1.0 Introduction

Natural Area Consulting Management Services (Natural Area) was commissioned by the Water Corporation to undertake a detailed flora and vegetation survey, as well as a basic fauna survey, with a targeted Western Ringtail Possum and black cockatoo habitat assessment, at Logue Brook Dam (CW01144). Surveys were commissioned to inform all relevant stakeholders on environmental values relating to planning and potential approvals which may be required ahead of planned dam safety works.

1.1 Location

The survey area is approximately 50 km southeast of Mandurah, located within the Shire of Harvey. Covering roughly 48 ha, the area is situated on the western edge of Lake Brockman (Figure 1). Logue Brook dam was constructed in 1963 to further improve the Harvey irrigation scheme, and as a result Lake Brockman was formed (Department of Conservation and Land Management (CALM), 1989). Due to past historical land clearing, the majority of the survey area has been cleared, with an estimated 17 ha area to be assessed. The average annual runoff of the Logue Brook Dam catchment is approximately 12.5 million cubic metres, with headwaters of feeder streams originating from dissected laterite ridges (CALM, 1989). Currently, Lake Brockman is open to the public for recreational use.

1.2 Scope

The scope of works associated with the survey works included:

- desktop assessment to determine environmental values and conservation significant flora, fauna, habitat, vegetation, or other environmental features relating to the project area
- detailed flora survey to identify floristic diversity, existing vegetation conditions, occurrence of conservation significant flora and/or Threatened and Priority Ecological Communities
- on-ground detailed flora survey of the area to determine:
 - flora species composition (native and non-native)
 - presence of any priority or threatened flora species
 - vegetation type and condition
 - presence and locations of any Declared Pests and Weeds of National Significance (WoNS)
- on-ground basic fauna survey to record opportunistic sightings of fauna or evidence of their presence including tracks, scats, dens, warrens, and calls
- targeted search for Western Ringtail Possum (*Pseudochirus occidentalis*) through the presence of suitable habitat trees (*Agonis flexuosa*), presence of dreys, scats and/or through direct observation
- habitat assessment for black cockatoos, including the presence of habitat trees with a diameter at breast height (DBH) >500 mm and determining the presence of foraging and nesting habitat for threatened black cockatoos
- mapping of fauna habitat types and assessment of the habitat quality
- reporting outcomes of the survey.

1.3 Objectives

The objective of the survey was to collect sufficient information relating to the conservation value and condition of the flora, vegetation and fauna within the survey area to inform the decision making and environmental approval process related to the proposed remedial works within Logue Brook Dam.

2.0 Site Characteristics

The characteristics of a site have a strong bearing on the flora, vegetation, fauna, and ecological communities present. Key characteristics of the survey area are outlined in this section.

2.1 Regional Context

According to Interim Biogeographical Regionalisation of Australia (IBRA) descriptions, the survey area is located within the JAF01 – Northern Jarrah Forest subregion. This subregion occurs east of the Darling Scarp which is overlying granite and metamorphic rocks with an average elevation of 300 m. The Northern Jarrah Forest region is dominated by Jarrah Marri forest on laterite soils and in the eastern area of the subregion is dominated by Wandoo-Marri woodland on clayey soil (Williams and Mitchell, 2001).

2.2 Climate

The climate experienced in the area is Mediterranean, with dry, hot summers and cool, wet winters. According to the Bureau of Meteorology (2020); Wokalup WA, site number 009642, the region has an average:

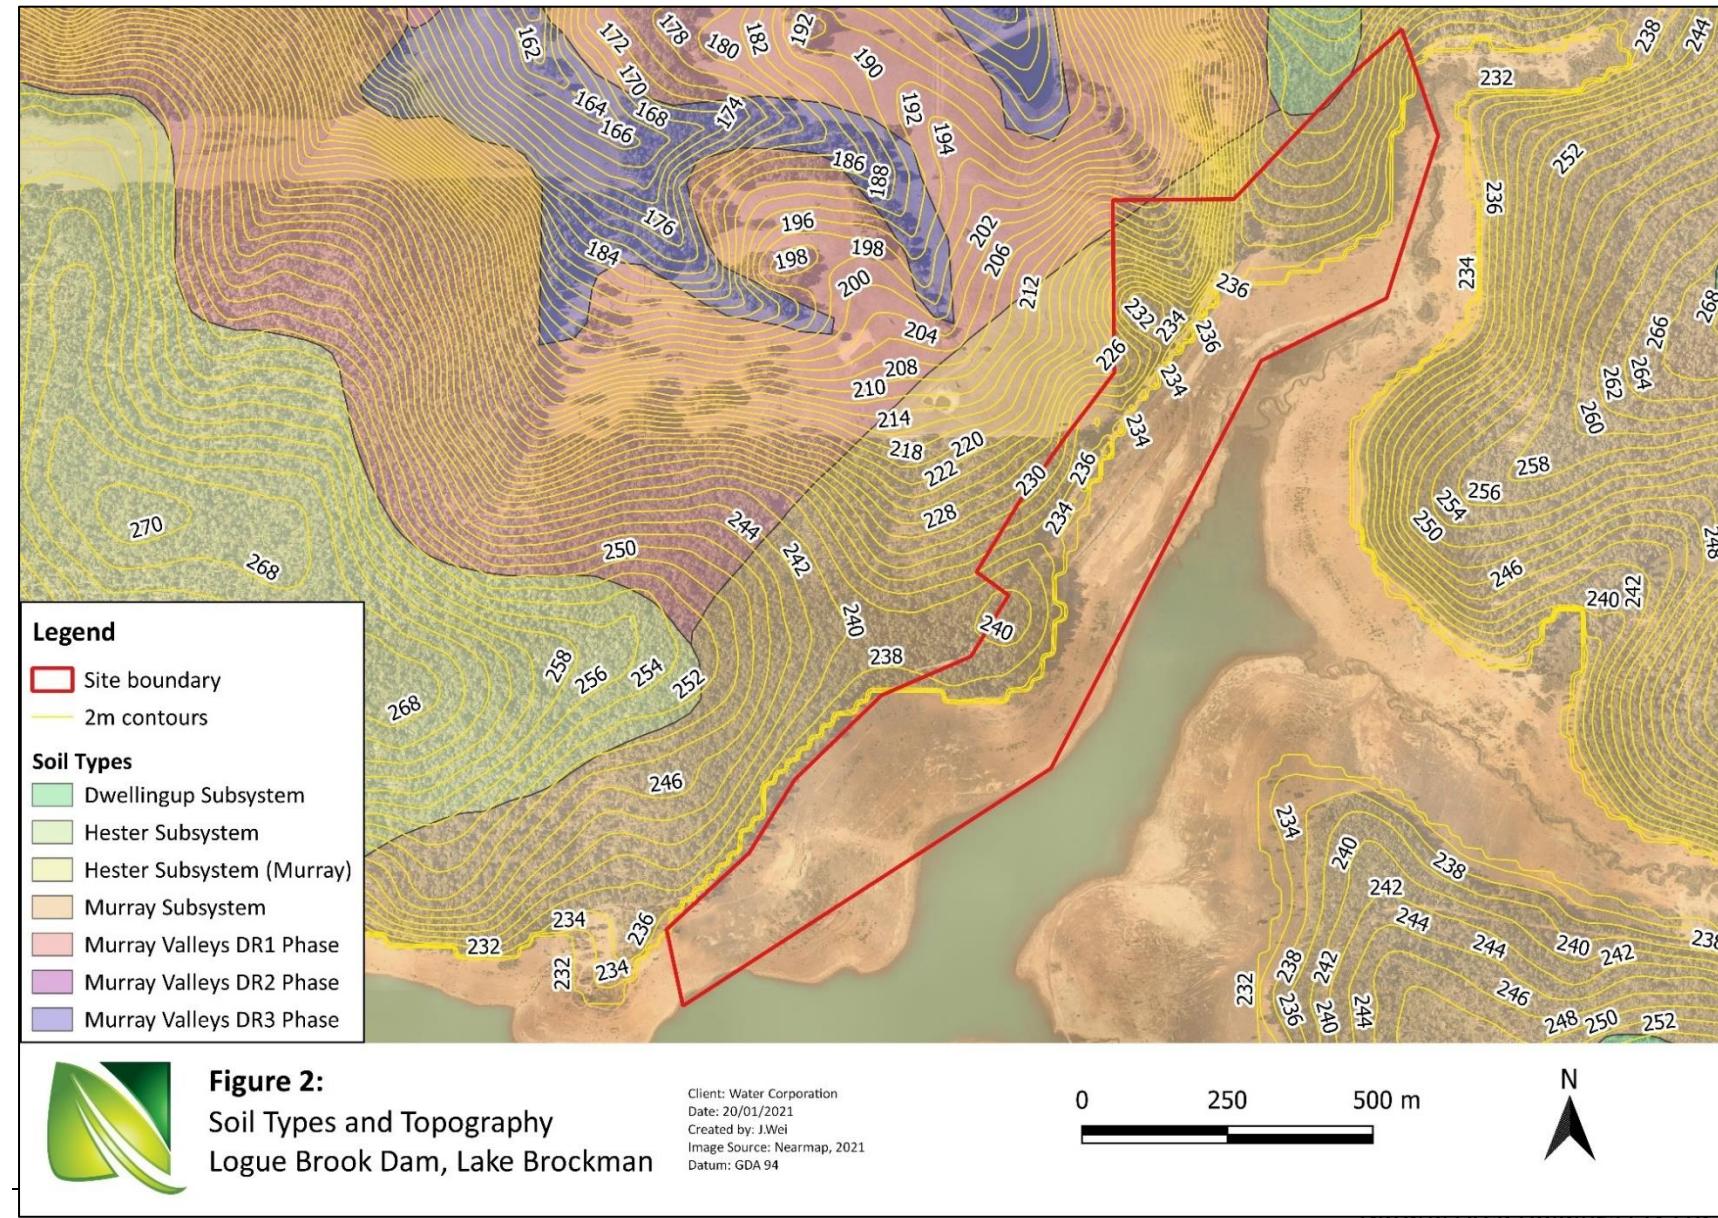

- rainfall of 957.4 mm pa, with rain falling predominantly between May and August
- maximum temperature ranging from 16.7 °C in winter to 31 °C in summer, with a maximum recorded temperature of 43.6 °C
- minimum temperature ranging from 7.9 °C in winter to 16.1 °C in summer, with a minimum recorded temperature of -0.7 °C
- predominant wind directions include morning easterlies and westerly sea breezes during the summer months, with an average wind speed of 14.9 km/h.

2.3 Soils and Topography

According to the Natural Resource Info (NRInfo) data maintained by the Department Primary Industries and Regional Development (DPIRD, 2021), three soil types occur within the study area, with the Murray Subsystem (255MvMY) being the dominant soil type (Table 1, Figure 2). The survey area resides within the Darling Scarp with undulating topography and contours ranging from 208 m to 248 m Australian Height Datum (AHD) (Figure 2).

Table 1: Soil types

Code	Name	Description
255MvMY	Murray Subsystem	Deeply incised valley of the Murray River; red and yellow earths and minor duplex soils; occasional rock outcrops; narrow sandy terrace.
255MvDR1	Murrays Valleys DR1 Phase	Gentle to moderate slopes of scarp face (5-25%) with red and yellow gradational earths and duplex soils with variable depth and common rock outcrop.
255DpHR	Hester Subsystem	Ridges and hill crests on laterite and gneiss, relief 5-40m, slopes 5-15 %. Soils are sandy gravels, loamy gravels and loamy earths.

2.4 Vegetation Complex

Three vegetation complexes were identified within the assessment areas (Table 2) by the WALGA Environmental Tool (2020) and as described by Heddle, Loneragan, and Havel (1980).

Table 2: Vegetation Complexes

Name	Description
Murray 1	Dominated by open forests comprising of Jarrah-Marri on the valley slopes and an open forest of Jarrah, Marri and <i>Eucalyptus patens</i> on the lower bank slopes (Heddle <i>et al.</i> 1980). Along creeks, the fringing vegetation is comprised of a woodland of <i>Eucalyptus rudis</i> and <i>Melaleuca rhaphiophylla</i>
Helena 1	The vegetation type is variable depending on the depth of soil and ranges from an open forest of jarrah-marri on the lower slopes and valley floors to the heaths on shallow soils on the upper slopes, to herblands and lithic complex on the granite rocks.
Dwellingup	Dominated by an open-forest of jarrah-marri on the uplands and restricted to medium-high rainfall areas (receiving 900-1100mm average annual rainfall).

2.5 Pre-European Vegetation

The pre-European vegetation indicated to occur within the survey area is mostly West Darling 3 vegetation system (Department of Primary Industries and Regional Development, 2020). It is described as forest comprising of mainly Jarrah (*Eucalyptus marginata*) and Marri (*Corymbia calophylla*) (DPIRD, 2020). The current remaining extent of pre-European vegetation is approximately 1,606,736 ha (67.21%). (DWER, 2021).

