aboutASUS

ASUS is a worldwide top-three consumer notebook vendor and maker of the world's best-selling, most award-winning, motherboards. A leading enterprise in the new digital era, ASUS designs and manufactures products that perfectly meet the needs of today's digital home and office, with a broad portfolio that includes motherboards, graphics cards, optical drives, displays, desktop and all-in-one PCs, notebooks, netbooks, servers, multimedia devices, wireless solutions, networking devices, tablets and smartphones.

Driven by innovation and committed to quality, ASUS won 4,168 awards in 2012 and is widely credited with revolutionising the PC industry with its Eee PC™. ASUS has more than 12,500 employees around the globe with a world-class R&D team of 3,800 engineers. Company revenue for 2012 was approximately US\$14 billion.

ASUS is the Top 2 Consumer Notebook Brand in the World

According to the latest IDC report (2012 Q4), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- The Top 1 consumer notebook brand in South East Asia
- The Top 1 notebook brand in Central and Eastern Europe
- The Top 2 notebook brand in China
- The Top 2 notebook brand in Western Europe
- The Top 3 Android Tablet Brand in the World

ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989
 - One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard
- The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS' notebooks have the best quality and are reliable.

ASUS received 4,168 awards in 2012

A testament to your commitment to innovation, design and quality, ASUS garnered a total of 4,168 awards from prestigious technology organisations and IT journalists worldwide.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The World's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS is No.1 in Quality and Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the Wall Street Journal Asia.

Marks in History: ASUS Notebooks

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

Zero defects during 600 days in space!

Two ASUS notebooks were selected by R&K, a major computer and electronics supplier to the aerospace industry, to provide astronauts with dependable computing hardware.

"ASUS notebooks never overheat like those made by other companies," said Sergei Avdeev, one of the Russian cosmonauts. "Thermal flow in space and on Earth is completely different. Only notebooks with the best cooling can survive continuous operation. We used our ASUS notebooks all day without a problem."

In the air

Helping the NRMA CareFlight helicopter rescue unit save lives.

NRMA CareFlight, an emergency medical and rescue helicopter unit serving New South Wales in Australia, uses ASUS notebooks in different fields, including aviation, medical treatment, and administration. ASUS notebooks play a critical role in CareFlight improving survival rates in severe head trauma incidents. They help medical teams arrive on-site faster than ambulances, with fatalities lowered by 33%.

"All our pilots are very impressed with ASUS notebooks and amazed at their ability to withstand aircraft vibration," said Mark Lees, Community Relations Manager of CareFlight. "We are ready to install ASUS notebooks in all our aircrafts and link them to onboard navigation computers."

On the road

Flawless performance during grueling off-road racing.

ASUS notebooks performed critical tasks at the PATAGONIA 2000 race, which saw them used in hote deserts and snow-covered mountains. They acted as navigation devices, exceling due to their built-in GPS functionality and dynamic map displays. They were also mobile communication centers, enabling email and video conferencing.

"Needless to say, ASUS computers survived the severe conditions of this strenuous voyage without a single flaw," said race organiser Aviv Shweky.

At the ends of the earth

Conquering Antarctica.

Perfect performance records in freezing temperatures at the South Pole have been achieved. A December 2003 expedition that included acclaimed mountaineers Shi Wang and Jian Liu set out to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet, where temperatures drop below -100°F. Wang and Liu brought ASUS S200N notebooks to record and share their experiences.

On the world's highest peak

First notebooks to scale Mount Everest.

