

Species Endresianæ¹

FRANCO PUPULIN, CARLOS OSSENBACH, RUDOLF JENNY and ERNST VITEK

The short career of Auguste R. Endrés as a botanical explorer, author and illustrator, is concentrated in just the few years that he spent in Costa Rica between the end of 1866 and the first months of 1874, with a brief parenthesis in Panama. In these seven years Endrés botanized throughout the country, devoting his main attention to the still unrevealed richness of small orchid plants that are common in the canopies of Costa Rican forests². The botanical results of his activity, largely neglected after his death in 1874, are extraordinary both in terms of the quantity of specimens, illustrations and plant descriptions, as well as the quality of his meticulous work.

Endrés' botanical legacy amounts to the astonishing figure of 3518 sheets - 1127 of which contain one or more drawings - plus a number of loose documents, scraps and notebooks that include other species descriptions. Notwithstanding his immense labor, only a very small portion of the orchid plants he collected, studied and illustrated during his Costa Rican journey were published as new to the science.

He co-authored the description of 11 species with his main scientific correspondent, Heinrich Gustav Reichenbach. Another four species and one new variety, based on collections by Endrés, were described by Reichenbach while they corresponded between Costa Rica and Germany, and 20 species more after Endrés' death until 1886. After the relocation of Reichenbach's herbarium to the Hof Imperial Museum in Vienna (now the Naturhistorisches Museum), Friedrich Richard Rudolf Schlechter (1872–1925) and Friedrich (Fritz) Wilhelm Ludwig Kränzlin (1847–1934) studied the material collected by Endrés, and used it as the basis for the description of 3 and 41 new orchid species, respectively. Kränzlin, at least, removed material collected by Endrés from Reichenbach's herbarium which served as the type specimens for his new species. The largest part of this collection was lost when the Berlin/Dahlem Herbarium was bombed in 1943, but some of the specimens had been previously sold

¹ This chapter is largely based on the critical examination of the type orchid material collected by Endrés, published in the *Annalen* of the Natural History Museum of Vienna: Pupulin, F., C. Ossenbach, R. Jenny & E. Vitek. 2011. *Typi Orchidacearum ab Augusto R. Endresio in Costa Rica lecti. Ann. Naturhist. Mus. Wien*, B 112: 265–313, and Pupulin, F., C. Ossenbach, R. Jenny & E. Vitek. 2012. *Additamenta ad typos Endresianos Orchidacearum Costaricæ. Ann. Naturhist. Mus. Wien*, B 113: 133–138.

² Ossenbach, C., F. Pupulin & R. Jenny. 2010. Orchid itineraries of Augustus R. Endrés in Central America: a biographic and geographic sketch. *Lankesteriana* 10(1): 19–47.

by Kränzlin to Oakes Ames in 1924; they are actually conserved in the Oakes Ames Orchid Herbarium, Harvard University Herbaria.

The following important contribution to Endrés' orchidology was the work of Carlyle A. Luer (1922–), who, between 1992 and 1999, published twenty species descriptions of Costa Rican Pleurothallidinae (mostly belonging to the genus *Lepanthes*) based on plants and drawings by Endrés in the Naturhistorisches Museum. If other minor contributions resulting from the study of Endrés' materials are taken in account³, the total number of orchids described as new to the science on the basis of Endrés' collections amounts to only 114 species (with two new genera) and two varieties. When compared to the substantial advances in the knowledge of Mesoamerican orchids made by Endrés, it is clear that his formal contribution to botany was much less than his commitment deserved. Endrés himself was aware of this, and a few months before his death he wrote bitterly to his friend, the Captain Dow:

*"Reichenbach has lately repeated his proposal of buying my dried orch. collections and I fear our first interview will be a stormy one. I begin to consider these cabinet-celebrities as vampires nourishing their inflated fame at the cost of the lifeblood of those poor fools they condescendingly call "collectors", and I am thoroughly disgusted, at moments, with the pursuits I have so passionately followed for seven years. / Rchb. lately proposed retarding the publication of my plants to 1875, in order to adorn, as he says, the catalogue which will be published on occasion of the ---eth. anniversary of the Hamburg Botanical Gardens, of which he is the Director. / My own opinion is that, if any further retardation takes place it will emanate from a resolution of relinquishing his invaluable cooperation, and of working up the material myself and by myself. / Would that I had done this long ago I should then at least have enjoyed the public credit which is my just due in reward for the sacrifices I have made. If, by sheer luck, not worn out bodily, my patience at least is exhausted"*⁴.

The following pages include a complete catalogue of the orchid types based on collections by Endrés, associated with his illustrations and other materials from his gatherings.

⁴ Letter to Capt. J. M. Dow, dated 12 January 1874 Cornell University, Ithaca.

ORCHID TYPES BASED ON COLLECTIONS BY AUGUSTE R. ENDRÉS

Barkeria lindleyana* var. *centerae Rchb. f., Gard. Chron. 1873: 1597. 1873.

Syn. *Epidendrum lindleyanum* var. *centerae* H.J. Veitch, Man. Orchid. Pl. 6: 105. 1890.
“Introduced by us from Costa Rica, in 1873, through M. Endres”.

TYPE: Costa Rica. “The original Barkeria Lindleyana was found in Costa Rica ... Now ... the lynx-eyed, indefatigable, and really scientific traveller, Mr. Endres, has discovered a very beautiful, prettier-coloured variety of it in Costa Rica ... I was most agreeably surprised to obtain fresh flowers of this remarkable plant quite recently (beginning of November) from the Royal Exotic Nursery of Messrs. Veitch & Sons”, A.R. Endrés s.n. Holotype: W 0019041; isotype: W0019039.

Batemania burtii Endrés & Rchb.f., Gard. Chron. 1099. 1872.

Syn. *Huntleya burtii* (Endrés & Rchb.f.) Pfitzer (1889), *Zygopetalum burtii* (Endrés & Rchb.f.) Benth. & Hook.f. ex Hmesl. (1884); *Huntleya burtii* (Endrés & Rchb.f.) Rolfe (1916).

TYPE: Costa Rica. “It was discovered so early as June, 1867, in Costa Rica, by M. Endres, who proposed to name it in honor of one of his acquaintances”. Holotype, W 0019751 (with drawing of the flower and floral dissections), A. R. Endrés s.n.

Other Endrés’ material: flowers and description (W 0019752; sketch with two descriptions, A. R. Endrés 100 (W 0019759); drawings of the flowers, dissections and descriptions, A. R. Endrés 100 (W 0019758); drawings, A. R. Endrés 100 (W 0019756); flowers, A. R. Endrés s.n. (W 0019754); drawing of a flower, A. R. Endrés 109 (W 0019760); drawing and descriptions, A. R. Endrés s.n. (W 0019755); flowers, A. R. Endrés s.n. (W 0019753); sketch of the flower, A. R. Endrés s.n. (W 0019757).

Brassia chlorops Endrés & Rchb.f., Gard. Chron. 542. 1873.

Syn. *Ada chlorops* (Endrés & Rchb.f.) N.H.Williams.

Syntypes: “There are [...] five dry specimens of it in my herbarium, gathered in Costa Rica by Mr. Endres, the skilful lynx-eyed investigator and by Mr. Julian Carmiol. The fresh specimen come from Messrs. Veitch, who imported it likewise from Costa Rica”. LECTOTYPE, selected by Pupulin et al.⁵, «near *Mesospinidium* / Sept^r», A. R. Endrés 243 (W 0019028). Isolectotypes: W 0019029, W 0019030, W 0019031, W 0019032, W Rchb.Orch. 2438.

Other Endrés’ material: Reichenbach’s manuscript description and drawing of material from Endrés (W 0018985); inflorescences with flowers, A. R. Endrés s.n. (W 0019035).

Chondrorhyncha endresii Schltr., Repert. Sp. Nov. Regni Veg. 17: 14. 1921.

Syn: *Chondroscaphe bicolor* (Rolfe) Dressler (the type, R. Pfau s.n., K); *Chondroscaphe endresii* (Schltr.) Dressler.

TYPE: Costa Rica. “Ohne nähere Standortsangabe”, A. R. Endrés 166. Holotype, W0018830.

⁵ Pupulin, F., C. Ossenbach, R. Jenny & E. Vitek. 2011. *Op. cit.*

Other Endrés' material: drawings of the type and descriptions, A. R. Endrés 166 (W 0018831); drawings of the flower and details, A. R. Endrés 166 (W 0018833); description, A. R. Endrés 166 (W 0018832).

Chondrorhyncha reichenbachiana Schltr., Repert. Spec. Nov. Regni Veg. 17: 15. 1921.

TYPE: Costa Rica. "Cataratas, blühend Marz-August", A. R. Endrés 557. Holotype, W 0018829.

Other Endrés' material: drawings of the type and descriptions, A. R. Endrés 557 (W0018826); dissected flower, A. R. Endrés 659 (W 0018823); flowers, A. R. Endrés s.n. (W-0018827).

