

## Pumpkin Howden's Field

Developed by John Howden of Massachusetts in the early 1970s, it defined "the look" in big Halloween pumpkins — deep orange color, defined ribs, and good handles. Fruits vary in shape and weight, typically averaging 18–26 lb. or larger.

## Pumpkin Big Max

---

Big Max is a large type of pumpkin of the species *Cucurbita maxima* that can exceed 150 pounds (68 kg) under ideal growing conditions. They are often bright orange in color, with fine-grained, yellow-orange flesh.

## Pumpkin Cinderella

---

Elegant and unique to the typical pumpkin shape. This French heirloom, non-GMO variety makes the perfect decorative pumpkin for any display.

## Pumpkin Galeaux D'Eysine

---

Galeux d'Eysines pumpkin seeds produce a lovely French HEIRLOOM pumpkin with salmon pink coloured skin covered in peanut-like warts caused by sugar swelling in the skins.

## Pumpkin Blue Doll

---

Blue Doll pumpkin has an exotic blue color to its blocky, deeply ribbed fruit. Large vines produce excellent yields of 15-20 lb. fruit that have a blue colored rind and sweet, deep orange flesh. Blue Doll's flesh is good for pies, soups or canning. Intermediate resistance to Powdery Mildew.

## Pumpkin Musquee De Provence (fairytale)

---

Thick, deep orange, moderately sweet flesh. In France cut wedges are sold in supermarkets and farmers' markets for cooking. Decorative. Late maturity. Long storage.

## Pumpkin Jarradale

---

Jarradale pumpkins are heirloom vegetables, making them the perfect addition to your roadside produce stand or farmers market. They're simple to grow for both beginner and experienced gardeners alike. Jarrahdale pumpkin seeds just need fertile, well-draining soil, sunshine and one hundred days to grow into a robust, tasty winter squash.

## Pumpkin Baby Boo

---

Baby Boo is a charming, all-white, miniature pumpkin that grows to the size of a tennis ball at around 7.5cm (3in) in diameter and 5cm (2in) tall. Each plant will bare 10+ baby pumpkins on vines that reach up to 10 feet in length.

## Pumpkin Sugar Pie

---

Sugar Pie Pumpkins are the traditional pumpkin for making pumpkin pies. It is because of their sweet, fine grained, orange flesh which is often more firm and less stringy than their carving cousins.

## Pumpkin Wee Be Little

---

- Wee-Be-Little is a true miniature pumpkin that produces remarkably small fruit that are about the size of a baseball. The fruit are smooth enough for painting have a bright orange color and thin, dark stems that are well attached.

## Pumpkin Connecticut Field

---

This heirloom variety, grown hundreds of years ago by Native Americans and New England settlers, produces hefty orange-gold fruits weighing 15-20 lbs. The round, smooth pumpkins have slightly ribbed skins and are the ideal size for big jack-o'-lanterns and fall decorations.

## Pumpkin Marinade Chioggia

---

A unique green warty Italian heirloom squash valued for its eating quality, and traditionally used in preparing gnocci and ravioli. The perfect shape for stacking, this novel ornamental is also long-storing.

## Zucchini Spineless Perfection

---

This zucchini has the same great flavor as Spineless Beauty but with improved disease resistance. Easy to pick plant with a delicious crisp flavor. You will find minimal scarring on this spineless perfection. These attractive and open planted zucchinis make harvesting easy.

## Zucchini Golden

---

Golden zucchini is an heirloom, open-pollinated, bush-type of zucchini. The foliage is said to be quite large, and coloration varies from medium green to yellow. The bushing quality of this squash means it needs plenty of space in the garden.