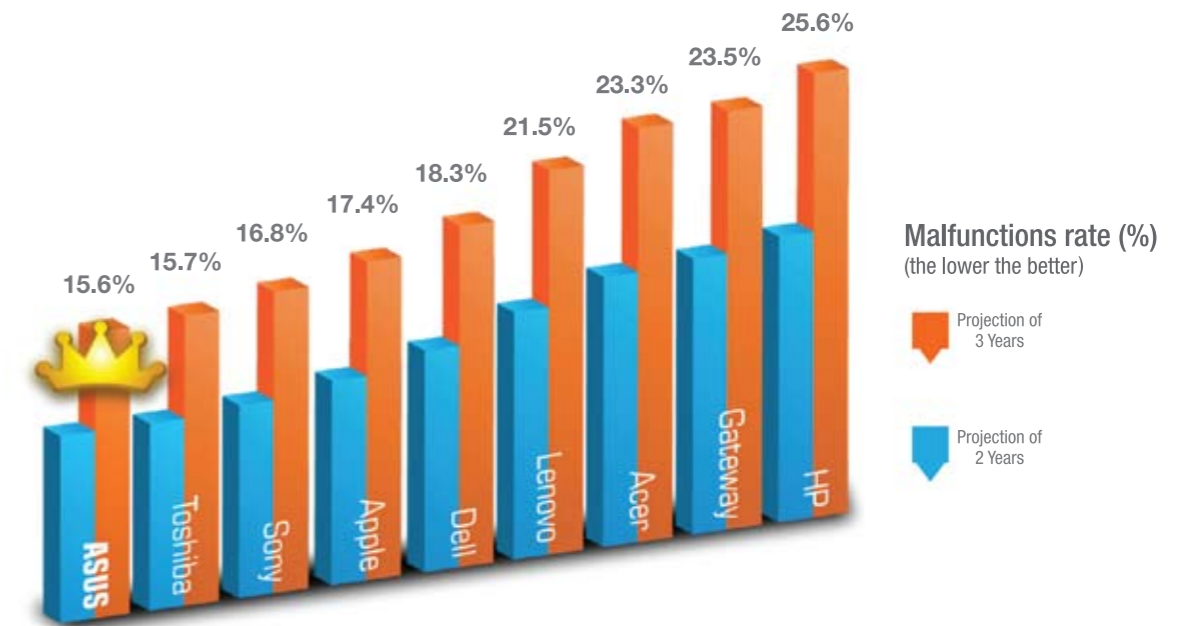

Conditions at the world's tallest mountain may faze other notebooks, but several ASUS models, including the US/56 leather and bamboo editions, W7 and U1 were chosen to accompany an expedition to the top of Mount Everest, know locally as Qomolangma. Upon reaching base camp at 500m, only ASUS notebooks continued to operate. Other notebooks failed to boot due to extremely low ambient temperatures. The US even made it to the peak at a height of 8848m, with expedition leader Captain Wang Yongfong carrying it as a tribute to eco-friendly technology and making ASUS the world's first notebooks at the top of Mount Everest.

Survey of 30,000 Laptops Lists ASUS as Top in Reliability Rankings

SquareTrade, the largest independent warranty service provider in the United States, published a report that analyzed the failure rates of over 30,000 new laptop computers manufactured by the leading nine notebook brands over the past 3 years. A minimum of 1,000 notebooks from each brand were sampled.

With three year malfunction rates under 16%, laptops from ASUS are nearly 40% more reliable than HP, the worst performer in this study. HP, the industry leader, which shipped nearly 16 million laptops in the past year according to IDC, ranked dead last in this reliability study with over one-fourth of laptops expected to malfunction in three years. Gateway and Acer, the no. 2 maker of laptops, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (pg 6).

Extreme Test Ensure Top-Quality Notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

Keyboard Test

ASUS tests the keyboard to check the comfort and durability, especially on keys that are more frequently used.

Abrasive Test

Abrasive resistance test subjects the exteriors of ASUS notebooks to friction, making sure that the colors and surface materials stay at prime conditions even after extensive and demanding use.

Noise Test

ASUS notebooks undergo meticulous noise testing to help promote a quiet and pleasant computing environment for consumers. Noise mitigation, quiet cooling and component seals are all put to test in this set of trials.

Pressure Test

Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests, and ASUS commercial panel pressure tests exceeds the requirements of normal notebook standards by 20%.

