EPSON®
EXCEED YOUR VISION

PowerLite® Pro G5550
MULTIMEDIA PROJECTOR

Standard lens included

Brilliant performance meets precision control.

The PowerLite Pro G5550 offers the ultimate projection solution for any auditorium or boardroom, even in ambient light. Now included with a standard lens, it provides amazing image quality with 4500 lumens color and white light output[1], XGA resolution and C^{2}Fine™ technology. Engineered to integrate with both IP and RS-232, the G5550 works with industry-leading devices, offers easy remote monitoring and control functionality using Epson's Easy Management® software and is compatible with Crestron's RoomView. The G5550 features DICOM simulation mode for training and educational purposes[2] as well as a closed captioning decoder.

High brightness; incredible detail — crystal-clear images with XGA resolution, C^{2}Fine technology, plus 4500 lumens color and white light output[1]

Complete networkability — wired and wireless (optional) Crestron RoomView compatible network connection, content over IP and message broadcasting

Enhanced connectivity — HDMI, VGA and multiple video and audio inputs

Multi-screen options — project two side-by-side images from different inputs or up to four images from network users

Additional lens options — upgrade to other interchangeable bayonet lenses, including short-throw, long-throw and rear-projection; with horizontal and vertical lens shift for flexible setup configurations

PowerLite® Pro G5550
MULTIMEDIA PROJECTOR

## The best-selling projectors in the world.

Epson understands business and education and has a solution no matter what your situation. Built with image quality and reliability in mind, EPSON® projectors enhance communication and inspire collaboration, while offering a low total cost of ownership. From long-throw projectors to ultra-short-throw and all-in-one solutions, Epson has the model made for you.

The best selling projectors #1 Epson Projectors in the world

Brilliant image quality

3LCD technology — for quality and color that's beyond amazing

CERTIFIED 3 CHIP TECHNOLOGY

- 3 chips for full-time, vibrant color
- 25% less electricity required per lumen of brightness when compared to 1-chip DLP projectors[3]
- Over 20 years of road-tested reliability built into every projector

3LCD

▲ 3LCD technology

Advanced sharpness

Another feature Epson has transferred over from its industry-leading home cinema projectors — advanced sharpness for video. Depending on the content, users can adjust any of the following attributes of the image depending on the content: thin line enhancement, thick line enhancement, vertical line enhancement or horizontal line enhancement.

Amazing color light output

LUMENS 4500 COLOR LIGHT 4500 WHITE LIGHT TRUE-TO-LIFE COLOR

Rich color and detail are critical for presentations — that's why it's important to understand that color light output is an essential ingredient in achieving optimum performance. The PowerLite Pro G5550 delivers 4500 lumens of color light output and 4500 lumens of white light output[1] for bright, vibrant, colorful images.

C²Fine technology delivers a higher contrast ratio

C²Fine offers smooth, uniform images with exceptional contrast for better image quality. Based on this new phase-compensation technology, light leakage is eliminated, and, when combined with auto iris, it allows for contrast ratios of up to 1000:1.

▲ With C²Fine   ▲ Without C²Fine

Enhanced connectivity

The PowerLite Pro G5550 is equipped with:
- Full digital connectivity with an HDMI port
- 5 BNC, 2 video/audio, 2 x VGA and RS-232 for additional flexibility

Better ProDucts for a Better Future™

For more information on Epson's environmental programs, go to eco.epson.com
Eco Features
- Energy-efficient 3LCD light engine
- Designed to be recycled[4]
- Epson America, Inc. is a SmartWay[SM] Transport Partner[5]

SmartWay[SM] Transport Partner — Getting There With Cleaner Air

Full-featured performance

DICOM simulation mode

DICOM (Digital Imaging and Communication in Medicine) is a standard for handling, storing, printing and transmitting medical imaging information. The projector's DICOM Simulation Mode enables users to reproduce images with an advanced grayscale level that simulates DICOM Part 14. This mode is ideal for viewing grayscale medical images, such as X-rays, for training and educational purposes[2].

▲ Normal Mode ▲ DICOM Simulation Mode

6-axis color adjustment

For special projection material such as high-quality photographs or artwork, users can adjust the hue, saturation and brightness for six colors: RGBCMY (Red, Green, Blue, Cyan, Magenta, Yellow).

Improved video with 3:2 and 2:2 pull-down options

3:2 pull-down creates 60 frames per second and 2:2 pull-down creates 48 frames per second from 24 frames.
• 3:2 pull-down: The image is smoother.
• 2:2 pull-down: One frame length is the same as film. It is ideal for movies.

Test patterns

The PowerLite Pro G5550 also includes four test patterns with precise setup features, including detecting distortion, checking linearity, color reproduction and bleeding, and DICOM simulation mode.

▲ Color Bars ▲ Grayscale

Advanced control, monitoring and communication

Epson's EasyMP® monitor tool

If you are searching for a solution that gives you control over your time, EPSON network projectors with Easy Management capabilities can help. EPSON networked projectors provide built-in remote access, with no licensing fees, to EPSON monitor software. These features give you added control, with the ability to troubleshoot and monitor all EPSON networkable projectors from any computer over a wired or wireless Ethernet network.

