Late Dr. Alfonso Neri García Aldrete

IN MEMORIAL OF ALFONSO NERI GARCIA ALDRETE

José Arturo Casasola-González (Instituto de Estudios Ambientales, Universidad de la Sierra Juárez)

Since I was a child I have always been interested in insects and that was the reason that led me to become a biologist, but in the beginning, my knowledge of insects was limited only to the most common groups, that is, to beetles and butterflies, mainly. However, everything changed when Alfonso García Aldrete opened the doors to a world totally unknown to me and it was then that I discovered the fascinating world of psocids. Alfonso was my professor at the university and he gave me General Entomology laboratory classes, one of the courses that I enjoyed the most during my entire stay at the university. Due to the interest that I showed in the classes and the ability I had to dissect and mount insects, he asked me to help him prepare the specimens with which he worked and that is how my professional career began, but it was also the beginning of a great friendship that grew over time.

For me, Alfonso was not only a teacher, he was also an "academic father" who guided me at all times and helped me develop professionally and in my personal life. I always had great respect for him, and despite the camaraderie and trust we had, for me he was always "Dr. Alfonso". I always admired his way of working, he was a methodical and constant man, every day he did several activities, one after the other, he wrote a few lines for a manuscript, dissected a specimen, made an illustration and described some new species, always with great enthusiasm and, although he showed a serious image, he really was a kind and cheerful person, who enjoyed his work, his friendships and especially his family. Another thing that fascinated me was the patience and dedication with which he dissected and prepared the specimens, almost always accompanied by the music of Johann Sebastian Bach, thanks to Alfonso I discovered my taste for ancient and baroque music.

I remember that one of the things that Alfonso enjoyed a lot was traveling and just as he was methodical in the laboratory, he was also methodical in the field work, he made a lot of effort in the search and collection of psocids, but he also took the opportunity to visit the places where he was going. He not only liked to contemplate natural landscapes, he also admired pre-Columbian archaeological remains and colonial baroque art, he was a cultured man. He enjoyed good food, which he always accompanied with a glass of wine or a shot of tequila. He was a great fan of soccer and his favorite team was the "pumas" from UNAM, but he also followed the "tigers" from the Universidad Autónoma de Nuevo León, his alma mater's team.

Alfonso graduated as an Agricultural Engineer from the Monterrey Institute of Technology and Higher Studies, where years later he also obtained a Master's degree in Biological Sciences. He completed his doctorate at Illinois State University, Normal, Illinois, United States, with Professor Edward L. Mockford and upon returning to Mexico, he joined the Institute of Biology of the National Autonomous University of Mexico, where he worked as a prolific researcher. until his last days. His work covers more than 220 publications, 15 book chapters and two books, in addition to being the editor of 6 books. He described more than 36 genera and more than 660 species in 82 genera, mainly from the genera *Lachesilla*, *Triplocania*, *Euplocania* and *Goja*. Although his work focused on the knowledge of the diversity and taxonomy of the Psocoptera of Mexico, he also described species from other countries and in recent years, he dedicated himself to the study of the species from Colombia and Brazil, where he also contributed to the emergence of important research groups led by Dr. Ranulfo González and Dr. José Albertino Rafael.

With Alfonso I shared moments that will remain in my memory forever, his departure leaves a great void in me and although I will always remember him with joy, his absence hurts me a lot. I will always be grateful for the trust he had in me from the beginning and, above all, for the opportunity he gave me to develop professionally as a psocopterologist. However, he still had a lot to teach me and I still had a lot to learn from him. His departure is an unfortunate loss, but his legacy will prevail forever, thank you so much Dr. Alfonso Neri García Aldrete!