Hinge Test

Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness. ASUS Commercial Series notebooks exceed industry standards in this area as well.

Vibration Test

Vibration test puts the notebooks on multiple frequency vibrations to ensure that the frame construction outside and the inside of the notebooks are always attached securely.

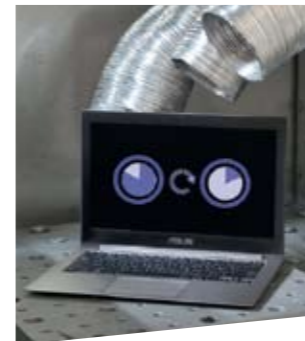

Shock Test

Notebooks are likely to experience shocks during shipping and day-to-day use. This is why ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

Spin Test

Most of the notebook covers can be opened with one hand and this means that the screen has to be flexible. Spin tests are carried out to measure how well the lid is able to protect the notebook by testing it with a twist on the overall framework to an extreme degree.

High Acceleration Test

HALT test (Highly Accelerated Life Test) tests notebooks in high speed stimulations to simulate the movement of a mobile notebook, with an extensive analysis of our engineers to reduce the problems that may occur during transportation.

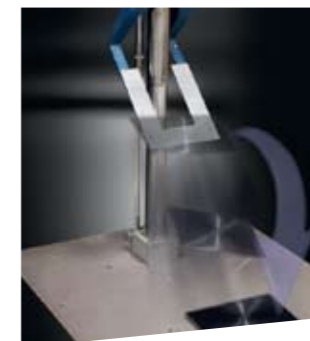

Port Test

Each port is tested to ensure that it remains strong and solid despite the continuous plug and unplug actions.

Temperature Test

Each ASUS notebook went through many trials to be able to continue to operate in diverse climates. One of the tests is to stimulate an environment of high humidity and low, and also in extreme temperature conditions. Each weak point in the material and framework is strengthened. This is the reason ASUS notebooks have high durability.

Fall Test

A dropped notebook shouldn't mean a broken notebook and ASUS puts its notebooks through a series of drop tests to measure how well they cope with life's little accidents. ASUS commercial notebooks surpass industry standards at more than double the drop height.

ASUS received 4,168 awards in 2012

A testament to our relentless innovation and the results of years of research in design and manufacturing techniques, ASUS garnered a total of 4,168 awards from prestigious technology organisations and IT journalists worldwide. This can only be achieved by a company with vision and mission to pursue the best innovation.

Of all the awards received, tablets and smartphones totalled to 789, a proof of ASUS' commitment to innovation, design and quality.

iF Design Awards
ASUS products have won numerous international industrial design awards and have once again demonstrated their outstanding design quality and innovation by taking home no less than 10 accolades at the iF Design Awards 2012.

Innovation International CES Awards
Six ASUS products have been selected for the CES 2012 Innovations Design and Engineering Awards honoree program. The awards have become a hallmark for the best-designed products in consumer technology and our brand promise of Inspiring Innovation - Persistent Perfection has resulted in such wide recognition for our products.

ASUS TAICHI™

The Incredible Fusion of Notebook and Tablet

Combining a Notebook and a Tablet

The ASUS TAICHI™ is an incredible combination of notebook and tablet whose double-sided Full HD IPS display switches seamlessly between modes at a touch. Lid open, TAICHI™ is a notebook with a full-size backlit keyboard. Lid is closed, TAICHI™ instantly transforms into a multi-touch tablet. Both TAICHI™ screens work independently and simultaneously too, so people can share its powerful Intel® Core™ i7 processor, astonishing SonicMaster audio co-developed with Bang & Olufsen ICEpower®, dual HD camera and array microphones.

ENHANCED PRODUCTIVITY

One-Finger Mode Switching

Want to switch from your laptop mode to tablet mode? Just use one finger to close the lid of TAICHI. Instantly it transforms from a laptop into a tablet interface. It's that simple.

