchSlider allows you to simply slide your finger across the temperature scale to the desired setting, with control advances in half-levels from 1 to 9. You can also touch the desired level directly for faster adjustments to the cooking zone temperature. All 60cm models are controlled with one single 9.5cm touchSlider control, while the extra wide models have one, four or five 8cm touchSlider controls.

Hobs

Greater control with touchSlider.

Easy to monitor status.

Models shown: Models shown: EH975SZ17E flex induction hob, LF91BA582B island hood, CT636LES1 compact45 coffee centre, CS658GRS1B compact45 hot air steam oven, HN678G4S1B single oven with microwave and pulseSteam, BI630CNS1B warming drawer.

Perfectly framed.

Induction hobs are perfect for a wide variety of cooking and in a range of finishes you can truly make your kitchen bespoke.

Hobs

With their slim 4mm profile and tough, stain and scratch resistant wipe-clean surface, it's easy to see why our smooth, high-gloss finish glass induction hobs are the perfect choice for many people.

Facetted design

Great for blending in with your existing kitchen and worktop or maybe a Teppan yaki domino hob, a facetted induction hob with slim steel side trim features a slightly raised edge around its circumference.

Flat frame design

Perfect for coordinating with your kitchen, hood and other Siemens appliances, this modern flat frame design has a sleek stainless-steel frame around its edge to contain spills and protect the glass edge.

Flush-fitting design

The flush-fitting smooth glass finish makes this induction hob practical and easy to clean, whilst sitting flush and neat in your contemporary kitchen.

Bevelled-edge design

A traditional bevelled edge design induction hob is easily blended into any kitchen aesthetic, yet still features all the great flexibility of an induction hob.

Enjoy a new cooking experience.

flexInduction is no-compromise cooking at its best.

The iQ700 flexInduction range is available in a variety of models. Including the extra wide twin flexInduction with a triple-circuit cooking zone to a single flexInduction hob with 2 induction zones. With differing sizes, trims and colours to choose from the range also boasts up to 17 power levels and all with the simplicity of the touchSlider temperature scale to select the desired heat setting. There is something to suit all kitchen styles and cooking preferences.

flexInduction – place your pans anywhere.

Tailored to your needs

flexInduction is a must for diverse cooking. The cooking area is tailored to your needs, enabling you to use a small area for boiling rice, or the whole strip for large cooking pots. A hob that fits in with your lifestyle, flexInduction is no-compromise cooking at its best.

The options are endless

The triple flexInduction model allows you to have numerous cooking choices. The model boasts 5 induction zones in total. 2 flexInduction zones with different usage possibilities either 2 single induction zones of 480cm² or 1 full zone of 960cm². The central area of the hob has 1 flexInduction zone which is 720cm².

Precision control at the touch of a button

The stylish design of the touchSlider sits flush to the appliance; similar to the touch pad of a laptop, technology and design enthusiasts alike will revel in its functionality. Not only does the touchSlider allow for a great degree of cooking control, it's also easy to clean as there are no protruding parts.

Stop making dinner and start enjoying a cooking experience.

Speed. Energy- efficiency. Style.

Welcome to
induction cooking.

Hobs

With the iQ500 induction range cooking could not be easier. Recognised as being one of the quickest, safest and most efficient methods of cooking available Siemens offer a collection of models to suit all requirements. From the extra wide 912mm models with 5 induction zones, as featured below, to the 592mm models with 4 induction zones. Some models have the reStart and quickStart functions and most can be installed with our stylish domino hobs to add versatility, catering for all methods of cooking whilst creating your own bespoke look.

Precision heat when you need it.

Lowering the cost of every meal through energy-efficiency

Energy-efficiency is at the heart of Siemens products, and is at the heart of automatic pan recognition. Only the area of the hob in contact with the pan receives energy, meaning energy isn't wasted by heating the entire unit. Not only will this lower your carbon footprint, but it will also reduce your utility bills.

Be in control of the uncontrollable

A busy lifestyle can involve being pulled in many directions. Should that happen while you're cooking, control panel pause will shut down all power at the touch of a button, ensuring that your meal isn't ruined. At the second touch all will resume as if you were never interrupted.

All the power at the touch of a button

Speed. Power. Efficiency. Power boost increases the power output of selected zones by 50%, allowing precision heat when you need it most – perfect when time is of the essence.

Mix and match.

The modular domino hobs can be mixed and matched with each other and even with other hobs in the Siemens range.

Whether it is an induction hob with a single wok burner or a Teppan yaki and domino gas hob, Siemens domino hobs are designed to fit side by side, creating individual, bespoke cooking areas for your kitchen or living space.

Domino hobs; cooking pleasure tailored to you.

Traditional Japanese cooking was made to be shared

The Teppan yaki cook top offers a healthy cooking experience as only a small amount of oil is needed. Ideal for dinner parties as the two heating zones allow you to divide the surface so you can continue cooking on one section whilst keeping food warm on the other for your guests to enjoy.

All the features you would expect

Though small in size the domino hob collection have all the top line controls and features as our full size models. The flexInduction domino and Teppan yaki feature touchSlider for precision control at the touch of button and both the domino gas hob and wok burner make them easy to clean with their dishwasher safe cast iron supports.

Hobs

Hoods

Outstanding performance,
intelligently designed.

Model shown: LD97AA670B downDraft hood.

Enjoy a fresher kitchen.

Tackle demanding food smells with intensive setting, which creates a powerful boost of extraction. **Model shown:** LC98KA570B.

The finishing touch for your kitchen, our iQ700 range of hoods benefit from a fully coordinated design with all other iQ700 appliances. They banish unwanted steam, grease and cooking smells efficiently. No more misted windows, or greasy surfaces – just fresh-smelling surroundings.