The original drawings by Endrés of his «*Zygopetalum* № 10» were used by Reichenbach to prepare a plate for his *Xenia Orchidacea*, under the intended name of «*Chondrorhyncha lamellata*», finally never published (FIG. 139).

Cryptarrhena quadricornu Kraenzl., Pflanzenr. IV. 50(Heft 80): 314. 1922.

Syn: *Cryptarrhena guatemalensis* Schltr.

TYPE: "Costa Rica. schwule, niedrig gelegene Gegenden an der atlantischen Seite", A. R. Endres s.n. [№ 658 of gen. coll. Orch.]. Holotype, W 0018849, with Endrés' description and Kränzlin's drawing of the flower.

Cryptophoranthus acaulis Kraenzl., Repert. Spec. Nov. Regni Veg. Beih. Beih. 34: 232. 1925.

TYPE: Costa Rica. "Mina Iglesias: Río Barranca", A. R. Endres 62 [Holotype, W 0021288 (1/2, with Endrés' sketch); W 0021289 (2/2, with Endrés' sketch and description)].

The name is a synonym of *Specklinia tribuloides* (Sw.) Pridgeon & M.W.Chase (bas. *Epidendrum tribuloides* Sw.; *Cryptophoranthus tribuloides* (Sw.) H. Dietr., *Cymbidium tribuloides* (Sw.) Spreng., *Dendrobium tribuloides* (Sw.) Sw. , *Humboldtia tribuloides* (Sw.) Kuntze, *Tribulago tribuloides* (Sw.) Luer.

Cryptophoranthus endresianus Kraenzl., Repert. Spec. Nov. Regni Veg. 17: 437. 1921.

Syn: *Zootrophion endresianum* (Kraenzl.) Luer

TYPE: Costa Rica. "Ohne genaueren Standort", 1867, A. R. Endrés s.n. Holotype, annotated by Kränzlin, with Endrés' description and drawings and Reichenbach's sketches, W 0018865. Isotype: W 0018864.

Other Endrés' material: Costa Rica. «San Ramón, camino a San Carlos», descriptions and drawing of plant and flower, A. R. Endrés s.n. (W 0018863); coloured drawings of plant and flower, A. R. Endrés s.n. (W 0018866, W 0018867); without locality, A. R. Endrés s.n. (W 29950; W39082).

Dichaea cryptarrhena Rchb.f. ex Kraenzl., Pflanzenr. 4(50): 36. 1923.

TYPE: "Subäquatoriale andine Provinz. Costa Rica, ohne genaueren Standort", A. R. Endrés 28. Holotype, W 0019083.

Other Endrés' material: Costa Rica. «San Ramón», drawings of the type and descriptions, A. R. Endrés 28 (W 0019084).

Dichaea dammeriana Kraenzl, Engler Pflanzenr., IV, 50(83): 41. 1923.

Syntypes: “Subäquatoriale andine Provinz. Sierra Nevada de Sta. Marta, H. Smith 2773 (AMES, US, NY); Costa Rica. A. R. Endrés 66” (AMES, W). LECTOTYPE, designated by Pupulin⁶: AMES-26090; Isolectotypes, W 0019086 (with Endrés' and Reichenbach's drawings), W 0019087; W 0019090; W 0019089; W 0019088.

Other Endrés' material: Costa Rica. «San Ramon», drawings and descriptions of the syntype, A. R. Endrés 66 (W 0019085); drawing of the syntype (W 0019092).

Dichaea diandra Rchb.f., Bot. Zeit. 35: 41. 1877.

TYPE: “Costa Rica. Endres”, A. R. Endrés s.n. Holotype: not located; no isotypes known to exist.

Endrés' type collection is likely referable to a species of sect. *Dichaea*, the only group that, according to the diagnosis, has abaxially verrucose sepals. However, while in the protologue Reichenbach first assigns the species to a group with muricate fruits, he later describes the ovary as glabrous. The column of *D. diandra*, with two lateral anthers, was likely a monster, and in the absence of a type specimen or any other material associated with the original protologue, Reichenbach's diandrous *Dichaea* cannot be assigned with certainty to any of the known taxa⁷.

Dichaea glabrescens Kraenzl., Pflanzenr. 4(50): 41. 1923.

Syn: *Dichaea tuerckheimii* Schltr.

TYPE: “Subäquatoriale andine Provinz. Costa Rica, [1867], A. R. Endrés 118. Holotype, W 019150. Isotype, W 019146.

Other Endrés' material: drawings of the type, A. R. Endrés 118 (W 0019160); «Potrerillos», description («*Dichaea heteromorpha*»), A. R. Endrés 118 (W 0019160); drawings, A. R. Endrés 12 (W 0021667); plants, A.R. Endrés s.n. (W 0019145; W 0019147; W 0019148; W 0019149; W 0019151; W 0019152).

According to a manuscript annotation by Kränzlin on the type sheet, he changed the name from *glabrescens* to *selaginella*, because Schlechter had already used this name in 1920 for a species from Colombia (synonymous with *Dichaea hystricina*).

Endresiella zahlbruckneriana Schltr., Repert. Spec. Nov. Regni Veg. 17: 14. 1921.

Syn: *Trevoria zahlbruckneriana* (Schltr.) Garay.

TYPE: “Costa Rica. an der Strasse von San Ramon nach San Carlos, Legua. Blühend im September”, A. R. Endrés 512. Holotype, W 0019449.

⁶ Pupulin, F. 2007. Contributions toward a reassessment of Costa Rican Zygopetalinae (Orchidaceae). 3. A systematic revision of *Dichaea* in Costa Rica. *Harvard Papers in Botany* 12 (1): 15–153.

⁷ Pupulin, F. 2010. Flora Costaricensis. Family #39 Orchidaceae: Tribe Cymbidieae: Subtribe Zygopetalinae. *Fieldiana, Botany* n.s. 49: 1–60.

The Oakes Ames Orchid Herbarium at the Harvard University hosts the copy of the illustration of the type, originally prepared by Schlechter and traced under his supervision (FIG. 140).

***Epidendrum endresii* Rchb.f.**, Gard. Chron., n.s., 19: 432. 1883.

Syntypes: Costa Rica. “First of all I had some branches from my poor friend Endres, who found it flowering in December at Costa Rica. The flowers were simply described as white—labellum lilac. Then my friend Mr. F. C. Lehmann sent me a glorious plant and some branches in spirit, which now lie before me, I had at the same time a very carefully prepared picture, which appears to have been taken from the very same individual I had in spirits. Mr Lehmann found it flowering in March, 1878, in Costa Rica. Now, Mr. F. Sander sends me a fresh inflorescence and twigs. LECTOTYPE, designated by Santiago & Hágster⁸ (Icon. Orchid. 9: t. 931. 2007): Costa Rica. F.C. Lehmann 177, W- Rchb.Orch. 50033 / NMW 0019967.

Other Endrés’ material: Costa Rica, «Heights S.th of Cartago / Tablazo», drawing of the flower and dissections, A. R. Endrés 502 (W 0024422, W 0024422); plants, A. R. Endrés 502 (W 0023883, W 0023885); plant and description, A. R. Endrés 502 (W0019970); drawing of the flower and floral dissections, A. R. Endrés “108” (W0024490); «Tablazo of Cartago, Coralillo», A. R. Endrés s.n. (W 1889-31372); without locality, A. R. Endrés s.n. (W 0019971); «Tablazo / Fila de Atarrazú», A. R. Endrés s.n. (W 0019969).

***Epidendrum ionocentrum* Rchb.f.**, Gard. Chron., n.s., 20: 8. 1883.

Syn: *Prosthechea ionocentra* (Rchb.f.) W.E.Higgins, *Epidendrum prismatocarpum* var. *ionocentrum* (Rchb.f.) Teusch., *Hormidium ionocentrum* (Rchb.f.) Brieger, *Encyclia ionocentra* (Rchb.f.) Mora-Ret. & J.García, *Pseudencyclia ionocentra* (Rchb.f.) V.P.Castro & Chiron, *Panarica ionocentra* (Rchb.f.) Withner & P.A.Harding, *Encyclia prismatocarpa* var. *ionocentra* (Rchb.f.) M.Wolff & O.Gruss

Syntypes: Costa Rica. “This curious and rare species was found by Messrs. Endres and Pfau. LECTOTYPE, selected by Pupulin et al.⁹: Costa Rica. Cartago: «Sitio de don / Eusebio Ortiz / Birris», plant with flowers, A. R. Endrés s.n. (W 0024579); Isolectotypes: «Sitio Ortiz / Birris», inflorescence and flowers, A. R. Endrés s.n. (W 0024551, W 0024552, W 0024419); «Sitio Ortiz / etc.», A. R. Endrés s.n. (W 0024415); «Sitio de don / Eusebio Ortiz / Birris», A. R. Endrés s.n. (W 0024426); «Sitio Ortiz», A. R. Endrés s.n. (W 0024429).

