★ = San José de Payamino

\*\* Denotes first record of *Atractus torquatus* in Ecuador (plates 33-35). Whole specimen not collected, however details regarding lepidosis and deposited tissue (tail clip) for this individual are available upon request.

We thank Paul Bamford for plates: 39-40, 83, 88-89; Lucas Huggins for: 111-14, 135-36; Richard Preziosi for: 91-92, 155; and Thierry Garcia for plate 57.

Scientific nomenclature follows that of Uetz et al. (2017), with the exception of Valencia et al. (2016) for *Micrurus* spp.