The technology built into Siemens iQ700 range of hoods eliminates grease, steam and odours, effortlessly and quietly from your cooking space. We know that a kitchen is not only a place to cook; it is a place to entertain, relax after a hard day's work, or spend time with friends and family. The powerful motors in our cooker hoods and the specially designed

housing mean an even quieter operation and fewer disturbances for you.

climateControl uses an ultra-sound sensor to detect the level of steam or air and adjusts the extraction power automatically. You can use the intensive setting to temporarily boost the extraction rate to cope with particularly demanding cooking conditions, for instance when stir-frying. Models that feature this will revert back to normal automatically after ten minutes so you don't have to remember to switch it back yourself.

Ideal for removing strong, lingering cooking odours like curry or fish, or simply to keep your kitchen fresh throughout the day the interval operation setting will turn the hood on to ventilate the kitchen for a couple of minutes every hour. Some models even have an automatic run-on facility, the hood works for an additional ten minutes to deal with any

With open plan living becoming more and more popular, a quiet, efficient and powerful extractor is necessary.

How to choose your hood.

With the trend for open-plan living, a quiet, efficient and powerful extractor is essential to deal with the strong cooking odours and grease-laden air that can otherwise linger throughout the house. There are two vital points to consider when choosing a hood, the first is whether you want the hood to be ducted or re-circulating, and the second is its power rating. Here are some helpful pointers.

Ducted or recirculated?

For optimum performance, your extractor hood should be ducted to the outside of the house, so that the extracted air is vented outside. But sometimes this is not practical, so most Siemens hoods can also operate in re-circulating mode; where the air is passed through the metal filter to remove grease, and then through a carbon filter to remove odours before being directed back into the kitchen. Although the extraction rate is slightly lower when using this method than ducted extraction and the carbon odour filter will need to be replaced, re-circulating the air offers an energy efficient benefit; cool air is retained in the home in the summer and warm air does not vent out during winter months.

The power to perform

A chosen hood must be powerful enough to effectively remove moisture and cooking odours from a kitchen. The hood should be able to change the air in the kitchen 10 times per hour. Using this quick calculation, consumers can check whether a hood is sufficiently powerful. Firstly, calculate the volume of the kitchen (HxWxD metres). Next multiply that figure by 10. The resulting figure is the ideal extraction rate required. Match this to a lower power level on the hood to avoid having to run at full power for increased efficiency.

Our hood range is also equipped with the energy-saving, powerful yet quiet and durable iQDrive motor, capable of handling smoke and grease in the most challenging cooking situations. Specially designed to last longer, the motor comes with a 10-year motor guarantee and a 5-year parts and labour guarantee.

For example

Room:
 $4\text{m} \times 4\text{m} \times 2.5\text{m} = 40\text{m}^3$

10 changes per hour:
 $10 \times 40\text{m}^3 = 400\text{m}^3/\text{h}$

So the hood must achieve
a minimum of $400\text{m}^3/\text{h}$.

Complete freedom to plan your kitchen.

The downDraft hood provides a modern extraction solution that perfectly integrates into your kitchen without compromising on design.

880 mm
Width

Hoods

With this style solution in mind, the new Siemens downDraft hood emerges and disappears with the touch of a button and with its convenient LED light strip aiming the focus on what you are cooking, no space is lost. Due to its unique design and placement, it not only catches all unwanted odours but it also catches every eye.

Space saving

Banish unwanted steam, grease and cooking smells from your kitchen, and not have to worry about where to place that unsightly hood. Siemens new downDraft hood is conveniently placed under the counter-top so unless you want to see it, the hood only needs to be on show when you are cooking.

LED illumination

Both illuminating your hob as well as making it an attractive feature, the downDraft hood features LED lights that can be turned on and off with the use of the extraction settings, or with the use of the softLight can be used to create ambiance in the kitchen.

Electronic touch controls

Beautifully designed the hood features control options that coordinate with Siemens iQ700 hobs and compact appliances; five control options with electronic touch controls. When you are busy cooking, you shouldn't have to stop to think about how your cooker hood works.

Exceptional extraction.

Ceiling hoods, the perfect space-saving solution.

This powerful but unobtrusive ceiling hood has the ability to free up valuable space in your kitchen and creates a beautiful integrated look. Additionally this stylish hood benefits from rim ventilation, remote control operation and uses energy-efficient, dimmable LED lights for a completely clean and modern look in your kitchen. Suitable for ducted installation.

1200 mm
Width

The freshness of outdoors in your kitchen... all day long

Smells and steam may still linger after you've finished cooking, which is where the automatic after running can assist. It continues running for 10 minutes after the hood is switched off, allowing you to dine in fresh-smelling surroundings.

Convenient remote control

Our ceiling hoods are operated via remote control, so it doesn't matter if it is out of reach. You also have the option to dim the LED lights with ease creating the perfect kitchen ambiance when entertaining.

The low-fat option for your kitchen

Our patented rim ventilation extracts air around the edges of an attractive dishwasher-safe steel cover that conceals the grease-collecting filters. Changing the filters is easy thanks to the convenient and secure cover mechanism.

The stylish solution to uncluttered and modern living.

Energy efficient extraction.

iQ700 chimney hood, state-of-the-art efficiency.

Sleek designs allied with seriously innovative technology and energy efficiency, our chimney hoods are perfect for large, modern kitchens. Whether you choose the aesthetics of glass, angled or boxed, all iQ700 hoods are designed to match our iQ700 ovens and hobs. The iQ700 model highlighted below is much more than just a standard cooker hood. With the powerful yet energy efficient iQDrive motor, LED lights and electronic touch controls, this hood is perfect for anyone looking for a state-of-the-art high performance, energy saving chimney hood.