2.6 Fauna Habitat

There is potential for the three threatened black cockatoo species and their habitats to occur on site including, the Carnaby's Cockatoo (*Calyptorhynchus latirostris*) listed as endangered under the EPBC Act 1999 (Cwlth), the Forest Red-tailed Black Cockatoo (*Calyptorhynchus banksii naso*) and the Baudin's Black Cockatoo (*Calyptorhynchus baudinii*) listed as Vulnerable; all are listed as threatened under the Biodiversity Conservation Act 2016 (WA). According to the WALGA Environmental Planning Tool (2020), the survey area is located within the Jarrah Forest Region, which requires investigation to determine Carnaby's Cockatoo feeding habitat.

According to DBCA's Web Map Service (*Western Ringtail Possum Habitat Suitability* (DBCA-049) (Department of Biodiversity Conservation and Attractions, 2020a), the closest suitable habitat for the Western Ringtail Possum occurs approximately 10 km south of the survey area, in the vicinity of Harvey Dam Reservoir.

2.7 Aboriginal and European Heritage

A search within 10 km of the survey area on the Aboriginal heritage inquiry system (10 km radius) (Department of Planning, Lands and Heritage, 2021a) and inherit database (Department of Planning, Lands and Heritage, 2021b) indicated no Registered Aboriginal Sites or State Registered Places occurring within the survey area.

3.0 Methodology

3.1 Desktop and Literature Review

Desktop surveys were undertaken to determine:

- likely native and non-native flora and fauna species present
- current extent of native vegetation
- general floristic community types
- likely presence of threatened or priority flora and fauna species
- likely presence of any threatened or priority ecological communities.

The following databases were accessed to obtain relevant information:

- NatureMap (Department of Biodiversity, Conservation and Attractions, 2020c) (Appendix 1)
- Protected Matters Search Tool (Department of Agriculture, Water and the Environment, 2020), (Appendix 2)
- National Map to determine to determine soil types (Department of Primary Industries and Regional Development, 2020), IBRA subregions
- FloraBase (Department of Biodiversity, Conservation and Attractions, 2020b).

Conservation code definitions for the State and Commonwealth and the data relating to conservation significant species from database searches were summarised into field reference guides to aid with on-ground flora and fauna surveys (Appendix 4).

3.2 On-ground Flora Methodology

Natural Area personnel Sharon Hynes (Lead Botanist) and Ben Connor (Field Assistant) surveyed the area over three days (27th Nov 2020, 8th Dec 2020 and 25th Jan 2021) with key GPS data recorded using Mappt software on a handheld Samsung tablet. The flora and vegetation surveys were carried out in accordance with *EPA Technical Guidance – Flora and Vegetation Surveys for Environmental Impact Assessment* (Environmental Protection Authority, 2016). Samples were collected and any unfamiliar species were recorded and photographed to enable later identification.

Field activities included:

- setting up a total of six (10 x 10 m) quadrats were set up across in the two vegetation types determined (Figure 5). A photograph was taken of each quadrat from the north east corner (Appendix 6)
- assessing boundaries of vegetation type and condition extent across the survey area
- recording aspect, topography, and slope of the area
- recording soil colour and type
- recording bare ground, gravel, rock, and leaf litter as a percentage of cover
- recording drainage of the area
- recording flora species present including percentage cover, height, and habit. Additional species were recorded whilst the area was traversed

- determining the presence of any further threatened or priority listed flora species and/or ecological communities listed under the *Biodiversity and Conservation Act 2016* (WA) and/or the *Environmental Protection and Biodiversity Conservation Act 1999* (Commonwealth)
- tracklogs of ecologists undertaking data collection with time/date attribute data that demonstrate survey effort were recorded.

3.2.1 Vegetation Type

The vegetation type was determined using the structural classes described in *Bush Forever Volume 2* (Government of Western Australia, 2000), and records dominant over, middle and understorey species. A tablet equipped with GPS mapping software (Mappt) was used to mark the change in vegetation type across the survey area. A description of the various structural classes is provided in Table 3.

Table 3: Vegetation structural classes

Life Form/Height Class	Canopy Percentage Cover			
	100 – 70%	70 – 30%	30 – 10%	10 – 2 %
Trees over 30 m	Tall closed forest	Tall open forest	Tall woodland	Tall open woodland
Trees 10 – 30 m	Closed forest	Open forest	Woodland	Open woodland
Trees under 10 m	Low closed forest	Low open forest	Low woodland	Low open woodland
Tree Mallee	Closed tree mallee	Tree mallee	Open tree mallee	Very open tree mallee
Shrub Mallee	Closed shrub mallee	Shrub mallee	Open shrub mallee	Very open shrub mallee
Shrubs over 2 m	Closed tall scrub	Tall open scrub	Tall shrubland	Tall open shrubland
Shrubs 1 – 2 m	Closed heath	Open heath	Shrubland	Open shrubland
Shrubs under 1 m	Closed low heath	Open low heath	Low shrubland	Low open shrubland
Grasses	Closed grassland	Grassland	Open grassland	Very open grassland
Herbs	Closed hermland	Hermland	Open hermland	Very open hermland
Sedges	Closed sedgeland	Sedgeland	Open sedgeland	Very open sedgeland

(Source: Government of Western Australia, 2000)

3.2.2 Vegetation Condition

Vegetation condition was assessed using the rating scale attributed to Keighery in *Bush Forever Volume 2* (Government of Western Australia, 2000). A tablet equipped with GPS mapping software (Mappt) was used to mark the extent of vegetation condition across the area. Table 4 provides a description of the rating scale.

Table 4: Vegetation condition ratings

Category	Description
1 Pristine	Pristine or nearly so, no obvious signs of disturbance.

Category	Description
2 Excellent	Vegetation structure intact, disturbance affecting individual species and weeds are non-aggressive species.
3 Very Good	Vegetation structure altered, obvious signs of disturbance. For example, disturbance to vegetation structure caused by repeated fires, the presence of some more aggressive weeds, dieback, logging and grazing.
4 Good	Vegetation structure significantly altered by very obvious signs of multiple disturbances. Retains basic vegetation structure or ability to regenerate it. For example, disturbance to vegetation structure caused by very frequent fires, the presence of some very aggressive weeds at high density, partial clearing, dieback and grazing.
5 Degraded	Basic vegetation structure severely impacted by disturbance. Scope for regeneration but not to a state approaching good condition without intensive management. For example, disturbance to vegetation structure caused by very frequent fires, the presence of very aggressive weeds, partial clearing, dieback and grazing.
6 Completely Degraded	The structure of the vegetation is no longer intact, and the area is completely or almost completely without native species. These areas are often described as 'parkland cleared' with the flora comprising weed or crop species with isolated native trees or shrubs.

(Source: Government of Western Australia, 2000)

3.3 On-ground Fauna Methodology

A basic fauna survey was undertaken in conjunction with other survey activities. The on-ground fauna survey was completed in accordance with a Basic Fauna Survey as outlined in the Environmental Protection Authority (EPA) *Technical Guidance, Terrestrial vertebrate fauna surveys for environmental impact assessment* (EPA, 2020). The fauna survey included recording opportunistic sightings of fauna species while traversing the survey area along with recording evidence of their presence in the form of:

- scats
- tracks
- diggings
- burrows, dens and warrens
- runnels (vegetative tunnels)
- calls.

The Western Ringtail possums survey recorded:

- GPS locations of suitable habitat trees (*Agonis flexuosa*)
- dreys (vegetative nest)
- scats
- other presence indicators.

The Black Cockatoo habitat survey recorded:

- GPS locations of habitat trees with a diameter at breast height (DBH) of > 500 mm which have the potential to provide habitat in the form of foraging (form of chewed nuts), roosting or hollows for threatened black cockatoos
- species of the habitat trees, if they contain hollows
- direct sightings of birds within the survey area
- a photograph of each habitat tree and its canopy.

3.4 Limitations

Several limitations associated with both desktop and on-ground flora surveys exist, including:

- database searches provide an indication of what flora species may be present, with on ground surveys required to confirm those present
- the differing databases are reliant on information submitted via various reporting mechanisms, so all records of a particular species or ecological community within a specified area may not be complete
- information on flora species provided on some databases include out-of-date species names, meaning that names need to be checked for currency
- herbarium records are largely limited to vouchered specimens
- plant species flower at different times and are not always able to be identified
- not all species flower every year
- some fauna species are highly mobile and may utilise the survey area as part of their range but may not be present at the time of the survey.
- certain fauna species are shy, difficult to observe or active at different times of the day and may not be observed even though they are present on site
- high daytime temperatures during summer surveys may reduce fauna movement, reducing probability of encountering species.

Despite these limitations, Natural Area estimates that 80 – 90% of flora species within the survey area were identified.

4.0 Flora Survey Results

4.1 Desktop Survey

A NatureMap Species Report indicated the potential for 1113 flora species to occur within a 20 km radius of the survey area including:

- 712 dicotyledons
- three gymnosperms
- 382 monocotyledons
- 16 ferns.

A desktop survey of online databases indicated the potential for a total of 55 conservation significant species to occur within 20 km of the survey area (Table 5). NatureMap indicated 47 conservation significant flora species listed under the *Biodiversity Conservation Act 2016 (WA)*, as potentially occurring within 20 km radius of the survey area (DBCA, 2020a) (Appendix 1). A review of the Protected Matters Search Tool (PMST) (Department of Agriculture, Water, and the Environment, 2020) indicated 16 significant flora species listed under the *Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act)* (Cwlth) as potentially occurring within a 20 km radius of the survey area (Appendix 2). Based on the existing site conditions (soil type, drainage) and current known species ranges, the following 14 flora species have the potential to occur within the survey area (highlighted in green, Table 5).

4.1.1 Threatened and Priority Ecological Communities

A review of the Protected Matters Search Tool reported that there are three listed Threatened and Priority Ecological Communities (TEC's, PEC's) that could potentially occur within 20km of the survey area (Department of Agriculture, Water and Environment, 2020) (Table 6). A review of the DBCA's Threatened and Priority Ecological Communities database indicates that the closest known TEC's, PEC's occur approximately 5km East of the survey area on the Swan Coastal Plain (DBCA, 2020c).

Table 6: Threatened and Priority Ecological Communities within the Logue Brook Dam survey area

Name	Status	Presence
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area
<i>Corymbia calophylla</i> - <i>Xanthorrhoea preissii</i> woodlands and shrublands of the Swan Coastal Plain	Endangered	Community likely to occur within area
Tuart (<i>Eucalyptus gomphocephala</i>) Woodlands and Forests of the Swan Coastal Plain ecological community	Critically Endangered	Community likely to occur within area

4.1.2 Introduced Species

A review of the Protected Matters Search Tool reported that there are 15 weeds of national significance (WoNS) which have the potential to occur within 20 km of the survey area (Table 7) (Department of Agriculture, Water and the Environment, 2020).

Table 7: Weeds of National Significance (WoNS)

WoNS	Common Name
<i>Anredera cordifolia</i>	Madeira Vine
<i>Asparagus asparagoides</i>	Bridal Creeper
<i>Brachiaria mutica</i>	Para Grass
<i>Cenchrus ciliaris</i>	Buffel-grass, Black Buffel-grass
<i>Chrysanthemoïdes monilifera</i>	Bitou Bush, Boneseed
<i>Chrysanthemoïdes monilifera</i> subsp. <i>Monilifera</i>	Boneseed

WoNS	Common Name
<i>Eichhornia crassipes</i>	Water Hyacinth, Water Orchid, Nile Lily
<i>Genista linifolia</i>	Flax-leaved Broom, Mediterranean Broom, Flax Broom
<i>Genista sp. X Genista monspessulana</i>	Broom
<i>Lantana camara</i>	Lantana, Common Lantana
<i>Lycium ferocissimum</i>	African Boxthorn, Boxthorn
<i>Olea europaea</i>	Olive, Common Olive
<i>Pinus radiata</i>	Radiata Pine Monterey Pine, Insignis Pine, Wilding Pine
<i>Rubus fruticosus aggregate</i>	Blackberry, European Blackberry
<i>Salix spp. except S.babylonica, S.x calodendron & S.x reichardtii</i>	Willows except Weeping Willow, Pussy Willow

Source: Department of Agriculture, Water and the Environment (2020)

4.2 Flora On-ground Survey

4.2.1 Flora

A total of 92 flora species (taxa) were recorded from 40 families during the field survey, including 16 weeds and 72 native species. Examples of native flora species are shown in Figure 3 and weed species in Figure 4. A complete flora species list is provided in Appendix 5, with quadrat data provided in Appendix 6.

One Category 3 Declared Pest, Narrowleaf cottonbush (*Gomphocarpus fruticosus*), was identified within the survey area, locations are shown in Figure 5. Declared pests are listed on the Western Australian Organism List under the *Biosecurity and Agriculture Management Act 2007* (WA). This classification requires the landowner/land manager to control the population to limit damage as a result of the presence of these species (Table 8) (DPIRD 2021).

