Introduction

An Updated Bibliography of Andreas Vesalius (1514-1564)

Compiled by Maurits Biesbrouck
started in december 2005

Summary

After more than forty years Dr. Harvey Cushing's list of Vesaliana demands an upgrade. The present list combines the Vesaliana of Cushing with titles gathered by R. Calcoen and newly found earlier and more recent ones. They are arranged in alpha-numerical order while the list retains the already existing numberings.

Résumé

Après plus de quarante années il y a lieu de compléter les Vesaliana de Harvey Cushing. La liste présentée ici donne les Vesaliana des deux listes de Cushing avec les titres rassemblés par R. Calcoen, ainsi que ceux qui sont retrouvés ultérieurement et les plus récents. La nouvelle liste est établie dans un ordre alpha-numérique tout en sauvant les numérations existantes.

INTRODUCTION

To the best of my recollection, it was Dr. Johan VAN ROBAYS, pathologist at the ZOL-Hospital in Genk (Belgium), who drew my attention to the importance of an inclusive list of Vesaliana. Our initial meeting in Roeselare, on Monday the 26th May 2003, was to discuss the feasibility of creating a Vesalius Society in Flanders. As a result of this meeting, the idea of compiling all existing Vesaliana into one list was brought into fruition.

HISTORY OF THIS LIST

Nowadays, due to their vast number, it has become virtually impossible to list, let alone to collect, all existing Vesaliana. Others have previously pointed out this problem. Ten years ago, their number was already huge. ZANOBIO noted that on the occasion of every Vesalius anniversary or celebration, the literature about the great anatomist still grows considerably.

INTRODUCTION

Internet searching of his name shows ten thousands sites, with numbers still increasing. This must be explained by the lasting and immense popularity of Vesalius.

Today's most used and best known list of Vesaliana is that of Harvey CUSHING in chapter X of the second edition (1962) of his Vesalius bio-bibliography (1). Before Cushing the only detailed Vesalius bibliography was that of F.M.G. DE FEYFER, forming the basis of his work (2). CUSHING (1962) gives two separate and complementary lists, each starting with the letter 'A', but with a continuous numbering. The first list, with 433 references, dates from the first edition of 1943 and is his. The second one contains 295 addenda by C.D. O'MALLEY.

THE LIST

Vesalius publications are divided into works by Vesalius, or re-issues of them, and of works about Vesalius, the so-called Vesaliana. Newly discovered editions of Vesalius's works or new publications (*Opera Vesalii*) are, as a matter of fact, additions to the existent bibliographies of H. CUSHING and of Elly COCKX-INDESTEGE. They are not included in the present list, except when they are accompanied by a relevant commentary with a Vesalianum status. Vesaliana are publications dealing - in part or in total - with Vesalius or his work. For those that could not be consulted the source is mentioned at the end of the entry between parenthesis (Cushing 1962) or brackets [later ones].

Some remarks

In the first edition of 1943, at the end of chapter X, eighteen more titles are added in a newly started alphabetical order but with numbers continuing up to 451. As O'Malley started his numbering with 434 and incorporated all of them into his list, there was no need for any correction. Attention to this is drawn by mentioning the original Cushing number in the few annotations concerned.

The names in Cushing's list are left unchanged, with the exception of GALEN whose name is rendered in Latin as 'GALENUS' to fit with the new added entries. In contrast with the present notation, Dr. Cushing sometimes placed a prefix as 'del' after the root of the name, e.g. 'GAIZO del' instead of 'DEL GAIZO'. One has to keep this in mind within an alphabetical search. Attention to this is drawn by the addition of an entry and referencing to it, e.g. 'GAIZO, Modestino del. See DEL GAIZO, 443 etc.'. As in most modern indexes and directories the Scottish and Irish Gaelic prefixes 'Mac', 'Mc' and 'M' are listed together. Care should also be taken with the fact that 'Ö' stands for 'OE' and 'Ü' for 'UE' so for instance "MÜNTZ Eugène" precedes "MULS, G."

