Trend of Fiskars share price compared to Hex (1997=100)

Bertel
Langenskiöld

President's Review

In 2001, Fiskars continued to build its strategy on the industrial operations comprising of Fiskars Brands, Inc. (former Fiskars Consumers Products, Inc.) and Inha Works. The other activities are the Real Estate Group and Investment Operations.

Consumer products form the biggest one of these business areas. The former name Fiskars Consumer Products, Inc. was changed into a shorter and more appealing form, Fiskars Brands, Inc., as from January 2002.

The past year was one of major changes for Fiskars Brands. The declining trend in the United States that set in already in late 2000 continued throughout 2001 with significant impacts even on the global economy. In the United States, Fiskars Brands' sales decreased by 10 %, further aggravated by the events of September, which led to a further reduction in consumption.

On the other hand, sales in Europe and other markets continued to be stable and reached the level of the previous year.

In this situation, it was imperative to focus our strategy and take steps to restore profitability. Significant changes were introduced during 2001 in the corporate management of Fiskars Brands. Consolidation of the previously relatively dispersed operations was started and for example administrative functions are now mainly centralized in Madison, Wisconsin. The new management appointed to coordinate European operations has its seat in Brussels. Since our principal customers are major international companies, it has become necessary to centralize also marketing and sales. We believe this will give us the possibility to better serve our customers and improve the penetration of the comprehensive offering of Fiskars Brands.

The efforts carried out in the area of customer service have yielded results and the retail chains Wal-Mart and Home Depot nominated Fiskars Brands as Category Manager in several product categories. Outstanding customer service combined with superior products is the strength of Fiskars Brands that will ensure Fiskars leading position in its chosen sectors.

In the past year, development efforts were focused on consolidation as well as on improving capacity utilization and the general efficiency of operations. As a result of this, the number of personnel decreased by 800. Inventory levels decreased and were a significant element in improving operational cash flow.

Although the structural development is a continuous process, major non-recurring costs cannot always be avoided; this was the case also in 2001. The structural development work will continue in the future.

In pace with the structural program, Fiskars Brands continues to focus on the development of new innovative products. Like so many times before, numerous new products launched during the year won highly valued design awards such as the German Red Dot Award and the Chicago Athenaeum Good Design Award. Development of product innovations will naturally be pursued with the same or even higher intensity.

Thanks to the implemented measures, Fiskars Brands now has a structure that ensures the potential for profitable operations in the prevailing situation and the capacity to face the challenges brought about by the anticipated economic upturn.

Inha Works performed well in 2001 in spite of the weakening market for hinges attributable to the sluggish trend in the building industry and of the declining demand for rail fasteners. The outlook for Inha's main product category, Buster Boats, was good. This trend is expected to prevail as the new models, Buster Magnum and Buster S, were very positively received both by customers and professional trade publications.

Management of Fiskars Real Estate assets continued according to established practice. The lands and forests are managed in a way that ensures profitability and productivity while giving attention to environmental aspects. Development plans for the areas located in the municipality of Kisko were completed, and this added a significant mass of building sites, mainly for summer houses, to the real estate assets of the corporation. Planning on the Hanko peninsula continues.

As numerous visitors to Fiskars Village have been able to witness, the company is also determined to pursue its efforts to maintain and improve the vitality of the area although it has been necessary to consolidate industrial activity in the Pohja region and move production from Fiskars to Billnäs.

Fiskars' long-term investments mainly consist of the holding in Wärtsilä Corporation where Fiskars is the biggest single shareholder, as well as of placements in several international investment funds.

The sale of Sanitec shares in June 2001 also improved the consolidated cash flow.

Today Fiskars is well prepared for future challenges. Serving our customers – both consumers and retailers – by supplying outstanding products is a challenge we are happy to take on in a way worthy of our 352-year old company.

I wish to thank our customers, cooperation partners, employees and shareholders for the past year, and look forward to our continued good cooperation.