Additional features to assist administrators/Help Desk

• Remote access and control through the network
• Remote monitoring of up to 1024 EPSON networked projectors
• Simultaneously view status, including input sources, power on/off, lamp life hours and more
• Preventative maintenance features, including temperature levels and error alerts
• Schedule filter and lamp time settings
• E-mail notification (SMTP) to send alerts to your handheld device
• Enterprise SNMP plug-in available

Network projection — content over IP

You can use EasyMP Network Projection to project your computer content through the projector, via a network, for effective meetings, presentations and digital signage applications. You can use either wired or high-security wireless LAN connections and project the same or up to four different images on up to four projectors, or display a panoramic image.

Full networkability

EPSON networked projectors can also be accessed from your browser via an internal web page. Whether you assign a static IP address or enable DHCP, the projector becomes accessible once it's integrated in your network. The internal web page lets you control items such as network configuration, projector settings and e-mail alerts.

Message broadcasting

This innovative feature enables you to broadcast customized images/alerts over the network for announcements or instructions. Messages can be sent to up to 1024 projectors simultaneously and will overwrite the current screen content if the projector is being used, unless this function is disabled by the presenter. If the projector is off, message broadcasting will turn the projector on and then display the message.

Powerful content management

Split-screen

Split-screen allows you to display content from two inputs simultaneously, side by side, on a single screen with the following features:

- Three layout options, as shown below
- Video and presentation materials displayed simultaneously
- The ability to run video on both screens

Layout Option 1: 50-50% split-screen

Layout Option 2: Main image on the left

Layout Option 3: Main image on the right

Multi-PC projection

EPSON Multi-PC Collaboration utility allows you to display four individual PC screens simultaneously over the network with another 12 users connected to the same projector on Standby mode. You can drag and drop participants into or out of one of the four quadrants. This feature is a great tool for meetings or classroom projects where multiple users want to present and compare their screens. You can also connect up to four remote projectors at the same time and show the same multi-screen image — another great tool for remote meeting setups.

Easy and flexible installations

Centered lens design

The PowerLite Pro G5550 makes installation easy to plan with lens-to-screen alignment. Installers can position the ceiling mount, screen and projector independently of one another, knowing that the center of the screen will align with the lens at the center of the projector.
Optional Lenses

A 1.8x standard lens is included for remarkable placement flexibility. For even greater flexibility, Epson offers a total of five lenses with varying ranges, including a rear-throw lens. This allows users to choose the motorized lens most suited for their environment. A quick-release lever allows for a quick, easy lens exchange.

Off-axis, flexible installation

The Powerlite Pro G5550 also features a ±30-degree tilt operation for off-axis positioning flexibility. As a result, it can be used for a wide range of applications, such as projecting on angled surfaces. EPSON technology keeps the projector running without compromising performance or causing overheating.

±30°

▲ Off-axis, flexible installation

EPSON lens shift technology

In addition to added reliability and amazing color performance, Epson's industry-leading 3LCD technology enables this projector to achieve a wide range of lens shift capabilities, allowing you to install around obstacles. This lens shift technology enables an incredible range of ±50 percent on the vertical axis and ±10 percent on the horizontal axis.

Quick Corner®

This innovative feature allows you to move any of the four corners of an image independently at setup, using the remote control, for a perfectly rectangular picture.

Keystone correction

Adjusts up to ±40 degrees vertically and ±20 degrees horizontally to easily achieve a perfect square image.

Low cost of ownership

Long-life lamp that's easy to replace

This high-efficiency lamp lasts up to 2000 hours in Normal Mode and up to 3000 hours in ECO Mode.[6] It can be replaced quickly and easily, without having to uninstall the projector from the ceiling.

Long-life electrostatic air filter

This innovative filter was designed to protect the optical engine, lamp and electronics from small dust particles that can enter any projector. It has a recommended 3000-hour filter cleaning schedule[7] and can capture particles as small as three microns, due in part to its pleated, expanded design.

Built-in 7 W speaker

• For multimedia applications — convenient built-in speaker

Built-in closed captioning

• Accommodates those with hearing impairments

• Delivers important content when audio broadcasting is not preferred

• Helps save money — no need to pay for an additional decoder and its installation

• Effective and easy to use — easily enabled or disabled through the projector remote or menu

>>> Phase one projected to be early.

---

1 Color and white light output will vary depending on mode selected. White light output measured using ISO 21118 standard.

2 This projector does not meet the DICOM standard Part 14 and should not be used as a medical diagnostic device.

3 Data source: ProjectorCentral.com Jan 2011. Average of 1038 shipping models for which manufacturers provided lumens and total power data, all resolutions and brightness levels.

4 See our website for convenient and reasonable recycling options at www.epson.com/recycle

5 SmartWay is an innovative partnership of the U.S. Environmental Protection Agency that reduces greenhouse gases and other air pollutants and improves fuel efficiency.

6 Lamp life will vary depending upon mode selected, environmental conditions and usage. Lamp brightness decreases over time.

7 Recommendation based on normal room conditions. Cleaning requirements may vary depending on use, environment and other conditions. Cleaning intervals may be adjusted to accommodate the environment in which the projector is used.