Other Endrés’ material: flower and Reichenbach’s sketch of the lip and the column, A. R. Endrés s.n. (W 0020200); Costa Rica. San José: Dota, «around Sta. Maria [...] Epidendrum ionocentrum / Endr. Rchb.f.», flower and description, A. R. Endrés s.n. (W 0020202); Alajuela: San Ramón, «Colorado near Naranjo. id. Birris», description and sketch of the lip, A. R. Endrés s.n. (W 0024580). Without locality, A. R. Endrés s.n. (W-0020201).

The name, *Epidendrum ionocentrum*, was ostensibly suggested by Endrés (annotation on W-Rchb.Orch. 14530), who proposed himself as a co-author of the species. His name, however, was not included in the published description.

⁸ Hágster, E. & E. Santiago. 2009. *Epidendrum pterocaulon*. Pl. 931 in: Hágster, E. & L. Sánchez Saldaña (eds.). *Species New and Old in Epidendrum, The Genus Epidendrum, Part 6*. Icones Orchidacearum (Mexico), Fascicle 19, plates 901-1000.

(W 0019682); pencil plate, A. R. Endrés s.n. (W 0019680); pencil drawing of a flower, A. R. Endrés s.n. (W 0019681). Without locality, colored drawing of the flower of «*Lepanthes müllneriana*», A. R. Endrés s.n. (W 0019675). Candelaria, crest of Cerro del Dragon (Legua de los Desamparados, Savannas), A. R. Endrés s.n. (W 1889-29954) Without locality, A. R. Endrés s.n. (W 1889-29912, W 1889-29916).

Lepanthes caroli-lueri Bogarín & Pupulin, Harvard Pap. Bot. 15(1): 116. 2010.

TYPE: Costa Rica. Boundary between Alajuela and Heredia provinces: Grecia, Sarapiquí, Colonia Virgen del Socorro, road to Cariblanco, bridge on San Fernando river, 10°16'32"N 84°10'16"W, 750 m, shores of San Fernando river, 13 February 2004, D. Bogarín 741, H. León-Páez, F. Pupulin & E. Salas. Holotype, JBL-spirit. Isotypes, CR, JBL-

spirit. Paratypes: Costa Rica. Without collecting data: A. R. Endrés s.n. (W 1889-29901); Endrés drawings, A. R. Endrés 62 (W0019016); Endrés drawings and floral dissections, A.R. Endrés 604 (W0019017, W0019018, W0019015).

Lepanthes circularis Luer, Lindleyana 10(3): 140. 1995. (Lindleyana)

TYPE: Costa Rica. Cartago: “heights above El Tejar, alt. 4500 ft,” ca. 1867, A. R. Endrés s.n. Holotype, W 1889-41448.

Lepanthes dichroma Luer, Lindleyana 11: 59. 1996.

TYPE: Costa Rica. Cartago: “this side of San Cristobal and Santa Maria, 5 June”, ca. 1867, A. R. Endrés s.n. Holotype, W 1889-142238.

Lepanthes dotaе Endrés ex Luer, Lindleyana 10(3): 143. 1995.

TYPE: Costa Rica. San José: “Dota, rainy season, Sept.-Nov.”, A. R. Endrés s.n. [Lepanthes N° 56], sketch 253. Holotype, W 0019635.

Other Endrés’ material: drawings of the flower and floral dissections, A. R. Endrés s.n. (W 0019632); coloured drawing of the flower, A. R. Endrés s.n. (W0019633); «Lepanthes, see sk. 253», A. R. Endrés s.n. (W0019634).

Lepanthes elegans Luer, Lindleyana 10(3): 146. 1995.

TYPE: Costa Rica. Cartago: “beyond the Laguna, Sitio Ortiz, Birris, Aug.”, ca. 1867, A. R. Endrés s.n. Holotype, W 1889-29930. Paratype: Costa Rica. A. R. Endrés s.n. (W 1889-142084).

Other Endrés’ material: drawings of the flower and floral dissections, A. R. Endrés s.n (W 0019615); coloured drawing of the flower, A. R. Endrés s.n (W 0019614).

Lepanthes endresii Luer, Lindleyana 7(2): 106. 1992.

TYPE: Costa Rica. Cartago: “heights above El Tejar south of Cartago, June”, ca. 1867, A. R. Endrés 509. Holotype, W 1889-24850.

Other Endrés’ material: coloured drawing of the flower, A. R. Endrés 509 (W 0019608); sketches of the plant, inflorescence, the flower and flower details, A. R. Endrés 509 (W 0019609, W 0019610); plants, A. R. Endrés 509 (W 1889-29962, W 1889-29970; W 1889-29895; W 1889-142252); Costa Rica. «La Paz, etc.», A. R. Endrés s.n. (W 1889-30718).

Lepanthes falcifera Luer, Lindleyana 10(3): 148. 1995.

TYPE: Costa Rica. Cartago: “beyond the Laguna, Sitio Ortiz, Birris”, ca. 1867, A. R. Endrés s.n. [Nº. 663 Gen. coll. Orch.]. Holotype, W 1889-46789. Isotypes, W 1889-142079, W 1889-142080, W 1997-8536.

Other Endrés’ material: drawing of the flower, A. R. Endrés s.n. (W 0019394).

Lepanthes fascinata Luer, Lindleyana 10(3): 148. 1995.

TYPE: Costa Rica. Cartago: “San Cristóbal, June 5”, ca. 1867, A. R. Endrés s.n. Holotype, W 1889-24844.

Other Endrés’ material: Costa Rica. “P. of Cartago”, A. R. Endrés s.n. (W 1889-24866, specimen on the right).

Lepanthes forcipifera Luer, Lindleyana 10(3): 151. 1995.

TYPE: Costa Rica. Without locality, ca. 1867, A. R. Endrés s.n. Holotype, W 0019390.

Lepanthes fugiens Luer, Lindleyana 10(3): 151. 1995.

TYPE: Costa Rica. Without locality, ca. 1867, A. R. Endrés s.n. Holotype, W 0019389.

Lepanthes gracillima Luer, Lindleyana 10(3): 154. 1995.

TYPE: Costa Rica. Puntarenas: Monteverde, epiphytic in tree in a pasture, 1500 m, 21 March 1995, C. Luer, J. Luer, J. Atwood, W. Rhodehamel, G. Campbell & G. Barbosa 17447. Holotype, MO. Paratype: Costa Rica. Cartago: “heights back of Carpintaria”, ca. 1867, A. R. Endrés s.n. [24, according to the protologue] (W 1889-29961). FIG. 141C.

Other Endrés’ material: coloured drawing of the flower and floral details, «*Lepanthes gracillima*», A.R. Endrés s.n. (W 0019386); drawings of the plant and two flowers, A. R. Endrés s.n. (W 0019387); drawings of the plant, flower, and floral dissections, A. R. Endrés s.n. (W 0019388).

Lepanthes guardiana Endrés ex Luer, Lindleyana 10(3): 156. 1995.

TYPE: Costa Rica. Without locality, ca. 1867, A. R. Endrés 670, sketch 299. Holotype, W 0019373. Paratype: Costa Rica, Without locality, ca. 1867, A. R. Endrés s.n., W 0019374. FIG. 141D.

Other Endrés’ material: coloured drawing of the flower, «*Lepanthes guardiana*», A.R. Endrés s.n. (W 0019376); drawings of the flower, floral dissections and description, A. R. Endrés s.n. (W 0019375).

Lepanthes hamulifera Luer, Lindleyana 10(3): 156. 1995.

TYPE: Costa Rica. San José: “Taburcia, Candelaria”, ca. 1867, A. R. Endrés s.n. Holotype, W- 0019369.

Lepanthes limbellata Endrés ex Luer, Lindleyana 10(3): 159. 1995.

TYPE: Costa Rica. Without locality, ca. 1867, A. R. Endrés s.n. Holotype, W 1889-0041431.

Other Endrés’ material: drawings of the plant and flower, «*Lepanthes limbata*», A. R. Endrés s.n. (W 0019345); drawings of the plant and flower, A. R. Endrés s.n. (W 0019344, W 0019346).

Lepanthes minutissima Endrés ex Luer, Lindleyana 10(3): 159. 1995.

TYPE: Costa Rica. Without locality, ca. 1867, «*Effusa*», A. R. Endrés s.n. Holotype, W 1889-0087090.

Other Endrés' material: drawings of the plant and flower, with descriptions, A. R. *Endrés s.n.* (W 0019339); drawings of the plant and flower, and coloured drawings of the flower, A. R. *Endrés s.n.* (W 0019338); coloured drawing of the flower, «*Lepanthes microscopica*», A. R. *Endrés s.n.* (W 0019337).

Lepanthes orbella Luer, Lindleyana 11: 64. 1996.