Table 8: Management control categories for declared plants

Category	Action
C1	Exclusion: includes species that are not yet established in Western Australia and control measures are to be taken to prevent them entering and establishing
C2	Eradication: present in low enough numbers or in sufficiently limited areas that eradication is feasible
C3	Management: established in Western Australia and it is feasible or desirable to manage them in order to limit damage. Control includes the prevention of population size or density increasing or moving into an area where it currently doesn't occur

Bugle Lily (*Watsonia meriana* var. *bulbillifera**)

Narrowleaf Cottonbush (*Gomphocarpus fruticosus**)

Spear Thistle (*Cirsium vulgare**)

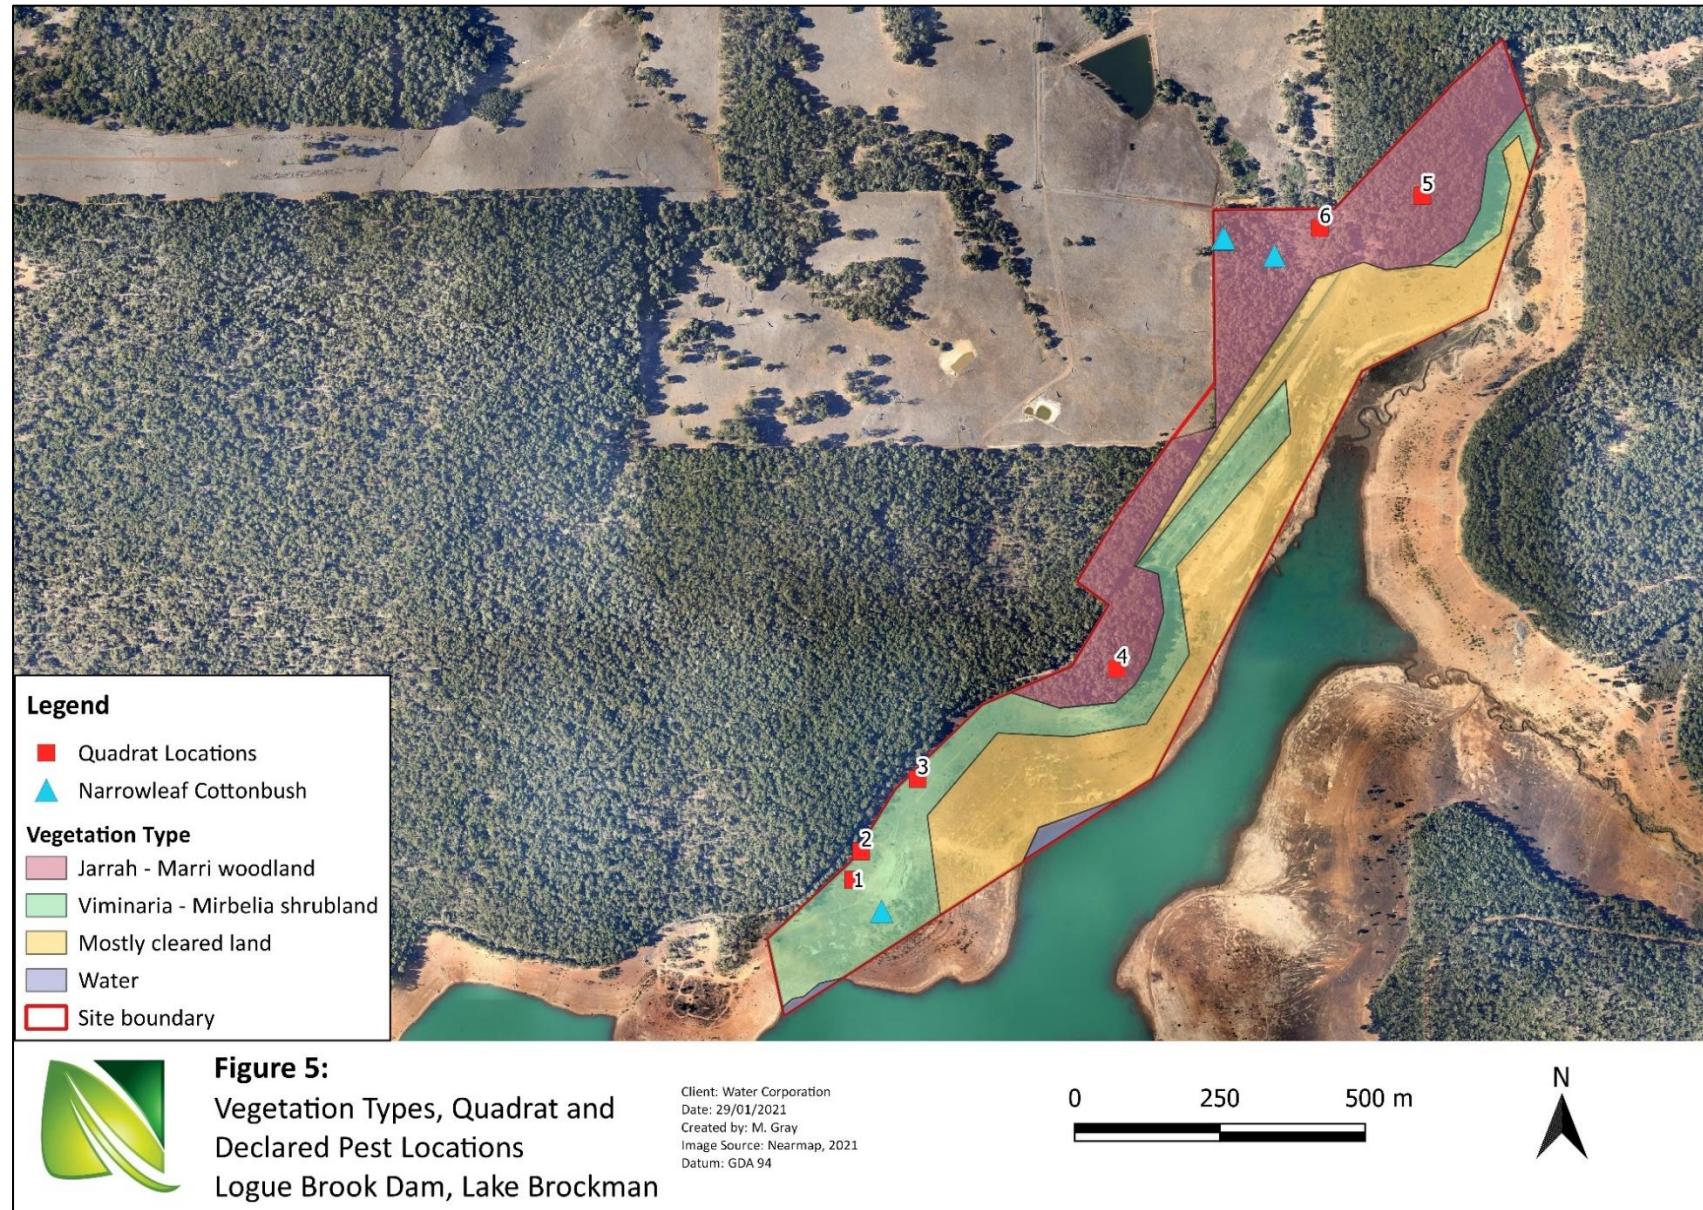

Figure 4: Examples of weed flora species recorded

4.2.1 Vegetation Type

Two vegetation types were determined to be within the survey area, namely the Jarrah Marri Forest and the *Viminaria juncea* and *Mirbelia dilatatum* Shrubland. Jarrah Marri Forest forms the dominant vegetation type in areas of higher elevations around Logue Brook Dam, whilst the Shrubland occurred on lower elevations of the banks, sloping down towards the dam. Vegetation types are described in Table 9 and their locations are shown in Figure 5.

Table 9: Vegetation types present at Logue Brook Dam survey area

Vegetation Type	Description	Photo
<i>Jarrah Marri Forest</i>	A Forest of <i>Corymbia calophylla</i> and <i>Eucalyptus marginata</i> over <i>Mirbelia dilatata</i> and <i>Bossiaea aquifolium</i> subsp. <i>aquifolium</i> and mixed shrubs; and an understorey of mixed herbs and sedges	
<i>Viminaria juncea</i> and <i>Mirbelia dilatatum</i> Shrubland	A shrubland of <i>Viminaria juncea</i> and <i>Mirbelia dilatata</i> over mixed shrubs and an understorey of <i>Conostylis aculeata</i> and mixed herbs and sedges.	

4.2.2 Vegetation Condition

Vegetation condition ranged from Completely Degraded to Excellent, with more than half of the survey area classified as Completely Degraded (51.3%) (Table 10, Figure 6). This area is primarily cleared and used for frequent recreational activities such as camping. Land to the north-west of the survey area is agricultural/pastoral land and weed encroachment was noted along the periphery of remnant bushland areas bordering this land (Figure 6). Better condition vegetation occurs further away from the dam in areas that are not utilised for camping, and in the centre of vegetated blocks with lower impact from edge effects. The area was also subjected to fires within the last 5 years with burnt trunks on trees visible and the understorey dominated by fire germinated shrubs such as the *Mirbelia dilatata*.

Table 10: Vegetation Condition

Vegetation Condition	Pristine	Excellent	Very Good	Good	Degraded	Completely Degraded	Totals
Area (ha)	0.0	4.2	3.8	8.3	8.2	24.8	48.4
Area (%)	0.0	8.7	7.8	15.0	17.1	51.3	100

4.2.3 Threatened and Priority Ecological Communities

The flora and vegetation survey identified no priority and threatened ecological communities within the Logue Brook Dam survey area.

5.0 Fauna Survey Results

5.1 Desktop Survey

A NatureMap Species Report indicated the potential for 544 fauna species to occur within a 20km radius of the survey area including:

- 13 amphibians
- 152 birds
- 286 invertebrates
- 33 mammals
- 60 reptiles

Desktop surveys also indicated a total of 30 potential conservation significant fauna species that may potentially occur within the survey area (Table 11):

- NatureMap indicated 21 conservation significant species listed under the *Biodiversity Conservation Act 2016 (WA)* that may potentially occur within 20 km of the survey area (Department of Biodiversity Conservation and Attractions, 2020a) (Appendix 1).
- Protected Matters Search Tool (PMST) indicated 15 conservation significant species under the *Environment Protection and Biodiversity Conservation Act 1999 (Cwlth)* that may potentially occur within 20 km of the survey area. (Department of Agriculture, Water and the Environment, 2020) (Appendix 2).
- A review of DBCA threatened and priority fauna species database indicated the potential for 20 conservation species to occur within 15 km of the area. In addition, both the Carnaby's Cockatoo (*Calyptorhynchus latirostris*) and Quokka (*Setonix brachyurus*) were previously recorded within 1 km of the survey area (DBCA, 2020c).

Of the fauna species listed as potentially occurring, 11 are likely to occur based on the habitat present and their known range, these are highlighted green in Table 10.

Table 11: Threatened and Priority flora species listed by NatureMap, PMST, and DBCA

Invertebrate	<i>Westralunio carteri</i>	Carter's Freshwater Mussel	T / VU	X	X	X

5.2 Fauna on-ground Survey

A total of 10 vertebrate species and one invertebrate were recorded during the survey (Table 12). Six species of birds were observed, including the threatened Forest Red-tailed Black Cockatoo (*Calyptorhynchus banksii naso*), which was recorded through direct observation while feeding on the nuts of the Marri tree (*Corymbia calophylla*).

Evidence of the presence of four mammal species were recorded through observation of tracks and scats. Three of the four mammals recorded are non-native introduced animals which includes the Red Fox (*Vulpes vulpes*), European Rabbit (*Oryctolagus cuniculus*) and Dog (*Canis familiaris familiaris*). The first two species are listed as C3 Declared Pests under the *Biosecurity and Agriculture Management Act 2007* (WA), which requires management by the landowner/manager to reduce their impact and spread.

Table 12: Fauna species observed

Family	Scientific Name	Common Name	Lifeform
Birds			
Acanthizidae	<i>Acanthiza apicalis</i>	Broad-tailed Thornbill (Inland Thornbill)	Bird
Alcedinidae	<i>Dacelo novaeguineae*</i>	Laughing Kookaburra	Bird
Artamidae	<i>Artamus cinereus</i>	Black-faced Woodswallow	Bird
Cacatuidae	<i>Calyptorhynchus banksii naso</i>	Forrest Red-tailed Black Cockatoo	Bird
Psittacidae	<i>Platycercus zonarius</i> <i>semitorquatus</i>	Twenty-eight Parrot	Bird
Maluridae	<i>Malurus splendens</i>	Splendid Fairywren	Bird
Invertebrate			
Nymphalidae	<i>Danaus plexippus</i>	Wanderer Butterfly	Invertebrate
Mammals			
Canidae	<i>Canis familiaris familiaris*</i>	Dog (scat)	Mammal
Canidae	<i>Vulpes vulpes*</i>	Red Fox (scat)	Mammal
Leporidae	<i>Oryctolagus cuniculus*</i>	European Rabbit (scats)	Mammal
Macropodidae		Kangaroo (tracks & scats)	Mammal

*Denotes introduced fauna species

5.3 Habitat Assessment

Majority of the survey area has been previously cleared with Degraded and Completely Degraded areas constituting over 68% (33 ha) of the survey area. Recreational activities, including camping, are permitted in surrounding areas. This increased anthropogenic disturbance, coupled with edge effects may result in the emigration of fauna species from these areas and reduce quality of the habitats.