◀ 900 mm ▶
Width

Hoods

iQDrive motor ensures this hood requires little energy to run.

climateControl Sensor extracts unwanted steam and grease only when needed.

State-of-the-art efficiency

The LF91BA582B hood features innovative technology that saves energy. This is thanks to the highly efficient, durable brushless iQDrive motor which is powerful, but requires very little energy to run. The bright long-lasting LED lights also contribute to the energy savings whilst perfectly illuminating your cooking area.

touchSlider control

Allows your hood to fit in seamlessly with other Siemens appliances, adding to the individual style of your kitchen while being incredibly easy to use. There's also the added convenience of being able to easily see the current setting of your hood as well as having all options accessible at the touch of a finger.

Reduce your energy bills

Auto intensive revert automatically turns off the intensive setting if left idle. Lower energy consumption is not only good for reducing your carbon footprint, but will reduce your energy bills too.

High-design easy access.

iQ700 angled chimney hood, striking and practical.

The eye-catching sleek design of our angled chimney hood range, allows them to be less intrusive when it comes to taking up space in a smaller kitchen. The high-design also makes for easier access to all areas of your hob, even the rear zones. The iQ700 hood below benefits from softLight with dimmer function, which creates beautiful atmospheric lighting for your kitchen. And, featuring a black glass canopy with electronic power display and steel filter covers for a truly striking hood.

The dimmer switch creates the perfect ambient lighting.

Illuminate your culinary creations in style

Adds to the ambiance of your kitchen, providing a soft and cool light in an area that can be difficult to illuminate. The dimmer switch allows the light to always compliment the atmosphere, creating the perfect evening accompaniment.

Stand out from the crowd

The eye-catching design of black glass is striking and will ensure that this hood will stand out and make a feature in any kitchen as well compliment and coordinate with other Siemens appliances.

Extra power to keep your kitchen smelling fresh

Intensive setting creates a powerful boost of extraction, perfect for tackling demanding food such as stir fry or steamed vegetables. This ensures moisture is properly eradicated, without misting windows and keeping the kitchen air fresher.

The final piece of
your fitted kitchen.

SIEMENS

Hoods

Cooling

Super efficient, super stylish.

Models shown: aCool wine cabinet CI24WP02, aCool freezer with indoor ice and water dispenser FI24DP32, aCool fridge CI30RP01.

The perfect environment for fresh food.

Food preservation technologies that mean you can store a lettuce for up to 20 days and it will still taste as fresh as the day you bought it.

Above (from top to bottom): hydroFresh drawer, vitaFresh drawer, freshProtect box.

There's nothing worse than stocking your fridge full of fresh food, only to find that a few days later it is no longer edible. Saving you time and money Siemens fridge freezers feature new technology that is going to prolong the life of your fresh produce, meaning there will be fewer trips to the supermarket so you can enjoy your favourite foods for longer.

These benefits include; keeping your food at the correct temperature, locking in the nutrients with our innovative hydroFresh drawer, and the airFresh filter that helps to separate the smells in your fridge meaning no cross contamination between sweet and savoury foods. A Siemens fridge freezer is the smartest way to preserve your food.

Fresh food up to three times longer

Keeping foods fresher for up to 3 times as long compared to a conventional vegetable drawer. The "dry" zone and "dewpoint" zone within vitaFresh drawers determine how much humidity food receives. Storing meat and dairy at their optimum humidity creates less food wastage and cuts down on your food bills.

Preserves food up to twice as long

Fresh food can last twice as long as it would in a standard vegetable drawer in the Siemens hydroFresh drawer. With an innovative humidity control, the drawer keeps minerals and nutrients in vegetables, salad and fruit for longer, increasing their use by date – saving you time and money.

Fridge freezer KI87SAF30G.

Technology never tasted so good

A box in the fridge with an individual temperature control; freshProtectbox can be set to 0°C for meat and fish, 2°C for milk products and 4°C for fruit and vegetables, providing the optimum temperature for individual foods, allowing them to stay fresher for longer. Fresh ingredients are the basis for delicious meals, but also count for less wastage and fewer trips to the supermarket.

Ideal storage for meat and fish

Ideal for storing meat and fish, the coolBox creates an environment that is almost 3°C cooler than the rest of the fridge. The coolBox stores meat and fish at the optimum preservation temperature, whilst allowing other food in the fridge to be chilled at around 4°C. Food tastes better for longer and there is less food wastage.

Keeps food smells separate

Shelves separate food, the airFresh filter separates smells, ensuring that the fridge smells fresh at all times. The filter neutralises odours in the fridge, ensuring that smells don't transfer between foods, while the anti-microbial filter stops the transfer of germs and bacteria. Sweet and savoury can sit side-by-side and you can enjoy a fresh smelling fridge every time you open the door.

Optimum temperature guaranteed

Monitoring the temperature of the room, sensors in the fridge detect how much power is needed to maintain optimum fridge and freezer temperatures. Less fluctuation in temperature ensures food is stored safely and also helps to make sure only the energy needed is used. Food preservation and energy-efficiency go hand-in-hand with vitaControl.

Freshness at its best.

Longer lasting food is good for the environment.

Research shows that UK households are throwing away £12 billion worth of food every year. That means the average household with children throws away about £50 worth of food and drink a month.* Thanks to the advanced technology in Siemens refrigeration appliances, food stays fresher for longer.

For example the hydroFresh vegetable drawer, which is available on many of our built-in fridge freezers, maintains the correct humidity of the contents. This means fruit and vegetables can

be kept for up to twice as long, giving you longer to use them. Ensuring you get more out of the food you buy and waste less.

coolBox – Food storage times		
Meat	Max. storage time (days)	Handling recommendation

Cooling

Designed for an easy life.

easyLift shelves – even when full, you can raise or lower the shelf.