Helsinki, February 2002

Fiskars Brands

Fiskars' biggest industrial operations consist of consumer products organized under a subsidiary called Fiskars Brands, Inc. and it is headquartered in

Madison, Wisconsin, USA. United States and Europe are the principal markets and the company encompasses 29 individual operating units with over 4.300 employees worldwide. Fiskars Brands maintains dedicated manufacturing, sales and distribution facilities on a global basis, focusing on specific countries and product lines.

From the beginning of 2002, the name of the company was changed from Fiskars Consumer Products Inc. to Fiskars Brands, Inc. Approximately 70% of Fiskars Brands' sales are generated in North America and 27% in Europe, with small but growing markets outside of these two region, primarily in Latin America and Asia.

The past year was a period of significant changes. The company focused on its core business operations with renewed emphasis on marketing and customer service. Notwithstanding global uncertainty and the weakest operating environment in two decades, the positive impact of the new management and other structural measure became apparent in the year's financial results.

Recognition of Fiskars name was further consolidated in the United States and Europe boosting Fiskars Brands' strong position as reliable supplier. A continuous flow of new innovative products into markets has been an essential part of Fiskars Brands' strategy. This will provide the basis for the long-term growth of the company and consolidate its established market position.

Consumer products are divided in three distinct product categories: Home, Office and Craft; Lawn and Garden; and Recreation.

Joy

for the hands and eyes

At least 30% lighter to use. At least 30% more economical to produce. Soft and cheerful in the hand of the user, hard and aggressive at work. Functionality and production technology protected by patent, designs by registration. This is how Fiskars defines a marketable innovation. A joy for millions of hands and eyes.

HOME, OFFICE AND CRAFT

Fiskars is known worldwide for its orange-handled scissors and other original and innovative products. The most important product lines for home and office include a wide range of cutting products, high-quality floor mats and electronic power surge protection equipment. Further, the houseware offerings include a wide variety of premium cutlery and kitchen aids, which will be imported from Europe and introduced to the US markets in 2002.

Fiskars school and hobby product line includes scissors designed for different age groups, and a broad line of creative hobby products for children. The company has been cooperating with educators throughout the world and makes for example downloadable lesson plans available to teachers (www.fiskars.com). During the year, this product group received special recognition for its scissors from the National Association of Teachers (USA).

The products are marketed through a worldwide distribution network and manufactured primarily in the United States, Finland, Mexico and Italy.

LAWN AND GARDEN

The Lawn and Garden group is a global manufacturer and marketer of a wide variety of products for lawn and garden activities and outdoor entertaining. The group maintains operations in the United States, Finland, UK, Denmark, Germany, Sweden, Norway, Poland and Russia.

Fiskars black-and-orange cutting garden tools are recognized products trusted for their high quality

appreciated for their ergonomics. Fiskars products are also known for their award-winning design. Several design awards, such as the Finnish Design Award, the European Design Award and the Chicago Athenaeum Good Design Award, enhanced the reputation of the Lawn and Garden products. The innovatively designed trimmers won the prestigious German Red Dot Award for excellent design. Watering tools, decorative pottery for plants and garden furniture are other products in this category.

Fiskars garden tools were also named Category Managers for both Wal-Mart and Home Depot retail outlets in the United States.

RECREATION

The recreation and leisure group supplies tools for hunting, fishing, biking and camping. The best-known product lines are axes, camping saws and camping spades approved also by Nato, as well as Gerber multipurpose tools and knives.

Manufacturing units are located primarily in the United States and Finland, and the group serves global markets through worldwide distribution channels. Recreation and leisure products are estimated to possess considerable growth potential above all in the US and European markets. Both specialized stores and international retail organizations have shown interest in these product lines. A major recognition for Gerber products during the year was being named Category Captains at Wal-Mart.

Fiskars and Gerber are the principal trademarks.