## Zucchini Black Beauty

---

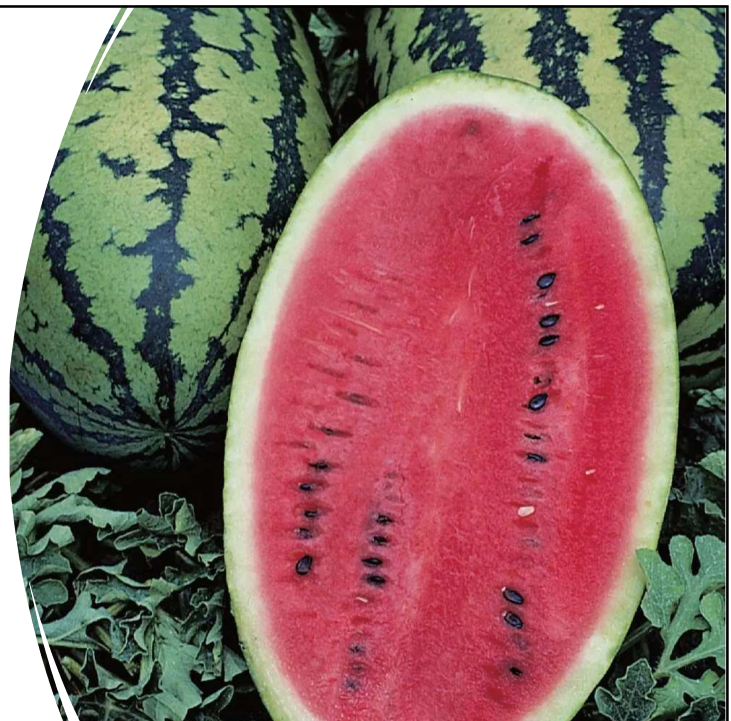

Black Beauty Zucchini is an heirloom Summer Squash that produces 6 to 8 inch long fruits. The outer skin is a dark green almost black color, with a creamy white inner flesh. Each plant grows to a mature height of roughly 12 to 24 inches tall, displaying a bush like growth habit.

## Watermelon All Sweet

---

Large, oblong 25-30 lb. striped melons grow to 17-19" long and 7" in diameter. Deliciously sweet, bright red flesh.

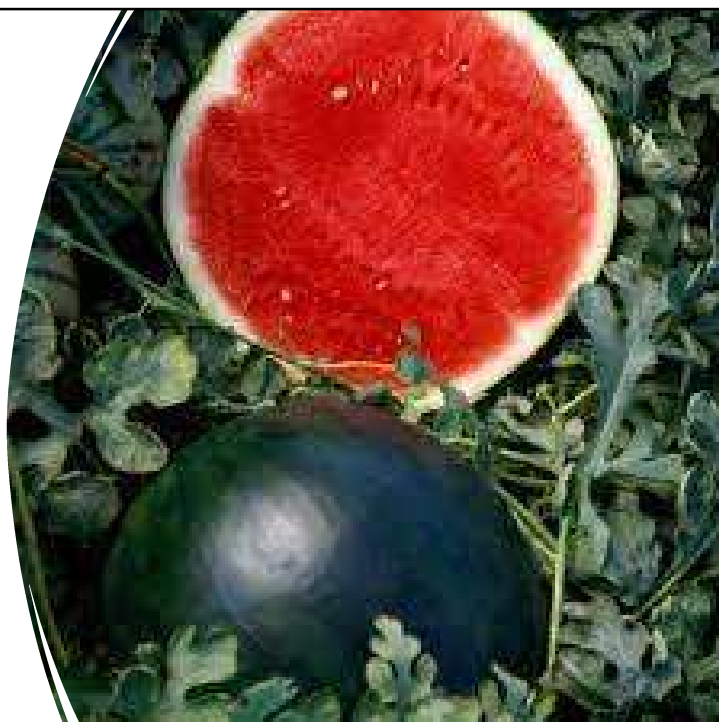

## Watermelon Sugar Baby

---

The sweetest, best-tasting watermelon you can grow. 'Sugar Baby's dark-green skinned melons grow 8" across—loaded with sweet, fine-textured, medium-red flesh. Large, oblong 25-30 lb. striped melons grow to 17-19" long and 7" in diameter. Deliciously sweet, bright red flesh.

## Watermelon Cal Sweet Bush

---

A patio-friendly watermelon! Cal Sweet Bush is among the most compact watermelon plants we've grown. Where traditional watermelon plants tend to be very pushy, intruding on neighboring crops, this one keeps a respectful personal space of 14–18 inches making it the ideal container plant. It produces 2–3, admirable 10–12 pound fruit that rival the size of melons from much larger plants.

