Glossary of Five Special Terms for the Game of Pseudonumerology

Pseudonumerology™: A word puzzle game by PseudonumerologicVIPs. In Pseudonumerology, numbers are converted to words for the pleasure of playing with word combinations. Then the words may be converted back as a device to remember the numbers. Pseudonumerology is not related to the occult practice of numerology.

Pseudonumeral™: A substitute for a numeral in Pseudonumerology. Pseudonumerals are sounds as pronounced in English words. When written, the Pseudonumerals of words may be underlined.

example: The Pseudonumeral for 0 is the sound z or s in words such as zoo, essay and ace.

In Pseudonumerology there are ten Pseudonumerals, which may be named iz (0), id (1), in (2), im (3), ir (4), il (5), ich (6), ick (7), iv (8), and ib (9).

Pseudonume™:

noun: A pseudonym, or substitute name, for a long-digit number in Pseudonumerology. A Pseudonume may be a single word or several words.

example: A Pseudonume for 6526 is challenge, another is usually enjoy.

verb: To create a Pseudonume for a given long-digit number.

example: "It takes a few minutes to Pseudonume an eight-digit number."

Pseudonumer™: A product by PseudonumerologicVIPs, such as a word list or computer program, that is helpful in pseudonuming numbers.

example: This book includes two Pseudonumers, the Pocket Pseudonumer, and the Ponderous Pseudonumer.

pseudospell: To spell out the numbers from a Pseudonume.

examples: Pseudonumerology is pseudospelled 0 1 2 3 4 5 6.

PseudonumerologicVIPs is pseudospelled 0 1 2 3 4 5 6 7 8 9 0.

Phantasmagorishable is pseudospelled 8 2 1 0 3 7 4 6 9 5.

Pseudonumerology: Rules and Techniques of Play

Pseudonumerology is the trademark for a word puzzle — a new game with a very old history. It is based on a phonetic code that was designed over 300 years ago by memory experts that have used it to remember numbers easily — as easily as we remember words. Memory techniques using this code have been well described and demonstrated in *The Memory Book*, by Harry Lorayne and Jerry Lucas (1974, Ballantine Books), and in *Use Your Perfect Memory*, by Tony Buzan (1991, Penguin Books). Now the code forms the basis for a word game, not only for those who wish to remember numbers, but for anyone who enjoys playing with words. The object of Pseudonumerology is to create the most appropriate words for a given number. The most interesting numbers are those that you would like to remember, and the best words are found by using a large number-word list, such as the Ponderous Pseudonumer forming most of this book.

Ten Sound Groups — Ten Pseudonumerals

The phonetic code for Pseudonumerology ignores all vowel sounds and deals only with the much more distinctive consonant sounds. The sounds conveniently fall into ten groups — one phonetic group for each of the ten digits. These sounds substitute for numerals and are called Pseudonumerals.

Here are the ten Pseudonumerals, and the memory aids to help you learn them.

Pseudonumeral	Memory Aid
0 the sound z, s, soft c	the word "zero" starts with z
1 the sound t, d, th	† has 1 stroke down
2 the sound n, ng	n has 2 strokes down
3 the sound m	m has 3 strokes down
4 the sound r	r in the word "four"
5 the sound l	capital L resembles a 5-finger outstretched hand
6 the sound j, ch, sh, soft g	J resembles backward 6
7 the sound k, hard c, q, hard g	in the letter k are hidden two or three 7's
8 the sound f, v, ph, gh (cough)	handwritten ƒ resembles 8
9 the sound p, b	p and b resemble 9

Note that voiced and unvoiced consonants are the same Pseudonumeral:

z (voiced) = s (unvoiced)	v (voiced) = f (unvoiced),
d (voiced) = t (unvoiced),	b (voiced) = p (unvoiced)
g (voiced) = k (unvoiced),	

Double letters form a single sound and a single Pseudonumeral: tt = 1, nn = 2, mm = 3, even if the two letters occur in separate words but are pronounced as one ("I hate tea!" = 1). Silent letters are always ignored (knight = 21), as are all vowel sounds.

Before you read further, take a few minutes to study the memory aids listed above and learn the ten Pseudonumerals. You should be able to mentally spell out, or pseudospell, the

numbers from any word that you can pronounce. Open the book to a page of words, which we call Pseudonumes, and try to pseudospell some of these to see how well it works.

Using the memory aids, the ten Pseudonumerals are easy to learn and easy to remember, but there are ten of them, after all, and anyone can have a bad day. If you should forget any of them while learning to play Pseudonumerology, here is how you can get them again. Simply write out the following words, then write the numerals from 0 to 9 directly below them:

PSEUDONUMEROLOGY? I GIVE UP!

0 1 2 3 4 5 6 7 8 9

Of course you needn't give up, and after playing Pseudonumerology for a few days you will probably never forget the Pseudonumerals again. If, on the other hand, you are the type that would rather do anything else than play a word game, you may quit reading here. But don't be annoyed if you are referred to as a *Pseudonumerologicophobe* (try spelling out the numerals from that one before you go!)

New Names for the Numbers 0 to 9

When playing with Pseudonumerals, it is often convenient to have names for them. This is especially true for young children, who are able to pseudospell words even before they learn how to spell them properly. Preschool children love numbers, sounds, and names, and they are eager and quick to learn new ones. Most children learn the names of the numbers in their own language only, while others have the opportunity to learn them in two or three languages. Parents or teachers can teach children to play Pseudonumerology by giving them new names for the numbers.