Although they may be behind closed doors Siemens elegant and functional range of built-in fridge freezers are going to become the talking point in any kitchen.

Whether its an American-style fridge freezer that has the wow-factor; an aCool appliance that allows you to create your own bespoke designs; stand alone, or undercounter option that is going to save space, Siemens has a wide range to choose from. Energy efficient, our appliances are packed with flexible storage solutions and technologies that are going to suit your hectic lifestyle.

With noFrost technology you'll never have the job of defrosting the freezer again.

You never need to defrost the freezer again

Who has time to defrost the freezer? Those with a Siemens noFrost freezer do, because there simply is no need to. Using an air circulation system to remove humidity and stop frost and ice building up on the freezer walls and packaging your freezer will look after itself. No longer will you have to run-down your freezer to defrost and remove the ice build-up. Hassle free, you can enjoy fresher food, no more soggy packaging and a frost free freezer for life.

Because life's too short

For those models that come with lowFrost, life is still made easier. lowFrost reduces the build-up of frost by up to 50%, meaning that you don't need to defrost the freezer as often, only once every 18 months to 2 years. Designed to save you time and provide added convenience, you can spend your time on the things you enjoy, not defrosting your freezer.

With noFrost technology you'll never have the job of defrosting the freezer again.

Cooling

Model shown: aCool fridge freezer CI36BP01.

Models shown: coolConcept freezer GI38NP60, coolConcept fridge KI42FP60.

Minimum energy consumption 24/7, 365 days a year.

We are committed to developing energy saving technology that makes a difference.

Packed with ingenious and energy efficient solutions, a Siemens appliance is perfectly designed for your convenience and practicality. Not only is it going to do what you expect, there is so much more that you don't see, including the environmental benefits. Perhaps the most important energy efficiency technology is that designed to keep your food fresher for longer. Storing foods at their optimum humidity and temperature creates less food wastage, meaning fewer trips to the supermarket, cutting down on your food bills.

Keeping food at the optimum temperature the multiAirflow System helps to circulate air around the fridge evenly, meaning that temperatures on all shelves are maintained.

Ensuring freshness as well as saving energy the multiAirflow System cools down new warmer food entering the fridge 40% faster than a standard fridge as the motor doesn't need to work as hard to cool the fridge down.

When you're on holiday or a long business trip Holiday Mode will ensure that your food in the freezer stays cold enough to maintain freshness whilst reducing energy output – saving you money, and helping the environment. Our fridges also feature a warning alarm that signals you when the fridge door has been left open, ensuring that energy isn't needlessly wasted and preserving the food inside, both are saving you money and energy usage.

Superb styling, superb freshness.

Unique storage solutions.

Bespoke combinations to suit your needs.

In-door ice and water dispensers.

Although they may be behind closed doors our elegant and functional range of built-in fridge freezers are going to become the talking point of any kitchen. Whether its an American-style fridge freezer that has the wow-factor; stand alone, or under counter option that is going to save space, Siemens has a wide range to choose from. Energy efficient, our appliances are packed with food preservation and flexible storage solutions that are going to suit consumers hectic lifestyles.

Individual flare

For professional quality storage and care of wine, both white and red, choose the elegant and stylish aCool wine cabinet. Great for showing off large collections, there is room for 98 bottles, all beautifully presented and conveniently accessible on telescopic storage shelves, and with two independently adjustable temperature controls the system can accurately maintain temperatures from 5°C to 18°C.

Sophisticated storage, stunning functions

With a digital display that keeps consumers informed of the precise temperature and helps navigate easily through the operating menus, a door sensor that sets off a warning alarm if the door is left open for any reason; aCool appliances from Siemens feature top of the range technologies.

Seamlessly integrated into the sidewall of the fridge for maximum illumination and no loss of fridge space, the LED lighting is both energy efficient and practical. While the conveniently placed in-door ice and water dispenser featured in certain aCool freezers delivers chilled water, crushed ice and ice cubes at the touch of a button.

aCool appliances allow you to create bespoke designs, suiting individual tastes and making kitchens unique to you.

Individual flare.

Show your individual side with aCool appliances, bespoke designs to suit your individual taste.

With a digital display that keeps you informed of the precise temperature and helps you to navigate easily through the operating menus, a door sensor that sets off a warning alarm if the door is left open for any reason and an eco mode which can be selected to save energy; the aCool appliances from Siemens features top of the range technologies.

Technology never tasted so good

The freshProtectbox provides the optimum temperature for individual foods, allowing them to stay fresher for longer. Fresh ingredients are the basis for delicious meals, but also count for less wastage and fewer trips to the supermarket – saving you time and money.

Precision control at the touch of a button

With easy to use electronic controls Siemens fridge freezers never leave you in the dark. The electronic display allows you to precisely set and change the temperature of your fridge and freezer and select certain modes, such as Eco and Holiday Mode, at your finger tips.

Refreshing ice-cool water, whenever you want it

Filtered cold water and ice at the touch of a button. The chilled water and ice dispenser is a convenient time saver, serving a refreshing drink whenever you want.

Style statement.

Impress your friends with the stunning aCool fridge freezer, brimming with style and top-class features.

Packed with the latest innovations this stylish iQ700 fridge freezer is going to keep your food fresher for longer with a multiAirflow system that improves the circulation of air around the fridge and freezer and noFrost technology that is going to leave your freezer, frost free for life.

Food preservation storage solutions.