## Watermelon Quetzali

---

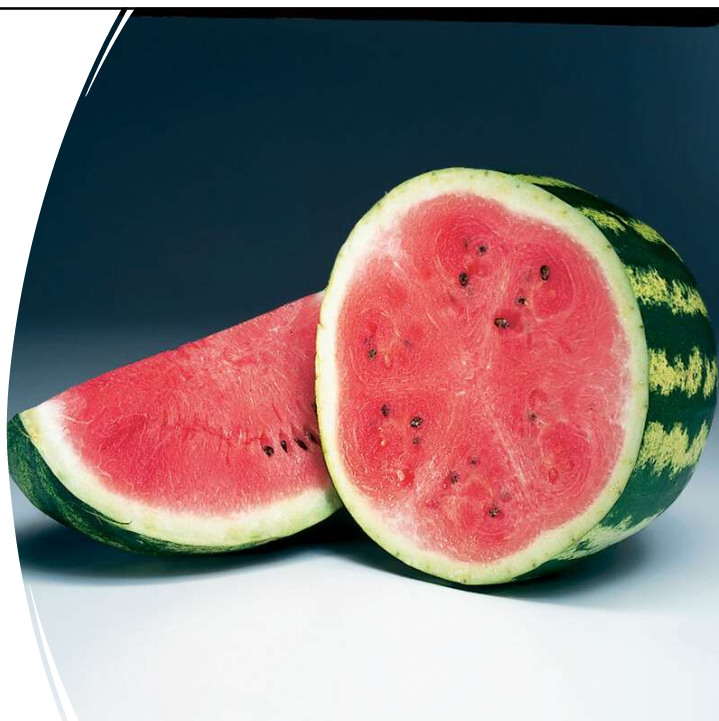

- Very sweet, crisp 7-13 lb. The rind is unusually thick, so loss to splitting tends to be low. Dark and light green stripes. Pink-red flesh, small seeds.

## Watermelon Crimson Sweet

---

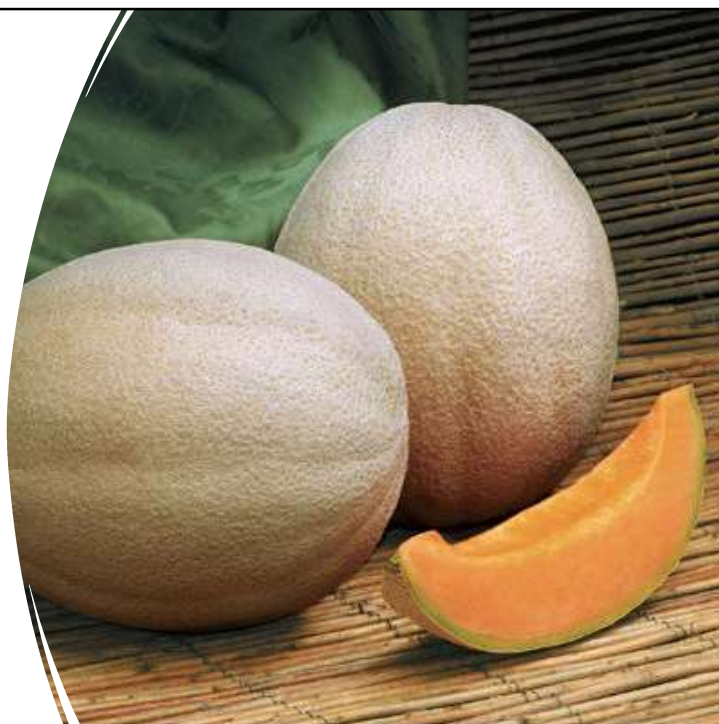

Dark and light yellow-green striped, 10" x 12" blocky oval fruits weigh in at 15–25 lb. Crisp, sweet pink flesh and vigorous vines.