For evident reasons, since this is an alphabetical list intended to be expandable, whenever possible the full first names are used. To avoid ambiguity in calling for copies of an article, the names of periodicals are also mentioned in full and 'ibidems' are replaced by the original data.

When an authors' name is missing Cushing doesn't always begin the reference with the title as we do (e.g. in the addition by O'Malley: 450. BASEL, ...). In these cases the title, accompanied by its original number at its end, has been moved to the right alphabetical place.

Annotations or commentaries on titles by H. Cushing (001-728) are copied unchanged, except for the punctuation in some of them and when necessary a reference number is adapted

INTRODUCTION

to correspond with the new numbering. To avoid ambiguity, references to chapter X, dealing with the *Vesaliana*, in his own bio-bibliography are noted more clearly.

For uniformity and presentation a careful attempt has been made to eliminate most typographical differences from various sources without disturbing their informative content. Except for those of Cushing the responsibility for the annotations is entirely mine. Although not always possible, a considerable effort has been made to give relevant information for further study when this is not evident from the title. Whenever relevant and possible, an English translation of the title is added. All entries have at least been double checked against transcription errors.

Some inaccuracies have been dealt with in the following way:

1. Due to the alphabetical inversion by O'Malley and in order to respect this logic the numbers for DELECLUZE and DELANNOY (respectively 481 and 482, now 442 and 439) were switched, with the original number mentioned between brackets as [HC481] and [HC482]. The same happened in the first list with PILCHER and PIERSOL (respectively 319 and 320, now being 1409 and 1403 (originally [HC319] and [HC320])). Furthermore the references to ANDREAS Valerius (then 011, 012 and 013, now 38, 39 and 40) have been moved upwards between ANDRE Vésale and ANDREAS Vesalius where they alphabetically belong.

2. Unfortunately Cushing did not always respect the chronological order. Here numbers have not been changed.

3. The following titles in the second list have an identical counter-part in Cushing's first list. Only one of them is saved, mentioning however the two original numbers:

107 and 483, now 446 with [HC107] [HC483]
138 and 507a, now 584 with [HC138] [HC507a]
294 and 608, now 1240 with [HC294] [HC608].

4. In order to respect the alphabetical order, two references of O'Malley and Saunders have been moved from the top to the bottom of their sublist:

617, now 1337 with [HC617]
618, now 1340 with [HC618].

5. The following numbers in Cushing have been deleted because they have nothing to do with Vesalius: 30 (Baudrier, 1912), 79 (Choulant, 1841), 201 (Hundt, 1501), and 206 (Ingrassia, 1547?).

Sources

It goes without saying that CUSHING, with the additions by O'MALLEY, formed the firm basis to start with. The titles that they contain which were published before Vesalius's time - the so-called pre-Vesaliana - have been omitted, because they have nothing to do with Vesalius himself. The numbers concerned are 30, 34, 35, 54, 58, 66, 116, 147, 167, 269, 466 and 571. Number 338, a later publication, has been omitted too, for the same reason. After that I started screening for other published Vesaliana and searching for the relevant titles they contained.

INTRODUCTION

At the same time several ones came via the catalogues of the large university libraries and of antiquarians, as they are mentioned in the legend of sources. The already published lists, with Vesaliana mentioned by Cushing were looked at but revealed nothing he had not mentioned already in his publication. The World Wide Web delivered many Vesalius sites but only a few articles and books that could not be found elsewhere. The sites themselves are not cited, except when they allow downloading the specified article.

In 1993 Roger CALCOEN published an important list of new Vesaliana that were also numbered (3). His 298 new entries since Cushing are recognisable by the mentioning of [RC1] to [RC298] at the end of the title. As with the Cushing numbers, they were saved, even when I could personally consult the article. Unfortunately the numbers do not always follow an exact order due to inconsistencies in alphabetical order and because the sequence of entries within the same author does not always follow the exact chronology. But a quick search for an item specifically out of Calcoen's list remains possible: only the number RC279 is to be found between the references beginning with 'Andreas Vesalius ...'. So by adding the numbers assigned by Cushing (1943), O'Malley (1962) and Calcoen (1993) at the end of each of their titles between brackets, the present list still permits one to find a Vesalianum on the basis of their numberings.