NET SALES BY MARKET AREA

Inha Works manufactures Buster aluminum boats, hinges to the door and window industry, special-purpose radiators and rail fasteners. The principal markets are Finland, other Nordic countries and Eastern Europe.

The production layout of the factory were upgraded during the year, internal logistics was improved and new facilities were built for boat and hinge production. These measures will pro-

vide the basis for further improvement of productivity and quality development.

The strong demand for motorboats weakened in 2001. However, the sales of Buster Boats in Finland and Scandinavia remained on a high level and deliveries to Russia started.

Buster is the European forerunner in development of aluminum boats. The boats are available in seven different size classes. The new Buster Magnum, which represents a new generation of design and technical characteristics, was launched towards the end of the year. The boat was enthusiastically received in Nordic media and won the Boat of the Year 2001 Award at the Scandinavian motorboat exposition in Stockholm. Also the new Buster S was presented to the public. The position of Buster Boats as the European market leader is strengthened thanks to energetic improvement of production technology and systematic product development.

Sales of hinges declined towards the end of the year in pace with the stagnating growth in the Finnish construction sector. At the same time exports increased by 30% mainly to Sweden, Russia and Estonia. As a result of product development in cooperation with customers, the refining level of hinges is being further improved to meet customers' requirements. Increased exports and production rationalization measures have consolidated our position as the leading Nordic supplier of hinges.

The Formaterm radiator range has been renewed and continues to offer popular concepts for heating and drying of humid rooms. Thanks to their modern design they are ideal for demanding interiors.

Rail fasteners, which represent the traditional steel processing expertise of Inha Works, are sold to the Nordic railways under long-term supply agreements.

Ingmar
Lindberg

Real Estate Group

Fiskars Real Estate operations consist of the management of 15,000 hectares of real estate properties and related services. The land holdings situated in the Southwest of Finland represent a considerable corporate asset and include more than 100 lakes and 250 km of shoreline.

Most of the land holdings, 11,000 hectares, are in and

around the old Fiskars Village. Traditional forestry and farming are carried on in this area according to long-term plans, and the forests are harvested in accordance with forest management plans to maintain a balance between regeneration and demand based on long-term contracts with external parties. An interesting specialty that has emerged in recent years are the deliveries of quality wood for instance to the furniture industry. The raw material is mainly harvested in the company's own forests and supplemented by purchases from other sources.

The revenues from the real estate operations are partly used to maintain the historically valuable buildings at Fiskars Village and improve the surrounding landscape. The objective is to continue developing the Fiskars region as an attractive place to work and live in and to offer tourists an interesting opportunity to visit this more than 350 years old, historically unique and still living industrial community.

In 2001, the upgrading of the village has proceeded at a slightly calmer pace. However, even during last year many new working facilities were renovated for artisans moving into Fiskars. This work will continue in 2002. The plan to increase accommodation capacity in the area was modified to some extent in 2001 and construction will begin this year.

The remaining 4,000 hectares of land holdings of Fiskars are located on the Hanko peninsula. The real estate company Ferraria has prepared a partial general plan for the area together with the neighboring municipalities with the objective of creating the conditions necessary for future development. The environmental authorities approved the plan in 2000. Preparation of a general plan for the Skogby-Harparskog area has started. The purpose is to attract new permanent settlers and environmentally friendly small-scale industry to this beautiful environment close to the sea.

Living **soul**
of the company

Fiskars is also a place, an industrial village with more than 350 years of traditions, surrounded by extensive lands and forests owned by Fiskars. This birthplace of the dynamic company will not be a museum; instead it is given the possibility to achieve good results from forest management and real estate development. The company invests in Fiskars Village to keep its culture alive.

Shareholdings

Fiskars holds 17.5% of the share capital and 23.9% of the votes in Wärtsilä Corporation.