The remnant Jarrah Marri Woodland vegetation located along the north-west boundary ranges from Good to Excellent condition and consists of good canopy trees which provides good quality habitat and foraging for many avian species. Habitat for terrestrial fauna such as reptiles, amphibians and small mammals are also present in the form of understorey shrubs, leaf litter, logs and rocks. The *Viminaria juncea* and *Mirbelia dilatatum* Shrubland provides a transition zone between the Woodland habitat and the cleared areas within the survey area. However, due to the Degraded to Completely Degraded vegetation condition of this habitat type, most fauna species may only utilise the site transiently for foraging and movement. The dam also provides a permanent water source for fauna.

A total of 336 habitat trees (DBH > 500 mm) that satisfied the *EPBC Act referral guidelines for three threatened black cockatoo species* were identified and their locations mapped (Table 13, Figure 8). Seven habitat trees were observed to have hollows with only one jarrah (*Eucalyptus marginata*) tree noted to have the potential to function as a breeding site (hollow opening large enough to accommodate mature black cockatoos) (Figure 9). None of the tree hollows displayed any signs of current black cockatoo breeding activity.

Evidence of black cockatoo foraging (Chewed marri nuts)

Evidence of black cockatoo foraging (Chewed marri nuts)

Feather from Red-tailed black cockatoos

Forest Red-tailed Black Cockatoos roosting on dead Jarrah

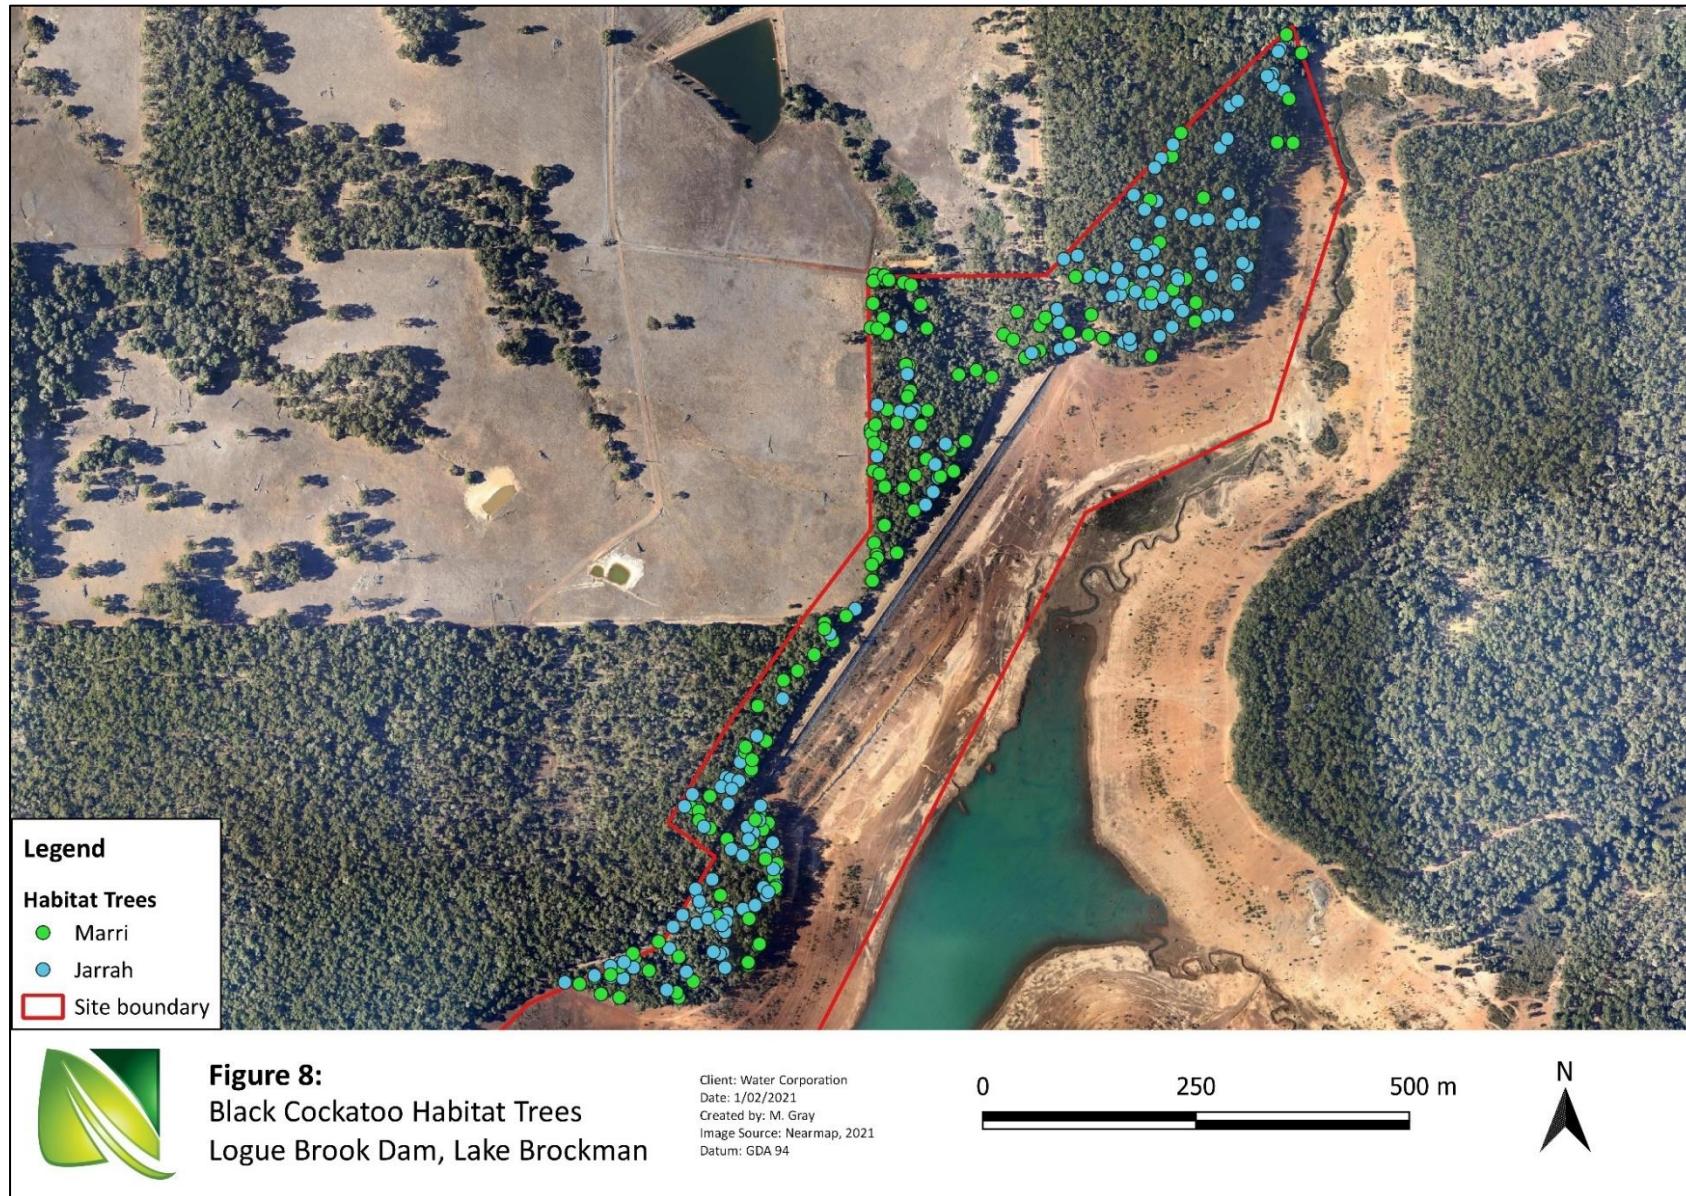

Figure 7: Examples of fauna observed at Logue Brook Dam

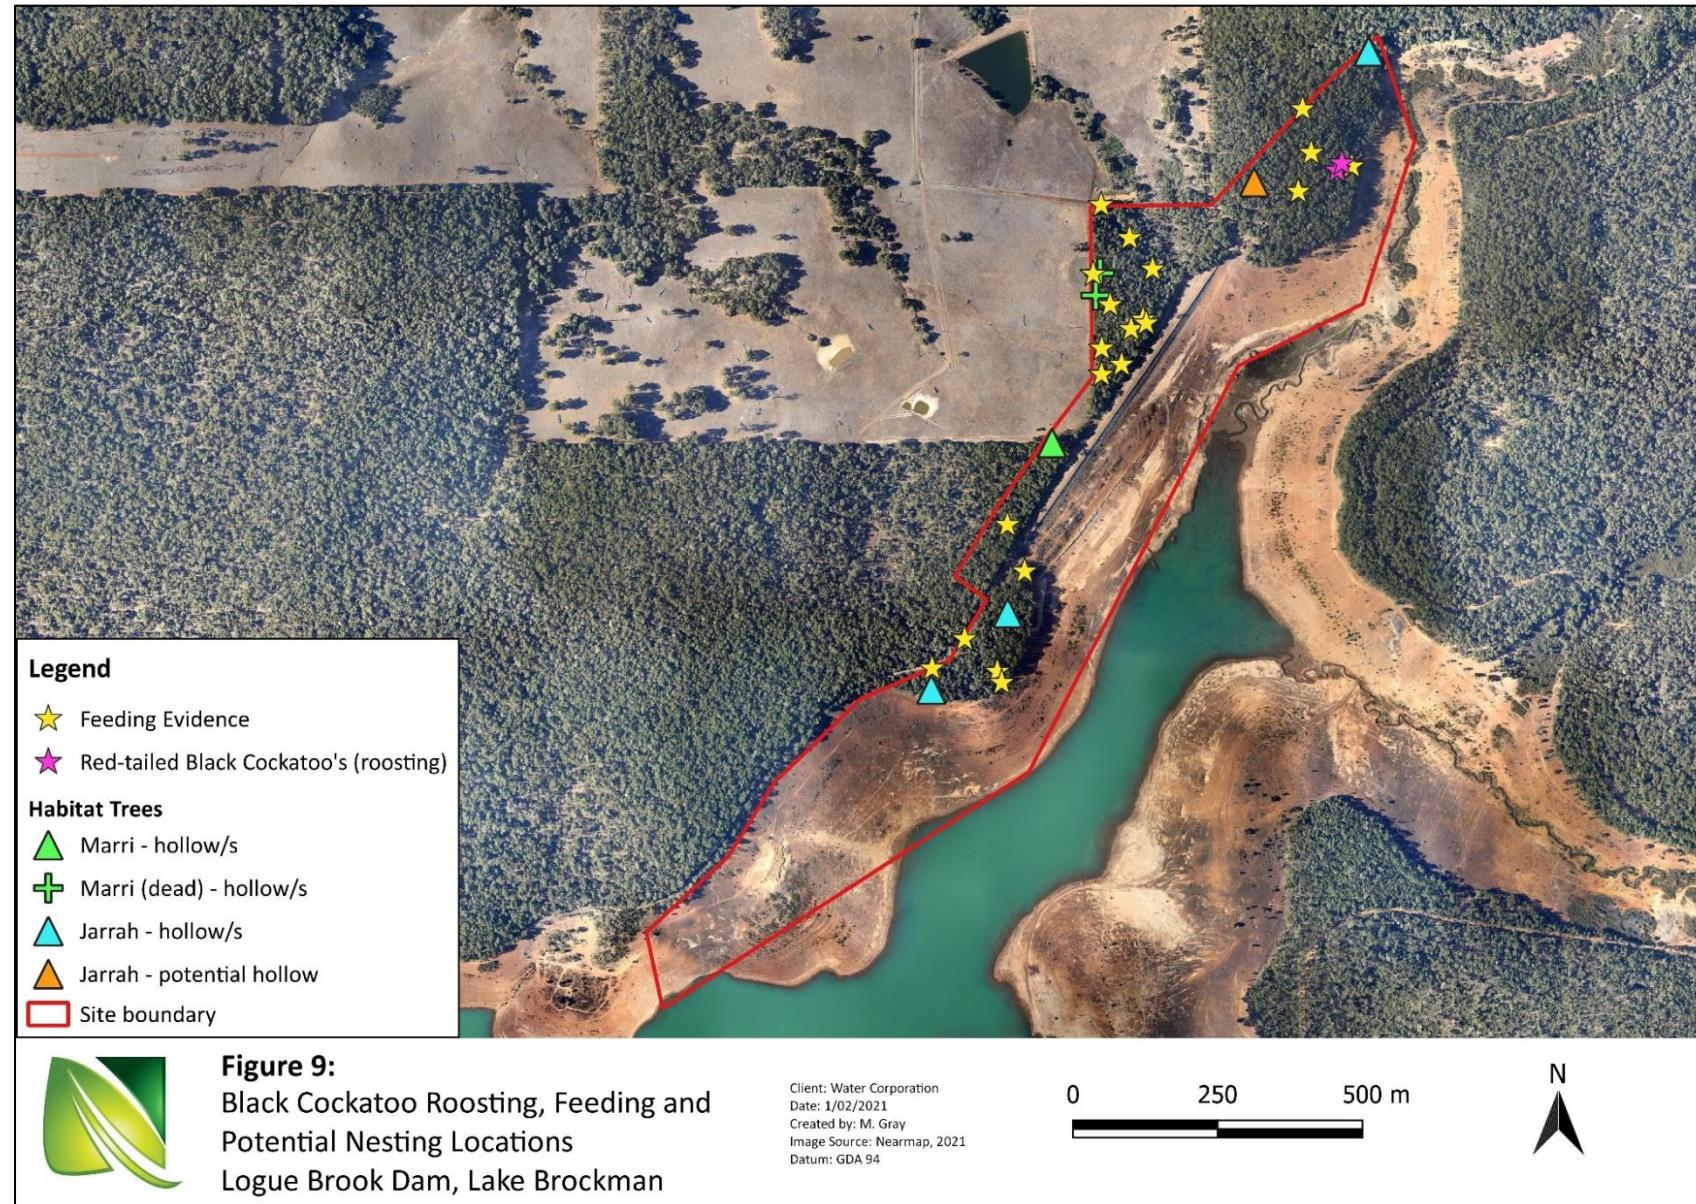

Table 13: Potential black cockatoo habitat trees

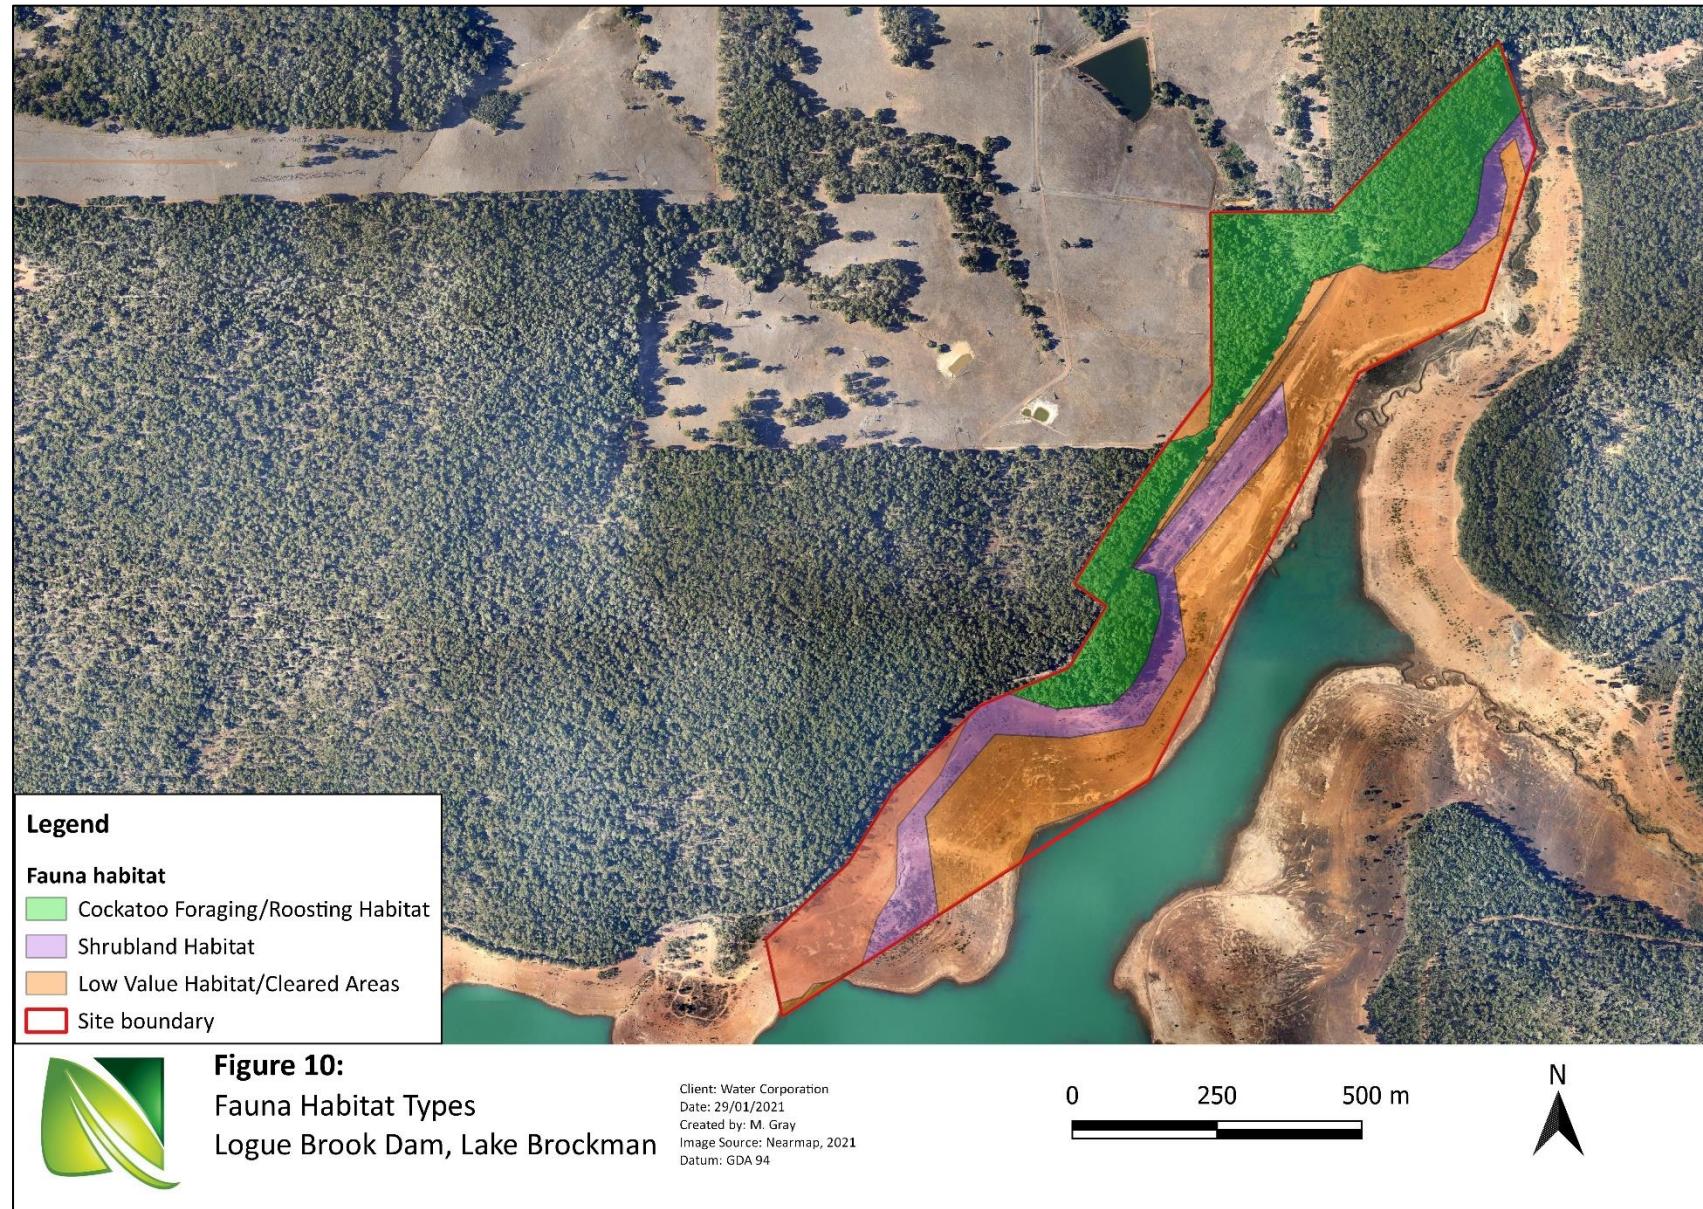

Species	Status	Suitable black cockatoo nesting hollows	Small Hollows	No Hollow	Total
Jarrah (<i>Eucalyptus marginata</i>)	Alive	1	3	170	174
	Dead	0	0	12	12
Marri (<i>Corymbia calophylla</i>)	Alive	0	1	140	141
	Dead	0	2	7	9
Combined Total		1	6	329	336

A summary of the habitat trees and GPS locations are provided in Appendix 7. Evidence of feeding in the form of chewed nuts (Marri) by black cockatoos were observed in 24 locations within the Jarrah Marri Woodland vegetation type (Figure 9). Forest Red-tailed Black Cockatoos (*Calyptorhynchus banksii naso*) were also directly observed on two occasions, roosting in the northern section of the survey area (Figure 9).

No critical characteristic habitat, namely *Agonis flexuosa* Woodland, nor evidence (scats, dreys, direct observations) of the Western Ringtail Possum (*Pseudochirus occidentalis*) were observed during the spring 2020 survey. The closest known records from DBCA threatened and priority fauna species search occurs approximately 9 km south of the survey area (DBCA 2020d).

A scoring tool, based on the *Revised draft referral guideline for three threatened black cockatoo species: Carnaby's Cockatoo, Baudin's Cockatoo and the Forest Red-tailed Black Cockatoo* (Commonwealth of Australia, 2017), considers key attributes of foraging habitat for each of the three black cockatoo species. This scoring tool assigns a habitat score between one and ten, with a score of ten representing the maximum possible score and very high quality of foraging habitat. Contextual adjustors (attributes that improve or reduce functionality of foraging habitat) such as tree species composition, availability of nesting hollows, distances from known breeding and roosting sites, were considered and used to evaluate habitat quality. The scoring matrix was applied to the survey area in Logue Brook, with habitat score of ten assigned to all three species (Table 14).

