

Order ACIPENSERIFORMES

Sturgeons

Family ACIPENSERIDAE¹

Bonaparte 1831

Acipenser transmontanus. From: Richardson, J. 1836. The Fish. In: Fauna Boreali-Americana; or the zoology of the northern parts of British America: containing descriptions of the objects of natural history collected on the late northern land expeditions, under the command of Sir John Franklin, R.N. J. Bentley, London. Part 3: i-xv + 1–327, Pls. 74–97.

Acipenser Linnaeus 1758

Latin for sturgeon, with at least three published explanations of its derivation: (1) derived from the Greek *akkipesios* (ἀκκίπησιος) and perhaps equivalent to the Egyptian *xipen-pennu*;² (2) combination of the Greek *akis*, point, and *pente*, five, presumably referring to five rows of sharp scutes on body;³ (3) from the Latin *acus*, needle, and *pensum*, weight (a quantity of wool given to handmaids to be woven or spun daily), i.e., a fish that “possesses a weight of needles,” referring to the “needle-shaped barbels” that hang down from its mouth⁴

***Acipenser baerii* Brandt 1869** patronym not identified but probably in honor of Karl Ernst von Baer (1792–1876), Baltic-German scientist and explorer, considered the father of embryology

***Acipenser baerii baicalensis* Nikolskii 1896** *-ensis*, Latin suffix denoting place: Lake Baikal, Siberia, type locality

***Acipenser baerii stenorrhynchus* Nikolskii 1896** narrow-snouted, from *sténos* (Gr. στένος), narrow, and *rhýnchos* (Gr. ῥύγχος), snout, referring to pointed snout compared with blunt snout of *A. b. baerii*

***Acipenser brevirostrum* Lesueur 1818** *brevis* (L.), short; *rostrum* (L.), snout, referring to shorter snout compared with *A. oxyrinchus*

***Acipenser colchicus* Marti 1940** *-icus* (L.), belonging to: Colchis, ancient name for eastern coast of Black Sea in Eurasian Georgia, type locality

***Acipenser dabryanus* Duméril 1869** *-anus* (L.), belonging to: Claude-Philibert Dabry de Thiersant (1826–1898), fish culturist, French counsel to China, and student of Chinese fishes, who collected holotype

***Acipenser desotoi* Vladikov 1955** in honor of Hernando (misspelled Fernando) de Soto (ca. 1496–1542), Spanish conquistador who explored the Gulf of Mexico (where this sturgeon occurs) and was first European to see the Mississippi River

***Acipenser fulvescens* Rafinesque 1817** Latin for yellowish or tawny, referring to its “dark fulvus color”

¹ Some authorities recognize up to four sturgeon subfamilies (Acipenserinae, Scaphirhynchinae, Pseudoscaphirhynchinae, Husinae), but relationships remain unresolved; see, e.g., Hilton, E. J., L. Grande and W. E. Bemis. 2011. Skeletal anatomy of the shortnose sturgeon, *Acipenser brevirostrum* Lesueur, 1818, and the systematics of sturgeons (Acipenseriformes, Acipenseridae). Fieldiana Life and Earth Sciences No. 3: i–vi + 1–168.

² Thompson, D. W. 1947. A glossary of Greek fishes. London: Oxford University Press. vi + 302 pp. Thompson did not explain why sturgeons, which do not occur near Egypt, would have an Egyptian name.

³ Kirsch, P. H. and M. W. Fordice. A review of the American species of sturgeons (Acipenseridae). Proceedings of the Academy of Natural Sciences of Philadelphia 41: 245–257.

⁴ Guasparri, A. 2002. *Acipenser*. Glotta 76 (1/2): 50–52.

***Acipenser gueldenstaedtii* Brandt & Ratzeburg 1833** in honor of Johann Anton Güldenstädt (1745–1781), Baltic German naturalist and explorer, who identified this sturgeon in 1772 but used a non-Linnaean name (Sturio)

***Acipenser medirostris* Ayres 1854** *media* (L.), moderate or middle; *rostris*, Neo-Latin scientific adjective of *rostrum* (L.), snout, referring to snout length compared with specimens of *A. transmontanus* that Ayres examined, all from San Francisco Bay, California, USA

***Acipenser mikadoi* Hilgendorf 1892** patronym not identified, possibly in honor of the “mikado” or emperor of Japan, then Emperor Meiji, who reigned from 1867 to 1912 (Hilgendorf lectured at Tokyo College of Medicine from 1873–1876 and described this sturgeon from one he saw at a fish market)