Composition

A serious attempt has been made to group several editions and translations of the same work into one entry only, but when sufficient proof was lacking a new entry was created.

Completeness

Although a considerable effort has been made to find all the existing Vesaliana, this list is not complete. Whereas Dr. Cushing achieved his goal reasonably well to include "*all references to general literature cited in the preceding chapters* [of his Vesalius bio-bibliography], *including a few entries of purely bibliographical character*", even today it is possible to find Vesaliana not mentioned by him, although existing in his days. This is not a surprise since also for him "*titles continued to accumulate up to the date of publication*". The situation has developed greatly since then: growing numbers of new articles, books and the internet result in a daily avalanche of new publications concerning the history of medicine and even more so those about Vesalius, who still plays such a prominent role in it.

A major problem while creating the current list was the impossibility of seeing every interesting article. Many of them don't bear the name of Vesalius in their title although they contain important information on him or his works. When absolute proof of this was lacking they have not been included. It is our hope that someone having the opportunity to examine them will be able to include the missing titles.

Some figures may give an idea of the (in)completeness of my 'unified' list. Apart from the Cushing Vesaliana totaling 728 entries I succeeded in gathering 682 new references before I got the list of Calcoen. Out of his 298 references I had only found 142 of them, but my list contained already 108 entries with the lemma 'Vesal' in the title of references from before 1993 that were missing in his list. This demonstrates clearly the magnitude of what may be lacking and the need for an update as well.

INTRODUCTION

In recent years many publications have appeared mentioning only once or a few times the name of Vesalius in a rather casual way without adding much new information. Entering 'vesalius' on the search page of www.amazon.com delivers more than 500 (!) of these titles. For each book this powerful search engine mostly produces a review quoting all the references to Vesalius, including those in the index, and making it possible to read on line the complete page where they are found. For this reasons they have not been added to this list.

New titles

Many existing and valuable data and ideas remain hidden. Some scholars have carried out a lot of research of Vesalius and his works but only presented their results in courses or talks, without publishing their work. I wish to apologize to those authors whose work is mentioned partially or has been omitted. They are invited to let me know of any gaps or inaccuracies that they may find. Thus we can hope to maintain a solid and practical list of Vesaliana that will stay up-to-date and accessible to anyone interested.

ACKNOWLEDGEMENT

My sincere thanks go to Apr. G. DE MUNCK, president of the *Koninklijke Apothekersvereniging van Antwerpen* (KAVA), who was so kind to give me a copy of R. Calcoen's article and to Herwig DEUMENS of the Koninklijke Academie voor Geneeskunde van België for his most valuable remarks and suggestions. My sincere gratitude goes especially to Elly COCKX-INDESTEGE for her invaluable advice and continuous support through-out the project. Finally I wish to thank Prof. em. Dr. Omer STEENO (K.U.Leuven), Dr. Theodoor GODDEERIS (Kortrijk, Belgium), Prof. Jacqueline VONS (Université François Rabelais - Tours), Rabbi Edward REICHMAN, MD (Albert Einstein College of Medicine - New York, Bronx), Carlos SORETO (Universidade Alberta, Lisbon), and all those who supported this work by supplying additional titles.

Numbers with asterisk '*' = item seen.
Numbers without asterisk = item not seen.

Edition of 2007

From 2007 on also the websites about Vesalius and his works are searched in a more systematic way. They are added when their content is significant and the site allows downloading the specified article, even if there is no publication on paper.

Edition of 2008

An alphabetical list with the second and third authors has been added. Since decennia articles written by practitioners of some disciplines tend to have more than three authors. In those cases only the first three of them are mentioned.

Edition of 2009 = Update 2010

The title "Vesaliana" was changed into "Vesalius Bibliography".

The author *Mondino* (n° 1224) has been changed into *Curtius* (n° 412.20) and *Linden, van der* (n° 1114) has been changed into *Vander Linden* (n° 1844.20).