Table 14: Black Cockatoo foraging habitat scoring and justification (10-Very High Quality to 1-Low Quality)

Forest Red-tail Black Cockatoo foraging habitat	Score
Impact area contains native eucalypt Jarrah Marri woodland. <i>Corymbia calophylla</i> and <i>Eucalyptus marginata</i> are the dominant tree species, which are a known foraging resource for black cockatoos.	7
Context adjustors: attributes improving/reducing functionality of foraging habitat	
Contains trees with suitable nest hollows: One jarrah tree presented suitably sized nest hollow, with six other trees exhibiting smaller hollows which may eventually develop breeding hollows	+3
Primarily contains marri and/or jarrah	+2
Contains 336 trees with potential to be used for breeding (DBH ≥ 500 mm)	+2

6.0 Discussion

6.1 Flora and Vegetation

A total of 92 flora species across 40 families were recorded during the field survey. This includes 76 (82.6%) native plant species with the remaining 16 (17.4%) species being introduced (weed) species. Species are well represented in the Asteraceae (9 species), Fabaceae (12 species) and Poaceae (8 species) families.

Narrowleaf Cottonbush (*Gomphocarpus fruticosus*) was recorded in the survey area in several locations and is listed as a category C3 Declared Pest on the Western Australian Organism List under the *Biosecurity and Agriculture Management Act 2007* (WA) and requires the landowner/ land manager to control its population to limit damage because of the presence of this species.

As majority of the area has been previously cleared, 68% consists of Degraded to Completely Degraded areas. The remaining vegetation mainly constitutes Jarrah Marri Woodland in Good to Excellent condition along the western edges of the survey area.

6.1.1 Significant Flora

No threatened or priority flora species were recorded during Natural Area surveys.

6.1.2 Threatened and Priority Ecological Communities

No threatened or priority ecological communities were determined to be present within the survey area during the desktop or field surveys within the survey area. With the closest TEC and PEC areas indicated by DBCA (2020) to be 5km away from the site.

6.2 Fauna

A total of 10 vertebrate species were recorded during the survey. Of which six species are native fauna with the remaining four being introduced feral species. Foraging by black cockatoos was evident within the area through 24 recorded feeding locations. The threatened Forest Red-tailed Black Cockatoo (*Calyptorhynchus banksii naso*) was also recorded through direct observation while feeding on the nuts of the Marri trees (*Corymbia calophylla*).

Three non-native fauna species, including the Red Fox (*Vulpes vulpes*), European Rabbit (*Oryctolagus cuniculus*) and Dog (*Canis familiaris familiaris*) were recorded on site. The first two species are listed as Category 3 Declared Pests under the *Biosecurity and Agriculture Management Act 2007* (WA) and requires management by the landowner/ land manager to limit the potential damage these species may have on the native landscape, which can be done through baiting programs.

