VESPERTILIONIDAE

Scotophilus kuhlii
VESPERTILIONIDAE

These photographs and the line drawings on the other side are intended to aid in the recognition of families and genera. Bat genera known from Mindanao but not pictured here include *Cheiromeles*, *Coelops*, *Megaderma*, *Megaerops*, and *Saccolaimus*. Additionally, many genera are represented by several species. For identification of species, we recommend the use of "A key to bats of the Philippine Islands" (Ingle & Heaney, 1992). The key includes characters that are not obvious from photographs, such as dentition and measurements.

Bats Recorded from Mindanao
 A total of 53 species of bats are known from Mindanao; additional species are probably present. The length of the forearm in adults, often useful for identification, is provided in parentheses. This measurement can be taken with a ruler, but calipers provide more accuracy.

EMBALLONURIDAE
Emballonura alecto (44-49 mm)
Saccolaimus saccolaimus (66-71 mm)
Taphozous melanopogon (61-65 mm)

MOLOSSIDAE
Chaerephon plicata (40-43 mm)
Cheiromeles parvidens (73-78 mm)
Mops sarasinorum (39-45 mm)

PTEROPODIDAE
Acerodon jubatus (165-215 mm)
Alionycteris paucidentata (45-50 mm)
Cynopterus brachyotis (58-68 mm)
Dyacopterus spadiceus (92 mm)
Eonycteris robusta (67-82 mm)
Eonycteris spelaea (67-80 mm)
Haplonycteris fischeri (46-53 mm)
Harpyionycteris whiteheadi (80-91 mm)
Macroglossus minimus (41-45 mm)
Megaerops wetmorei (45-52 mm)
Ptenochirus jadori (76-90 mm)
Ptenochirus minor (60-78 mm)
Pteropus hypomelanus (136-149 mm)
Pteropus pumilus (94-113 mm)
Pteropus speciosus (118-133 mm)
Pteropus vampyrus (179-204 mm)
Rousettus amplexicaudatus (80-92 mm)

RHINOLOPHIDAE
Coelops hirsutus (34 mm)
Hipposideros ater (38-43 mm)
Hipposideros cervinus (44-50 mm)
Hipposideros coronatus (47 mm)
Hipposideros diadema (77-89 mm)
Hipposideros obscurus (42-48 mm)
Rhinolophus arcuatus -small (43-46 mm)
Rhinolophus arcuatus -large (47-50 mm)
Rhinolophus inops (49-55 mm)
Rhinolophus macrotis (43-44 mm)
Rhinolophus philippinensis (51-57 mm)
Rhinolophus rufus (68-73 mm)
Rhinolophus subrufus (51-56 mm)
Rhinolophus virgo (38-44 mm)

MEGADERMATIDAE
Megaderma spasma (57-63 mm)

VESPERTILIONIDAE
Kerivoula hardwickii (33-35 mm)
Kerivoula pellucida (35 mm)
Kerivoula whiteheadi (30-31 mm)
Miniopterus australis (34-39 mm)
Miniopterus schreibersi (42-46 mm)
Miniopterus tristis (51-55 mm)
Murina cyclotis (36-39 mm)
Myotis horsfieldii (35-38 mm)
Myotis macrotarsus (44-49 mm)
Myotis muricola (30-34 mm)
Philetor brachypterus (34-39 mm)
Pipistrellus javanicus (32-36 mm)
Pipistrellus petersi (38 mm)
Pipistrellus stenopterus (38-40 mm)
Pipistrellus tenuis (30-32 mm)
Scotophilus kuhlii (47-53 mm)