Wärtsilä is the leading global supplier and a major provider of marine propulsion equipment and decentralized power generation systems and supporting services. The Group also operates a Nordic engineering steel company and manages substantial assets that support the core business. The Group's brand names are Wärtsilä, Sulzer and Imatra Steel.

Wärtsilä's consolidated net sales in 2001 amounted to EUR 2.4 (2.7) billion. Operating profit was EUR 524 (367) million, which included non-recurring capital gains of EUR 550 million on the sale of Assa Abloy and Sanitec shares and EUR 122 million in provisions for the Power Divisions. Profit before extraordinary items was EUR 509 (336) million. The Group has 10,800 employees.

Wärtsilä's Power Divisions comprise Marine, Power Plants and Service. The Power Divisions' net sales totaled EUR 2.3 (2.3) billion and its operating profit was EUR 88 (86) million. In research and development, the Power Divisions placed highest priority during 2001 on introducing the smokeless and dual-fuel engines as well as on developing the quality of operations and products.

Wärtsilä Marine Engines offers shipyards and shipping companies complete marine propulsion systems. Wärtsilä holds a strong position in the marine market, particularly in the RoRo and RoPax, cruise ship and large containership markets.

Wärtsilä Power provides complete energy generation solutions using natural gas, oil, Orimulsion® and biofuels. USA and Continental Europe were the largest markets.

Wärtsilä supplies a comprehensive portfolio of services for its marine and power plant customers. Wärtsilä service agreements now cover more than 10,000 MW of power, or roughly 8.6% of Wärtsilä's active installed base.

Imatra Steel's net sales 2001 amounted to EUR 186 (194) million. Operating profit was lower than in the previous year and totaled EUR 6 (17) million. (www.wartsila.com)

Other holdings

Fiskars has also holdings of approximately EUR 23 million in several capital investment funds, mainly the EQT funds. (www.eqt.se)

Report by the Board of Directors

Corporate net sales decreased by 7% from the previous year to EUR 762 million (824) as a result of the weakening trend in the US market.

The non-recurring costs of EUR 34 million (14) recorded during the year pressed the operating result down to EUR 12 million (28). Income from investments increased to EUR 51 million (43). Result after financing items totaled EUR 36 million (38) and earnings per share amounted to EUR 0.41 (0.46).

The Board of Directors proposes the same dividend as in the previous year, i.e. EUR 0.31 per share of series A and EUR 0.29 per share of series K. Thus the dividend distribution will be EUR 16.8 million.

Change of name

The name of the American subsidiary under which the consumer products operations are organized and managed was changed to Fiskars Brands, Inc. (previously Fiskars Consumer Products, Inc.). This change, which is part of the program aimed at strengthening recognition of Fiskars brands, has become an efficient sales supporting tool.

Operational results

Net sales decreased by 10% due to declining demand in Fiskars' principal market United States. Sales in Europe grew

by more than 5%. United States accounted for 67% and Finland for 5% of total sales.

Sales of consumer products decreased in most product categories in the US market during 2001; the drop was most dramatic in flowerpots. While demand for some product categories, above all Fiskars and Gerber brands, showed a clear recovery already in the last quarter of the year, the overall sales performance was not yet satisfactory. Several new products were developed during the year and were positively received in all markets. Sales in Europe grew, although the trend was declining in some market areas, especially UK. In the Nordic markets, sales remained on the previous year's good level.

The costs of restructuring of the consumer products business and costs attributable to a weakening market situation totaled EUR 34 million (14). These costs were mostly recorded for restructuring of the US flowerpot and sunshade businesses and include write-down of inventories. As a result of these costs, the operating profit from consumer products decreased to EUR 11.0 million (27.0). However, the profitability of the Home, Office and Craft category stayed on a very good level. The performance of the Garden category was satisfactory in the United States and the result from garden furniture improved over the previous year. The overall result of the European operations improved in spite of the unsatis-

factory performance trend in Germany.

Fiskars supervises the protection of its patents and designs systematically and efficiently. In a litigation case in the United States during the year, a competitor was sentenced to pay considerable damages for having copied Fiskars products.