Again more than hundred references could be added especially thanks to the indefatigable search by Prof. em. Dr. Omer Steeno. Several older ones, from before 1850, such as Gemusaeus, Ingrassia, Portal and many others, can now be retrieved and downloaded from books.google and are indicated by (BG).

Edition 2011

With 122 new records found during 2010.

Edition of 2012

With 75 new records during 2011.

INTRODUCTION

Edition of 2013

More than 130 new records during 2012.

From now on the translations of Vesalius's works are also included in a more systematic way, as 'AUTHOR, X (transl.)'. One may justly argue that translations are still his works, with a content defined by himself, and, because of this, do not belong here, as this bibliography is intended to be a list of writings on Vesalius and his works and not of the works written by him. But translations unlock the contents of that works for a fast growing number of scholars not reading Latin, who will be glad finding means to read the passages of their interest in a comprehensible language, be it not precisely in his words. Moreover, Vesalius himself can of course not be held responsible for this translations.

Edition of 2014

The system of 'sigels' has been simplified. It still consists in two forms.

1. Between brackets one can find the place of the record in pre-existing lists:

[HC1]- [HC728] Harvey Cushings *Vesaliana* (chap. X of his Vesalius bio-bibliography, 1962)

[RC1] - [RC298] Roger Calcoen (*Vesaliana*, 1993)

2. Between parentheses one can find the key to the libraries. After purifying the *Legend of Sources* this was combined with the *List of Library Abbreviations of H. Cushing* to form a new list of *Key to the Libraries*.

The more than 180 new records found during 2013 have been added.

Edition of 2015

As a consequence of a more rational use of the lay out the number of pages has been reduced. As 2014 was an important Vesalius commemoration year, some 235 new titles could be added, the total now being 3.160 records.

Edition of 2016

An new introductory page on *How to use this bibliography* has been added. Following the great Vesalius commemoration year 2014, the number of new publications is still growing, resulting in more than 292 extra records, bringing the total at 3.453 records.

Edition of 2017

Again many extra titles could be retrieved. Of the now 3633 records 75% could be consulted.

INTRODUCTION

Warning: due to the accumulation of records, in exceptional cases their leading ID-number had to be changed (renumbered) in order to maintain the consistency of the list. So in rare cases the format has changed from NNNN.NN to NNNN.NNa, b, etc. (see e.g. Jacqueline Vons).

Edition of 2018

With 3875 titles.

Edition of 2019

With 4016 titles

Edition of 2020

With 4148 titles

INTRODUCTION

How to use this bibliography

*** Warning ! ***

Andreas Vesalius is an interesting and important figure. For physicians he is the father of anatomy and hence the founder of modern medicine. For historians, together with the Polish priest Nicolaus Copernicus, who wrote his *De revolutionibus orbium coelestium*, just as the *De humani corporis fabrica* published in 1543, they both made the transition of the medieval way of thinking from the so-called 'dark' Middle Ages into the Renaissance.

During the past centuries a lot has been written and published on Vesalius' life and works. Many aspects of these have been studied and commented on, both by scholars and enthusiastic occasional writers, every one of them deserving our deep respect. For that reason I choose to continue the list in the spirit of the great Harvey Cushing (1869 - 1939), a choice I must humbly admit is not for everyone the right one. But for novices, and out of respect due to our great anatomist, it may be dangerous to pick up unprepared from this list any article(s) without being possible to put them into the right perspective or without having checked whether they have a sound base on their own for further study or comment.