1 is called "one". It is also called "id".

2 is called "two". It is also called "in".

This is as natural for children as learning two sets of names for the notes of the musical scale: "A, B, C, D, E, F, G", and "Do, re, mi, fa, sol, la, ti."

Here are the ten new names for the numbers:

0 — "iz"	2 — "in"	4 — "ir"	6 — "ich"	8 — "iv"
1 — "id"	3 — "im"	5 — "il"	7 — "ick"	9 — "ib"

The common names for numbers are in fact rather clumsy in English and in most other languages. Some numbers are one-syllable words, others are two. These awkward names do not stick well in our minds and may add to our difficulties with numbers. As we read or hear a number such as 875302: "eight-seven-five-three-zero-two", this mixture of one- and two-syllable words may be harder for our memories to handle. Was that *sev-en* or *five-one*? These words may sound similar in our memories. Was that *ze-ro* or *three-two*? The same number 875302 registered as "iv-ick-il-im-iz-in" may prove to be easier for most minds to deal with. If we had learned to use the new names of the numbers rather than the English names, our abilities for verbal and mental work with numbers might be increased.

A Word Puzzle, a Memory Device, a Tool for Verbal Communication of Numbers

Pseudonumerology is primarily a word puzzle. It is a challenge to make good Pseudonumes that match long-digit numbers. But Pseudonumerology is more than a game — it is also a memory device. Memory experts, such as Harry Lorayne, have demonstrated that the phonetic code is the most powerful technique ever used to remember numbers. Maybe we

should think of Pseudonumerology as a self-powered technological device, like a high-tech bicycle. While most people prefer to travel with a car or motorcycle, others find great satisfaction in pedaling. While most prefer to remember numbers using a pencil and paper, or a programmable pocket device, others find satisfaction in being able to "program" the numbers into their memory. This introduction shows some of the ways to play Pseudonumerology to remember your useful numbers.

I began teaching the Pseudonumerals to university students to show them a technique for remembering parts of the geological time-scale. Instead of struggling to memorize the ten most important geological dates: 570 (million years), 510 m.y., 439 m.y., 408 m.y., 362 m.y., 290 m.y., 245 m.y., 208 m.y., 145 m.y., 66 m.y., it is far easier and even fun to learn ten well-chosen Pseudonumes: *legs*, *lots*, *ramp*, *erosive*, *motion*, *knobs*, *new role*, *unsafe*, *T.(-rexs) rule*, *ouch-ouch!* First it takes the students a few minutes to learn the Pseudonumerals. Then it takes them only a few minutes more to learn these Pseudonumes, because they were chosen to relate to the corresponding geological periods: in the Cambrian period the first animals with *legs* appeared, the Ordovician rocks in Norway contain *lots* of fossils, the Silurian strata are characterized by *ramp* structures, *erosive* forces dominate the Devonian . . . and finally the Tertiary began with the extinction of dinosaurs (*ouch-ouch!*)

Having learned the Pseudonumerals, these students now have a technique for instantly recognizing numbers, if communicated as Pseudonumes. On a geology field trip with forty students in a chartered bus, I may want them each to have the number of my cellular telephone, in case someone should become separated from the group. The number happens to be 94827844: I can simply tell them that the Pseudonume they need to remember is "*Brave yankee wayfarer*" and most of them then have the number without ever needing to write it down! Among those who play it, Pseudonumerology is a powerful tool for rapid verbal number communication.

How to Pseudonume Various Types of Numbers

Pseudonumerology is played differently, according to how many digits the numbers include and how quickly the numbers should be pseudonumed. There are four different number-memory challenges, which can be solved using three different Pseudonumerology techniques:

- Short-digit numbers, up to about 4 digits, such as PIN codes, telephone extension numbers or simple historic dates. Here there are few numbers and often only a single word to remember. The specific object, person or event should somehow *prompt* the Pseudonume used.
- Long-digit numbers, up to about 12 digits, such as complete telephone numbers, account numbers, identification numbers, full dates (in the order: year, month, day). These numbers are dealt with by making a *phrase* of Pseudonumes.
- Very long strings of numbers, up to any number of digits. Such a string can be made into Pseudonume nouns that are linked together in a silly story or a series of mental pictures — a *phantasmagoria*.
- Any numbers to be pseudonumed very quickly — without writing them down. These numbers are also best made into a *phantasmagoria* of Pseudonumes.

Each of these three techniques — *Promptable Pseudonumes*, *Pseudonume Phrases*, and *Pseudonume Phantasmagorias* — are described here.

Promptable Pseudonunes

People, places, objects and events cannot easily remind us of numbers, but they can prompt us to remember feelings, ideas, words — and Pseudonunes. The best Pseudonunes may be prompted by the things to which they are related. Personal and imaginative associations are often ideal. Many Promptable Pseudonunes are based on one's knowledge and experience, and a Promptable Pseudonune for one person may be meaningless or grotesque to another. Using the Ponderous Pseudonumer, you can find Promptable Pseudonunes for your numbers.

Promptable Pseudonunes are used for remembering the dates of the geological time scale, as mentioned above. Knowledge of the interesting features of each of the geological periods prompts us to remember the Pseudonune that gives the date. Consider another example: pseudonuming the founding dates of the colleges that make up Cambridge University. Using only the names of the colleges, and no other information, one might come up with the following Promptable Pseudonunes. For convenience, they are listed here in chronological order, but each date is learned independently and not in any particular order.