Inha Works' net sales decreased by about 3% from the previous year to EUR 22 million; the decline was mainly attributable to a moderate decrease in boat sales in Finland and Sweden. Demand for hinges slowed down in the Finnish market compared with the previous year, while exports grew clearly. Inha Works' operating result decreased to EUR 2.6 million (4.0) due to higher raw-material prices and changes in the production structure.

Income from long-term investments totaled EUR 51.1 million (42.7) and consisted mainly of dividends from Wärtsilä and proceeds from the sale of Sanitec shares.

The result from Real Estate operations improved and continued to be good.

Capital expenditure and financing

Investments during the year totaled EUR 40 million (104); EUR 31 million (33) of this related to industrial operations. The most significant single capital expenditure project was the ERP system acquired for the US units.

The project will be implemented over a period of three years.

Investment operations accounted for EUR 8 million (49) of the capital expenditure. In addition in September, the convertible bonds loan issued by Wärtsilä was converted into shares, after which Fiskars' holding in Wärtsilä increased to 17.5%.

In June, the corporation sold 6.3% of its holding in Sanitec Corporation for EUR 57 million which yielded proceeds of EUR 11.7 million.

Cash flow from operations was exceptionally good as energetic steps to reduce the level of inventories and receivables started bearing fruit. Also the operational cash flow from investments was strong.

As a result of these factors, the balance sheet total decreased by about 9% to EUR 929 million (1,016). Equity ratio improved to 44% (39) and gearing was 96% (121). Solvency remained good, and the corporation had unused available credit limits. Interest-bearing liabilities were amortized by EUR 90 million during the year.

Personnel

Mr. Bertel Langenskiöld, M. Sc. (Eng.), assumed his responsibilities as President and CEO of Fiskars Corporation on 1 January 2001. Ms. Leena Kahila-Bergh, M. Sc. (Econ.), was appointed Vice President, Corporate Communications, as from 1 February 2001.

Mr. William J. Denton, President of Fiskars Brands, Inc. renewed the structure of the consumer products operation and strengthened its management team. The organization was streamlined and production plants were consolidated. Also the European regional organization was strengthened and its management moved to Brussels, Belgium.

Inha Works' President Mr. Pauli Lantonen retired at the end of June and the Executive Vice President of the company, Mr. Vesa Koivula, succeeded him from the beginning of July.

The number of personnel decreased dramatically, especially in the United States and was 4,556 at the year-end (5,337).

Annual general meeting 2001

The Annual General Meeting of Fiskars Corporation held on 15 March 2001 decided to distribute a dividend of EUR 0.31 per share of series A and EUR 0.29 per share of series K. The total dividend was unchanged from the previous year, i.e. EUR 16.8 million.

The resigning Board members Mr. Gustaf Gripenberg and Mr. Stig Stendahl were reelected for a term expiring in 2004.

KPMG Wideri Oy Ab, Corporation of Auditors, was reelected Auditor of the corporation.

The Board of Directors was granted authorization for one year to purchase and transfer not more than 1,962,303 A-shares and not more than 805,918 K-shares of the corporation. The previous corresponding authorizations were canceled. The granted authorization has not been used.

Share prices

The price of Fiskars A-share at the year-end was EUR 8.50 (7.40) and the price of the K-share EUR 8.00 (7.50). The price of the A-share increased by 15% and the price of K-share by 7%. The HEX Index of the Helsinki Exchanges decreased by 32% during the year. In 2001, a total number of 1,263,271 A-shares (3.2%) were traded at the average price of EUR 7.71 and 46,916 K-shares (0.3%) at the average price of EUR 7.93.

Outlook

The outlook for 2002 is mixed and consumer behavior is still very difficult to predict especially in the United States. The measures taken during 2001 in order to improve the efficiency of operations will have a positive effect on the results of 2002. However, restructuring will continue during 2002 and cause non-recurring costs.