## Melon Aphrodite

---

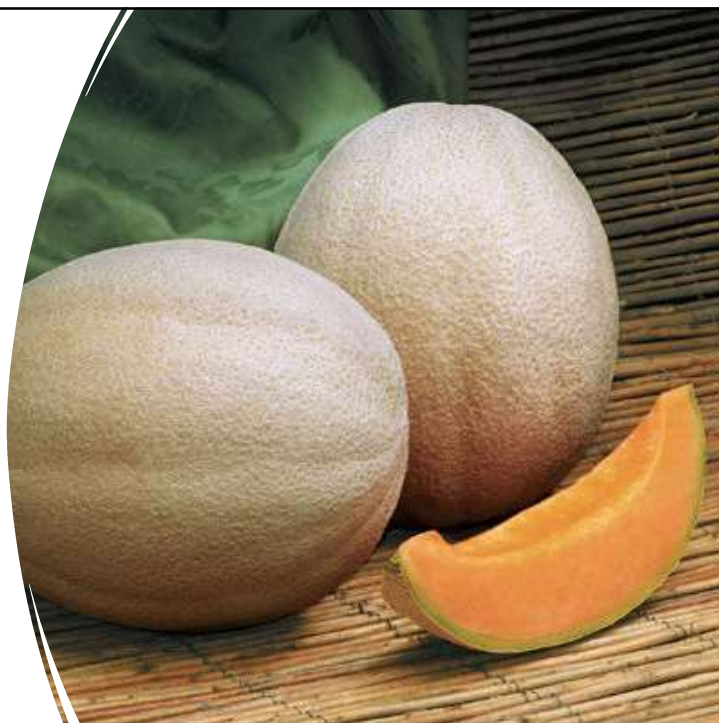

Aphrodite produces large melons weighing 6 to 8 lbs. and matures 2-3 days earlier than Athena. It has shown improved netting, which is an important advantage for fall plantings or under stressful conditions where the netting can be weak. Aphrodite muskmelon stores and ships well after harvest and its salmon colored flesh is firm and sweet.

## Melon Aphrodite

---

Aphrodite produces large melons weighing 6 to 8 lbs. and matures 2-3 days earlier than Athena. It has shown improved netting, which is an important advantage for fall plantings or under stressful conditions where the netting can be weak. Aphrodite muskmelon stores and ships well after harvest and its salmon colored flesh is firm and sweet.

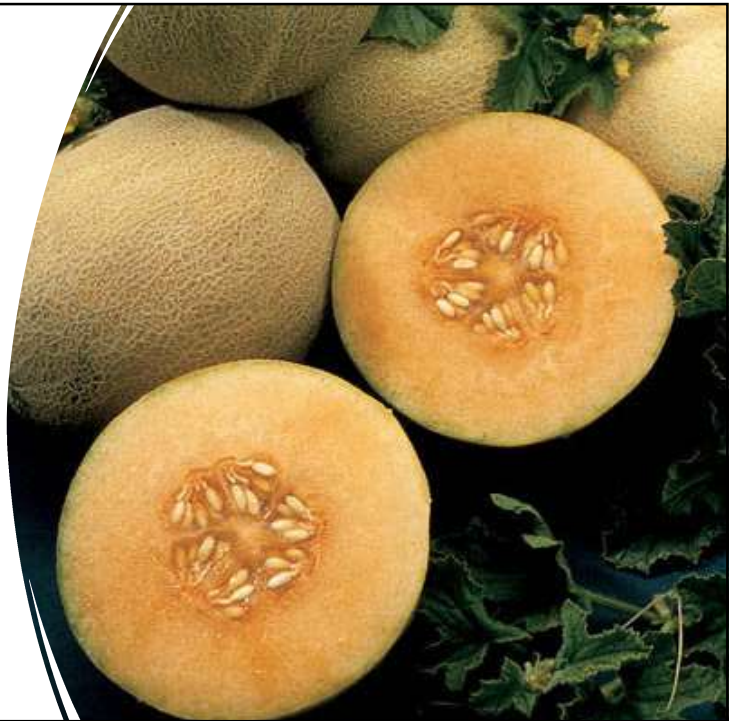

## Melon Ambrosia

---

Extra-sweet and juicy with a delectable aroma, these melons are good right down to the rind.