Excellent food preservation systems as standard

The multiAirflow system moderates the fridge temperature when new food is added, cooling down food 40% faster than a standard fridge. Well cared for ingredients help to make delicious meals... get ready to impress your friends.

Shelves separate food. The airFresh filter separates smells

The airFresh filter neutralises odours in the fridge, ensuring that smells don't transfer between foods. Enjoy a fresh smelling fridge every time you open the door.

Ice and a slice?

Positioned inside the fridge freezer drawer, the ice cube maker can produce up to 1.8kg of ice cubes in 24 hours! Perfect for dinner parties and social occasions.

Serious refrigeration just got seriously cool.

Show off your wine collection.

Beautifully presented and conveniently accessible storage for all wines.

A perfect addition to other aCool appliances, our full height aCool wine cabinet stores up to 98 bottles whilst adding glamour and individuality to your kitchen. Though if your collection is not so vast, we also offer a wineCooler, in the built-in cooling range, which can hold up to 32 bottles.

Professional quality storage and care of wine

Great for showing off your collection, there is room for 98 bottles (of 0.75 litres), all beautifully presented and conveniently accessible on telescopic storage drawers, and with two independently adjustable temperature controls the system can accurately maintain temperatures from 5°C to 18°C.

Elegant and practical lighting

To further highlight your collection of fine wines, the interior of the wine cabinet has elegant, energy efficient LED lights. Which not only provide ambiance in the kitchen but allow for maximum illumination, so you can be sure you choose the correct wine for dinner.

The acoustic door warning signal ensures you're in control

The acoustic door open warning signal alerts you if the door has been left ajar, or if there is no power getting to the fridge. Both energy and wine are safe from being needlessly wasted, saving you money.

Professional storage for your wine collection.

Super efficient, super stylish.

The coolConcept range from Siemens.

Some models in the range feature vitaFresh® drawers that control humidity and keep your food fresher for longer, easyLift glass shelves that are adjustable to suit your ever changing storage needs and noFrost technology that means you'll never have to defrost the freezer again.

Top marks for energy efficiency

Every model in the coolConcept range is rated A++ for energy efficiency in the EU energy-labelling scheme. Using up to 40% less energy than their A-rated equivalents our range of coolConcept appliances also feature noFrost technology for your ultimate convenience, saving you money and providing you with clever storage spaces.

Advanced technology making food taste as nature intended

The "dry" zone and "dewpoint" zone within vitaFresh determine how much humidity food receives. Storing foods at their optimum humidity can help them last up to 3 times as long. This creates less food wastage, meaning fewer trips to the supermarket and lower food bills.

Storage space that adapts to your needs

Expect nothing but convenience with easyLift shelves. Even when full, you can raise or lower the shelf by 6cm to make room for taller items – ideal for serving jugs.

Style, capacity and innovation in one.

American big thinking
meets German ingenuity.

Our coolDuo, American-style fridge freezers have all the innovations you would expect from Siemens. Including noFrost; freshProtectbox, multiAirflow cooling and in-door ice and water dispensers, whilst also providing you with additional capacity and flexibility for all your shopping needs.

Crushed or cubed ice and chilled water at the touch of a button.

Everything to hand when you need it

The fully extendable drawers on telescopic rails slide smoothly and surely, fully extending for complete accessibility for the wanted item at the back of the fridge.

Technology never tasted so good

The freshProtectbox provides the optimum temperature for individual foods, allowing them to stay fresher for longer. Fresh ingredients are the basis for delicious meals, but also count for less wastage and fewer trips to the supermarket – saving you time and money.

Refreshing ice-cool water, whenever you want it

Filtered cold water and ice at the touch of a button. The chilled water and ice dispenser is a convenient time saver, serving a refreshing drink whenever you want.

Elegant, ingenious and
convenient American style,
Siemens style.

Dishwashers

Extra innovations for extra shine.

Clever lighting.

Less ordinary lighting innovations that create ambiance in your living space and keep you informed, Siemens dishwashers feature an internal blue emotionLight that has the wow-factor; once you've seen it in action you'll be sure to want to show off brilliantly cleaned glasses in your own home.

Above: timeLight usable on any surface or any colour.
Below: Cool glow of emotionLight.

With our dishwashers being so quiet, how else would you know they were on?

Useable on any surface of any colour, the innovative timeLight projects the remaining time of the dishwasher cycle on to the floor. With our dishwashers being so quiet it can be hard to tell when they are on or off. This is the perfect solution to let you know the dishwasher is running at a glance, so you can avoid opening the door mid cycle and get on with your day. The equally as innovative infoLight also projects a dot of light onto the floor so you can see instantly if the dishwasher is running.

Cool glow of emotionLight

Creating a relaxed ambiance in your living space, the emotionLight uses LED lights to reflect off your brilliantly-cleaned glasses and create a cool blue glow emanating from inside your dishwasher. LED lights high in the door frame bathe the interior of the dishwasher in beautiful blue light when you open the door, and switch off again when you close it. The LED lights never need to be changed and will last the lifetime of your dishwasher.

Door openAssist

A modern handleless kitchen deserves appliances that can blend in seamlessly with their surroundings, yet still offer excellent results with innovations that support your busy life. A Siemens iQ700 dishwasher is no exception. With door openAssist you can open fully integrated dishwashers by simply touching the front of the unit. The dishwasher automatically opens so you can load or unload the dishwasher with ease. This removes the need for a handle and is the perfect solution and choice for designer kitchens. Innovative and modern, for a life less ordinary.

TFT Display

Advanced technology meets sophisticated design. The TFT Display integrated into the top control panel of our dishwashers is the perfect match for the seamless design of our handleless openAssist models. Readable from any angle, the clearText TFT display makes it easy to see all selected programme information at a glance. What's more, the helpful information button allows you to quickly discover the programmes and options of your dishwasher with ease, as well as see the exact start, end and running times. For a life less ordinary.