<i>Name of the college</i>	<i>Date founded</i>	<i>Promptable Pseudonune</i>	<i>How the name of the college might prompt the Pseudonune</i>
St. Peter's or Peterhouse	1284	"Never!"	Imagine St. Peter, the guardian at heaven's gate saying "You enter? Never!"
Clare	1326	Mangy	(Mangy) Clare has mange and is losing her hair.
Pembroke	1347	Homework	Your <i>pen broke</i> while doing your homework.
Gonville	1348	Moravia	The <i>ville</i> is <i>gone</i> . Where? To far away Moravia!
Trinity Hall	1350	Mules	Imagine a hall, divided in three areas, full of mules.
Corpus Christi	1352	Melon	Envisage the <i>body</i> of Christ as a melon.
King's	1441	Ararat	The kings are struggling to rule on Mt. Ararat.
Queens'	1448	Hairy Revue	The queens with wild hair dance in a revue.
St Catherine's	1473	Origami	St. Catherine is folding paper origami figures.
Jesus	1496	Herbage	Jesus Christ is selling vegetables under a sign: <i>Jesus - Christ's Herbage - Wholesale</i>
Christ's	1505	Wholesale	
St. John's	1511	Old Hat	Old St. John is wearing an Old Hat.
Magdalene	1542	Alluring	Mary Magdalene was alluring in her sinful youth.
Trinity	1546	Allergy	Trinity—a three-leaf clover—gives you an allergy.
Emmanuel	1584	Live Wire	Despite the owners <i>manual</i> , you grab a live wire.
Sidney Sussex	1596	Hula-hoop Show	<i>Sidney</i> and <i>Susie X</i> put on a show using plastic Hula-hoops.
Downing	1800	Offices	Downing street, London, is full of offices.
Girton (first womens' coll.)	1869	Few show up	<i>Girls</i> come to <i>town</i> : "a few show up"
Newnham	1873	Vacuum	The students try to vacuum up a <i>new</i> smoked <i>ham</i> .
Selwyn	1882	Heavy Oven	<i>Sell</i> and <i>win</i> a heavy oven.
New Hall	1954	Pillar	The <i>new hall</i> is supported by an immense pillar.
Churchhill	1960	Beaches	Visualize Churchhill with troops landing on the beaches of Normandy.
Fitzwilliam	1968	Buy a Chevy!	Fitzwilliam, a car-dealer, says "Buy a Chevy! "

Here the Pseudonumes are prompted by the name of the college only. Those familiar with these colleges would consider many of these Pseudonumes insulting, but their additional knowledge and experience would prompt other Pseudonumes instead. In any case, insults are not easily forgotten! Not only historical dates, but any 2- or 3-digit numbers are best remembered using Promptable Pseudonumes.

Pseudonume Phrases

For numbers of more than three digits it is usually necessary to make a Pseudonume Phrase, such as *Brave yankee wayfarer* for the number 94827844. Making Pseudonume Phrases is creative and fun for anyone who enjoys word games, such as Scrabble or a crossword puzzle. Simply break your long-digit number into parts, and look through the Ponderous Pseudonumer to find interesting Pseudonumes that can be combined in meaningful ways.

One-, two- and three-digit Pseudonumes usually result in the best Pseudonume Phrases. This is because there are many choices of Pseudonumes for each number, and many more ways in which they can be combined. It is usually best to start with the last digits of the number.

Here is a simple formula for making Pseudonume Phrases for numbers up to about twelve digits long.

- step 1. For the last digits (5, 4, 3, or 2 digits) of the number, find an interesting noun.
- step 2. For the first digits (5, 4, 3, or 2 digits) of the number, find a suitable verb.
- step 3. For the middle digits, find suitable adjectives using one- and two-digit Pseudonumes.

Consider a ten-digit number: 8514097362. To use the formula, start with the last three digits, 362. Among the Pseudonumes you find listed, the nouns *emotion*, *machine*, *motion*, and *mission* would each make clear mental images, so you write these down. Then try the first three digits, 851. For this number you find suitable verbs such as *evaluate*, *failed*, *felt*, *float*, *fueled*, and *valued*. Now you have several possibilities: *felt emotion*, *fueled a machine*, *evaluate a motion*, *failed a mission*. . . Write down the ones you prefer and then find suitable adjectives to modify your noun, using the middle four digits: *horsy*, *racy*, *rosy*, *year's*, *hero's*; *baggy*, *balky*, *big*, *buggy*, *epic*, *picky*, *poky*. Your final phrase might be *felt a rosy epic emotion*, *fueled a racy balky machine*, *evaluate a year's poky motion*, *failed a hero's big mission*. These examples follow the formula, using 3-digit nouns and verbs. You should usually start by checking for a 5- or 4-digit Pseudonume, but will probably not find a good one. You may also want to try a 2-digit noun or verb, using the same formula.

Designing Promptable Pseudonume Phrases

Making Pseudonume Phrases using the simple formula is usually easy. For a more challenging word game, try to design a Promptable Pseudonume Phrase, having a meaning that is related to the purpose of the particular number. Sometimes the simple formula leads to such a phrase. If the example above were the telephone number for a friend or a therapist, the phrase *he felt a year's epic emotion* might be appropriate. If the number were for your car mechanic or service station, the best phrase might be *he fueled a racy, balky machine*. If it were your plumber, you might enjoy thinking of him using the phrase *evaluate a year's poky motion*, or for your hairdresser *failed a hero's big mission*.