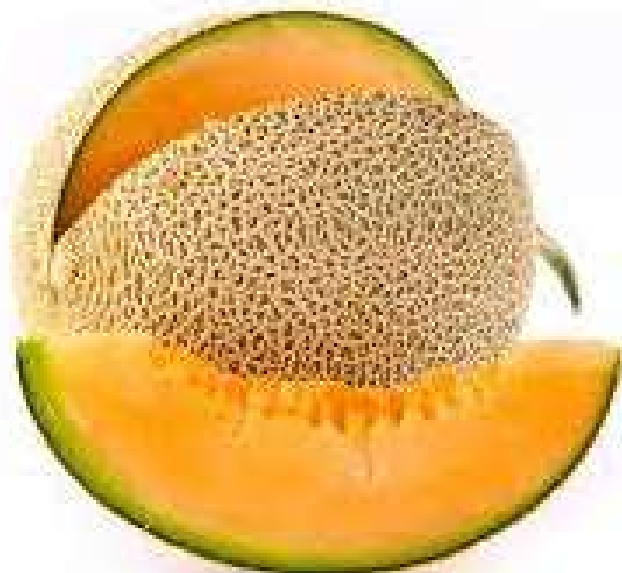

Ambrosia melon is an exotic melon hybrid that might be confused with a cantaloupe, but it's quite different. Its flesh is very sweet, tender and pale orange in color with a flavor described as "a combination of all melons plus flowers"

## Melon Hales Jumbo

---

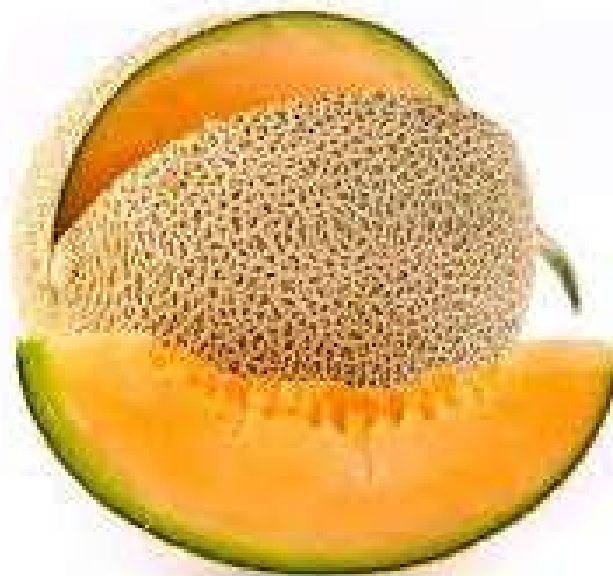

An old, classic favorite dating from the 1920s, this ribbed melon has a heavily netted skin. Also called muskmelon. As melons go, this one is a little more drought tolerant than most, but remember that all melons are more than 90% water. Likes hot weather. Delicious, firm flesh is rich with antioxidants.

At this stage the flesh is crisp and sweet and the shelf life is best. When the melons are allowed to fully mature, the flesh is sweet, pure white and soft.

## Cucumber Tasty Green

---

The incredibly tender skin on this favorite burpless cuke is an inky-green with faint ridges, and the flesh is crisp, juicy, and delicious. The fruit is 12 inches long, arising on vigorous vines that are resistant to powdery mildew and tolerant of downy mildew. A favorite for taste.