The safer way to clean your wine glasses.

The wine glass holder accessory is specially designed to save you time as well as giving you complete peace of mind.

Wine glass holder accessory

No longer will you choose to wash your wine glasses by hand. Available as standard in all iQ700 dishwashers, this accessory holds and optimally cleans up to four long stemmed wine glasses safely and securely. The innovative lock mechanism ensures your glasses are stable in the basket, yet with minimal contact areas to avoid any water pooling or streaks. The result? Sparkling glasses that have been safely cleaned and dried, every time. The accessory is also available to buy from the Siemens website (accessory code SZ73300).

Saving energy naturally.

Energy efficiency meets cutting edge design.

Using advanced drying technologies, Siemens dishwashers keep energy consumption to a minimum. Zeolith®, a form of naturally occurring mineral, has the astonishing ability to absorb moisture and convert it to heat.

What does this mean for you? The heat produced naturally by the Zeolith® is used for the drying cycle. No additional energy is therefore required to heat up the contents of your dishwasher for the drying process (as with a standard drying system). This results in perfect drying, with less energy usage.

The Zeolith® mineral is stored in the depths of the dishwasher; this regenerates itself and keeps working for the entire lifetime of the machine. Combine this with the economy 50 programme to get brilliant results with minimal energy.

Add an extra shine

Shine & Dry is a unique energy efficient function that produces table ready, gleaming glassware by harnessing the power of Zeolith®. This special drying cycle not only brings out a streak free shine in most delicate glassware and tableware but also means extra dry and stain free plastics, pots and pans.

Drying phase – Zeolith® absorbs moisture and converts it to heat energy.

Cleaning phase – As the mineral is heated during the cleaning cycle, it is recharged and ready to absorb moisture once more.

Clean dishes before the evening is over.

Perfectly clean and dry dishes in a third of the time. Flexible dishwashing, for a life less ordinary.

Ever needed your dishes cleaned quickly, forgotten to put the dishwasher on in the morning, or simply need clean plates before your guests arrive?

That's why we've introduced varioSpeed Plus, the perfect time saver. Giving you the flexibility to spend time on more important things, varioSpeed Plus reduces the time it takes to wash and dry a full load down to a third.

Ideal when you need your cutlery and plates in a hurry, just press the varioSpeed Plus button in conjunction with your desired programme* and it will run the dishwasher significantly

faster without compromising on wash quality. Used together with the Eco 50 programme, varioSpeed Plus will wash and dry a full load in just over an hour. Giving you time saving solutions when you need them the most and sparkling clean dishes fast.

*Except quick wash 45°C programme

Dishwashers

Fully integrated iQ500 dishwasher.
Model shown: SN66P050GB.

Top drawer.

Dishwasher interior design at its highest level.

Keeping the design of your dishwasher just as sleek on the inside as it is out, Siemens dishwashers house various features that will benefit you when washing your dishes. These include adjustable drawers and baskets for larger pans or serving plates, extra slats for wine glasses and crockery, a cutlery drawer and a basket that helps to disperse detergent more effectively.

rackMatic™

Ever found yourself loading and unloading the dishwasher because the last pan doesn't fit? rackMatic™ conveniently allows you to raise and lower the height of the top basket, even when the dishwasher is full. With the simple flick of a lever you can raise or lower the basket to suit your washing needs. This increased flexibility ultimately saves you time and takes the stress out of a mundane chore.

varioFlex Pro basket system and varioDrawer Pro

Making the most of space within the dishwasher, varioFlex Pro allows you to create extra room for pots and pans. Now with an optimised lower basket design for large plates and adjustable tines highlighted with blue touchpoints, your dishwasher can adapt to any load quickly and easily. Adding a third shelf for cutlery, varioDrawer Pro removes the need for a cutlery basket and creates more space. Perfect for the extra-large dinner party, you can fit more in, making the after dinner clean up quick and simple. Enjoy fewer washes and more flexibility.

dosageAssist

Ensuring that your dishes receive the best possible clean every time, dosageAssist quickly and evenly dissolves your dishwasher tablets throughout the entire machine, leaving no mess for you to clean at the end of the cycle. Rather than the detergent tablet dropping to the bottom of your machine, it falls into an innovative basket at the front, allowing it to dissolve completely leaving no mess and a brilliant clean.

Siemens recommends using Finish dishwashing products

Siemens has tested and recommends using Finish dishwashing products. For the ultimate clean and shine, plus added protection against corrosion, Siemens recommends new Finish Quantum Shine & Protect.

Added extras.

Convenience and cutting-edge technology stunningly combined. Siemens dishwashers give you more than just clean dishes. Functional programmes with benefits you will want to see, no longer will you want to select the quickest wash.

Model shown: SN66P050GB stainless steel dishwasher.

hydroDry

Protect your glasses from cracking with hydroDry. Heat generated during the wash cycle is used to pre-heat the rinsing water to stop glasses being put under stress. The system also optimises the drying process. Not only does this ensure your favourite glasses are hygienically cared for as no external air is brought into the machine to dry them, but as no existing heat is used to gently warm the rinse water, it is energy-efficient too.

extraDry

Why spend time towel-drying plasticware when extraDry does it for you? extraDry is designed to make sure that plasticware comes out of the dishwasher bone dry – no more water droplets, no more hand drying.

halfLoad

The halfLoad function is great for couples and smaller households. Letting you place items anywhere in the dishwasher, it is ideal for smaller loads and uses up to 20% less water and 10% less energy to produce a brilliant clean. A dishwasher uses water and energy most efficiently when run with a full load. However, with halfLoad you have a resource saving option for when you can't wait until the dishwasher is full.