TAICHI Stylus

Use TAICHI Stylus to sketch or to write notes in Tablet or Extend mode. Expand the scope of work achievable with ASUS TAICHI and its Stylus. Now you can enhance your productivity regardless of the nature of tasks with TAICHI.

TAICHI™ SHARING : 4 Display Modes

It's a notebook. It's a tablet. More than that, the unique function of TAICHI which enables you to switch to 4 different display modes gives you the unparalleled flexibility of sharing with your boss, colleagues to friends and family, giving you your desired privacy with the 4 different modes.

Lift the lid with one smooth motion and TAICHI becomes a fully featured notebook. The Full HD 11.6" screen features IPS technology for a vibrant image with wide viewing angles. The backlit keyboard with ambient light control and large multi-touch touchpad make light of productivity tasks too.

NOTEBOOK MODE

Close the lid and TAICHI instantly becomes a tablet. 10-point multi-touch Full HD screen gives complete fingertip control and the supplied stylus works just like a pen on paper for accurate handwritten notes and sketches, plus IPS technology keeps the image bright and clear. Built-in motion sensors also make TAICHI the ideal for mobile gaming.

TABLET MODE

Only TAICHI gives you 2 display screens with its Mirror mode. With the lid open and Mirror mode enabled, the 2 screens are able to display the same image which makes TAICHI perfect for sharing your favourite movie or software demonstration. IPS display technology ensures a bright, vibrant image with wide viewing angles on both screens too.

MIRROR MODE

In Extend mode, TAICHI is no longer one computer - it's two. When enabled, the 2 screens can be used by 2 people at once, as a notebook as well as a tablet. Extend mode is ideal for presentations and the supplied Screen Share app lets the presenter see the script on one screen while the audience views the slides on the other.

EXTEND MODE

INCREDIBLE BEAUTY

Dual High-Definition Display Screens

The ASUS TAICHI™ gives a spectacular high-definition view with apps, games and movies thanks to two 1080p Full HD displays. IPS technology ensures a brilliant image with accurate colours and crisp contrast, while the 178° wide viewing angle keeps each screen crystal-clear even when seen from the side. TAICHI can capture incredible images too, thanks to HD camera in both notebook and tablet modes.

[3mm / 9mm / 1.25kg]

Thin and Light

Even with two screens, ASUS TAICHI is able to maintain its sleekness with a front profile of 3mm and rear profile of 16.5mm. Besides that, the 1.25kg light weight adds to the ease of mobility.

TAICHI Exterior Interface

Use TAICHI as a tablet with the lid closed, or utilize TAICHI's Mirror or Extend modes for sharing your content.

TAICHI Interior Interface

Use TAICHI as a fully featured notebook with the lid opened.

INCREDIBLE AUDIO & VISUAL

Premum Full HD Ultrabooks

Full HD Ultrabooks with Style and Quality

The world's most advanced Ultrabook. With the same razor-thin design, powerful 3rd generation Intel® Core™ i7 processor, ASUS ZENBOOK™ is a perfect balance of style and performance.

SonicMaster audio ensures amazing sound quality too, while the Full HD multi-touch display uses IPS technology for a brilliant image with rich colours that looks incredible from every angle.

INCREDIBLE BEAUTY

1080P

Premium Full HD IPS panel boosts display details

ASUS ZENBOOKs with Full HD 1080p display screens showcases pixel-perfect vivid images on IPS panels. With 178° viewing angles, now you can have great views from almost any direction at nearly twice the angles of other ultrabooks. The Full HD screens also boost colour gamut to 72% and contrast to a bright 800:1, which are double of the capabilities of the display screens of other ultrabooks.

Ultra Slim & Light

With a slim profile of 3-9mm and ultra light weight of 1.3kg, ASUS ZENBOOKs is the ultimate embodiment of beauty that enhances your ease of mobility. You can just carry it along with you just about everywhere.