Most Promptable Pseudonume Phrases, however, must be built around a relevant noun or verb that may come from any part of the number, not necessarily the last few digits. This Promptable Pseudonume must be found first. You should start by looking in the lists of five-digit numbers, but usually the best Pseudonume is found by pondering the two- or one-digit numbers, where the choices are greatest. It may take fifteen minutes or more to design a Promptable Pseudonume Phrase. If, when you are finished, you are not satisfied, you should start again, as you may well find a much better phrase. This is not a tedious process, but a fascinating word game.

Blank Pseudonumes for Pseudonume Phrases

There are a few English words that contain no Pseudonumeral and they may be added in any position in any Pseudonume Phrase. Starting phrases with *we* or *you* makes them more personal. Other Blank Pseudonumes can be used to make Pseudonume Phrases more interesting. Blank Pseudonumes are listed alphabetically at the beginning of the Ponderous Pseudonumer.

In typical English phrases, verbs are often followed by the article *a* (*write a...*, *taking a...*). In the Ponderous Pseudonumer the Blank Pseudonume *a* (in parantheses) has been added after many verbs to help you see these possible connections as you quickly scan through the lists.

Altered Words in Pseudonume Phrases

Adjectives combine easily to make Pseudonume Phrases (see step 3 in the simple formula above). The most helpful one- and two-digit adjectives are listed in bold-face print in the Ponderous Pseudonumer. There are often no suitable adjectives to be found, however, especially among four- and five-digit Pseudonumes. Many words may be altered to form Pseudonume adjectives simply by adding a *y* (*telephoney*, *alligatory*). Suggestions of this type are made by the addition of -y to many words in the Ponderous Pseudonumer. Altered words often lead to visual and memorable images using fewer words: a *telephoney forest* may have telephones mounted on the trees, and an *alligatory bedroom* may have alligators hiding under the bed. Children especially enjoy using altered words and the creative images they involve.

Nearly any singular noun can be used to modify another noun:

a Brezhnev mailbox (imagine Brezhnev having had a unique mailbox)

a choirleadery astronaut (the astronaut waves or sings as if leading a choir)

A common English construction for such combinations is with a hyphen (*a Brezhnev-mailbox*, *a choirleader-astronaut*) but the y-form is preferable for Pseudonume Phrases. It encourages you to make a clear mental picture that can easily be remembered. When using the y-form, you actually imagine the mailbox and what characteristics make it *Brezhnev*. You imagine the astronaut and how he acts *choirleadery*. Once you have formed a clear mental picture, no matter how foolish it is, the Pseudonume Phrase is easily remembered.

Adding Less Common Pseudonumerals to Pseudonume Phrases

Dictionaries list the words that are available in the language, but they do not indicate how often the words are actually used. In this presentation of Pseudonumerology, the word *the* occurs 610 times and the word *any* occurs 40 times. Numbers also have different frequencies of use. Among the numbers we encounter daily, the numerals 0 and 1 occur more often than average. Almost a third of our long-digit numbers begin with the numeral 1, and a large percentage of numbers are rounded off to end with the numeral 0.

In the Ponderous Pseudonumer, which includes most common English words, the frequency of Pseudonumerals is as follows:

0 — 16%	2 — 11%	4 — 15%	6 — 4%	8 — 5%
1 — 17%	3 — 5%	5 — 9%	7 — 9%	9 — 8%

Thus the Pseudonumerals 1 and 0 are better represented than average. It is very helpful that *s*, the Pseudonumerical 0, is very common at the end of words, in the plural and possessive forms of nouns. The Pseudonumerals 3, 6, and 8 are less well represented, which means that long-digit numbers are more difficult to pseudonume if they include several of these numerals.

Single Pseudonumerals may sometimes be added directly to Pseudonume Phrases. There are two surefire ways to add the Pseudonumerical 3. *My* can be added before many nouns (*my table, my fireplace*), and *'m* can be added after many verbs as an abbreviation of *them* or *him* (*chase 'm, correct 'm*). Such an *'m* has been added to many verbs to fill out the list of two- and three-digit Pseudonumes in the Ponderous Pseudonumer.

There are no surefire ways for adding the Pseudonumerical 6, although *huge* before many nouns (*huge teapot*) makes a clear mental picture. In a pinch, a 6 may be added to nearly any adjective that ends in *y* (*silly*→*sillyish* or *sillish*, *wacky*→*wackyish* or *wackish*) and to some other words (*cow*→*cowish*, *youth*→*youthish*). Such suggestions, written as *sillyish, wackyish, cow-ish, youth-ish*, have been made to provide more choices among the lists of two- and three-digit Pseudonumes. (Warning: These are altered words, and are recommended for your personal use only. Such abuse of English words in public may be considered offensive!)

A few adds the Pseudonumerical 8 before many plural nouns (*a few apples*), and *off* adds an 8 after many verbs (*run off, take off*). But for adding an 8, or any other single Pseudonumerical, the Ponderous Pseudonumer lists many suitable choices and it is not necessary to make further suggestions here.