6.2.1 Fauna Habitat

While majority of the survey area has been previously cleared, with surrounding areas used for recreational activities, remnant vegetation still presents suitable habitat for native fauna. The upper canopy tree species within Jarrah Marri Woodland provides suitable foraging and roosting sites for many avian species including the three threatened black cockatoos.

Habitat for smaller terrestrial fauna such as reptiles, amphibians and small mammals is also in good condition with adequate vegetation cover from understorey shrub species, as well as suitable shelter/ refuge sites in the form of leaf litter, logs and rocks. The dam also provides a permanent water source for fauna.

To further identify additional fauna species a trapping program would need to be undertaken. If the area is proposed to be cleared, a fauna trapping and relocation targeting small mammals, reptiles and amphibians can be implemented to mitigate fauna loss due to land clearing. Larger mammals such as kangaroos and mobile bird species to be encouraged into adjacent areas during clearing process.

6.2.2 Black Cockatoo Habitat

The availability of potential habitat trees and known foraging resource is a good indicator for the presence of black cockatoos to occur within the survey area. While 336 habitat trees were recorded, only one Jarrah tree exhibited potential suitability as a breeding hollow due to size of the hollow present. Therefore, it is more likely that the survey area acts as a foraging and roosting site, rather than a breeding site for the black cockatoos. Based on the *Revised draft referral guideline for three threatened black cockatoo species: Carnaby's Cockatoo, Baudin's Cockatoo and the Forest Red-tailed Black Cockatoo* (Commonwealth of Australia, 2017), foraging habitat was very high quality for all three black cockatoo species. Impacts on higher quality foraging habitat have a corresponding lower acceptability of loss in hectares and therefore may require the need to refer the action for EPBC Act approval.

Conservation Codes

- T - Rare or likely to become extinct
- X - Presumed extinct
- IA - Protected under international agreement
- S - Other specially protected fauna
- 1 - Priority 1
- 2 - Priority 2
- 3 - Priority 3
- 4 - Priority 4
- 5 - Priority 5

¹ For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

Appendix 2: Protected Matters Search Tool Report

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected.

Information on the coverage of this report and qualifications on data supporting this report are contained in the caveat at the end of the report.

Information is available about [Environment Assessments](#) and the EPBC Act including significance guidelines, forms and application process details.

Report created: 24/11/20 15:54:31

Summary

Matters of National Environmental Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance:	1
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	None
Listed Threatened Ecological Communities:	4
Listed Threatened Species:	32
Listed Migratory Species:	9

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Land:	1
Commonwealth Heritage Places:	None
Listed Marine Species:	15
Whales and Other Cetaceans:	None
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have nominated.

State and Territory Reserves:	11
Regional Forest Agreements:	1
Invasive Species:	29
Nationally Important Wetlands:	None
Key Ecological Features (Marine)	None

Details

Matters of National Environmental Significance

Wetlands of International Importance (Ramsar)	[Resource Information]
Name	Proximity
Peel-yalgorup system	Within 10km of Ramsar

Listed Threatened Ecological Communities

[\[Resource Information \]](#)

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Name	Status	Type of Presence
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area
Clay Pans of the Swan Coastal Plain	Critically Endangered	Community likely to occur within area
Corymbia calophylla - Xanthorrhoea preissii woodlands and shrublands of the Swan Coastal Plain	Endangered	Community known to occur within area
Tuart (Eucalyptus gomphocephala) Woodlands and Forests of the Swan Coastal Plain ecological community	Critically Endangered	Community likely to occur within area

Listed Threatened Species

[\[Resource Information \]](#)

Name	Status	Type of Presence
Birds		
Atrichornis clamosus		
Noisy Scrub-bird, Tjimiriluk [654]	Endangered	Species or species habitat may occur within area
Botaurus poiciloptilus		
Australasian Bittern [1001]	Endangered	Species or species habitat known to occur within area
Calidris ferruginea		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
Calyptorhynchus banksii naso		
Forest Red-tailed Black-Cockatoo, Karrak [67034]	Vulnerable	Species or species habitat known to occur within area
Calyptorhynchus baudinii		
Baudin's Cockatoo, Long-billed Black-Cockatoo [769]	Endangered	Species or species habitat known to occur within area
Calyptorhynchus latirostris		
Carnaby's Cockatoo, Short-billed Black-Cockatoo [59523]	Endangered	Species or species habitat known to occur within area
Falco hypoleucus		
Grey Falcon [929]	Vulnerable	Species or species habitat may occur within area
Leipoa ocellata		
Malleefowl [934]	Vulnerable	Species or species habitat likely to occur within area

Name	Status	Type of Presence
<i>Numenius madagascariensis</i> Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat may occur within area
<i>Rostratula australis</i> Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area
Fish		
<i>Galaxiella nigrostriata</i> Blackstriped Dwarf Galaxias, Black-stripe Minnow [88677]	Endangered	Species or species habitat may occur within area
Mammals		
<i>Bettongia penicillata ogilbyi</i> Woylie [66844]	Endangered	Species or species habitat known to occur within area
<i>Dasyurus geoffroii</i> Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat known to occur within area
<i>Pseudocheirus occidentalis</i> Western Ringtail Possum, Ngwayir, Womp, Woder, Ngoor, Ngoolangit [25911]	Critically Endangered	Species or species habitat known to occur within area
<i>Setonix brachyurus</i> Quokka [229]	Vulnerable	Species or species habitat known to occur within area
Other		
<i>Westralunio carteri</i> Carter's Freshwater Mussel, Freshwater Mussel [86266]	Vulnerable	Species or species habitat known to occur within area
Plants		
<i>Andersonia gracilis</i> Slender Andersonia [14470]	Endangered	Species or species habitat likely to occur within area
<i>Anthocercis gracilis</i> Slender Tailflower [11103]	Vulnerable	Species or species habitat may occur within area
<i>Caladenia huegelii</i> King Spider-orchid, Grand Spider-orchid, Rusty Spider-orchid [7309]	Endangered	Species or species habitat likely to occur within area
<i>Diuris drummondii</i> Tall Donkey Orchid [4365]	Vulnerable	Species or species habitat likely to occur within area
<i>Diuris micrantha</i> Dwarf Bee-orchid [55082]	Vulnerable	Species or species habitat likely to occur within area
<i>Diuris purdiei</i> Purdie's Donkey-orchid [12950]	Endangered	Species or species habitat known to occur within area
<i>Drakaea elastica</i> Glossy-leaved Hammer Orchid, Glossy-leaved Hammer Orchid, Warty Hammer Orchid [16753]	Endangered	Species or species habitat known to occur within area
<i>Drakaea micrantha</i> Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat likely to occur within area
<i>Eleocharis keigheryi</i> Keighery's Eleocharis [64893]	Vulnerable	Species or species habitat likely to occur within area

Name	Status	Type of Presence
<i>Lambertia echinata</i> subsp. <i>occidentalis</i> Western Prickly Honeysuckle [64528]	Endangered	Species or species habitat may occur within area
<i>Lasiopetalum pterocarpum</i> Wing-fruited Lasiopetalum [64922]	Endangered	Species or species habitat may occur within area
<i>Synaphea</i> sp. Fairbridge Farm (D. Papenfus 696) Selena's Synaphea [82881]	Critically Endangered	Species or species habitat likely to occur within area
<i>Synaphea</i> sp. Pinjarra Plain (A.S. George 17182) [86878]	Endangered	Species or species habitat may occur within area
<i>Synaphea</i> sp. Serpentine (G.R. Brand 103) [86879]	Critically Endangered	Species or species habitat known to occur within area
<i>Synaphea stenoloba</i> Dwellingup Synaphea [66311]	Endangered	Species or species habitat known to occur within area
<i>Tetraria australiensis</i> Southern Tetraria [10137]	Vulnerable	Species or species habitat likely to occur within area

Listed Migratory Species		[Resource Information]
* Species is listed under a different scientific name on the EPBC Act - Threatened Species list.		
Name	Threatened	Type of Presence
Migratory Marine Birds <i>Apus pacificus</i> Fork-tailed Swift [678]		Species or species habitat likely to occur within area
Migratory Terrestrial Species		
<i>Motacilla cinerea</i> Grey Wagtail [642]		Species or species habitat may occur within area
Migratory Wetlands Species		
<i>Actitis hypoleucus</i> Common Sandpiper [59309]		Species or species habitat likely to occur within area
<i>Calidris acuminata</i> Sharp-tailed Sandpiper [874]		Species or species habitat likely to occur within area
<i>Calidris ferruginea</i> Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
<i>Calidris melanotos</i> Pectoral Sandpiper [858]		Species or species habitat may occur within area
<i>Numenius madagascariensis</i> Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat may occur within area
<i>Pandion haliaetus</i> Osprey [952]		Species or species habitat likely to occur within area
<i>Tringa nebularia</i> Common Greenshank, Greenshank [832]		Species or species habitat likely to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Land

[Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Name

Commonwealth Land -

Listed Marine Species

[Resource Information]

* Species is listed under a different scientific name on the EPBC Act - Threatened Species list.

Name	Threatened	Type of Presence
Birds		
<u>Actitis hypoleucus</u>		
Common Sandpiper [59309]		Species or species habitat likely to occur within area
<u>Apus pacificus</u>		Species or species habitat likely to occur within area
Fork-tailed Swift [678]		
<u>Ardea alba</u>		Species or species habitat known to occur within area
Great Egret, White Egret [59541]		
<u>Ardea ibis</u>		Species or species habitat may occur within area
Cattle Egret [59542]		
<u>Calidris acuminata</u>		Species or species habitat likely to occur within area
Sharp-tailed Sandpiper [874]		
<u>Calidris ferruginea</u>	Critically Endangered	Species or species habitat may occur within area
Curlew Sandpiper [856]		
<u>Calidris melanotos</u>		Species or species habitat may occur within area
Pectoral Sandpiper [858]		
<u>Haliaeetus leucogaster</u>		Species or species habitat likely to occur within area
White-bellied Sea-Eagle [943]		
<u>Merops ornatus</u>		Species or species habitat may occur within area
Rainbow Bee-eater [670]		
<u>Motacilla cinerea</u>		Species or species habitat may occur within area
Grey Wagtail [642]		
<u>Numenius madagascariensis</u>	Critically Endangered	Species or species habitat may occur within area
Eastern Curlew, Far Eastern Curlew [847]		
<u>Pandion haliaetus</u>		Species or species habitat likely to occur within area
Osprey [952]		
<u>Rostratula benghalensis (sensu lato)</u>	Endangered*	Species or species habitat likely to occur within area
Painted Snipe [889]		
<u>Thinornis rubricollis</u>		Species or species habitat may occur within area
Hooded Plover [59510]		

Name	Threatened	Type of Presence
Tringa nebularia Common Greenshank, Greenshank [832]		Species or species habitat likely to occur within area

Yarloop		WA
Regional Forest Agreements		[Resource Information]
Note that all areas with completed RFAs have been included.		
Name		State
South West WA RFA		Western Australia
Invasive Species		[Resource Information]
Weeds reported here are the 20 species of national significance (WoNS), along with other introduced plants that are considered by the States and Territories to pose a particularly significant threat to biodiversity. The following feral animals are reported: Goat, Red Fox, Cat, Rabbit, Pig, Water Buffalo and Cane Toad. Maps from Landscape Health Project, National Land and Water Resources Audit, 2001.		
Name	Status	Type of Presence
Birds		
Anas platyrhynchos		
Mallard [974]		Species or species habitat likely to occur within area
Columba livia		
Rock Pigeon, Rock Dove, Domestic Pigeon [803]		Species or species habitat likely to occur within area
Passer domesticus		
House Sparrow [405]		Species or species habitat likely to occur within area
Passer montanus		
Eurasian Tree Sparrow [406]		Species or species habitat likely to occur within area
Streptopelia chinensis		
Spotted Turtle-Dove [780]		Species or species habitat likely to occur within area
Streptopelia senegalensis		
Laughing Turtle-dove, Laughing Dove [781]		Species or species habitat likely to occur within area