## Cucumber Patio Snacker

---

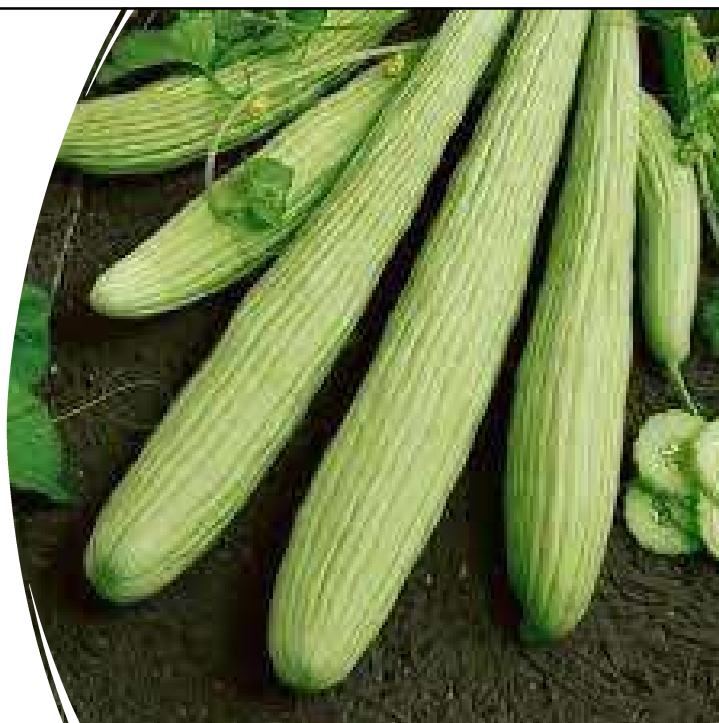

The healthy, vigorous plants yield white-spined, dark green-skinned fruit that are ideal for picking at under 2 inches wide and 6 ½–7 inches long. They are crunchy, flavorful and bitter-free. Keep picked, and you'll have continuous harvests all season long.

## Cucumber Armenian Yard Long

---

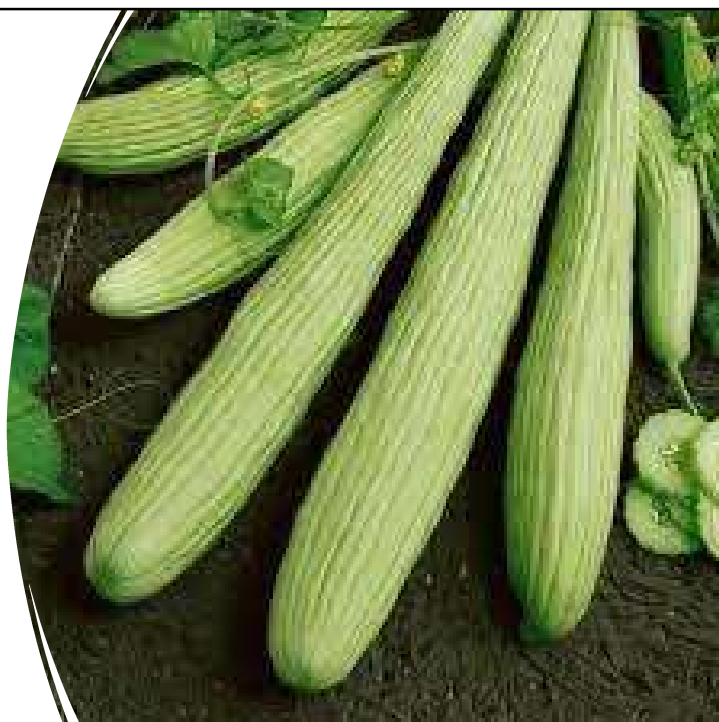

Light green, mild tasting, deeply ribbed fruit. The elongated fruit yields uniform, easily digestible, fluted slices.

## Cucumber Armenian Yard Long

---

Light green, mild tasting, deeply ribbed fruit. The elongated fruit yields uniform, easily digestible, fluted slices.

## Cucumber straight 8

---

Straight Eight Cucumbers are very dependable at producing prolific crops. These cucumbers are smooth, straight, deep green, 15-20 cm (6-8") long and 5-6 cm (2½") wide with rounded blunt ends. Early, vigorous and prolific, it tolerates mosaic virus well. It is a superb variety that has stood the test of time.

## Cucumber Lemon

---

Lemon cucumber does not have a lemon taste, only color, but has a thin, tender skin with a flavor a little milder than a regular cucumber's. One great advantage to this cuke is that you can eat it all at one sitting with no half-cuke left to store in the fridge.

## Cucumber Diva

---

Diva is simply delectable, with thin, tender skin, crisp flesh, and a flavor that combines sweetness with a genuine cucumber bite impossible to find in the bland supermarket varieties today. It arises very abundantly on vigorous, disease-resistant plants, giving you a huge crop of the finest burpless cucumber we have tasted in a long time.