Stories Using Pseudonume Nouns

Pseudonume Phrases, like rhyme or verse, are carefully constructed with each syllable serving a purpose. This makes Pseudonume Phrases the most elegant form of Pseudonumerology, just as verse is the most elegant form of language. There are, of course, simpler forms of expression. In our ordinary language, we can write prose instead of verse. In Pseudonumerology, we can make a story where only the nouns are Pseudonumes. Such stories are also suitable for children, who are not concerned with the carefully chosen adjectives used in Pseudonume Phrases, but focus on the nouns. Stories with Pseudonume nouns are always longer than Pseudonume Phrases, but they can be remembered just as easily, especially if the stories involve visual or silly images.

As an example, consider again the 10-digit number 8514097362 (*he felt a year's epic emotion*). To see how a story might be made for this number, start by breaking it into two-digit numbers — 85 14 09 73 62 — and looking up each of these in the Ponderous Pseudonumer. Write a short list of suitable nouns for each two-digit number:

- 85 file, fly, foil, fool, oval, waffle
- 14 deer, diary, door, tower, tray, water
- 09 sap, soap, soup, spy, subway, wasp
- 73 coma, comb, commie, game, gum, wigwam
- 62 chain, chin, China, genie, gin, ocean

Now make up a story that ties these words together, such as:

A fool took only his diary, some soap, and some gum when he traveled to China.

All the important words here are Pseudonumes, and you would not confuse these with the other words in the story. These Pseudonumes are certainly easier and more fun to remember than the 10-digit number, but still you might get confused, because the story is so logical that it could be remembered in several ways. If you remember the story as:

A fool traveled to China, taking only his soap, gum and diary,
you will have the right numbers but in the wrong order!

Silly Linked-Picture Stories — Pseudonume Phantasmagorias

Memory experts have shown that the best stories are those where silly images are linked together. We easily remember unusual or silly things, and we tend to forget things that are routine or logical. Not only are silly stories easier to remember, but they are easier to create than logical ones, because they don't have to make sense. We also remember best the things that we have seen, or seen in our imaginations, so the silly images should be highly visual. To make certain that we don't leave any Pseudonumes out, or get them in the wrong order, it is important that each Pseudonume is linked to the next. As we make the story we add on each new Pseudonume in the form of a picture.

Here is an example of a silly linked-picture story for 8514097362: *A fool was riding on a deer. The deer climbed into a crowded subway. The subway drove into a wigwam. Out of the wigwam appeared a genie.* Each part of the story is a separate picture, that clearly links one Pseudonume to the next: fool is linked to deer, deer to subway, subway to wigwam, wigwam to genie. The Pseudonumes have simply been added on as pictures, one at a time, to create the story. The Pseudonumes cannot be interchanged, and none can be left out. This series of weird pictures can be seen in the mind, almost as in a dream or a nightmare. These pictures are part of a phantasmagoria.

When making a Pseudonume Phantasmagoria, be sure that you see each picture clearly in your mind, not just think of it. Pictures involving action or exaggeration in size are often the best. Once you have seen it in your mind, ignore that picture and move on to the next one. Do not worry about keeping track of earlier pictures or checking that you remember the entire phantasmagoria. Visual images, clearly seen, fix themselves so firmly in your memory that you simply make each visual link, and the phantasmagoria makes itself. You may pseudospell all the numbers at the end of the phantasmagoria but should not bother checking them while

making it. Even a week or two later you will be able to remember the Pseudonumes of the phantasmagoria.

Starting with a single digit, instead of the first pair of digits, the same number 8514097362 would be broken up in another way:

- 8 Eve, hive, hoof, ivy, UFO, view, wave
- 51 Hollywood, lady, lathe, lid, light, wallet
- 40 arrows, hearse, horse, race, rice, rose, warehouse
- 97 bag, beak, bike, book, bug, peak, pig
- 36 image, match, Magi, mesh, midge, mush
- 2 hen, honey, knee, Noah, wine, wing

A Pseudonume Phantasmagoria for these numbers could be:

A wave washes over a wallet. (See this image. . . , now move on to the next one.)

Out of the wallet gallops a horse. (See this image, now move on to the next.)

The horse is being ridden by a pig. (See this image, now move on to the next.)

The pig is being burned by a lighted match. (See this image, now move on to the next.)

The lighted match is pecked out by a hen. (See this image, now move on to the next.)

A Pseudonume Phantasmagoria can easily be promptable. It can be related to the numbers by giving it an appropriate first image. If this were the telephone number of an office, you might simply begin the phantasmagoria by seeing a huge ocean *wave* engulfing the office. . . Pseudonume Phantasmagorias are easier to create, easier to see, and easier to remember than sensible stories, and there is no limit to the pictures that can be added on.

Using the Pocket Pseudonumer to make Pseudonume Phantasmagorias

The fastest way to learn a very long-digit number is to make a Pseudonume Phantasmagoria. With only a little practice, images can be added almost as fast as the Pseudonumes can be found. To avoid the delays of turning pages through the Ponderous Pseudonumer to look for the best Pseudonumes, a Pocket Pseudonumer is provided. Each Pseudonume on the Pocket Pseudonumer has been carefully chosen to allow a clear visual image that is easily remembered and that is not easily confused with any other Pseudonume images on the list.

The Pocket Pseudonumer is the single most important page of this book. Make a photocopy of it and keep it handy for when you want to quickly learn new numbers. Think of this photocopied page as a pocket-sized device for learning numbers, just as a calculator is a pocket-sized device for working with them.

The technique of making Pseudonume Phantasmagorias is best demonstrated by examples, so a typical example is given here for each of the Pseudonumes on the Pocket Pseudonumer. Do not try to memorize these examples. Just read several of them to become familiar with the technique. You will easily be able to make and link your own images by simply referring to the Pocket Pseudonumer.