Name	Status	Type of Presence
Mammals		
<i>Canis lupus familiaris</i> Domestic Dog [82654]		Species or species habitat likely to occur within area
<i>Felis catus</i> Cat, House Cat, Domestic Cat [19]		Species or species habitat likely to occur within area
<i>Feral deer</i> Feral deer species in Australia [85733]		Species or species habitat likely to occur within area
<i>Mus musculus</i> House Mouse [120]		Species or species habitat likely to occur within area
<i>Oryctolagus cuniculus</i> Rabbit, European Rabbit [128]		Species or species habitat likely to occur within area
<i>Rattus rattus</i> Black Rat, Ship Rat [84]		Species or species habitat likely to occur within area
<i>Sus scrofa</i> Pig [6]		Species or species habitat likely to occur within area
<i>Vulpes vulpes</i> Red Fox, Fox [18]		Species or species habitat likely to occur within area
Plants		
<i>Anredera cordifolia</i> Madeira Vine, Jalap, Lamb's-tail, Mignonette Vine, Anredera, Gulf Madeiravine, Heartleaf Madeiravine, Potato Vine [2643]		Species or species habitat likely to occur within area
<i>Asparagus asparagoides</i> Bridal Creeper, Bridal Veil Creeper, Smilax, Florist's Smilax, Smilax Asparagus [22473]		Species or species habitat likely to occur within area
<i>Brachiaria mutica</i> Para Grass [5879]		Species or species habitat may occur within area
<i>Cenchrus ciliaris</i> Buffel-grass, Black Buffel-grass [20213]		Species or species habitat may occur within area
<i>Chrysanthemoides monilifera</i> Bitou Bush, Boneseed [18983]		Species or species habitat may occur within area
<i>Chrysanthemoides monilifera</i> subsp. <i>monilifera</i> Boneseed [16905]		Species or species habitat likely to occur within area
<i>Eichhornia crassipes</i> Water Hyacinth, Water Orchid, Nile Lily [13466]		Species or species habitat likely to occur within area
<i>Genista linifolia</i> Flax-leaved Broom, Mediterranean Broom, Flax Broom [2800]		Species or species habitat likely to occur within area
<i>Genista</i> sp. X <i>Genista monspessulana</i> Broom [67538]		Species or species habitat may occur within area
<i>Lantana camara</i> Lantana, Common Lantana, Kamara Lantana, Large-leaf Lantana, Pink Flowered Lantana, Red		Species or species habitat likely to occur

Name	Status	Type of Presence within area
Flowered Lantana, Red-Flowered Sage, White Sage, Wild Sage [10892] <i>Lycium ferocissimum</i>		
African Boxthorn, Boxthorn [19235]		Species or species habitat likely to occur within area
Olea europaea		
Olive, Common Olive [9160]		Species or species habitat may occur within area
Pinus radiata		
Radiata Pine Monterey Pine, Insignis Pine, Wilding Pine [20780]		Species or species habitat may occur within area
Rubus fruticosus aggregate		
Blackberry, European Blackberry [68406]		Species or species habitat likely to occur within area
Salix spp. except S.babylonica, S.x calodendron & S.x reichardtii		
Willows except Weeping Willow, Pussy Willow and Sterile Pussy Willow [68497]		Species or species habitat likely to occur within area

Caveat

The information presented in this report has been provided by a range of data sources as acknowledged at the end of the report.

This report is designed to assist in identifying the locations of places which may be relevant in determining obligations under the Environment Protection and Biodiversity Conservation Act 1999. It holds mapped locations of World and National Heritage properties, Wetlands of International and National Importance, Commonwealth and State/Territory reserves, listed threatened, migratory and marine species and listed threatened ecological communities. Mapping of Commonwealth land is not complete at this stage. Maps have been collated from a range of sources at various resolutions.

Not all species listed under the EPBC Act have been mapped (see below) and therefore a report is a general guide only. Where available data supports mapping, the type of presence that can be determined from the data is indicated in general terms. People using this information in making a referral may need to consider the qualifications below and may need to seek and consider other information sources.

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species distributions have been derived through a variety of methods. Where distributions are well known and if time permits, maps are derived using either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc) together with point locations and described habitat; or environmental modelling (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where very little information is available for species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc). In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More reliable distribution mapping methods are used to update these distributions as time permits.

Only selected species covered by the following provisions of the EPBC Act have been mapped:

- migratory and
- marine

The following species and ecological communities have not been mapped and do not appear in reports produced from this database:

- threatened species listed as extinct or considered as vagrants
- some species and ecological communities that have only recently been listed
- some terrestrial species that overfly the Commonwealth marine area
- migratory species that are very widespread, vagrant, or only occur in small numbers

The following groups have been mapped, but may not cover the complete distribution of the species:

- non-threatened seabirds which have only been mapped for recorded breeding sites
- seals which have only been mapped for breeding sites near the Australian continent

Such breeding sites may be important for the protection of the Commonwealth Marine environment.

Appendix 3: Conservation Codes

Conservation codes are used to describe the status of species and ecological communities that are no longer common and under threat of extinction. Species and communities can be listed under state legislation and/or commonwealth legislation.

Western Australia

Conservation Code	Name	Description
T	Threatened	Flora or fauna that is rare or likely to become extinct, ranked according to their level of threat using IUCN Red List criteria (Schedules 1-3 of the Wildlife Conservation (Specially Protected Fauna) Notice or the Wildlife Conservation (Rare Flora) Notice)
CR	Critically endangered	Species considered to be facing an extremely high risk of extinction within the wild in the immediate future
EN	Endangered	Species considered to be facing a very high risk of extinction in the wild in the near future
VU	Vulnerable	Species considered to be facing a high risk of extinction in the wild in the medium-term future
EX	Extinct Species	Species where ‘there is no reasonable doubt that the last member of the species has died (Schedule 4 of the Wildlife Conservation (Specially Protected Fauna) Notice or the Wildlife Conservation (Rare Flora) Notice)
EW	Extinct in the Wild	Species that are known to only survive in cultivation, in captivity, or as a naturalised population well outside its past range; and it has not been recorded in its known or expected habitat at appropriate seasons anywhere in its past range, despite surveys over a timeframe appropriate to its life cycle and form
MI	Migratory Species	Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth (Schedule 5 of the Wildlife Conservation (Specially Protected Fauna) Notice)
CD	Conservation Dependent	Species of special conservation interest (conservation dependent fauna), being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened (Schedule 6 of the Wildlife Conservation (Specially Protected Fauna) Notice)
OS	Specially Protected	Fauna otherwise in need of special protection to ensure their conservation

Conservation Code	Name	Description
		(Schedule 7 of the Wildlife Conservation (Specially Protected Fauna) Notice)
P	Priority Species	Possibly threatened species that do not meet survey criteria, or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened fauna or flora. Species that are adequately known, are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened species or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.
P1	Priority One	Poorly known species – Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either very small or on lands not managed for conservation, such as road verges, urban areas, farmland, active mineral lease and under threat of habitat destruction or degradation.
2	Priority Two	Poorly known species – Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, such as national parks, conservation parks, nature reserves, State forest, vacant Crown land, water reserves and similar.
3	Priority Three	Poorly known species – Species that are known from several locations, and the species does not appear to be under imminent threat, or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat
4	Priority Four	Rare or near threatened and other species in need of monitoring.

Appendix 4: Significant Flora Field Guide

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
 <i>Acacia flagelliformis</i> Photos: S.D. Hopper		Rush-like, erect or sprawling shrub, 0.3-0.75(-1.6) m high	Fl. yellow, May to Sep	Sandy soils. Winter-wet areas	P4	N	Unlikely-Habitat not suitable
 <i>Acacia horridula</i> Photos: S.J. Patrick & H. Bowler		Harsh, slender, single-stemmed shrub, 0.3-0.6(-1) m high Fl. yellow	May to Aug	Gravelly soils over granite, sand. Rocky hillsides	P3	N	Unlikely-Habitat not suitable

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
 <i>Acacia oncinophylla</i> subsp. <i>patulifolia</i> Photos: S.J. Patrick		Shrub, 0.5-2.5(-3) m high, 'minni-ritchi' bark, phyllodes 4-9 cm long, 3-6 mm wide. Fl. yellow	Aug to Nov or Nov to Dec	Granitic soils, occasionally on laterite	P4	Y	Habitat may be suitable
 <i>Acacia semitrullata</i> Photos: S.D. Hopper		Slender, erect, pungent shrub, (0.1-)0.2-0.7(-1.5) m high. Fl. cream-white	May to Oct	White/grey sand, sometimes over laterite, clay. Sandplains, swampy areas	P4	Y	Habitat may be suitable
<i>Actinotus repens</i>					P3	N	Unable to access
<i>Amanita fibrillopes</i>					P3	N	Unable to access

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
 <i>Andersononia gracilis</i> Photos: K. Atkins & M. Hislop		Slender erect or open straggly shrub, 0.1-0.5(-1) m high. Fl. white-pink-purple	Sep to Nov	White/grey sand, sandy clay, gravelly loam. Winter-wet areas, near swamps	E	Y	Habitat may be suitable
<i>Angianthus drummondii</i>		Erect annual, herb, to 0.1 m high. Fl. yellow	Oct to Dec	Grey or brown clay soils, ironstone. Seasonally wet flats	P3	N	Unlikely-habitat not suitable
 <i>Anthocercis gracilis</i> Photos: S.D. Hopper & J.L. Robson	Slender Tailflower	Erect, spindly shrub, to 0.6(-1) m high. Fl. yellow-green	Sep to Oct	Sandy or loamy soils. Granite outcrops	T / VU	N	Unlikely-habitat not suitable
<i>Boronia capitata subsp. gracilis</i>		Slender shrub, 0.3-0.6(-3) m high, branches pilose. Fl. pink	Jun to Nov	White/grey or black sand. Winter-wet	P3	N	Unlikely-habit not suitable

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
				swamps, hillslopes.			
 <i>Boronia tenuis</i> Photos: A.D. Crawford & S.J. Patrick	Blue Boronia	Procumbent or erect & slender shrub, 0.1-0.5 m high. Fl. blue/pink-white	Aug to Nov	Laterite, stony soils, granite	P4	Y	Habitat may be suitable
 <i>Caladenia huegelii</i> Photos: I. & M. Greeve & J.L. Robson	Grand Spider Orchid	Tuberous, perennial, herb, 0.25-0.6 m high. Fl. green & cream & red	Sep to Oct.	Grey or brown sand, clay loam	T / E	Y	Habitat may be suitable

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
 		Tuberous, perennial, herb, 0.35-0.6 m high. Fl. white-pink	Sep to Oct	White, grey or black sand	P4	N	Unlikely-habitat not suitable
<i>Caladenia uliginosa subsp. patulens</i>		Tuberous, perennial, herb, 0.2-0.35 m high. Fl. green-cream	Sep to Oct	Clay loam and gravel. Well drained soils amongst dense shrubs	P1	Y	Unlikely-habitat not suitable
<i>Carex tereticaulis</i>		Monoecious, rhizomatous, tufted perennial, grass-like or herb (sedge), 0.7 m high. Fl. brown	Sep to Oct	Black peaty sand	P3	N	Unlikely-habitat not suitable
<i>Chamaescilla gibsonii</i>		Clumped tuberous, herb. Fl. blue	Sep	Clay to sandy clay. Winter-wet flats, shallow water-filled claypans	P3	N	Unlikely-habitat not suitable
<i>Conostylis pauciflora subsp. pauciflora</i>		Rhizomatous, stoloniferous perennial, grass-like or herb, 0.1-0.35 m high. Fl. yellow	Aug to Oct	Grey sand, limestone. Hillslopes	P4	N	Unlikely-habitat not suitable

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
				consolidated dunes			
<i>Cyathochaeta teretifolia</i>		Rhizomatous, clumped, robust perennial, grass-like or herb (sedge), to 2 m high, to 1.0 m wide. Fl. brown		Grey sand, sandy clay. Swamps, creek edges	P3	N	Unlikely-habitat not suitable
<i>Dillwynia dillwynioides</i>		Decumbent or erect, slender shrub, 0.3-1.2 m high. Fl. red & yellow/orange	Aug to Dec	Sandy soils. Winter-wet depressions	P3	N	Unlikely-habitat not suitable
 Diuris drummondii Photos: A. P. Brown and J & M Greeve		Tuberous, perennial, herb, 0.5-1.05 m high. Fl. yellow	Nov to Dec or Jan.	Low-lying depressions, swamps	V	N	Unlikely-habitat not suitable

<i>Grevillea bipinnatifida subsp. pagna</i>		Prostrate, lignotuberous shrub, 0.2-0.7 m high. Fl. red & orange & yellow	Aug or Oct to Nov	Grey sandy clay and loam, ironstone. Seasonal wetlands, swamps, roadsides	P1	Y	Habitat may be suitable
<i>Grevillea prominens</i>		Spreading shrub, 0.5-1.7 m high, 0.3-1 m wide. Fl. cream-white	Sep to Oct	Gravelly loam. Along creeklines	P3	Y	Habitat may be suitable
<i>Haemodorum loratum</i>		Bulbaceous, perennial, herb, 0.45-1.2(-2) m high. Fl. black/brown-black/green	Nov. Grey	Yellow sand, gravel	P3	N	Unlikely-habitat not suitable
 <i>Hemigenia microphylla</i>		Slender shrub, 0.4-1.8 m high. Fl. blue-purple	Sep to Dec	Sandy clay, peaty clay, granite. Winter-wet depressions	P3	N	Unlikely-habitat not suitable