TYPE: Costa Rica. Without locality, ca. 1867, A. R. *Endrés s.n.* Holotype, Endrés drawing of the plant, flower and floral dissections, W 0019334.

Other Endrés' material: sketch of the flower, A. R. *Endrés s.n.* (W 0019333); sketches of the plant, flower and floral dissections, A. R. *Endrés s.n.* (W 0019332).

Lepanthes parvilabia Luer, Lindleyana 10(3): 162. 1995.

TYPE: Costa Rica. Without locality, ca. 1867, A. R. *Endrés s.n.* Holotype, W 1889-0142082.

Other Endrés' material: Costa Rica. Without locality, A. R. *Endrés s.n.* (W 0030669).

Lepanthes poasensis Luer, Lindleyana 10(3): 164. 1995.

TYPE: Costa Rica. Heredia: «Volcán Poás, front crest», ca. 1867, A. R. *Endrés s.n.* Holotype, Endrés' drawings of the plant and flower, with description, W 0019331.

Other Endrés' material: Costa Rica. A. R. *Endrés s.n.* (W 0019330); drawing of the plant, flower and floral dissections, A. R. *Endrés s.n.* (W 0019328); «Volc. Poás, on the crest of front ridge – June / Volc. Barba, Desengano, Sept.», A. R. *Endrés s.n.* (W 1889-0046786); drawing of the flower, A. R. *Endrés s.n.* (W 0019328).

Lepanthes pulcherrima Endrés ex Bogarín & Pupulin, Harvard Pap. Bot. 15(1): 118. 2010.

TYPE: Costa Rica. Alajuela: San Ramón, Santiago, finca of Jesús Salas Jiménez, mountains toward the towers of Berlín, 10°02'21"N 84°12'02"W, 1300 m, epiphytic in old tress along coffee plantations, F. Pupulin 7159, E. Salas-Pupulin & Jesús Salas, 14 September 2008. Holotype, JBL-spirit. Paratypes: Costa Rica. Endrés' drawings, «South West of San Ramón, rainy season, A. R. *Endrés* 273 (W 0019021, W 0019020, W 0019019); Endrés' description, A. R. *Endrés* 273 (W-Rchb-Orch 38643). Without collecting data, A. R. *Endrés s.n.* (W 1889-41417).

Lepanthes purpurea Luer, Lindleyana 10(3): 164. 1995.

TYPE: Costa Rica. Alajuela: «La Paz San Ramón», ca. 1867, A. R. *Endrés s.n.* HOLOTYPE, Endrés' drawings of the plant and flower, with description [«see fig. p. 54»], W-Rchb.Orch. 1889-0030740. PARATYPE, Costa Rica. Without locality, A. R. *Endrés s.n.* (W-Rchb.Orch. 1889-0087076).

Other Endrés' material: Costa Rica. Without locality, A. R. *Endrés s.n.* (W 0041418).

Lepanthes reflexa Luer & Hermans, Lindleyana 10(3): 167. 1995.

TYPE: Costa Rica. Cartago: Cerro de la Muerte, 2750 m, flowered in cultivation, 22 March 1994, J. Hermans & C. Hermans 2746. Holotype, MO. Isotype, K. Paratype, Costa Rica.

Chondrorhyncha lamellata Rehb. fil.

Figure 139. Unpublished drawing of "Chondrorhyncha lamellata", intended for Reichenbach's *Xenia Orchidacea*, based on a drawing by Endrés. Naturhistorisches Museum, Wien.

Figure 140. Drawing of the type of *Endresiella zahlbrückneriana*, traced on the original sketch by R. Schlechter (AMES 99111).