440 Examples of Mental Pictures to be Linked in Pseudonume Phantasmagorias
A is the previous Pseudonume to be linked and **B** is the Pseudonume that follows.

0 hose	a firehose is attached to A ; the hose sprays B
0 house	a house falls over on top of A ; B comes out from inside the house
0 ice	a layer of shiny ice forms over A and the ground; B slips on the ice
<u>0 saw</u>	<u>A is cut in two by a saw; the saw falls on or is taken by B</u>
1 hat	A wears or is covered by a hat; B is a decoration on the hat
1 head	A bumps into your head (ouch!); causing your head to bump into B
1 widow	A is attended by a grieving widow in black
<u>1 yacht</u>	<u>A sails aboard a luxury yacht; the yacht crashes into B</u>
2 hen	A is sat on by a huge brooding hen; the hen pecks at B
2 honey	sticky honey drips on A ; the honey runs onto B
2 wine	a glass of red wine is held by A ; the wine is spilled on B
<u>2 wing</u>	<u>a single flapping wing is attached to A; the wing detaches and flies to B</u>
3 ammo	A is in a pile of ammunition for a cannon; the ammo rolls into B
3 emu	visualize the emu as large flightless bird running like an ostrich
3 ham	A is butchered to make a ham; the ham is eaten by B
<u>3 mayo</u>	<u>thick mayonaise is spread on A</u>
4 arrow	A is shot by an arrow; B hangs from the arrow
4 hair	long hair grows out of A ; B comes and pulls/eats/gets tangled in the hair
4 hero	a superhero such as Superman rescues or helps A
<u>4 wire</u>	<u>A is suspended by a wire; the wire is attached to B</u>
5 hell	A roasts in a firey hell; B manages to escape from hell
5 hole	a round black hole appears in A ; B squeezes out of the hole
5 wall	A bounces off a brick wall; the wall falls on B
<u>5 whale</u>	<u>a huge whale swallows A; the whale spouts and out comes B</u>
6 OJ	A is squeezed to make brightly colored Orange Juice
6 shoe	A is stepped on by a single huge shoe; the shoe has no foot, but B inside
6 watch	A is wearing a large fancy watch around its middle
<u>6 witch</u>	<u>a witch rides on A instead of a broomstick; the witch captures B</u>
7 cow	a large cow grazes on A and produces B as milk
7 egg	A lays a large egg; the egg hatches and B emerges
7 hook	A is snagged by a large fishhook; the hook is held by B
<u>7 wig</u>	<u>A is wearing a large unruly wig</u>
8 Eve	A is picked or taken by Eve (dressed in her finest fig leaf)
8 ivy	vines of green ivy grow out of A ; the ivy flows onto B
8 UFO	A is captured by a flying saucer (Unidentified Flying Object)
<u>8 wave</u>	<u>A is engulfed by a huge ocean wave; the wave rolls back, leaving B</u>
9 boa	A is squeezed by a boa constrictor snake; the boa is killed by B
9 bow	a decorative bow of ribbon is tied around A
9 boy	a greedy boy grabs A and runs
<u>9 web</u>	<u>A is stuck in a huge spiderweb</u>
00 oasis	A is in an oasis of green vegetation
00 sauce	thick red sauce pours on A
00 seesaw	A is on one end of a seesaw; on the other end is B
<u>00 Zeus</u>	<u>the great Greek god Zeus has A with him on his cloud</u>
01 acid	steaming acid burns and dissolves A
01 seed	A produces a large seed; the seed grows into B
01 stew	A is made into a thick stew
<u>01 suit</u>	<u>A is wearing a brightly colored suit</u>
02 snow	A is buried by falling snowflakes; B emerges from the deep snow
02 sun	A is scorched by the sun; the sun is actually a glowing B
02 swing	A is swinging on a child's swing
<u>02 swan</u>	<u>a graceful white swan takes off from A; the swan flies to B</u>