Photos: J.A. Cochrane

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
  <i>Lambertia echinata</i> subsp. <i>occidentalis</i> Photos: A.P. Brown & J.A. Cochrane		Prickly, much-branched, non-lignotuberous shrub, to 3 m high. Fl. yellow	Feb or Apr or Dec	White sandy soils over laterite, orange/brown-red clay over ironstone. Flats to foothills, winter-wet sites	T / E	N	Unlikely-habitat not suitable
 <i>Lasiopetalum pterocarpum</i> Photos: A.P. Brown & J.A. Cochrane		Open, multi-stemmed shrub (with distinctly winged fruit), to 1.2 m high. Fl. pink	Aug to Dec	Dark red-brown loam or clayey sand over granite. On sloping banks near creeklines	T / E	Y	Habitat may be suitable
<i>Meionectes tenuifolia</i>					P3	N	Unable to assess
<i>Melaleuca viminalis</i>					P2	N	Unable to assess
<i>Millotia tenuifolia</i> var. <i>laevis</i>		Ascending to erect annual, herb, 0.02-0.1 m high. Fl. yellow	Sep to Oct	Granite or laterite soils	P2	Y	Habitat may be suitable

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
<i>Myriophyllum echinatum</i>		Erect annual, herb, 0.02-0.03 m high. Fl. red	Nov	Clay. Winter-wet flats	P3	N	Unlikely-habitat not suitable
<i>Pterostylis frenchii</i>		Tuberous, herb, to 0.35 m high, with rosette leaves		Calcareous sand with limestone, laterite. Flatlands and gentle slopes	P2	N	Unlikely-habitat not suitable
<i>Schizaea rupestris</i>		Rhizomatous, perennial, herb or grass-like or (fern), 0.1-0.2 m high, fronds simple, glossy; sporangia-bearing segments in pinnately arranged 'cock's comb'		Sand. Gullies, creek banks, shaded moist rock faces	P2	N	Unlikely-habitat not suitable
<i>Schoenus sp. Waroona</i>		Tufted annual, grass-like or herb (sedge), 0.02-0.06 m high. Fl. brown-red-green	Oct to Nov	Clay or sandy clay. Winter-wet flats	P3	N	Unlikely-habitat not suitable
<i>Senecio leucoglossus</i>		Erect annual, herb, to 1.3 m high. Fl. white	Aug to Dec	Gravelly lateritic or granitic soils. Granite outcrops, slopes	P4	Y	Habitat may be suitable
<i>Stylidium aceratum</i>		Fibrous rooted annual, herb, 0.05-0.09 m high, leaves spatulate. Fl. pink/white,	Oct to Nov	Sandy soils. Swamp heathland	P3	N	Unlikely-habitat not suitable

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
  <i>Stylidium ireneae</i> Photos: J. Wege		<p>Lax perennial, herb, (0.06-)0.1-0.28 m high, Leaves oblanceolate, 0.4-2 cm long, 1-3 (-5) mm wide, apex subacute to acuminate, margin entire, glandular. Scape glandular. Inflorescence racemose. Fl. pink, Oct to Dec. Sandy loam. Valleys near creek lines, woodland, often with Agonis</p>	Oct to Dec	Sandy loam. Valleys near creek lines, woodland, often with Agonis	P4	N	Habitat may be suitable
<i>Stylidium korijkekup</i>		Perennial, herb, 0.18-0.34 m high		Well-drained grey-brown sandy loam with laterite. Upland ridges	P2	N	Unlikely-habitat not suitable
<i>Stylidium paludicola</i>		Reed-like perennial, herb, 0.35-1 m high, Leaves tufted, linear or subulate or narrowly oblanceolate, 0.5-4 cm long, 0.5-1.5 mm wide, apex acute, margin entire, glabrous. Scape mostly glabrous, inflorescence axis glandular. Inflorescence racemose. Fl. pink	Oct to Dec		P3	N	Unlikely-habitat not suitable

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
<i>Stylium trudgenii</i>		Caespitose perennial, herb, 0.05-0.5 m high		Grey sand, dark grey to black sandy peat Margins of winter-wet swamps, depressions	P3	N	Unlikely-habitat not suitable
  <i>Synaphea odoceoleps</i> Photos: R. Butcher		Tufted, compact shrub, 0.2-0.5 m high. Fl. yellow	Aug to Oct.	Brown-orange loam & sandy clay, granite. Swamps, winter-wet areas	P1	N	Unlikely-habitat not suitable
  <i>Synaphea</i> sp. Fairbridge Farm (D. Papenfus 696) Photos: R. Butcher		Dense, clumped shrub, to 0.3 m high, to 0.4 m wide. Fl. yellow	Oct	Sandy with lateritic pebbles. Near winter-wet flats, in low woodland with weedy grasses	T / CR	Y	Habitat may be suitable

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
 <i>Synaphea</i> sp. Pinjarra Plain (A.S. George 17182) Photos: R. Butcher		Erect, clumped shrub (sub-shrub), to 0.8 m high. Fl. Yellow	Sep to Nov	Grey sandy loam or clay, grey-brown clayey sand, brown clayey loam, laterite. Flats, seasonally wet areas, railroad reserves often with wet depressions or drains	T / E	Y	Habitat may be suitable
 <i>Synaphea</i> sp. Serpentine (G.R. Brand 103) Photos: R. Butcher					T / CR	N	Unable to assess

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
 <i>Synaphea stenoloba</i> Photos: J. Koch		Caespitose shrub, 0.3-0.45 m high. Fl. Yellow	Aug to Oct	Sandy or sandy clay soils. Winter-wet flats, granite	E	N	Unlikely-habitat not suitable
 <i>Tetraria australiensis</i> Photo: G.J. Keighery		Rhizomatous, tufted perennial, grass-like or herb (sedge), to 1 m high. Fl. brown	Nov to Dec.		T / VU	N	Unable to assess
<i>Tetraria sp. Nannup</i>					P1	N	Unable to access

Picture	Common Name	Description	Flowering Period	Habitat Type	Cons Code	Likelihood (Y/N)	Comments
 <i>Tetratheca parvifolia</i> Photos: S. Fussell & J. Parker		Small shrub, 0.2-0.3 m high. Fl. pink	Oct		P3	N	Unable to access

Appendix 5: Flora Species List

*Denotes introduced species

Family	Scientific name	Common Name
Fabaceae	<i>Acacia browniana</i>	
Fabaceae	<i>Acacia decurrens</i> *	
Fabaceae	<i>Acacia pulchella</i> var. <i>pulchella</i>	
Proteaceae	<i>Adenanthera barbiger</i>	
Poaceae	<i>Aira cupaniana</i> *	Silvery Hairgrass
Euphorbiaceae	<i>Amperea simulans</i>	
Poaceae	<i>Amphipogon amphipogonoides</i>	
Myrtaceae	<i>Astartea scoparia</i>	Common Astartea
Poaceae	<i>Austrostipa semibarbata</i>	
Pittosporaceae	<i>Billardiera variifolia</i>	
Phyllanthaceae	<i>Boronia crenulata</i>	
Fabaceae	<i>Bossiaea aquifolium</i> subsp. <i>aquifolium</i>	
Poaceae	<i>Briza maxima</i> *	Blowfly Grass
Caprifoliaceae	<i>Centranthus macrosiphon</i> *	
Centrolepidaceae	<i>Centrolepis aristata</i>	Pointed Centrolepis
Centrolepidaceae	<i>Centrolepis fascicularis</i>	
Centrolepidaceae	<i>Centrolepis glabra</i>	Smooth Centrolepis
Fabaceae	<i>Chorizema rhombeum</i>	
Asteraceae	<i>Cirsium vulgare</i> *	Spear Thistle
Ranunculaceae	<i>Clematis pubescens</i>	Common Clematis
Haemodoraceae	<i>Conostylis aculeata</i>	
Haemodoraceae	<i>Conostylis setigera</i>	Bristly Cottonhead
Caryophyllaceae	<i>Corrigiola litoralis</i> *	Strapwort
Myrtaceae	<i>Corymbia calophylla</i>	Marri
Hemerocallidaceae	<i>Dianella revoluta</i>	Blueberry Lily
Droseraceae	<i>Drosera barbigera</i>	
Droseraceae	<i>Drosera nitidula</i>	Shining Sundew
Poaceae	<i>Eragrostis brownii</i>	Brown's Lovegrass
Myrtaceae	<i>Eucalyptus marginata</i>	Jarrah

Family	Scientific name	Common Name
Apocynaceae	<i>Gomphocarpus fruticosus</i> *	Narrowleaf Cottonbush
Fabaceae	<i>Gompholobium marginatum</i>	
Fabaceae	<i>Gompholobium preissii</i>	
Goodeniaceae	<i>Goodenia sp.</i>	
Haemodoraceae	<i>Haemodorum laxum</i>	
Proteaceae	<i>Hakea amplexicaulis</i>	Prickly Hakea
Lamiaceae	<i>Hemigenia pritzelii</i>	
Dilleniaceae	<i>Hibbertia amplexicaulis</i>	
Dilleniaceae	<i>Hibbertia diamesogenos</i>	
Fabaceae	<i>Hovea chorizemifolia</i>	Holly-leaved Hovea
Violaceae	<i>Hybanthus debilissimus</i>	
Asteraceae	<i>Hypochaeris radicata</i> *	Flat Weed
Restionaceae	<i>Hypolaena exsulca</i>	
Cyperaceae	<i>Isolepis cyperoides</i>	
Juncaceae	<i>Juncus subsecundus</i>	Finger Rush
Fabaceae	<i>Kennedia coccinea</i>	
Poaceae	<i>Lachnagrostis filiformis</i>	
Malvaceae	<i>Lasiopetalum floribundum</i>	Free Flowering Lasiopetalum
Asparagaceae	<i>Laxmannia squarrosa</i>	
Myrtaceae	<i>Leptospermum laevigatum</i>	Victorian Teatree
Ericaceae	<i>Leucopogon verticillatus</i>	
Stylidiaceae	<i>Levenhookia pusilla</i>	
Asparagaceae	<i>Lomandra sericea</i>	
Asparagaceae	<i>Lomandra sericea</i>	
Fabaceae	<i>Lotus angustissimus</i> *	Narrow Trefoil
Primulaceae	<i>Lysimachia arvensis</i> *	Pimpernel
Zamiaceae	<i>Macrozamia riedlei</i>	
Myrtaceae	<i>Melaleuca preissiana</i>	Moonah
Fabaceae	<i>Mirbelia dilatatum</i>	
Rubiaceae	<i>Opercularia hispidula</i>	Hispid Stinkweed
Iridaceae	<i>Patersonia babianoides</i>	
Iridaceae	<i>Patersonia occidentalis</i>	

Family	Scientific name	Common Name
Apiaceae	<i>Pentapeltis peltigera</i>	
Polygonaceae	<i>Persicaria prostrata</i>	
Proteaceae	<i>Persoonia longifolia</i>	
Phyllanthaceae	<i>Phyllanthus calycinus</i>	
Phytolaccaceae	<i>Phytolacca octandra</i>	Red Ink Plant
Apiaceae	<i>Platysace filiformis</i>	
Asteraceae	<i>Podotheca angustifolia</i>	Sticky Longheads
Asteraceae	<i>Pseudognaphalium luteoalbum</i>	jersey cudweed
Dennstaedtiaceae	<i>Pteridium esculentum</i>	Bracken
Asteraceae	<i>Pterochaeta paniculata</i>	Woolly Waitzia
Amaranthaceae	<i>Ptilotus esquhamatus</i>	
Amaranthaceae	<i>Ptilotus polystachyus</i>	Prince of Wales Feather
Poaceae	<i>Rytidosperma sp.</i>	
Goodeniaceae	<i>Scaevola calliptera</i>	
Solanaceae	<i>Solanum hystrix*</i>	Afghan Thistle
Asteraceae	<i>Sonchus oleraceus*</i>	Common Sowthistle
Stylidiaceae	<i>Stylium amoenum</i>	Lovely Triggerplant
Asteraceae	<i>Symphyotrichum squamatum*</i>	
Cyperaceae	<i>Tetraria capillaris</i>	Hair Sedge
Cyperaceae	<i>Tetraria octandra</i>	
Poaceae	<i>Tetrarrhena laevis</i>	Forest Ricegrass
Asparagaceae	<i>Thysanotus multiflorus</i>	
Araliaceae	<i>Trachymene pilosa</i>	
Asteraceae	<i>Ursinia anthemoides*</i>	
Fabaceae	<i>Viminaria juncea</i>	
Campanulaceae	<i>Wahlenbergia capensis*</i>	Cape Bluebell
Asteraceae	<i>Waitzia nitida</i>	
Iridaceae	<i>Watsonia meriana var. bulbillifera*</i>	Bugle Lily
Xanthorrhoeaceae	<i>Xanthorrhoea brunonis</i>	
Xanthorrhoeaceae	<i>Xanthorrhoea preissii</i>	
Apiaceae	<i>Xanthosia candida</i>	

Appendix 6: Flora Quadrat Data

Quadrat No.: 1

Survey Date: 27/11/2020

Personnel: SH BC

Easting: 403823.46

Northing: 6348494.05

Location: Logue Brook
Dam

Topography: Lake Bank

Aspect: South

Slope: 1-3%

Soil: Light brown
loam

Rock: 1-3%

Gravel 50%, 0.5cm

Leaf Litter: 0.5%, 1cm

Bare Ground: 50%

Drainage: Well

Notes: *Viminaria juncea* and *Mirbelia dilatata* shrubland

Condition Good