Species Endresianæ

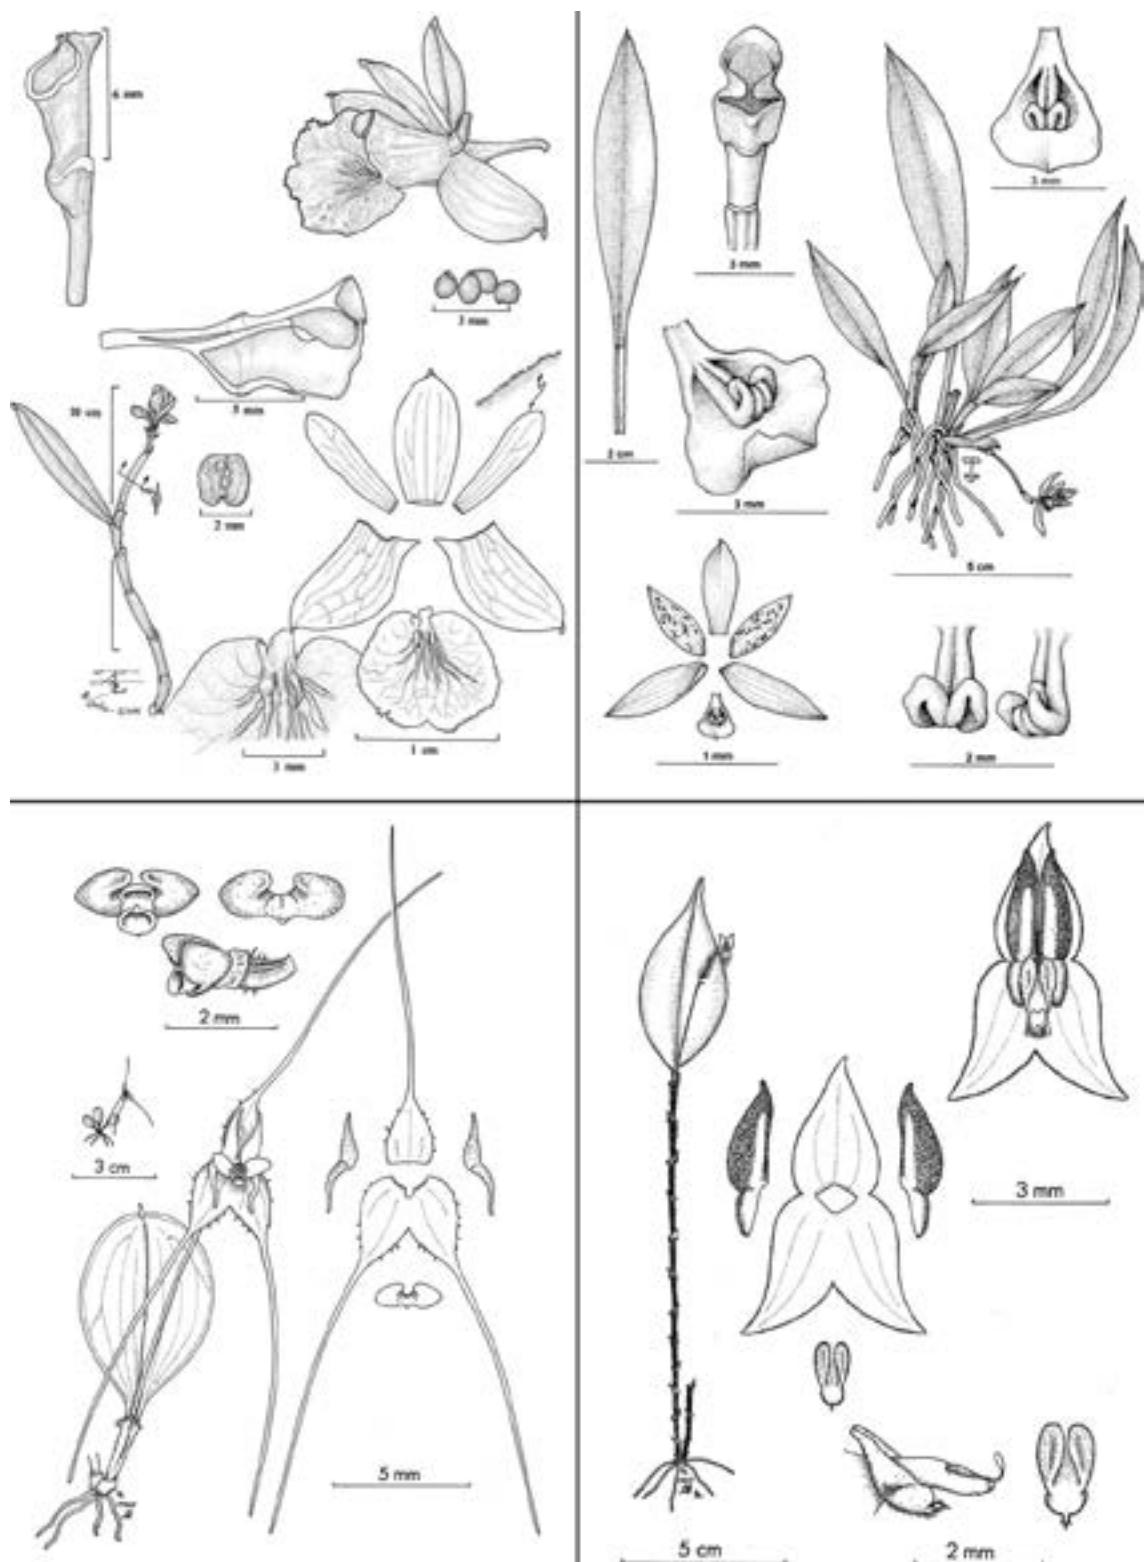

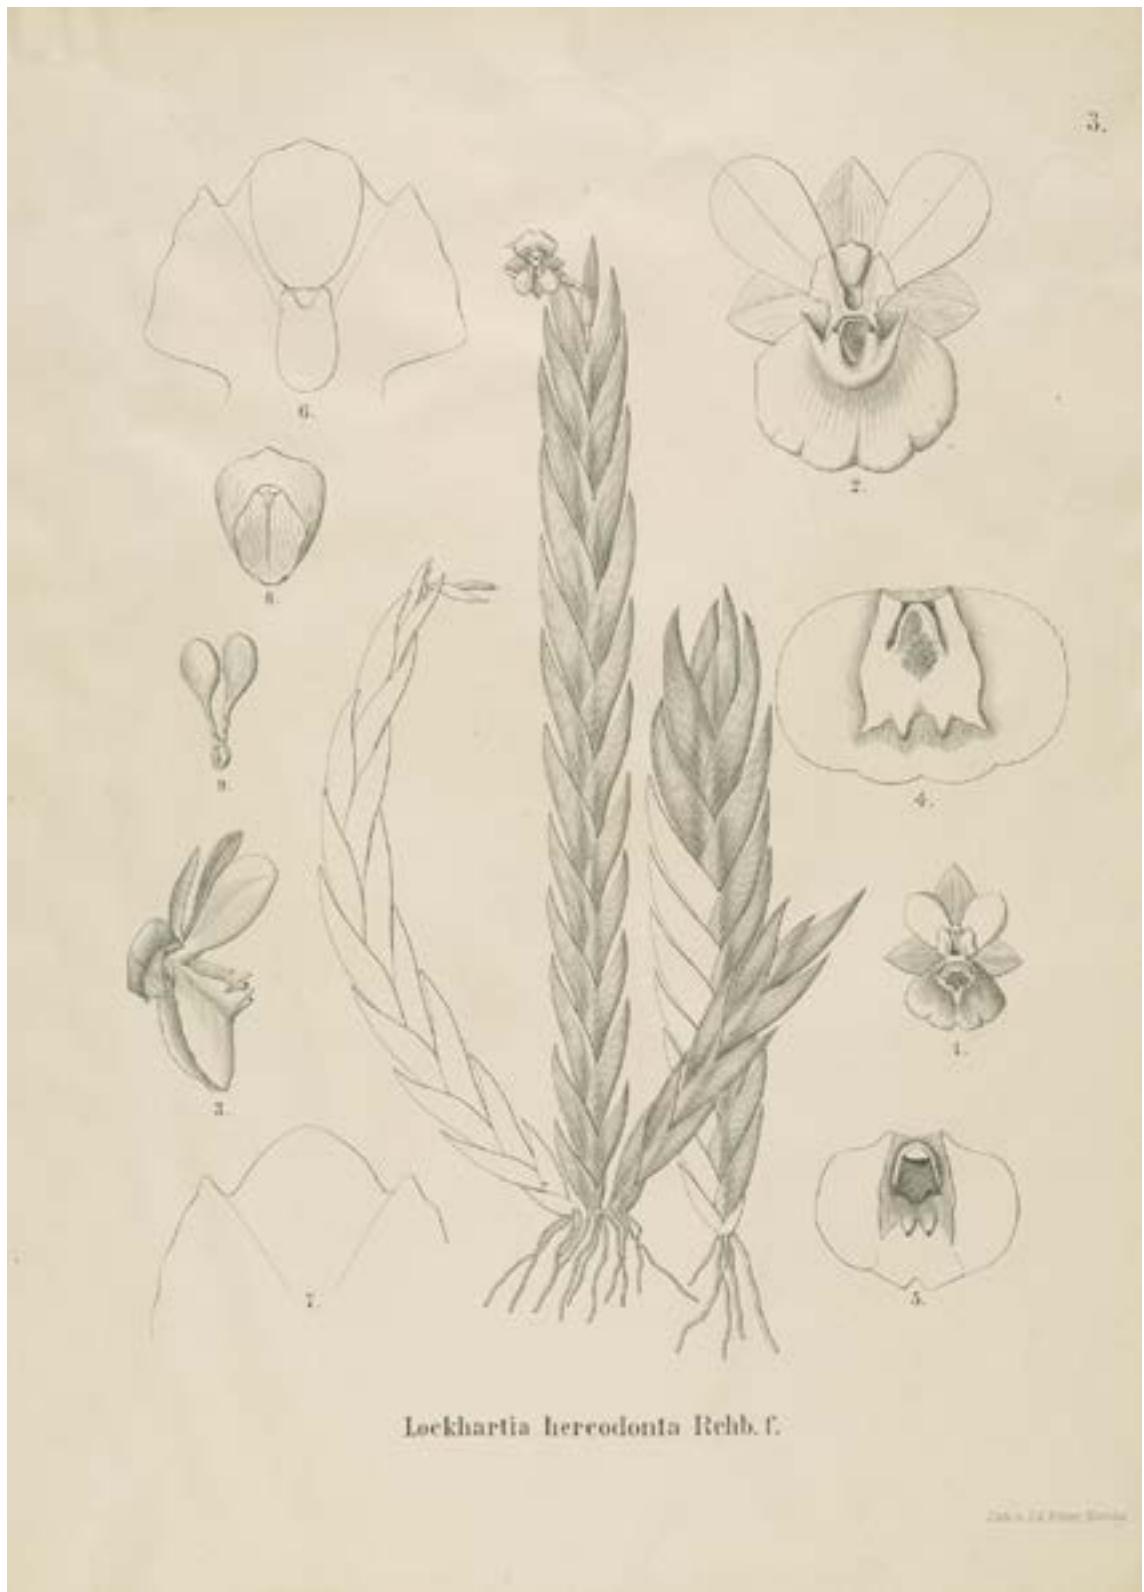

Figure 141. A — *Epidendrum pterocaulon*. Courtesy of the AMO Herbarium. B — *Kefersteinia endresii*. Courtesy of the Natural History Museum, Wien. C — *Lepanthes gracillima*. D — *Lepanthes guardiana* (C, D, Courtesy of the American Orchid Society).

Lockhartia hercodonta Rehb. f.

Zürich, 18. Februar 1886.

Figure 142. Unpublished drawing of *Lockhartia hercodonta*, intended for Reichenbach's *Xenia Orchidacea*, based on a drawing by Endrés. Natural History Museum, Wien.

Cartago: «South of Cartago, beyond the lime kilns of Doña Ana Clara Mayorga, rainy season», ca. 1867, A. R. Endrés s.n. (not located).

Lepanthes selliana Endrés ex Luer, Lindleyana 10(3): 167. 1995.

TYPE: Costa Rica. Without locality, A. R. Endrés s.n. [638, sketch 279, according to the protologue]. Holotype, Endrés' drawings of the plant and flower, W 0019321.

Other Endrés' material: coloured drawing of the flower, «Nº. 638 gen. coll. Orch., Lepanthes N.º 49 / Lepanthes Selliana Endr.» (W 0019319); drawing of the plant and flower flower, «89» (W 0019320).

Lepanthes similis Luer, Lindleyana 11: 64. 1996.

TYPE: Costa Rica. Without locality, ca. 1867, A. R. Endrés s.n. Holotype, Endrés' drawing of the plant, flower and floral dissections, W-Rchb.Orch 1889-30678.

Other Endrés' material: Costa Rica. Without locality, A. R. Endrés s.n. (W 0019333); without locality, A. R. Endrés s.n. (W 1889-29965, W 1889-30674).

Lepanthes umbonifera Endrés ex Luer, Lindleyana 10(3): 167. 1995.

TYPE: Costa Rica. Without locality, A. R. Endrés s.n., figure 67. Holotype, Endrés' drawings of the plant, flower and floral dissections, W 0019300.

Other Endrés' material: drawings of the plant, flower and floral dissections (W 0019417, W 0019415); drawings of the flower, «Lepanthes Nº. 3» (W 0019414); drawing of the flower and floral dissections, «67» (W 0019416).

Lockhartia amoena Endrés & Rchb.f., Gard. Chron. 666. 1872.

TYPE: Costa Rica. "Discovered by Mr. Endres in Costa Rica. Now flowering (March 16) in the Hamburgh Botanic Garden", A. R. Endrés 2527. Holotype, W0010806; isotype, AMES 26060 (barcode 2554947).

Other Endrés' material: Reichenbach's drawing of the type, based on A. R. Endrés 2527 (W 0010807); Costa Rica. Without locality, A. R. Endrés s.n. (W 0019586, W 0019587, W 0019588, W 0019589), W 0019588, W 0019585, W 0019590, W 0019584).