INCREDIBLE AUDIO

High audio clarity with SonicMaster

ASUS ZENBOOKs with Full HD 1080p display screens showcases pixel-perfect vivid images on IPS panels. With 178° viewing angles, now you can have great views from

INCREDIBLE RESPONSIVENESS

Resume **2**secs

Resume from sleep in 2 secs

With the power of ASUS Super Hybrid Engine II technology and super-efficient components, ZENBOOK™ achieves true 2-second instant resume to eliminate irritating reboot waiting time. Its battery can last up to 14 days of standby time. Worried about data lose? You can put your mind to ease because when the battery level is below 5%, your data will be backed up automatically to the SSD.

Easy connectivity for file transfers and more

With the various tools such as USB 3.0, Bluetooth 4.0, and micro HDMI, experience the ease of connectivity for file transfers, connecting to a bigger screen and more.

INCREDIBLE PERFORMANCE

Incredible Performance with Intel Core i7 processors

Get top speed and experience the smoothness with Intel Core i7 processors. Now you can multi-task and open multiple applications simultaneously.

ASUS VivoBook Intuitive Touch Screen Laptops

The World at Your Fingertips

Inspired by the Latin verb for "to live", ASUS VivoBook is a personal companion that blends the unique elegance of ASUS notebook design with Windows 8 touch-friendly operating system.

ASUS VivoBook embodies the spirit of touch to maximize intuitive interaction, offering naturally enjoyable user experiences that enhance ever aspect of your lifestyle. It has been designed with stand-out aesthetics, true-to-life sound and instinctive touch.

They are ideal for the increasingly cloud-based nature of computing, supporting seamless connectivity and usage on the go.

ASUS INTUITIVE DESIGN

All-Glass Touchscreen. Intuitive Small Touch Points of 6mm.

ASUS VivoBook S400 ushers in completely new touch experiences with its all-glass panel. Smooth throughout, the responsive touchscreen means your fingers can slide edge to edge naturally and unhindered. This flowing motion makes swiping, scrolling, and all other gestures quicker, more intuitive, and incredibly rewarding. With small touch points of 6mm, what it means is even the small fingers of toddlers are able to operate the ASUS VivoBook touchscreen laptops smoothly.

ASUS Intuitive Instant Functions

ASUS has developed a range of Instant Functions especially for Windows 8, enabling fuller immersion in the new operating system. With just one key press, engage and load up Instant Functions for more customization options and more personal interaction with your computing environment. The interface design puts you first, so it's utterly user friendly, offering quick settings and direct access to your content. You can change the way your ASUS VivoBook works and feels in seconds!

ASUS Fonepad™ 7.0" Tablet with Full Phone Functions

The Incredible Fusion of Phone & Tablet

We now spend more time looking at the screen on our smartphones than we do making calls, so why are their screen still so small?

Fonepad is perfect for people who value both voice communicator features of a smartphone and the increased entertainment opportunities afforded by a big-screen tablet, but prefer the convenience of carrying just one device.

Asus Fonepad is the one device for everything you do.

DUAL FUNCTIONALITY

Tablet with Full 3G Phone Functions

With full 3G phone functions, now you have the flexibility to use ASUS Fonepad according to your different needs. Its dual microphone with noise cancellation lets you have a crystal clear calling experience. When you are on the go, use a headset or just speak through the receiver with the tablet directly.

INCREDIBLE PERFORMANCE

The next generation Intel Atom Z2420 1.2GHz Processor

Equipped with Intel Atom Z2420 1.2GHz processor, now you can enjoy all-day computing with its power saving feature.

Long Battery Life

ASUS understands your need for a long battery life, especially for mobile devices. Now you do not have to worry about charging with up to 9 hours of all-day usage.

Expandability with Micro-SD Card Slot

If you need more storage for your entertainment, ASUS Fonepad supports up to 32GB micro-SD card storage.