## Crook Neck Summer Squash

---

Crookneck squash, named for the slight curves in their narrow necks, are easy to grow.

## Spaghetti Squash

---

Spaghetti squash is a medium-sized winter squash with an oblong shape, a creamy yellowish skin, and a relatively mild, neutral flavor. It's characterized by the way its cooked flesh separates into long strands resembling noodles—hence, the name spaghetti squash.

## Melon Early Dew

---

Ideal for Northern gardeners who will appreciate these round melons with tasty lime-green flesh inside a smooth, green-gold skin. Crisp texture and sweet flavor.

## Acorn Squash Taybelle

---

Ideal for Northern gardeners who will appreciate these round melons with tasty lime-green is a hybrid variety that will mature earlier than other acorn squash varieties. It has an intermediate resistance to powdery mildew which makes it a great option for humid and high-moisture growing conditions. flesh inside a smooth, green-gold skin. Crisp texture and sweet flavor.

## Delicata Squash

---

Delicata squash is a variety of winter squash with cream-coloured cylindrical fruits striped in green or orange that are cooked. As its name suggests, it has characteristically a delicate rind (or skin).

## Butterbaby Butternut Squash

---

Flavorful, high-yielding mini butternut squash on vigorous vines. The 4-6" fruit is uniform and classically shaped with attractive skin and beautiful interior flesh.

## Waltham Butternut Squash

---

Winter squash gives you the perfect reason to look forward to winter! The rich, sweet flavor of butternut quickly became a classic and has set a high bar. Roast, bake, or pureé into a soup for classic winter fare. 4 to 5 fruits per plant; solid stems resist squash vine borers. Stores for months!

## Blue Hubbard Squash

---

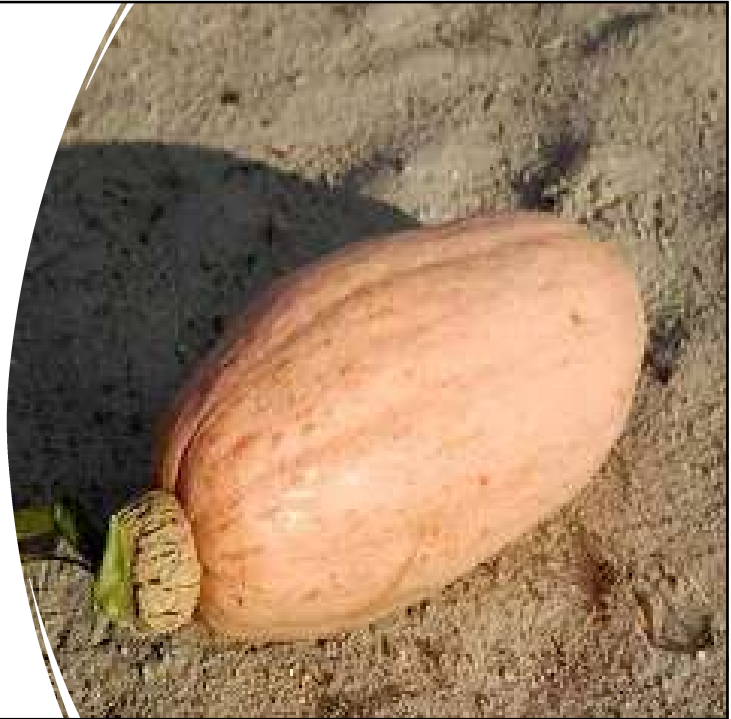

Blue hubbard squash is large in size, averaging thirty centimeters in diameter and ranging 5-40 pounds in weight. Oval and plump in shape, Blue hubbard squash is somewhat bulbous in the middle and slightly tapered at the neck leading to a corky, rough, light brown stem. The semi-thin rind is very tough, bumpy with some smooth patches, and pale blue-green-gray in color.

## Pink Banana Jumbo Squash

---

The Pink Banana squash is a great winter keeper! This popular jumbo squash can reach 48" in length and weigh up to 70 pounds! It is used for both canning and baking and is not stringy when picked when less than 30" long. The thin, brittle skin turns pink-orange at maturity, which is about 110 days.