Lockhartia grandibractea Kraenzl., Pflanzenr. IV. 50(Heft 83): 15. 1923.

TYPE: Costa Rica. "Subäquatoriale andine Provinz. Costa Rica", A. R. Endrés s.n. (the holotype, not located).

Other Endrés' material: drawings of the column, pollinarium and anther, A. R. Endrés s.n. (W 0019581); «Cartago», description, A. R. Endrés s.n. (W 0019580).

Lockhartia hercodonta Rchb.f. ex Kraenzl., Pflanzenr. IV. 50(Heft 83): 8, t. 2A. 1923.

TYPE: Costa Rica. "Subäquatoriale andine Provinz. Costa Rica", A. R. Endrés s.n. [Orch. N.º 167]. Holotype, with Reichenbach's sketch of the type and the note «n. sp.», W 0010813; Isotypes, W 0010815, W 0010816, W 0010817, W 0010814. FIG. 142.

Other Endrés' material: drawing of the rostellum and pollinarium, based on A. R. Endrés s.n. [(W 0019575); drawings of the flower and floral dissections, A. R. Endrés s.n. (W 0019576); drawings of the plant, flower and lip, A. R. Endrés s.n. (W 0019577); definitive drawing and engraved copy of the drawing intended for *Xenia Orchidacea*, A. R. Endrés s.n. (W 0019579); plate intended for *Xenia Orchidacea*, with Reichenbach's note «hercodonta», A. R. Endrés s.n. (W 0019578).

Lockhartia odontochila Kraenzl., Pflanzenr. IV. 50(Heft 83): 17. 1923.

TYPE: Costa Rica. "Subäquatoriale andine Provinz. Costa Rica", A. R. Endrés s.n. Holotype, annotated by Kränzlin, 1917, W 1889-58236.

Lycaste dowiana Endrés ex Rchb.f., Gard. Chron., n.s., 2: 194. 1874.

TYPE: Costa Rica. "Lycaste dowiana was discovered in Costa Rica by the late lamented Warscewicz. The flowers, however, were not well preserved [...]. The plant was also found [...] by the late collector Zahn. It is but now, however, that I am able to describe it with full satisfaction, from two good living plants, obtained from Mr. Endres, and beginning to flower in the Hamburg Botanic Garden". Holotype, annotated by Reichenbach, flowers with Endrés drawings of the flower and descriptions, 1868, A. R. Endrés s.n. (W 0019555). Isotypes: W 0019552, W 0019551). FIG. 143.

Other Endrés' material: drawings and descriptions, A. R. Endrés s.n. [Nº 89 of gen. coll. Orch.] (W-Rchb.Orch. 35945 / NMW 0019554); preparatory drawings intended for *Xenia Orchidacea*, based on Endrés' drawings (W 0019556).

Masdevallia anaristella Kraenzl., Repert. Spec. Nov. Regni Veg. 17(19-30): 417-418. 1921.

Syn.: *Barbosella dolichorhiza* Schltr.

TYPE: "Costa Rica. Ohne genaueren Standort", 1867, A. R. Endres s.n. Holotype, W 1889-37485. Isotypes, W 1889-37486, W 1889-37480, AMES 41297.

Masdevallia anura Kraenzl., Repert. Spec. Nov. Regni Veg. 17(19-30): 433-434. 1921.

TYPE: "Costa Rica. Ohne genaueren Standort", A. R. Endrés s.n. [N.º 21 gen. coll. Orch. / «*Masdevallia mucronata*»]. Holotype, W 0019518.

Masdevallia aperta Kraenzl., Repert. Spec. Nov. Regni Veg. 17(19-30): 430-431. 1921.

TYPE: "Costa Rica. Am Río Pascita grande" [«Rio Paquita, above the S. Marcos Bridge / Nov.ber – Dec.ber»], A. R. Endrés s.n. Holotype, W 1889-30752. Isotypes, W 1889-87087, HBG¹⁰, AMES 41994 (with Kränzlin's drawing). FIG. 144.

Other Endrés' material: drawings of the flowered plant and floral details, A. R. Endrés s.n. (W 0021291); «Cuesta from the saw mill of Birris up to the Sitio Ortiz / Aug.t-Dec.ber», «Birris, cuesta leading up to Sitio Ortiz / also near Pejivalle River», A. R. Endrés s.n. (W0021290).

¹⁰ A. C. Christenson [Significant collections of Orchidaceae conserved in Herbarium Hamburgense (HBG). Brittonia 46(4): 344-354. 1994] considers this specimen as the holotype.

Masdevallia carpophora Kraenzl., Repert. Spec. Nov. Regni Veg. 17(19-30): 427. 1921.

TYPE: “Costa Rica. Candelaria, el Río Parrita”, [«Taburcia, Candelaria, Dec.r / also along Rio Parrita / Dota», A. R. Endrés s.n. Holotype, W 0020185.

Masdevallia funebris Endrés ex Kraenzl., Repert. Spec. Nov. Regni Veg. 17: 435. 1921.

Syn.: *Masdevallia reichenbachiana* Endrés ex Rchb.f.

TYPE: “Costa Rica. Ohne genaueren Standort” [«Tablazo. i.s. heights / S.th of Cartago»], A. R. Endrés 501. Holotype, W 0019495, three plants on the left. Isotype, W 1889-0142279.

Other Endrés’ material: Costa Rica. «Birrís», A. R. Endrés 501 (W 0019494); «Masdevallia funebris / (probably just a variety of M. Reichenbachiana)», flowers, A. R. Endrés s.n. (W 1889-0046840; W 1889-0046843); drawing of the flower, floral dissection and description, A. R. Endrés s.n. (W 1889-0046840).

Masdevallia gorgo Rchb.f. ex Kraenzl., Repert. Spec. Nov. Regni Veg. Beih. 34: 136. 1925.
FIG. 145.

TYPE: “Costa Rica: Cartago pr. San Ramon. Fl. Julio et Augusto”, A. R. Endrés 134 [N.º 137 gen. coll. Orch.]. Holotype, W 0019178.

Other Endrés’ material: Costa Rica. A. R. Endrés s.n. (W 0019424); pencil plate of the plant, flower, and floral details, A. R. Endrés s.n. (W 0019184); sketches of flower and floral analysis, with description, A. R. Endrés s.n. (W 0019183).

Masdevallia gracilenta Rchb.f., Gard. Chron., n.s., 4: 98. 1875.

Syn.: *Cryptophoranthus gracilentus* (Rchb.f.) Rolfe; *Zootrophion gracilentum* (Rchb.f.) Luer.

SYNTYPES: “Costa Rica. Flowered in the collection of Messrs. Veitch, as well as in Hamburgh Botanic Garden”. LECTOTYPE, selected by Pupulin *et al.*¹¹: Costa Rica, 1867, with Endrés’ drawing of the flowered plant and Reichenbach’s analysis of the flower A. R. Endrés 73 (W 0018863).

Other Endrés’ material: drawings of the flowered plant and floral dissections, with description, «San Ramon. Camino a S. Carlos. July», A. R. Endrés No. 73 of Gen. Coll. (W 021097). Description, «San R[amón]. Camino a S. Carlos. Potrero Blis & Legua. July», A. R. Endrés No. 73 of Gen. Coll. (W 021331). Drawing of the flower and floral dissections, A. R. Endrés No. 73 (W 021330). Description and drawings, «San R[amón]. Camino a S. Carlos. San Francisco», A. R. Endrés No. 563 of Gen. Coll. (W 0021099).

Masdevallia molossooides Kraenzl., Repert. Spec. Nov. Regni Veg. 17: 416. 1921.

TYPE: “Costa Rica. Ohne genauen Standort in 1200 m ü. D. M.”, «rarissima!, 3500”», 1867, A. R. Endrés s.n. [Orch. N.º 21]. Holotype, with Endrés’ drawing of the flowered plant and Reichenbach’s analysis of the flower, W 0019504. Isotype, W 0019503.

Other Endrés’ material: drawings of the flower and floral dissections, A. R. Endrés s.n. (W 0019501; W 0019500). «Queb.da Verde / March» A. R. Endrés s.n. (W 1889-46750).

Oncidium lintriculus Kraenzl., Pflanzenr. IV. 50(Heft 80): 282. 1922.

Syn: *Oncidium dichromaticum* Rchb.f.

TYPE: “Subäquatoriale andine Provinz. Costa Rica, A. R. Endrés Orch. n. 168. Holotype, W 0013234.

The illustration of the flower of *O. lintriculus* published by Kränzlin²⁰ does not match any of the *Oncidium* species known from Costa Rica, and the type consists of a single fragment of inflorescence with immature flowers. Mora de Retana²¹ suggests a similarity between Kränzlin’s drawing and an immature flower of *O. polycladum*, but the shape of the callus and the large, crenulate column wings prevent such an interpretation. Dalström (correction label, 2002) suggests that this species is the same described by Kränzlin as *Cyrtochilum scaphochilum*²², but in the protologue the author expressly indicated that the country of origin and the collector are unknown (*Heimat und Sammler unbekannt*). Endrés number (168) is however the same affixed to the type of *O. scabripes*, which almost surely correspond to *O. dichromaticum*.