To avoid misleads, a good strategy should be to read first the biographies by M. Roth and C.D. O'Malley, and the bio-bibliography by H. Cushing – once called by Lindeboom *the firm tripod* for any Vesalius study - before consulting this bibliography, and certainly before giving a presentation, a comment or writing a paper. This seems to me a minimum to achieve a sufficient basic knowledge on Vesalius and his works. Still better would be to add other well informed authors such as Burggraeve and Baron. Only from that moment on one is sufficiently prepared to look for more additional info, as this solid basic knowledge will help to avoid any false or unproved statements. From that moment only, the present bibliography may be of any further help. When attacking a so-called Vesalian problem, or starting any new research, the best tactics are to look for all the corresponding lemmata in the register at the end of the list and to collect all those articles, in whatever language they may be written, to form a complete dossier, which should be studied properly. Chances are significant that additional info will be necessary and that more publications will be found. These should be studied thoroughly and incorporated into the dossier too and the compiler of the present list would be most grateful to be informed of all such findings. Once all this is accomplished, the writing of a paper will be much more easier, the result more complete and soundly founded, and with respect to the many hard working scholars, who devoted so much of their time to these studies, and to Andreas Vesalius himself.

BARBIANI(S)

'Barbianis' is nominative, 'Barbiani' genitive, and the correct transliteration should be 'Varvianis', as a Greek 'B' or *bèta* should be transliterated as 'Mp' (Theo Dirix). Nicolas Ant. Barbianis signed his letters always with 'Barbiani', without an 's', meaning 'of Barbianis', or possibly to point to his Italian origin (Omer Steeno). His grandson Nikos writes 'Nicolas Barbianis' too, whereas he signes himself with 'Nikos Varvianis'. Here I used 'Barbianis' as most authors do.

- 106.94 * BARBIANIS, Nicolas Ant. *Letter [to Borel de Bitche], Zante (Iles Ionniennes), 10 septembre 1951.* (AEA)
One of the first direct contacts between Leuven and Zakynthos before the devastating earthquake on 12.08.1953. On the visit to Frangoklissi in Laganas (Zakynthos) and the first Vesalius monument there. Also on Barbianis's publication on Vesalius. Borel de Bitche was the authorized minister for Belgium in Athens in 1951.
- 106.95 * BARBIANIS, Nicolas Ant. *Letter [to Borel de Bitche], Zante (Iles Ionniennes), 22 Décembre 1951.* (AEA)
On Barbianis's study of Vesalius and the communication of the 4th chapter on "La mort de Vésale à Zante" by Prof. Mr Spiros Dondas.
- 106.96 * BARBIANIS, Nicolas Ant. *Letter to Monsieur le Professeur G. van der Schueren, Louvain, Zante, 16 April 1952.* (UAL)
With a photo of the beach of Frangoclissi where Vesalius supposedly reached land at Zakynthos.
- 106.97 * BARBIANIS, Nicolas Ant. *Letter to Monsieur le Professeur G. van der Schueren, Louvain, Zante (Iles Ionniennes), 16 April 1952.* (UAL)
About his studies on Vesalius with details of Vesalius' burrial place.
- 106.98 BARBIANIS, Nicolas Ant. ['The place in Zante where Vesalius died and was buried'] in *Practica: Proceedings of the Academy of Athens*, Athens, 1952, 27: 193-196.
Not seen, probably in Greek.
- 106.99 * BARBIANIS, Nicolas Ant. *Letter to Monsieur le Professeur G. van der Schueren, Louvain, Zante (Grèce), 10 June 1952.* (UAL)
About his letter of 16 April 1952, see nos. 106.96 and 106.97. Also a short mention of R. Baert.
- 107 * BARBIANIS, Nicolas Ant. *O André Vésale kai è proodos tès anatomias [Andreas Vesalius and the evolution of anatomy] - L'évolution de l'anatomie et André Vésale*, Athens, 1953, 32 pp., ill.
In Greek with French summary on pp. 7 and 8.
Wagenseil says there is only one copy left (in Athens, see 1898), but Omer Steeno found two copies in the *Archive Prof. Gerard van der Schueren (P102), inventory nr. 810* in the *Central University Library of Leuven*, and J.E. Pons saw one in the *Solomos Museum* in Zakynthos. See no. 1734.86.