03 seam	a large sewn seam becomes visible on <i>A</i> ; the seam rips open and out comes <i>B</i>
03 sumo	<i>A</i> is squeezed by a huge, half-naked, Japanese sumo wrestler
03 swim	<i>A</i> goes for a swim but flounders; <i>B</i> swims past elegantly
<u>03 zoom</u>	<u>a zoom-lens extends from <i>A</i>; the zoom reaches to <i>B</i></u>
04 sari	a sari is the long cloth outer garment worn by Hindu women
04 sewer	<i>A</i> falls through a manhole into a dark wet sewer
04 sore	a large infected sore appears on the surface of <i>A</i>
<u>04 Zorro</u>	<u>Zorro, the masked hero-swordsman, slashes a "Z" in the side of <i>B</i></u>
05 sail	the sail of a sailboat is attached to <i>A</i> and is blown
05 seal	a seal balances <i>A</i> on its nose
05 weasel	a long thin weasel runs circles around <i>A</i> and bites at it
<u>05 whistle</u>	<u><i>A</i> blows into a large metal whistle; <i>B</i> flows out instead of sound</u>
06 ice age	<i>A</i> is buried by the advance of a thick glacier; the glacier melts, leaving <i>B</i>
06 sage	visualize the sage as a wise old man with white beard and cloak
06 sewage	<i>A</i> is caught in flowing sewage under the street
<u>06 switch</u>	<u>a light switch appears on the surface of <i>A</i>; when switched on <i>B</i> appears</u>
07 psycho	<i>A</i> is attacked by a psychotic deranged killer
07 sack	<i>A</i> is stuffed into a large cloth sack; <i>B</i> emerges from the same sack
07 ski	<i>A</i> is standing on a single large ski, moving downslope
<u>07 sock</u>	<u><i>A</i> is pushed into a giant wool sock</u>
08 housewife	<i>A</i> is dusted vigorously by a housewife
08 safe	<i>A</i> is stuffed into a large metal safe; <i>B</i> tries to move the heavy safe
08 sieve	<i>A</i> falls into a huge hand-held sieve
<u>08 sofa</u>	<u><i>A</i> seats itself on a large sofa; <i>B</i> seats itself on the other end of the sofa</u>
09 soap	<i>A</i> is rubbed by a bar of soap, making white lather
09 soup	<i>A</i> eats a bowl of hot soup
09 subway	<i>A</i> presses into an overcrowded subway; the subway crashes into <i>B</i>
<u>09 wasp</u>	<u><i>A</i> is attacked and stung by a long thin wasp</u>
10 dice	<i>A</i> rolls with a huge pair of dice; the dice have no spots but a picture of <i>B</i>
10 outhouse	<i>A</i> squeezes into a tall narrow wooden outhouse
10 toes	<i>A</i> falls on your toes (ouch!); your toes kick <i>B</i> in pain
<u>10 weeds</u>	<u>green leafy garden weeds grow out of <i>A</i></u>
11 tattoo	a surface of <i>A</i> displays a large tattoo
11 teddy	visualise a large soft cuddly teddy bear
11 teeth	<i>A</i> displays a set of glistening white teeth
<u>11 toad</u>	<u>a large warty toad hops around <i>A</i></u>
12 den	<i>A</i> enters the opening of a fox's den; <i>B</i> is already inside and comes out
12 dune	a large sand dune migrates over <i>A</i> ; <i>B</i> emerges from beneath it
12 tongue	a large wet tongue protrudes from <i>A</i> ; the tongue licks <i>B</i>
<u>12 wedding</u>	<u><i>A</i> is dressed in a white wedding gown; she is standing beside the groom <i>B</i></u>
13 Adam	<i>A</i> is patted by Adam, wearing his usual fig leaf
13 dime	a large 10-cent piece rolls around <i>A</i>
13 thumb	a huge thumb presses down on <i>A</i>
<u>13 tomb</u>	<u><i>A</i> is dead and is placed inside a stone tomb; <i>B</i> emerges from the tomb</u>
14 deer	<i>A</i> is riding on a deer with fine antlers
14 tower	a tall tower is above <i>A</i> ; <i>B</i> is inside the tower
14 tree	a large tree grows up from <i>A</i> ; <i>B</i> is hiding in the tree
<u>14 water</u>	<u><i>A</i> gets drenched by splashing water; the water runs off to <i>B</i></u>
15 dial	visualize the dial as a circular meter gague like a clock face
15 doll	the doll is a specific child's doll, such as a Barbie doll
15 tail	a ropy swishing cowtail is attached to <i>A</i> ; the tail swishes on <i>B</i>
<u>15 towel</u>	<u>a large beach towel covers <i>A</i>; <i>B</i> dries itself with the towel</u>

16 ditch	<i>A</i> stumbles into a long narrow ditch; <i>B</i> emerges from it
16 DJ	a disc-jockey spins <i>A</i> to make music; the DJ takes <i>B</i> to play it too
<u>16 tissue</u>	<u>a white facial tissue floats down to cover <i>A</i>; the tissue is used by <i>B</i></u>