Oncidium macrorhynchum Kraenzl., Pflanzenr. IV. 50(Heft 80): 200. 1922.

Pleurothallis polyliria Endrés & Rchb.f., Gard. Chron. 731. 1872.

Syn: *Pleurothallis gelida* Lindl.

SYNTYPES: “A beautiful specimen at hand is kindly sent by M. Wilson Saundar, Esq., who remarks that the plant is totally cespitose. Quite the same plant [...] is at hand in dried specimens, gathered at Costa Rica by Mr. Endres”. TYPES, not found.

Polycycnis gratiosa Endrés & Rchb.f., Gard. Chron. 1451. 1871.

TYPE: Costa Rica. “It is a very elegant thing, discovered by Mr. Endres in Costa Rica. Last autumn, it flowered in the celebrated collection of Messrs. Veitch”. Holotype, with Reichenbach’s drawings and description, cultivated by Veitch, A. R. Endrés s.n. [136], W 0029866.

Pleurothallis luctuosa R. Br. / var. *N. luctuosa* R. Br.

B. 1878.

8. 1878.

Figure 147. Illustration of *Pleurothallis luctuosa*, from Reichenbach's *Xenia Orchidacea* (1878), based on a plant by Endrés, flowered at Hamburg Botanical Garden.

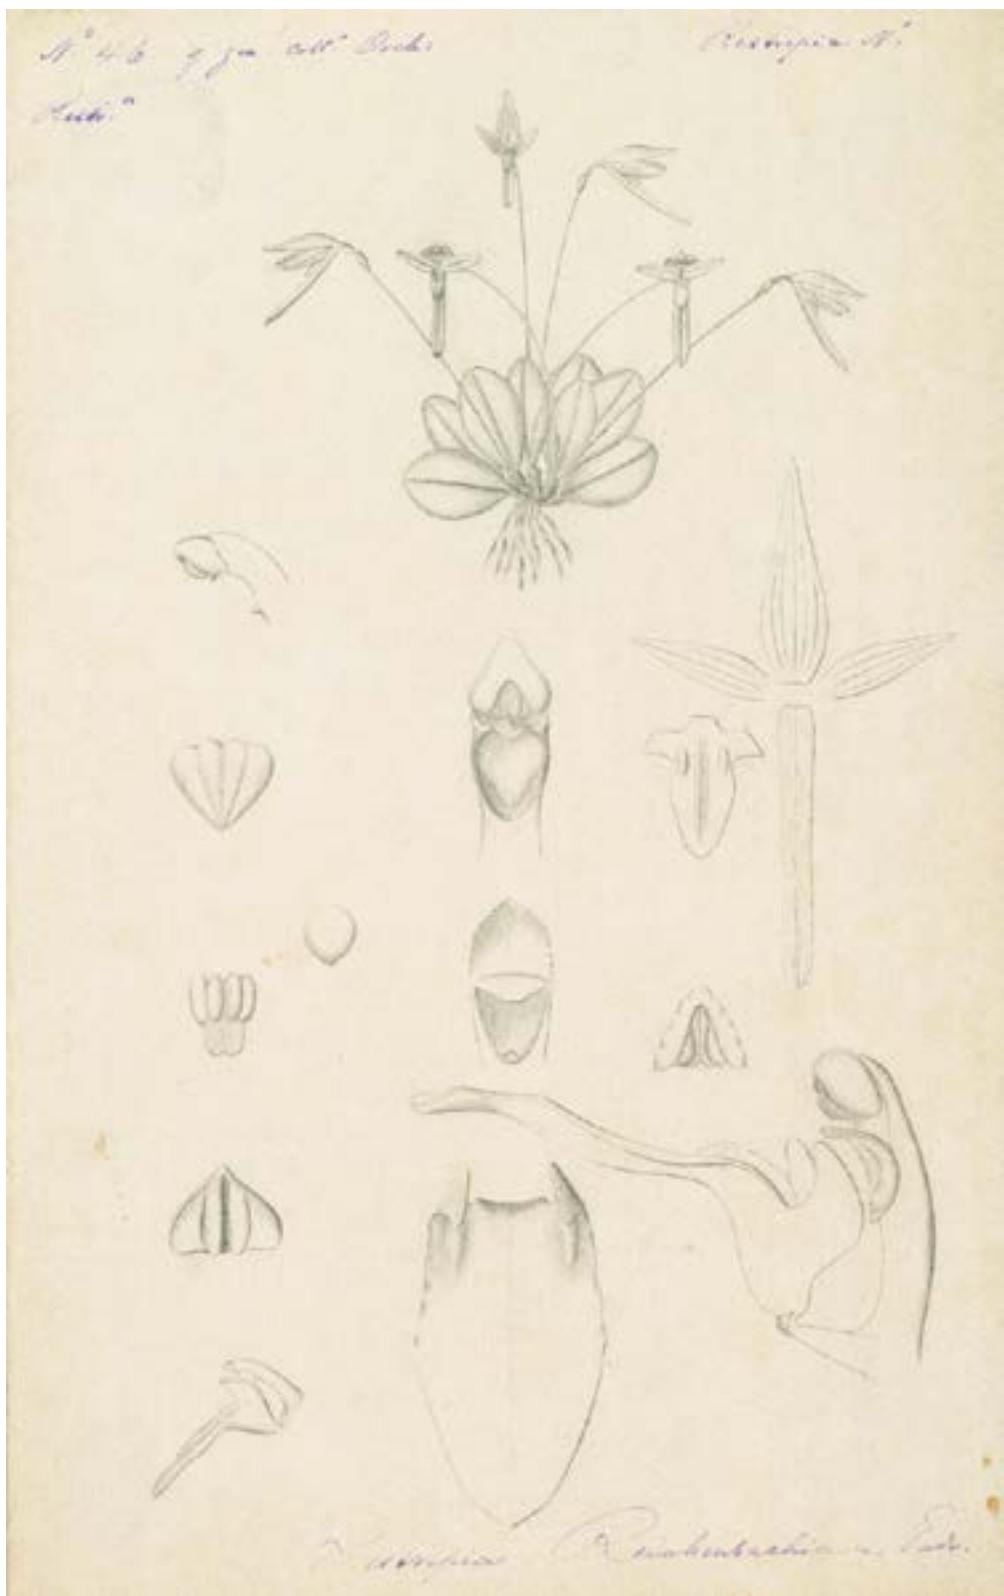

Figure 148. Endrés' sketch of the type plant of *Restrepia reichenbachiana* (W 0020802). Natural History Museum, Wien.