***Acipenser naccarii* Bonaparte 1836** in honor of Italian botanist Fortunato Luigi Naccari (1793–1860)

***Acipenser nudiventris* Lovetsky 1828** *nudus* (L.), bare or naked; *ventris*, genitive of *venter* (L.), belly, referring to seeming absence of ventral scutes, which are totally absorbed in large adults

***Acipenser oxyrinchus* Mitchell 1815** sharp-snouted, from *oxýs* (Gr. ὀξύς), sharp or pointed, and *rhýnchos* (Gr. ῥύγχος), snout, referring to its sharply V-shaped snouts

***Acipenser persicus* Borodin 1897** *-ica* (L.), belonging to: Persia, i.e., Persian, referring to Caspian Sea, Iran, type locality

***Acipenser ruthenus* Linnaeus 1758** *-us* (L.), adjectival suffix: from Ruthe-
nia, historic name for Central and Eastern Europe, probably referring to its distribution

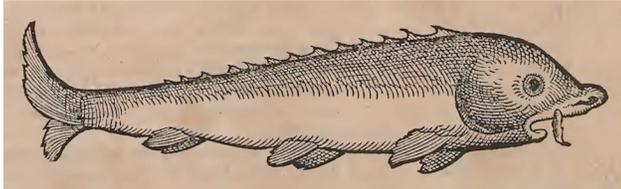

***Acipenser ruthenus marsiglii* Brandt 1833** in honor of Italian soldier and naturalist Luigi Ferdinando Marsigli (1658–1730), who identified this sturgeon in 1726 but used a pre-Linnaean name (*Antaceus glaber*)

***Acipenser schrenckii* Brandt 1869** patronym not identified but almost certainly in honor of Leopold von Schrenck (1826–1894), Baltic German zoologist, geographer and ethnographer

***Acipenser sinensis* Gray 1835** *-ensis*, Latin suffix denoting place: Sinica (China), referring to its occurrence in the Yangtze and Pearl River basins

***Acipenser stellatus* Pallas 1771** Latin for studded with stars, referring to stellated marks and tubercles on head

***Acipenser sturio* Linnaeus 1758** Medieval Latin for sturgeon

Huso, "as the Germans call it" (translation), from one of the accounts Ardeï, and then Linnaeus, used in the description of *Huso huso*: Gesner, C. 1604. *Historiæ animalium*. Liber IV. Qui est de piscium & aquatiliū animantium natura. Cambieri, Francofurti. 1052 + 38 pp.

***Acipenser transmontanus* Richardson 1836** *trans* (L.), over or beyond; *montanus* (L.), pertaining to mountains, referring to its occurrence on the western side of North America's Continental Divide, the first sturgeon described from the Eastern Pacific

Huso

Brandt & Ratzeburg 1833

Medieval Latin and Old High German word for sturgeon (tautonymous with *Acipenser huso* Linnaeus 1758)

***Huso dauricus* (Georgi 1775) -icus** (L.), belonging to: Daourie, Russian name for area of central Asia southeast of Lake Baikal to about 120° E, roughly the range of this sturgeon in the Amur River basin of Russia and China

***Huso huso* (Linnaeus 1758)** Medieval Latin and Old High German word for sturgeon

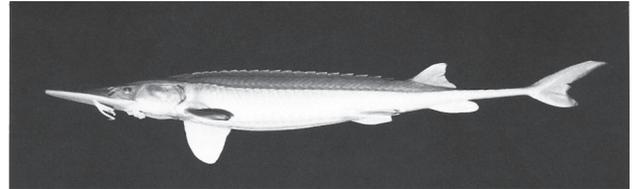

Pseudoscaphirhynchus

Nikolskii 1900

pseudo-, from *pseudēs* (Gr. ψεύδης), false, although this genus may superficially resemble *Scaphirhynchus*, with all three species having previously been assigned to it, such an appearance is false

***Pseudoscaphirhynchus fedtschenkoï* (Kessler 1872)** in honor of Russian naturalist and explorer Alexei Pavlovich Fedtschenko (1844–1873), who collected holotype

***Pseudoscaphirhynchus hermanni* (Kessler 1877)** in honor of Hermann

Scaphirhynchus suttkusi, holotype, male, 552 mm SL. From: Williams, J. D. and G. H. Clemmer. 1991. *Scaphirhynchus suttkusi*, a new sturgeon (Pisces: Acipenseridae) from the Mobile basin of Alabama and Mississippi. Alabama Museum of Natural History Bulletin No. 10: 17–31.

