

# PALEOPALYNOLOGY

ALFRED TRAVERSE

*Department of Geosciences,  
College of Earth and Mineral Sciences,  
The Pennsylvania State University*

Boston

UNWIN HYMAN

London Sydney Wellington

# Contents

<i>Preface</i>	page vii
<i>Acknowledgements</i>	ix
<i>List of tables</i>	xxiii
1 <i>What paleopalynology is and is not</i>	1
Definition of the subject	1
Historical matters	10
Annotated general bibliography of readily available publications	18
2 <i>Why one "does" paleopalynology and why it works</i>	28
Purposes	28
Why paleopalynology works	33
Disadvantages and limitations	34
3 <i>The natural history of palynomorphs</i>	35
Chitin	35
Sporopollenin	36
Palynomorphs in petroleum	46
General occurrence of palynomorphs in time	46
4 <i>Spores/pollen basic biology</i>	53
Bryophyte life cycles	53
Pteridophyte life cycles	55
Seed plant life cycles	56
Spores, pollen, "miospores", and other terminological troubles	59
5 <i>Spores/pollen morphology</i>	60
Morphological types	60
"Shell code"	72
Morphological types in detail	73
Supplemental notes on morphology	85
Exine texture, surface, and subsurface: sculpture and structure	92

## CONTENTS

Spores/pollen orientation and shape	108
Microscopic methods and sporomorph morphology	114
6 <i>Stratigraphic palynology – Precambrian, Cambrian, and Ordovician</i>	117
Acritarchs of Precambrian–Ordovician	117
Cambrian–Ordovician chitinozoans	132
Cambrian–Ordovician scolecodonts	133
7 <i>Silurian palynology</i>	143
General discussion	143
“Non-spore” palynology	146
8 <i>Devonian palynology</i>	148
Introduction	148
Paleozoic spore morphology and pertinence to the Devonian	152
Megaspores, seeds, and pollen	155
Pollen vs. spore morphology, polarity, and germination	161
Non-spore palynomorphs in the Devonian	164
Devonian palynostratigraphy	164
9 <i>Carboniferous–Permian palynology to the end of the “Paleophytic”</i>	170
Introduction	170
Potonié’s turmal system and modifications of it	171
“Turmal” classification of Paleophytic (Silurian to about mid-Permian) spores and pollen	174
Paleobotanical matters regarding the late “Paleophytic”	181
“Paleophytic” spores/pollen: the plants that produced them	182
Paleoecology of late Paleozoic spores	194
Comments on trends in the “Paleophytic” and the “Paleophytic”/“Mesophytic” boundary	197
Morphological comment regarding Carboniferous–Permian pseudosaccate and saccate spores/pollen	198
Late Carboniferous–Permian megaspores	200
Carboniferous–Permian acritarchs	200
10 <i>Permo–Triassic spores/pollen</i>	203
Introduction	203
Striates and bisaccates, Permo–Triassic hallmarks	205
Other spore/pollen types of Permo–Triassic	205
Permo–Triassic acritarchs	212

CONTENTS

11	<i>Triassic–Jurassic’ palynology</i>	213
	Introduction	213
	Circumpolloid pollen	224
	Colpate (sulcate) forms in the Triassic–Jurassic	228
	Further notes on Triassic–Jurassic saccates	230
	Jurassic palynomorph paleogeography	230
	Major known botanical relationships of “Mesophytic” (late Permian–early Cretaceous) dispersed spores/pollen genera	232
12	<i>Late “Mesophytic” “non-pollen” palynomorphs</i>	240
	Megaspores	240
	Acritarchs	240
	Dinoflagellates	240
13	<i>Jurassic–Cretaceous palynology: end of the “Mesophytic”. Advent and diversification of angiosperms</i>	255
	Introduction	255
	Normapolles pollen	268
	Late Cretaceous angiosperm pollen, and <i>Wodehousia</i> and <i>Aquilapollenites</i>	271
	Cretaceous palynofloral provinces	274
	Cretaceous megaspores	277
	Cretaceous fern spores	280
	“Terminal Cretaceous event”?	280
	Dinoflagellates and acritarchs of the Jurassic–Cretaceous	283
	Note on classification of Jurassic–Cretaceous spores/pollen	286
14	<i>Paleogene palynology</i>	289
	Introduction	289
	Paleogene climatic matters	290
	“Postnormapolles”	292
	Characteristic Paleogene spore/pollen floras	294
	Taxonomy and nomenclature of Paleogene spores/pollen	307
	“Cenophytic” (more or less Cenomanian–Pleistocene)	
	<i>spora dispersae</i> botanical relationships	309
	Cretaceous–present spores/pollen ranges	312
	Paleogene–Neogene dinoflagellates	312
15	<i>Neogene palynology</i>	317
	Introduction	317
	Palynologically significant stratigraphic boundaries in the “Ultimogene”	319

## CONTENTS

Miocene–Pliocene palynology	324
Pleistocene palynology	332
16 <i>Holocene interglacial palynology</i>	349
Introduction	349
Holocene palynological methods	350
Presentation of “pollen analysis” data	354
Holocene chronology	357
Some characteristic Holocene pollen analyses	361
Applications of Holocene palynology	370
17 <i>Production, dispersal, and sedimentation of spores/pollen</i>	375
Introduction	375
Spores/pollen as sedimentary particles	375
Vegetational analysis from pollen analytical results, “R values”, etc.	386
Pollen per gram, pollen influx, etc.	390
Sedimentation of spores/pollen and other palynomorphs	394
Sorting of spores/pollen per sediment type	412
Amounts of palynomorphs in sediments	423
Spores/pollen in water	425
Reworking, recycling, “stratigraphic leak” of palynomorphs	427
18 <i>Some factors affecting practical applications of paleopalynology</i>	431
Post-depositional alteration of palynomorphs: thermal maturation (= “carbonization”)	431
“Marginal palynology”	436
Palynostratigraphy (= the use of palynology for stratigraphy)	438
Data management in palynostratigraphy	440
Appendix <i>Palynological laboratory techniques</i>	445
Extant spores/pollen	445
Fossil palynomorphs	458
<i>Glossary</i>	492
<i>General Bibliography</i>	523
<i>Index</i>	566