Corporate sales are expected to grow as a result of the initiatives taken to improve customer service and harmonize product offerings. In addition, the growth potential of recently launched product innovations is significant. Especially the Fiskars and Gerber brands are expected to increase their market shares and strengthen Fiskars' established position in the distribution channels for consumer products.

Revenues from investment operations will represent a significant income item also in the current year.

The liquidity and financial structure of the corporation will remain stable.

General Accounting Principles

The financial statements have been prepared in accordance with regulations in force in Finland. These regulations are in conformity with the directives of the European Community.

The financial information is presented in euro.

The preparation of financial statements in conformity with regulations in force and generally accepted accounting principles requires management to make estimates and assumptions that affect the valuation of assets and liabilities and reported amounts of revenues and expenses. Actual results could differ from those estimates.

Scope of the Consolidated Financial Statements The consolidated financial statements include the accounts of all companies where Fiskars directly or indirectly holds more than 50% of the votes. Acquired or established subsidiaries and investments in participating interests are included in the consolidated financial statements from the date of acquisition or establishment to the date of divestment.

Intercompany transactions, dividends, receivables and liabilities as well as unrealized intercompany profits have been eliminated.

The purchase method of accounting is used in elimination of intercompany shareholdings. Tax liability on the acquired company's untaxed reserves is included in deferred tax liabilities. The remainder is included in shareholders' equity. Where appropriate, the excess of acquisition cost over the value of acquired net assets is allocated to various balance sheet items. The residual is accounted for as goodwill and amortized over ten to twenty years. The amortization period is dependent on estimates concerning the useful economic life of acquired brands.

Investments in participating interests (20%–50% of votes, more than 20% of shares) are included in the financial statements by applying the equity method of accounting. A proportional share of net income is included in financial items. Goodwill is amortized and any unrealized internal profit is eliminated. In the balance sheet the investment is valued at cost adjusted for the corporation's share of net assets accumulated after the date of acquisition.

Investments in other companies are stated in the balance sheet at cost or at net realizable value.

Transactions in foreign currencies Foreign currency denominated income statements are translated into euro at the average exchange rate for the financial period.

Balance sheets are translated at the end of period exchange rate. Consequently, net income according to the income statement will differ from net income according to the balance sheet. The difference is included in retained earnings.

Currency translation adjustments on foreign subsidiaries' opening retained earnings are included in consolidated retained earnings. Currency translation adjustments on other reserves are included in consolidated other reserves.

Transactions in foreign currencies are recorded at the rates of exchange ruling at the date of the transaction.

Unsettled balances in foreign currencies are translated at the rates prevailing on the balance sheet date, except for advance payments received or paid which are translated at the exchange rates on the payment date. Open hedging instruments pertaining to foreign currency items are valued at the market value, including interest components.

Both realized and unrealized exchange gains and losses have been included in the financial items in the income statement.

Net sales Net sales is defined as invoiced amount less indirect taxes, rebates and exchange rate adjustments on foreign currency denominated sales.

Research and development costs Research and development costs are expensed when incurred.

Retirement benefit plans In the consolidated accounts the

retirement benefit plans have been accounted for in accordance with IAS.

The retirement plans for the Finnish companies' employees are funded through payments to independent insurance companies. A small part of already retired employees receives their benefits from a trustee-administered fund. Any change in the deficit in the trustee-administered fund is included in net income of the parent company. The net deficit of the fund, which is almost fully covered, is taken up as a liability in the balance sheet.

Extraordinary income and expense Income and expense of significant size and not a part of continuing operations, e.g. sale or discontinuation of a separate line of business, are taken up as extraordinary items, net of tax.

Fixed assets and other long-term investments Fixed assets are stated at cost less accumulated depreciation according to plan. Certain land holdings have been revalued.

Revaluations are based on market values. If the market values fall below book value, the revaluation is reversed correspondingly.