ADDITIONS AND CORRECTIONS (PART 22) TO LIENHARD & SMITHERS, 2002: "PSOCOPTERA (INSECTA) – WORLD CATALOGUE AND BIBLIOGRAPHY"

Charles LIENHARD (Geneva Natural History Museum, Switzerland)
E-mail: charleslienhard@bluewin.ch

1. Introduction

This is the 22nd part of a series of "Additions and Corrections to the World Catalogue and Bibliography" (Lienhard & Smithers, 2002) published in "Psocid News". Parts 1-21 were published in Psocid News no. 4-24 (see below); a **Synthesis of Parts 1-10** is given by Lienhard (2016d = Psocid News Special Issue 3), a **Synthesis of Parts 11-20** is given by Lienhard (2021b = Psocid News Special Issue 4), see <http://hdl.handle.net/2115/35519>.

Please send me regularly copies of your papers on Psocoptera, and please inform me about errors that you find in Lienhard & Smithers (2002). If papers which came to your notice are not treated in the "Additions", please send me the bibliographical references by e-mail. In the "Additions to the Bibliography", references to the papers which I have not yet seen are marked with "(Not seen)" or "(Only abstract seen)". Please send me a copy or PDF of these papers if you feel concerned. Only papers which I have seen are analysed for the "Additions to the Catalogue", or those where the matter they deal with is clearly indicated in the title or in the abstract.

In general these "Additions" present the information in the style of the catalogue (Lienhard & Smithers, 2002), according to the criteria mentioned there (pp. ix-xli) and using the same abbreviations (pp. xl-xli). For each family, newly published changes concerning supra-generic taxa are mentioned at the beginning of the family treatment. For genus-group names and species-group names already listed by Lienhard & Smithers (2002) only the author is cited here. For new names the complete reference (author, year, page) is given in their first entry, where new genus-group names are marked with two asterisks (**) and new species-group names with one asterisk (*). For a name not listed by Lienhard & Smithers (2002), but cited in a preceding part of the "Additions", author and year are always mentioned. Genera are listed alphabetically within each family. Species are listed alphabetically within each genus. Species names are cited in the combination used by Lienhard & Smithers (2002), if not an explicit change of combination (or a new synonymy) has been published since.

The "Corrections to Lienhard & Smithers, 2002" refer to the pages of Lienhard & Smithers (2002) and the changes proposed are usually underlined.

No nomenclatural act is published in the "Additions to the Catalogue" because articles in "Psocid News" are not considered as published works under the rules of ICZN (see Editorial: Disclaimer). Sometimes recommendations to future revisers are given concerning nomenclatural acts which eventually should be published. Only some mandatory changes are made in the "Additions to the Catalogue" (e. g. adaptation of species name ending to the grammatical gender of the genus name).

2. List of countries mentioned in the "Additions and Corrections to the World Catalogue" (Parts 1-22)

Country checklists of Psocoptera species extracted from Lienhard & Smithers (2002) are given by Lienhard (2016b = Psocid News Special Issue 1).

All additional species records are mentioned in the "Additions and Corrections to the World Catalogue" and all countries mentioned in Parts 1 to 22 of these Additions are listed below, arranged according to the main geographical regions defined for the Catalogue (**I-X**), with a separate heading for fossils (**A**), mainly from amber. This list is provided to facilitate computer searching for distributional references in the online version of the different parts (see Psocid News no. 4-25) or in the **Synthesis of Parts 1-10** given by Lienhard (2016d = Psocid News Special Issue 3) and the **Synthesis of Parts 11-20** given by Lienhard (2021b = Psocid News Special Issue 4) which all can be found at <http://hdl.handle.net/2115/35519>.

4. Additions to the Bibliography

NOTE: Complete bibliographical references to publications cited in the present paper, which are not listed here, can be found in the World Bibliography (Lienhard & Smithers, 2002: 493-664) or in Parts 1 to 21 of the "Additions"; see also **Synthesis of Parts 1-10** (Lienhard, 2016d = Psocid News Special Issue 3) and **Synthesis of Parts 11-20** (Lienhard, 2021b = Psocid News Special Issue 4).

Remarks: Papers with two authors are listed in alphabetical order of second authors after the chronological list of papers with the first author as unique author. Papers with more than two authors (i. e. "first author *et al.*"-papers) are listed chronologically after the two-author papers. References to papers published in the same year are distinguished by suffix-letters added to the publication year. No cross-references to co-authors or editors are given.
