

Training Requirements for JABSOM Kaka'ako Researchers

- EHSO safety trainings are intended to be general awareness trainings.
- Principal Investigators or designee (e.g. Lab Supervisor or Manager) must provide all new lab personnel/students with task and site specific training.
- New lab personnel/students must complete the Lab Personnel Safety Checklist with their supervisor/PI prior to working in the lab.
- Lab personnel/students are responsible for keeping all training records and completing trainings when due. The Safety Training Log may be used to keep track of training dates.
- Training forms can be found at: [Safety Training](#)

UH General Lab Safety

- Required for anyone working in a UH lab.
- Initial and annual refresher training is available online at BioRAFT. Click on link to join training: [BioRaft](#) (log in using your UH username and password).

Initial Hazardous Waste Generator (HWG) Training and Annual Refresher HWG Training (specific to JABSOM Kaka'ako only)

- For all those who will submit chemical waste for disposal.
- Initial and annual refresher training is available online at BioRAFT. Click on link to join training: [BioRaft](#) (log in using your UH username and password).

General Biological Safety Training

- Initial and annual refresher training is available online at BioRAFT. Click on link to join training: [BioRaft](#) (log in using your UH username and password).
- See link for more information [University of Hawai'i Office of Research Compliance - Training](#)

Bloodborne Pathogen Standards

- Initial and annual refresher training is available online at BioRAFT. Click on link to join training: [BioRaft](#) (log in using your UH username and password).