Fixed assets are depreciated and amortized over their expected useful lives. Typically, the following expected useful lives are applied:

• goodwill	10–20 years
• other long-term expense	3–10 years
• buildings	25–40 years
• vehicles	4 years
• machinery and equipment	3–10 years

Revaluation amounts of land and water holdings are not depreciated.

Gains and losses on disposal of fixed assets are included in operating profit. Revaluation amounts of disposed assets are charged directly against equity.

Inventories and financial assets Inventories are stated at the lower of cost or net realizable value. Cost includes both direct and indirect costs. Cost is determined on a first-in-first-out (FIFO) basis. Net realizable value is the amount that can be realized from the sale of the asset less any related sales cost.

Leasing Operating leases are expensed. Objects leased under financial lease agreements are recorded as assets, and the corresponding liability is recorded as debt.

Provisions Provisions consist of reserves for future costs to which the corporation has committed itself or of losses that are deemed probable and do not generate a corresponding income.

Appropriations Appropriations in the parent company balance sheet consist of untaxed reserves and depreciation in excess of plan. In the consolidated balance sheet appropriations are taken up as equity and deferred tax liability. The change in appropriations is split into net income and increase or decrease in deferred tax cost.

Income taxes Income taxes consist of the aggregate current tax expense in the group companies, prior year taxes and deferred taxes. Taxes related to extraordinary items are shown in connection with these items.

Deferred tax assets and liabilities are calculated at the current tax rate or, if a future tax rate has been announced, at that announced tax rate. Deferred tax liabilities are recognized in full whereas deferred tax assets are recognized only to the extent it is considered probable that the tax asset will realize a future tax savings.

Dividends The dividend proposed by the Board of Directors has not been included as liability in the financial statements. Dividends to be paid are taken up as a liability following the decision of the Annual General Meeting.

Total	-22.3	-10.2	-60.6	-66.1

FINANCIAL RISK MANAGEMENT

Financing and financial risks are managed centrally from the Corporate Head Office in Helsinki.

Foreign exchange risks

Two thirds of the corporation's business is in North America and the rest is mainly in Europe. The revenue and expense of the North American business is mainly US dollar denominated while European business is mainly done in various European currencies.

The corporation does not use derivative financial instruments speculatively. Open contracts pertain mostly to hedging of financing transactions, and have been valued at market.

Interest rate risk

Approximately 90 per cent of the corporation's funding need is US dollar denominated.

With the exception of pension loans, all loans are floating interest rate loans.

Long-term interest swap agreements with a total value of 110 million US dollars reduce the corporation's exposure to fluctuations in short-term interest rates. Forward rate agreements with a total value of 105 million US dollars reduce the interest rate exposure in 2002.

Liquidity risk

The group had 283 million euros unutilized long-term revolving credit facilities available to meet the obligations. In addition there are various other short-term credit lines with banks in the amount of approximately 60 million euros. In Finland the Parent Company has Commercial paper programs amounting to 200 million euros with its main banks.

FORMULAS FOR CALCULATION OF RATIOS

Return on investment in per cent	=	$\frac{\text{Earnings after financial items} + \text{interest and other financial expense}}{\text{Balance sheet total} - \text{non-interest bearing debt}} \times 100$ (average of beginning and end of year amounts)
Return on equity in per cent	=	$\frac{\text{Earnings after financial items} - \text{taxes}}{\text{Equity} + \text{minority shareholders' equity}} \times 100$ (average of beginning and end of year amounts)
Equity ratio in per cent	=	$\frac{\text{Equity} + \text{minority shareholders' equity}}{\text{Balance sheet total}} \times 100$
Earnings per share	=	$\frac{\text{Earnings after financial items} - \text{minority interest} - \text{taxes}}{\text{Adjusted average number of shares}}$
Dividend per earnings in per cent	=	$\frac{\text{Dividend paid}}{\text{Earnings (calculated as in Earnings per share)}} \times 100$
Dividend per share	=	$\frac{\text{Dividend paid}}{\text{Adjusted number of shares Dec. 31}}$
Price per earnings	=	$\frac{\text{Adjusted market quotation Dec. 31}}{\text{Earnings per share}}$
Equity per share	=	$\frac{\text{Equity}}{\text{Adjusted number of shares Dec. 31}}$
Dividend yield in per cent	=	$\frac{\text{Dividend per share}}{\text{Adjusted quotation Dec. 31}} \times 100$
Adjusted average share price	=	$\frac{\text{Value of shares traded during the period}}{\text{Adjusted number of shares traded during the period}}$