- 107.50 * BARBIANIS, Nicolas Ant. *Letter to Monsieur le Professeur G. van der Schueren, Louvain, Zante (Grèce), 1952 or 1953 (?)*. (UAL)
Upper part of letter is missing. Mentions his brochure on 'Vesalius and Zakynthos' which he sent to the *Vesalius Instituut* (Leuven).
- 108 * BARBIANIS, Nicolas Ant. *Ανδρέας Βεζάλ ο πατήρ της ανατομίας και η Ζακύνθος*, [Andreas Vesalius, father of anatomy, and the island Zakynthos] Athens, 1961, 28 pp., ill. [RC15]
In Greek, with short fragments in French and Latin. Containing 'Τα Εγκαινία τῆς Πλατείας Ἀνδρέα Βεζάλ στὴ νέα Ζακύνθο (Λόγοι, Ομιλίες), 11 δεκεμβρίου 1960' [The Inauguration of the Andreas Vesalius Square in New Zakynthos (Speeches and lectures), December 11th 1960]. On p. 25 the rare photo of the first Vesalius-monument at Frangoklisi (Kalogerata).
- 108.01 * BARBIANIS, Nicolas Ant. 'Discours du délégué de l'Ile de Zante (Grèce)' in *Commémoration solennelle du quatrième centenaire de la mort d'André Vésale - Plechtige herdenking van het vierde eeuwgetij van het overlijden van Andreas Vesalius, 19-24/X/1964*, Bruxelles - Brussel, Académie Royale de Médecine de Belgique - Koninklijke Vlaamse Academie voor Geneeskunde van België, 1964, p. 188.
Barbiani presented at this occasion an urn with some soil of Zakynthos and looks ahead to the Vesalius-commemoration there in 1965.
- 108.02 * BARBIANIS, Nicolas Ant. *Discours du délégué de l'Ile de Zante*, Bruxelles, 19 octobre 1964, typescript, 1 p. (UAL)
See also no. 108.01. Mentions Ugo Foscolo and Denis Solomos.
- 108.03 * BARBIANIS, Nicolas Ant. *Letter to Gerard van der Schueren, Zante, 24 March 1965*. (UAL)
In French. Invitation for the Vesalius commemoration in Zakynthos on 1-2 May 1965, also on behalf of A. Gaitazis, prefect of Zakynthos. The addressee answered on 9 April 1965.
- 108.04 * BARBIANIS, Nicolas Ant. *Letter to Gerard van der Schueren, Zante, 14 April 1965*. (UAL)
In French. Answer to the letter of 9 April 1965 with the commemoration program for 1-2 May 1965 at Zakynthos and the arrangement for his and his wives stay in the city, and of R. Lagrain, secretary of the rector of Leuven.
- 108.05 * BARBIANIS, Nicolas Ant. *Résumé de L'Allocution de Mr. N.A. Barbiani, Secrétaire Général du Comité de Zante, à l'occasion du 4ème centenaire de la mort d'André Vésale, à la grande salle de réception de la Préfecture de Zante, le 1er Mai 1965, heure 8.00 p.m.*, typescript, 1 p.
Mentions Bizzaro, S. Dontas, Sabatakakis, N. Martacos, king Baudouin, C. Schuurmans.
- 108.06 * BARBIANIS, Nicolas Ant. *Ε Ζακύνθος και ο Βεζάλ. Αναμνηστικά εκδιλόσεως ἐπὶ τὴν 400ῆ ἐπετειὴ ἀπὸ τοῦ θανάτου τοῦ Ἀνδρέα Βεζάλ ἐν Ζακύνθῳ* [Zakynthos and Vesalius. Solemn commemoration at the 400th anniversary of Andreas Vesalius's death in Zakynthos], Zakynthos, Maios 1965, 10 pp.
In Greek. Copy in the library of SA Brussels.
- 108.07 * BARBIANIS, Nicolas Ant. *Letter to Gerard van der Schueren, Zante, 27 May 1965*.