10-year anti-rust warranty

Due to advanced materials and manufacturing technologies, in addition to our standard appliance warranty, we are able to provide a free of charge warranty against rusting-through of the dishwasher's inner cavity.

Night Programme

Sleep well and take advantage of cheaper electricity rates at night whilst benefitting from a super-quiet cycle. The Night Programme is a specially adapted, energy efficient Eco50°C programme that achieves a noise reduction of 2 dB by decreasing the spray pressure and extending the run time. Wake up to perfectly clean dishes, washed using less resources and saving money at the same time.

The Hygiene option

Great for cleaning food containers and utensils, babies' bottles and chopping boards the hygiene option kills 99.9% of bacteria and germs. Providing a simple solution to the upkeep of your family's health, the final rinse heats up to 70°C regardless of the cycle you choose.*

intensiveZone

With intensiveZone, you can wash delicate glasses and burnt cooking pans in the same wash. The higher temperature and increased spray pressure in the lower basket ensures stubborn stains are removed, whilst delicate items are protected in the top basket. This means there is no need to separate washes in to different loads, and no need to soak heavily soiled pans overnight. First-class convenience guaranteed.

Delicate

Intensive

Dishwashers

Space-saving lifesaver.

Working twice as hard to give you even better cleaning results.

The less space available, the more valuable that space becomes. This is especially true of a small kitchen, where a lot of space can be gained by using it efficiently, a 45cm dishwasher can help you to do just that.

Although the built-in dishwasher in the 45cm series may be small, it is still intelligent when it comes to powerful cleaning. Benefitting from 2 spray arms under the top basket as opposed to just one, duoPower ensures that your dishes receive the best possible clean, with 2 duoPower arms working doubly hard to reach every inch of the basket.

Featuring the innovative Siemens duoPower double spray arm and the time saving varioSpeed option, this model also features the varioDrawer cutlery tray, giving you nothing but outstanding results. Siemens dishwashers

are designed to thoroughly clean dishes, but quietly whilst using minimal water and energy. With Siemens, dishes have nowhere to hide.

Resource efficiency

The 45cm built-in dishwasher from Siemens uses only 9.5 litres of water to wash 10 standard place settings in one cycle, making them resource efficient too.

SIEMENS

SIEMENS

Dishwashers

Saving energy naturally.

Utilising natural technology for unprecedented drying.

Keeping your energy consumption to a minimum, a Siemens iQ700 dishwasher uses Zeolith®, a naturally occurring mineral, to create the heat and energy needed for drying dishes. This combined with varioSpeed Plus for a significantly faster wash, and the innovative, convenient varioDrawer Pro gives you a dishwasher that is easy to use and designed to perform.

Harnessing the power of nature – Zeolith® natural minerals.

Brilliant drying

The energy-efficient Zeolith® utilises natural minerals that release moisture as energy. Receive brilliant drying, costing as little as 10p per cycle, whilst being kinder to the environment

Add an extra shine

Experience instant sparkling and streak free glasses with Shine & Dry – making the perfect impression for any occasion without the need to hand dry glasses. It perfectly dries plasticware too, saving you the trouble of drying them yourself.

More space

The varioDrawer Pro frees up space as you don't need a cutlery basket, creating ample room in your dishwasher for more place settings in the lower basket – ideal for larger dinner parties. Blue touchpoints indicate all of the adjustment options too, meaning you can quickly and easily fit espresso cups in the drawer with the simple flick of a catch. More flexibility thanks to the varioDrawer Pro.

Energy efficiency meets cutting edge design.

Clever lighting.

Lighting innovations that create ambiance in your living space and keep you informed.

The iQ700 dishwashers come with less ordinary innovations that make your life easier and your kitchen better equipped. timeLight is the perfect solution to knowing when your dishwasher is on and to see how long is left at a glance. Whilst the emotionLight uses blue LED lights to reflect off your brilliantly-cleaned glasses, for a modern finish to your kitchen.

timeLight: projects programme time remaining.

timeLight: Information with no need to open the door

Useable on any surface of any colour, timeLight projects the remaining time of the dishwasher cycle on to the floor. With our dishwashers being this quiet, it's the perfect solution to let you know the machine is switched on.

The cool glow of emotionLight accents any atmosphere

Show off brilliantly-cleaned glasses and enhance a relaxed atmosphere in your kitchen with emotionLight. The cool blue light emanates from the dishwasher, adding to the ambiance of the room.

Perfect time saver

varioSpeed Plus is the perfect time saver, reducing washing and drying times down to a third. Enjoy the flexibility of a dishwasher that can finish faster and make sure you're never caught out if you forget to start the dishwasher before work.

With our dishwashers being so quiet, how else would you know they were on?

Space saving.

Use every square centimetre of living space efficiently.

The less space available, the more valuable that space becomes. This is especially true of a small kitchen, where a lot of space can be gained by using it efficiently. A 45cm slimline dishwasher can help you to do just that.

Power spraying with duoPower.

Nowhere to hide

duoPower provides 2 powerful spraying arms that work in unison to reach every corner of the dishwasher, leaving nothing but outstanding results – every time.

More space

varioDrawer frees up space as you don't need a cutlery basket, creating ample room in your dishwasher for more place settings – ideal for larger dinner parties.

Efficient and effortless drying.

The ecoDry setting automatically opens the dishwasher door ajar at the end of each cycle. This allows room temperature air to naturally dry the contents of the dishwasher without using any additional energy. Perfect for leaving the dishwasher to finish at night, or when you need to spend time on the more important things in life.

Small but still intelligent when it comes to powerful cleaning.

Behind closed doors.