Share option program

The holders of warrants connected to the option program of 1998 are entitled to a maximum of 1,050,000 shares of series A corresponding to approx. 1.9% of the shares and approx. 0.3% of the votes. The warrants can be exercised as follows:

	Subscription period	Number of shares of series A	Subscription price/share €
Series B	15 May to 15 June 2002	maximum 525 000	13.18
Series C	15 May to 15 June 2003	maximum 525 000	10.10

Management's shareholding

On December 31, 2001, the Board members, the President and the Corporate Vice President controlled a total of 15,419,961 shares corresponding to 27.9% of the Corporation's shares and 32.0% of the votes. By exercising the warrants connected to the option program of 1998 the President and the Corporate Vice President are entitled to a total of 105,000 shares of series A corresponding to 0.2% of the shares and 0.03% of the votes.

Shareholders' Agreement

In December 1992 a group of private investors and companies entered into an agreement on pre-emptive rights between the parties in case of sales of shares. The agreement is still in force and the group represents about 54% of the total number of votes.

Proposal by the Board of Directors to the Annual General Meeting

At the end of the financial year the distributable consolidated equity amounted to 318.4 million euros (306.6 million euros). The distributable equity of the Parent Company is 354.3 million euros (308.6 million euros).

For the accounting period of 2000 a dividend of 16.8 million euros was paid.

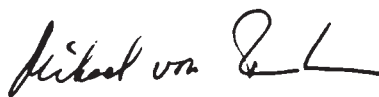

For 2001 the Board of Directors proposes a dividend of 0.31 euros per share of series A (0.31 euros) and 0.29 euros per share of series K (0.29 euros). Thus the dividend distribution would be:

on 39 246 066 shares of series A 0.31 euros/share, in total	12 166 280.46 euros
on 16 118 364 shares of series K 0.29 euros/share, in total	4 674 325.56 euros
Total distribution of dividend	16 840 606.02 euros

Auditors' Report

To the shareholders of Fiskars Corporation

We have audited the accounting records and the financial statements, as well as the administration by the Board of Directors and the Managing Director of Fiskars Corporation for the year ended 31 December 2001. The financial statements prepared by the Board of Directors and the Managing Director include the report of Board of Directors, consolidated and parent company income statements, balance sheets, cash flow statements and notes to the financial statements. Based on our audit we express an opinion on these financial statements and the parent company's administration.

We have conducted our audit in accordance with Finnish Generally Accepted Auditing Standards. Those standards require that we plan and perform the audit in order to obtain reasonable assurance about whether the financial statements are free of material misstatement. The audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by the management, as well as evaluating the overall financial statement presentation. The purpose of our audit of the administration has been to examine that the Board of Directors and the Managing Director have complied with the rules of the Companies Act.

In our opinion, the financial statements have been prepared in accordance with the Accounting Act and other rules and regulations governing the preparation of financial statements in Finland. The financial statements give a true and fair view, as defined in the Accounting Act, of both the consolidated and parent company result of operations for the year, as well as of the financial position at the year-end. The financial statements can be adopted and the members of the Board of Directors and the Managing Director of the parent company can be discharged from liability for the period audited. The proposed dividend is in compliance with the Companies Act.