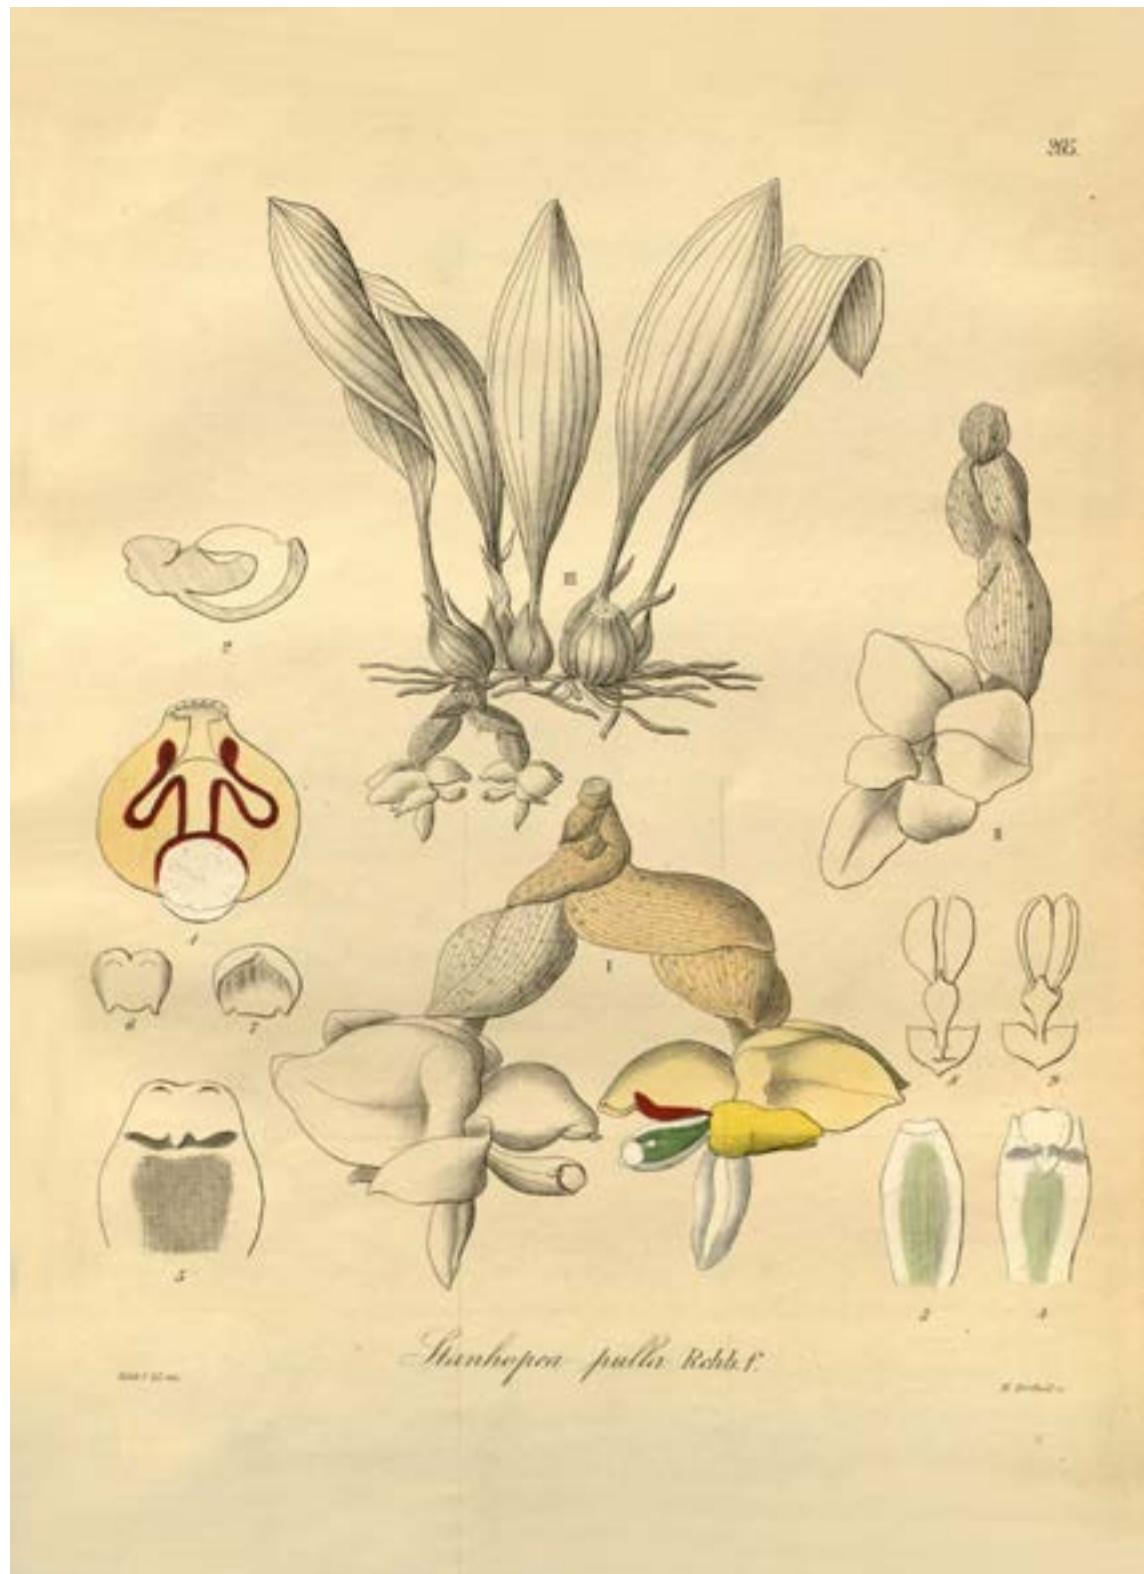

Figure 149. *Stanhopea pulla*. From H. G. Reichenbach & F. Kränzlin. *Xenia Orchidacea* 3: pl. 205. 1900.

I. *Oliviana gregaria* Rchb. f. (*Benthamic Trichopilia*)
II. 5-8 *Trichopilia dasyandra* Rchb. f.

Figure 150. Illustration of *Trichopilia dasyandra*, from Reichenbach's *Xenia Orchidacea* (1883), based on a plant collected by Endrés in Costa Rica.

Other Endrés' material: Costa Rica. Without locality, A. R. *Endrés s.n* [N 2560] (W 0020865); A. R. *Endrés s.n* [135] (W- 0020864).

Polystachya cingulata Rchb.f. ex Kraenzl., Repert. Spec. Nov. Regni Veg. Beih. 39: 81 (1926).

TYPE: Costa Rica. Lectotype, designated by Pupulin *et al.*²⁵, inflorescence: «*cingulata* [Rchb.f.] / *Polystachya* N. 2576. / Endress - [alia manu]»; «*Polystachya cingulata* / Cult. e Costa Rica. / Leg. Endres / Kränzlin 1923», A. R. *Endrés s.n.*, W 002860. ISOLECTOTYPES: four inflorescences: «N. / 2576 / Costa Rica [?] [Rchb.f.] / Endress [alia manu]»; «N. / 2576.»; «*Polystachya luteola* HK ? / Cult. e Costa Rica. / Leg. Endres», A. R. *Endrés s.n.*, W 002862; flowers, «N. / 2576»; «Cult. e Costa Rica. / Leg. Endres», A. R. *Endrés s.n.*, W 0029144; flowers, «N. / 2576»; «Cult. e Costa Rica. / Leg. Endres», A. R. *Endrés s.n.*, W 0029145.

The material upon which Kränzlin based his type of *Polystachya cingulata*, previously annotated by Reichenbach with this intended name, was received from Endrés and cultivated at the Hamburg Botanical Garden. Even though it only includes a single inflorescence, the sheet selected as the lectotype is the only one annotated with the name “*cingulata*” in Reichenbach’s handwriting. No extant material at W bears the indication of “Typus” by Kränzlin. The number “2576” is not a field number by Endrés, but likely a number assigned at Hamburg to the living plant from which the exsiccata were prepared. The name is probably a synonym of *P. caracasana* Rchb. f.

Ponera mesocopis Endrés & Rchb.f., Xenia Orchid. 2: 222, t. 200. 1874.

Syn: *Scaphyglottis mesocopis* (Endrés & Rchb.f.) Benth. & Hook. f. ex Hemsl.

TYPE: Costa Rica. “Diese Art, welche stark an manche Arten der Gattung Hexadesmia erinnert empfing ich von Hern Endres aus Costa Rica”, A. R. *Endrés s.n.* [N.^o 2617]. Holotype, with Reichenbach’s drawings, W 0020735.

Other Endrés’ material: Costa Rica. Without locality, «*Ponera heterocopis* Endr. Rbf.», sketch of the flowered plant, A. R. *Endrés s.n* [714] (W 0020731); «*Hexadesmia heterocopis*», Reichenbach’s sketch of the flower, A. R. *Endrés s.n* [N.^o 714] (W 0020733); A. R. *Endrés s.n* [Orch. N.^o 237] (W 0020738, W 0020739); with Reichenbach’s sketch, «*Ponera cirrhata*», A. R. *Endrés s.n* [Orch. N.^o 337] (W 0020737); sketch of the flower and floral dissection, with description, «*Ponera cirrhata* Endr. Rchb.f.», A. R. *Endrés s.n* [N.^o 337] (W 0020736); A. R. *Endrés s.n* (W 0020734); A. R. *Endrés s.n* [N.^o 2655] (W 0020732).

Restrepia dayana Rchb.f., Gard. Chron., n.s., 4(87): 257. 1875.

Syn: *Restrepia muscifera* (Lindl.) Rchb. f. ex Lindl.

TYPE: “The plant is a discovery of the late M. Endres in Costa Rica, where it grows at an altitude of 3000 feet, but is very scarce”. Holotype, with Reichenbach’s description and

EXCLUDED SPECIES

Aspasia papilionacea Rchb.f., Gard. Chron., n.s., 6: 100. 1876.

TYPE: Costa Rica. “Its discoverer, the late Señor Endres, appears not to have guessed what it was. He sent it with other things without ever mentioning the plant that beats all his Orchidaceous discoveries. He may have obtained it shortly before leaving Costa Rica, and the plant took a long rest before it developed two splendid flowers at once. It may be found with Messrs. Veitch, who got a lot of unnamed things from Señor Endres”, cult *Veitch s.n.* (Holotype, not located; drawing of the type, copy of Reichenbach’s sketches, AMES 24849 – barcode 4747525).

The name is a later synonym of *Aspasia lunata* Lindl. (Edwards’s Bot. Reg. 22: t. 1907. 1836), described on the basis of a plant collected in Brazil by M. Descourtilz. This small small sized, unmistakable epiphyte is only known from Brazil, and the data about the original collection of *A. papilionacea* given by Reichenbach in the protologue were surely based on a mislabeled plant obtained through the nurseries of Veitch.