## Melon Lilliput

---

The Pink Banana squash is a great winter keeper! This popular jumbo squash can reach 48" in length and weigh up to 70 pounds! It is used for both canning and baking and is not stringy when picked when less than 30" long. The thin, brittle skin turns pink-orange at maturity, which is about 110 days.

## Melon Yellow Crenshaw

---

Known for its sweet flavor, Crenshaw is a fine gourmet type melon with thick, mouthwatering flesh! Melons grow to about 6 pounds, and the rind turns yellow-green when ripe with salmon-colored flesh.

## Cucamelon

---

Prepare to be overwhelmed by the bounty of this plant. Although it reaches only about 4 feet long and scarcely 6 inches wide, it bears heavily all season, the small fruits forming among large, handsome 3-lobed leaves. Given sunshine and a good start, Mexican Sour Gherkin is prepared to take off, tolerating drought more effectively than many other vegetables, and free of pests.

## Shishito Pepper

Scoville Rating:  
50-200

---

Shishito peppers are small green peppers of Japanese origin. These peppers ripen from green to red, but they're typically harvested while still green. These peppers have a very thin skin. Their delicate nature means that they will cook quickly compared to heartier varieties like bell peppers

## Eggplant Hansel

---

Start harvesting the abundant fruits when they are only 3–4" long by 3/4–1" diameter. The compact, 24–36" plants produce tender, dark-purple fruit in clusters for easy harvesting. Hansel is non-bitter and perfect for grilling or slicing thin onto pizza.

## Eggplant Hansel

---

Start harvesting the abundant fruits when they are only 3–4" long by 3/4–1" diameter. The compact, 24–36" plants produce tender, dark-purple fruit in clusters for easy harvesting. Hansel is non-bitter and perfect for grilling or slicing thin onto pizza.

## Eggplant Gretel

---

Loads of tender, bitter-free 3–4" fruits on a compact 24–36" plant. You can begin to harvest when fruits are 3–4" long by 3/4–1 1/4" diameter. A perfect companion to both Hansel and Fairy Tale.

## Eggplant Gretel

---

Loads of tender, bitter-free 3–4" fruits on a compact 24–36" plant. You can begin to harvest when fruits are 3–4" long by 3/4–1 1/4" diameter. A perfect companion to both Hansel and Fairy Tale.

## Eggplant Black Beauty

---

This heirloom variety yields glossy, purple-black oval fruits weighing up to 2 pounds.. Try them in Asian dishes, stir fries, baked or even grilled. Black Beauty does well in container gardens, and with its attractive fruits and purple blossoms, it's also pretty added to the edible landscape. 80 days to maturity. This heirloom variety yields glossy, purple-black oval fruits weighing up to 2 pounds.

## Eggplant Italian Blanca

---

Start harvesting the abundant fruits when they are only 3–4" long by 3/4–1" diameter. The compact, 24–36" plants produce tender, dark-purple fruit in clusters for easy harvesting. Hansel is non-bitter and perfect for grilling or slicing thin onto pizza.

## Okra Red Brugandy

---

Everything on this one is red, the stems, the pods, the flowers and even to some extent the leaves. Truly ornamental but it also bears an abundance of tasty pods.

## Okra Long Pod

---

Long Pod Okra is an old Southern heirloom that grows long and tall! This variety will grow to be to 5' and produces bright green pods that are up to 8" long. Perkins Long Pod is an early maturing okra that should be harvested at 3-5" in length for most crisp, tender pods. This okra is excellent for canning, pickling and cutting up for gumbo or stews.

## Okra Green

---

•Green okra has a torpedo-shaped pod ranging in length of five to six inches when harvested mature. The pods are pale lime to lime green color, their exterior has furrowed lengthwise grooves. The skin can often be fuzzy to prickly, which can cause an allergic reaction to sensitive skin.

## Sweet Amarillo

Scoville Rating: 0

A new blocky bell pepper that matures from green to yellow. Bred for productivity, Sweet Amarillo really loads up the fruit. It can grow well in the garden or even your greenhouse. 77 days.
