				Brand	Nero
				Model	2014
			Other	Description	Nero 2014 makes it easy to achieve pro-looking results with numerous video effects, transition effects and titles. Simply use the pre-defined drag and drop effects and the easy to handle FX window to apply effects to single clips or your whole project. The unique Picture-in-Picture effect generator lets you select Picture-in-Picture templates and you can simply drag the wanted overlay clips into your project. Go one step further and fully customize your effects in advanced editing. Pro-results with ease of use guaranteed. The Nero 2014 launcher provides a categorized view of your projects and now makes it even easier to find the right application for your specific needs. Additionally, applications have task oriented home screens that guide you from job to job. Make use of convenient drop zones to drag and drop your media. The project will start automatically. Nero Suite has never been user-friendlier. Burn your personal music compilation in high quality MP3 Pro, lossless FLAC and other formats, to CD, or DVD, also create high quality standard Audio-CDs. So why limit your iTunes playlists and MP3 files to your iPod or PC? Just burn your jams to discs for easy listening in your car or on a CD/DVD player at home.

	Overview	<p>Product id: 32348383 Description: Dell PowerEdge R730 - Server - rack-mountable - 2U - 2-way - 1 x Xeon E5-2640V4 / 2.4 GHz - RAM 32 GB - SAS - hot-swap 2.5 - SSD 2 x 120 GB - G200eR2 - GigE - no OS - Monitor : none Mfr Part #: 463-7663 MSRP: \$3,599.00 Adapt to virtually any workload with a scalable server featuring an optimal mix of memory, storage, processing and GPUs. The incredible versatility of the PowerEdge R730 server delivers outstanding functionality in just 2U of rack space. With the combination of powerful processors, large memory, fast storage options and GPU accelerator support, the R730 performs exceptionally well in a number of demanding environments. Key Points Tackle almost any workload Virtualization and cloud applications VDI and HPC Product Features Tackle almost any workload The incredible versatility of the PowerEdge R730 server delivers outstanding functionality in just 2U of rack space. With the combination of powerful processors, large memory, fast storage options and GPU accelerator support, the R730 performs exceptionally well in a number of demanding environments. Virtualization and cloud applications With the powerful processor E5-2600 v3 product family and up to 24 DIMMs of DDR4 RAM, the R730 has the processing cycles and threads and large memory footprint necessary to deliver more, larger and higher-performing virtual machines for data centers and cloud platforms. Highly scalable storage, with up to sixteen 12Gb SAS drives and the high-performance 12Gb PowerEdge RAID Controller (PERC9), can greatly accelerate data access for your virtualized environment. In addition, the R730 can take advantage of optional Dell Fluid Cache for SAN and SanDisk DAS Cache application acceleration technology for even faster data access. VDI and HPC The option for up to two 300W dual-width accelerators/GPUs supports environments that require processing acceleration, including graphics-intensive virtual desktop infrastructure (VDI) implementations, such as CAD/CAM and other research and development applications. Seven PCIe Gen3 expansion slots plus a dedicated slot for a RAID controller further enhance IO flexibility to help make the R730 an ideal compute node for IT as a service (XaaS) providers as well as high-performance computing (HPC) and medical-imaging solutions.</p>
