San Pellegrino - Italy - Sparkling Water

Italian mineral water is a natural resource found in unpolluted areas, often in mountainous regions. As it flows underground towards its source, the water undergoes changes in its physical and chemical composition, absorbing the minerals that give it its distinctive characteristics. Untouched and pure, its uniqueness and taste depend on the territory from which it emerges.

Co-founders Charles and Tim had both spotted that premium spirits were growing quickly, fueled by consumers' increasing awareness of the provenance of what they ate and drank. This growing interest in premium food and drink had seemed to neglect mixers, a crucial element of the drinks industry that remained flat. It struck them both as extraordinary that people were paying a good deal of money for a high-quality spirit, yet had no choice but drown it with a poor-quality mixer. No compromise at Fever-Tree. Flavor and quality are of the utmost importance. Since the lid has been put on the first bottle of Premium Indian Tonic Water, they haven't wavered their single-minded mission to bring quality, flavor and choice back to mixers.