Cleverly designed and quietly efficient our built-in washing machines and washer dryers work away behind closed doors, producing beautifully clean clothes without ruining the beautifully clean lines of your living space.

Built-in to a modern kitchen or utility room, Siemens washing machines and washer dryers not only look great, they perform too. With state-of-the-art technology they are extremely energy efficient, easy to use and save time and money. From the sophisticated sensor

technology and cutting edge engineering, to the carefully designed range of programmes and options offered our built-in laundry appliances are designed, from the ground up to help manage the range and complexity of modern textiles, quietly behind closed doors.

Discreetly efficient.

Siemens built-in washing machines perform efficiently behind closed doors whilst keeping your kitchen's sleek lines and clean design.

With many special programmes to choose from, for all your needs. Our iQ500 washing machine caters for your hectic lifestyle without you even knowing.

What can you do in 15 minutes?

Add the laundry to your list. rapid15 rinses, washes and spins lightly soiled clothing in just 15 minutes, meaning your favourite shirt will be ready for the evening before you've finished dinner.

Moderates foam, keeping clothes immaculate

Too much foam can ruin clothes, so it's important to moderate how much is in the wash. The foam detection system accurately achieves this, adding extra rinse cycles to remove excess foam.

Welcome the logical solution for clean clothes

Clothes are usually dirty from day-to-day wear, only needing a light clean. Inverse logic is the default setting that produces perfect results for daily-worn clothes, reducing washing times by up to 40%. It's the logical solution.

iQ 500

WI14S440GB

At a glance

- Capacity: 7kg
- Spin speed: 1400rpm
- 5 special programmes – including rapid15 and Shirts/Blouses/Time Remaining
- Time delay – wash when the time is right for you
- Inverse logic – reduces wash times by up to 40%
- Large display – for easy navigation

Go to pages 147-149 to view the whole range.

Taking the chore out of laundry.

The last word in convenience.

When your living space is limited Siemens washer dryers combine your laundry duties all-in-one. With a non-stop wash and dry programme for a 4kg load, we take care of your laundry so you don't have to.

In conjunction with Nikwax, we can prolong the life of your clothes.

Night wash

A special programme that minimises noise reduction, providing the perfect wash without disturbing your sleep.

Perfect when speed is the only option

The flexiTime function is designed for when speed is the only option, reducing laundry cycles by up to 30%.

Keeping clothes multi-functional

Working with Nikwax, this programme applies a waterproof treatment to breathable fabrics, prolonging the life of high quality functional clothing like winter jackets, fleeces and ski suits. Simply add the Nikwax treatment to your detergent drawer and select the Textile Guard option.

Wash and dry up to 4kg of laundry non-stop.

Services

For the lifetime of your appliance.

Customer service.

Knowledge and expertise, where you need it, when you need it.

Purchasing a Siemens appliance gives you access to our expert customer service team; for the lifetime of your appliance. With 2-5 year guarantees on offer and multi-award winning products to choose from and assistance from an outstanding customer service department, you can be assured that the appliance you are buying will offer peace of mind.

Siemens Customer Service has received the Highly Commended accolade in the Domestic and General Total Excellence and Quality Award 2014.

Expert advice

Siemens Customer Service staff are full of knowledge and expertise, whether you have a simple question, want to order a spare or replacement part or require an engineer to visit your home. With engineers based locally across the country*, no one is better suited to help, and all Siemens repairs are analysed in advance so that we bring the correct replacement spare parts likely to be needed on the first visit.**

This is all supported by our outstanding online services, available 24 hours a day. Visit siemens-home.co.uk for product information, downloadable brochures, videos, instruction manuals and FAQs.

Greener products, cleaner planet.

World-class performance.
Minimum environmental impact.

Investing in the future, Siemens is committed to protecting the Earth's natural resources.

More than 80 percent* of the environmental impact occurring over a home appliance's lifetime is attributable to the usage phase. This is why, over the last few decades, BSH developers have been focusing on designing appliances that consume less energy, water and detergent. Environmental protection and energy efficiency are core topics within our corporate strategy.

What does this mean to you?

Our innovative energy-saving solutions from leading energy saving motors, to the brightest white, low-energy (LED) light can save you money and decrease your energy usage.

Energy saving comes automatically

Supporting environmental initiatives, the EU energy efficiency label is carried on all appliances; class A+++ being the most energy efficient. Reinforcing our focus on reducing energy consumption of our appliances reducing our carbon footprint, and passing on this energy saving to you, the consumer.

World-class performance

We make sure that Siemens ovens are as efficient as possible, with all our single and double oven cavities achieving a class A rating for energy efficiency. Selected models that feature hotairEco, a single shelf cooking programme, require 30% less energy than A rated appliances when hotairEco is used. And to top that, all of them are at least 20% more efficient than the standard requirements to achieve an A rating.

Most of our extractor hoods feature energy efficient low-voltage halogen lights; these offer excellent illumination of the hob space underneath but require replacing much less often. That means you don't have to worry about changing them or their effect on the environment.

If all UK consumers who bought an A rated fridge-freezer in 2011 had purchased an A+++ rated appliance instead, UK households would have saved £24 million in energy costs and

100,000 tonnes of carbon in one year (the equivalent carbon saving of taking over 30,000 cars off the road for a year). The Siemens range of super efficient fridge freezers offers a simple way to reduce your energy consumption. Much is the same for dishwashers with all of Siemens range rated at least A+ for energy efficiency and some offering the most efficient A+++ rating.

Built with ground-breaking technology, all Siemens washing machines automatically adapt the wash time and energy consumption to the amount of laundry in the machine.

In buying a Siemens product you can expect outstanding world-class performance, as well as a clear conscience.