Free 5GB Lifetime ASUS WebStorage

With free 5GB ASUS WebStorage for life, now you can upload, sync and share your files easily with your friends and family, no matter where they are, and data can be synchronised easily from PC to Pad and vice versa.

QUALITY VISUALS

Wide 178° Viewing Angle IPS Panel

With a wide 178° viewing angle, even your friends sitting near to you are able to have undistorted views of your photos and videos.

3MP Rear Camera & 1.2MP Front Camera

Capture and share every moment with ASUS Fonepad's front and rear cameras. It features a 3MP rear camera with auto-focus for taking photos, and 720p video recording. Besides, enjoy lively video calls with its 1.2MP front camera.

ASUS INTUITIVE SOFTWARES

WebStorage Online Office

Easily view, create, edit and share your Microsoft Office files online using your WebStorage account. Now you can work on your projects no matter where you may be.

Floating App

Now with ASUS' multitasking app, you can now easily switch between your apps. Supports Browser, Calendar, Calculator and other ASUS apps.

ASUS Story

ASUS Story automatically creates realistic-looking albums of photos, with page-turning animations. Create stunning presentations with ASUS Story easily and impress your clients and friends.

ASUS recommends Windows 8.

ASUS Monitor

MX279 27" Full HD AH-IPS LED-backlit and Frameless Monitor

Make what you see, AMAZING

Subtle & Elegant Design

The ASUS Designo MX Series displays sport ultra-slim profiles — with the MX239H measuring just 14.5mm at its thinnest point; while the larger MX279H comes in at 17.5mm — thereby minimizing the desk space required. In addition, the MX Series' edge-to-edge, frameless design has a bezel thickness of only 0.8mm. This subtle but elegant design is further accentuated by a sundial-inspired stand which provides a sturdy base for the monitor. MX Series design has already garnered accolades at the 2012 Good Design Awards.

Vivid, LifeLike Visuals

The Designo MX279H feature a 16:9 aspect ratio LED-backlit AH-IPS A+ panel with a 178° wide-view angle that minimizes color shift on both horizontal and vertical planes to ensure quality visuals from almost any direction. AH-IPS is the latest in IPS technology — delivering improved color accuracy plus increased energy efficiency.

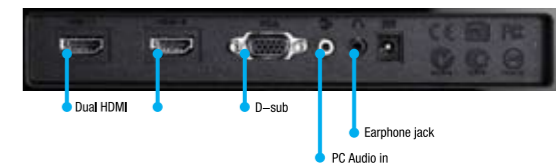

Premium Immersive Audio

These Designo MX Series displays feature ASUS SonicMaster technology — which was co-developed by the ASUS Golden Ear team and Bang & Olufsen ICEpower®. This ASUS-exclusive audio technology combines advanced hardware and software to refine every acoustic detail in pristine quality to deliver crystal clear, true-to-life surround sound — reproducing richer and more distinct vocals at a wider frequency range and louder volumes. The Designo MX's embedded ICEpower MobileSound 3 chip delivers incredible audio fidelity to ensure quality audio.

Dual HDMI for Extensive Connectivity

The Designo MX Series supports Full HD 1920 x 1080 resolutions and has dual HDMI and D-sub (VGA) input ports to ensure compatibility with a variety of multimedia devices including Blu-ray disc players, game consoles, and digital cameras to enrich users' entertainment experience.

ASUS DESIGNO SERIES MX279H BEAUTY BEYOND BOUNDARIES

Inspired by the ancients, the new Designo MX Series sports an elegant, precision-crafted, sundial design. MX279H feature an edge-to-edge frameless design with 178° ultra-wide viewing angle AH-IPS A+ panel for incredible visuals. In addition, built-in ASUS SonicMaster Technology, co-developed with Bang & Olufsen ICEpower® delivers an immersive premium audio performance. Its 2012 Good Design Award-winning ultra-slim, ergonomic design can be tilted to provide you with a comfortable viewing experience; while dual HDMI offers extensive connectivity options.