- (UAL)
- In French. Short note by Barbiani, followed by his functions and distinctions.
- 108.08 * BARBIANIS, Nicolas Ant. *Letter to Gerard van der Schueren*, Zante, 31 August 1965. (UAL)
In French. Letter accompanying some photo's with the destinee and asking hin a copy of his speech on May 1st, 1965 at Zante.
- 108.09 * BARBIANIS, Nicolas Ant. *Letter to Gerard van der Schueren*, Zante, 13 November 1965. (UAL)
In French. Mentions A. Dalcq.
- 108.10 * BARBIANIS, Nicolas Ant. *Picture postcard to Monsieur le Professeur G. van der Schueren, Louvain*, Zante (Iles Ionniennes), 14 December 1967. (UAL)
With New Year wishes.

Champavert le Lycanthrope ('the werewolf') is a pseudonym of Petrus Borel, but according to the introductory *Notice sur Champavert* the opposite is true. Short novel, a cruel and bloody fantasm, on Andreas Vesalius as a dissector. According to p. 112 it was inspired by a translation from the Danish of a certain Isaïe Wagner, and Amédée Pichot refused to use it in his *Revue de Paris*. With a dissection scene engraved by André Hofer.

With two folded leaves of plates, 50 cm. Limited to 250 unnumbered copies. In cloth-covered portfolio containing a reconstruction of the lost original drawings for the series of fourteen muscle figures illustrating the second book of Vesalius's *De humani corporis fabrica* (1543). The eight front and six back views have been reversed from the published originals and assembled to demonstrate the continuity of the background scenes which form two landscape sequences as originally envisioned by the artist. A twenty page introductory pamphlet accompanies the plates.

Ambassador L'Aubespine, bishop of Limoges, wrote on the 24th of July 1560 a letter to his queen Cathérine de Medicis, concerning a lady in waiting (dame de Clermont) belonging to her daughter Elisabeth of Valois, queen of Spain (third wife of Filips II). Dame de Clermont fell ill, but soon she recovered thanks to the care of Andreas Vesalius. The Court stayed on that very moment at Toledo. This is also the first proof that Vesalius was in Spain. This lady *Dame de Clermont* was Louise de Bretagne-Avaugour, chatelaine de Castelnau.

M. BIESBROUCK - VESALIUS BIBLIOGRAPHY: UPDATE JANUARY 2020

The poem, 12 cantos of seven line stanzas, gives a fairly accurate description of human anatomy as given by Vesalius in his *Fabrica* (1543), but without mentioning his name.
The poem, first published in 1633, is an imitation of Spencer's *Faery Queene*.

(BG)
In Latin. Dialogue between the citizen Caspar and the physician Andreas (acting as the author Pedro Jimeno, professor of medicine in Valencia). A verbatim transcription of Vesalius' last but one chapter in book I of the *Fabrica 1543*, but without its title: *Quo artificio humani corporis ossa & cartilagine inspectioni praeparentur*, comes on ff. 26v-38r. Pedro Jimeno was a former student of Vesalius in Padua. He also mentions having discovered the third auditory ossicle, whereas Vesalius himself knew only two of them (f. 20r). Mostly that discovery is attributed to Ingrassia.

See Cushing VI.D.25. Torteбат made the 12 copperplates drawn from Vesalius but the text is of Roger de Piles (Paris, 1635-1709) the famous art writer. In the four pages of the introduction *Aux amateurs* the author discusses the importance of anatomical knowledge for the artist, and gives examples of artists which brought this into practice with great succes, repeating twice that Titian drew the plates for Vesalius. Someones believe Torteбат is the pseudonym for de Piles.

This first print was interrupted because of the war and only one unique copy of the first part (pp. 1-30) has been printed. Jean-Pierre Tricot, grandson of the author, was so kind to give me and Omer Steeno a copy of it (Sept. 2014). However it was printed again somewhat later and was published as ‘André Vésale, quatrième centenaire’ in *L’art médical*, Anvers, 31 Mai 1914, 7 (no. 5): 65-80, and 30 Juin 1914, 7 (no. 6): 81-94.
The portrait is a wrong one (it represents Melchior von Brauweiler). The second part begins with an overview of the Vesalius-portraits, mentions the ‘only’ known letter of his hand and ends with the reasons for his travel to Jerusalem.