(forename not given), a ship officer (presumably on the Aralo-Caspian Expedition), who delivered sturgeon to zoologist and explorer Nikolai Severtsov (1827–1885), who coined the name in a presumably unpublished paper

***Pseudoscaphirhynchus kaufmanni* (Kessler 1877)** in honor of "Lord" Kaufman for the "professional help" (translation) he gave zoologist Modest Nikolaevich Bogdanov, who named this sturgeon in 1874 but did not provide distinguishing features; "Lord" Kaufman is almost certainly Konstantin Petrovich von Kaufmann (1818–1882, also spelled Kaufman), first Governor-General of Turkestan, who commissioned the scientific exploration of the land after it became part of the Russian Empire in the 1860s

Scaphirhynchus

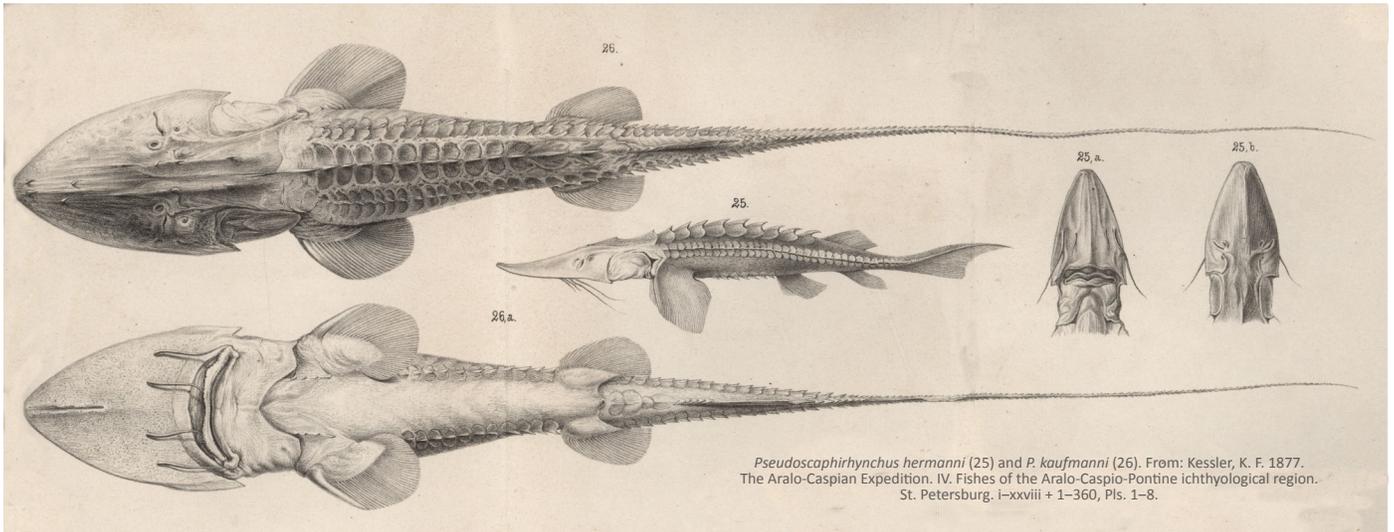

Heckel 1836

skaphis (Gr. σκαφίς), shovel; *rhynchos* (Gr. ῥύγχος), snout, referring to flat, shovel-shaped snout of *S. rafinesquii* (= *platorynchus*)

***Scaphirhynchus albus* (Forbes & Richardson 1905)** Latin for white, referring to its pallid coloration

***Scaphirhynchus platorynchus* (Rafinesque 1820)** flat-snouted, from *platys* (Gr. πλατύς), flat, and *rhynchos* (Gr. ῥύγχος), snout, referring to its head (including snout) "flattened somewhat like a spade"

***Scaphirhynchus suttkusi* Williams & Clemmer 1991** in honor of Royal D. Suttkus (1929–2009), Tulane University (New Orleans, Louisiana, USA), for his "longstanding dedication" to ichthyology

Pseudoscaphirhynchus hermanni (25) and *P. kaufmanni* (26). From: Kessler, K. F. 1877. The Aralo-Caspian Expedition. IV. Fishes of the Aralo-Caspio-Pontine ichthyological region. St. Petersburg. i–xxviii + 1–360, Pls. 1–8.