440 Examples of Mental Pictures to be Linked in Pseudonume Phantasmagorias

17 attic	<i>A</i> goes up into a large dark attic; <i>B</i> falls down out of the attic
17 duck	a large quacking yellow duck flies out of <i>A</i>
17 tack	a thumbtack is pressed into <i>A</i> ; the tack is holding up <i>B</i>
<u>17 tag</u>	<u>a paper price tag is stuck or tied to <i>A</i></u>
18 dive	<i>A</i> falls through the air in an elegant dive; the dive is hindered by <i>B</i>
18 dove	a white dove flies out of <i>A</i> ; the dove is caught by <i>B</i>
18 thief	a shadowy thief steals <i>A</i> ; the thief tries to hide in <i>B</i>
<u>18 TV</u>	<u><i>A</i> appears on TV</u>
19 tape	tape is wrapped around <i>A</i> ; the other end of the tape is around <i>B</i>
19 tepee	<i>A</i> enters an Indian's tepee; <i>B</i> is sitting inside
19 toupee	a toupee is glued onto the top of <i>A</i> ; <i>B</i> takes the toupee and runs
<u>19 tuba</u>	<u><i>A</i> enters the mouthpiece of a large tuba; <i>B</i> is blown out of the tuba</u>
20 NASA	<i>A</i> enters a NASA rocket that blasts off and lands on <i>B</i>
20 news	<i>A</i> is covered up by a huge newspaper; the newspaper is taken by <i>B</i>
20 nose	<i>A</i> strikes your nose (ouch!); you blow <i>B</i> out of your sore nose
<u>20 wings</u>	<u>flapping birdwings are attached to <i>A</i>; the wings leave <i>A</i> and fly to <i>B</i></u>
21 ant	a huge ant drags <i>A</i> ; the ant then marches alone to <i>B</i>
21 hand	<i>A</i> is grabbed by a large human hand
21 net	<i>A</i> is caught in a large butterfly net
<u>21 window</u>	<u>a window is seen on the side of <i>A</i>; the window opens and <i>B</i> emerges</u>
22 nanny	visualize the nanny as a woman overrun by children
22 neon	a flashing neon sign is mounted on <i>A</i>
22 nun	a nun in black and white habit prays beside <i>A</i>
<u>22 onion</u>	<u><i>A</i> is chased off by an offensively strong-smelling onion</u>
23 enema	memory specialists know that vulgar images are often the best
23 enemy	<i>A</i> is chased by an enemy soldier
23 gnome	visualize the gnome as a small dwarf-like creature with a white beard
<u>23 name</u>	<u><i>A</i> wears a huge name tag that says: «HI! MY NAME IS <i>B</i>»</u>
24 hangar	<i>A</i> flies or rolls into a large airplane hangar; <i>B</i> comes out of the hangar
24 hanger	<i>A</i> hangs on a clothes hanger; the hanger hangs on <i>B</i>
24 wiener	<i>A</i> is made into a wiener sausage; <i>B</i> eats the wiener
<u>24 winner</u>	<u><i>A</i> is given as a trophy to the winner; the winner lifts <i>B</i> in triumph</u>
25 knoll	<i>A</i> is rolling down a small knoll or hill; <i>B</i> climbs up the knoll
25 nail	a carpenter's nail is driven into <i>A</i> ; <i>B</i> is hung on the nail
25 Nile	<i>A</i> is carried away in the overflowing Nile River
<u>25 Noel</u>	<u>visualize Noel, the Christmas Season, as Santa Claus himself</u>
26 hinge	<i>A</i> swings like a door on a huge hinge
26 Hunch	<i>A</i> is taken by the Hunchback of Notre Dame
26 notch	a deep notch is cut into the side of <i>A</i>
<u>26 winch</u>	<u><i>A</i> is pulled by a cable attached to an electric winch</u>
27 hankie	<i>A</i> delicate but giant handkerchief falls on and covers <i>A</i>
27 ink	thin black ink spills and covers <i>A</i>
27 neck	<i>A</i> pulls or strikes your own bare neck (ouch)
<u>27 Yankee</u>	<u>visualize Uncle Sam or a New York Yankee baseball player</u>
28 knave	visualize a knave as a dishonest card player, switching <i>A</i> and <i>B</i>
28 knife	<i>A</i> is stabbed by a long sharp knife
28 Navajo	a Navajo Indian sitting on a blanket uses <i>A</i> to weave <i>B</i>
<u>28 navy</u>	<u>visualize a navy as a fleet of warships chasing <i>A</i></u>
29 honeybee	a big buzzing honeybee tries to get nectar from <i>A</i> ; the honeybee flies to <i>B</i>
29 knob	a large black plastic knob appears on <i>A</i> ; when turned on <i>B</i> appears
29 nappy	a nappy or baby's diaper is put on <i>A</i>
<u>29 nib</u>	<u>the nib of a fountain pen pokes <i>A</i></u>
30 Mace	<i>A</i> is sprayed by chemical Mace; the Mace is coming from <i>B</i>
30 maze	<i>A</i> goes through a maze; <i>B</i> is at the end of the maze
30 moose	<i>A</i> gets trampled by a moose with huge antlers
<u>30 moss</u>	<u>deep green moss suddenly grows and covers <i>A</i></u>

- 31 moat a moat filled with water surrounds *A*; *B* swims in the moat
- 31 moth a large furry moth flutters wildly in front of *A*
- 31 mouth *A* goes in your own open mouth; *B* comes out
- 31 mud *A* sinks into thick brown mud
- 32 menu *A* reads a large restaurant menu; *B* is described on the menu
- 32 mine *A* goes into a gold mine; only *B* is in the mine
- 32 money paper money is falling from the sky on *A*
- 32 moon *A* is silhouetted against a silvery moon
- 33 mamma a big mama cuddles *A* as if it were a baby
- 33 memo *A* finds an important memo; the memo warns about the coming of *B*
- 33 mime a mime in whiteface mimics the appearance and movements of *A*
- 33 mummy *A* is taken by a ghostly Egyptian mummy
- 34 hammer *A* is struck by a carpenter's hammer; the hammer is wielded by *B*
- 34 Mary *A* is held by the Virgin Mary with a halo
- 34 mohair *A* is wearing a wooly mohair (Angoran goathair) sweater
- 34 mower *A* is cut to pieces by a noisy motorized lawn mower
- 35 mail *A* is put in an envelope and sent in the mail; *B* opens the mail
- 35 mill *A* is ground up in an old fashioned flour mill
- 35 mole *A* is dug up and tunneled by a mole; the mole pushes *B* out of a tunnel
- 35 mule *A* is loaded onto a stubborn mule; the mule kicks *B*
- 36 Magi *A* is visited by the three Magi on camels; the Magi bring *B* as a gift
- 36 match *A* is burned by a lighted wooden match; the match is eaten by *B*
- 36 mesh *A* is covered by a finely woven mesh
- 36 mush *A* buries itself in a plate of baby mush
- 37 amigo visualize a smiling Mexican friend wearing a sombrero
- 37 hammock *A* awkwardly climbs into a hammock; the hammock is tied to *B*
- 37 mike *A* sings into a hand-held microphone; the mike is shaped like a *B*
- 37 mug *A* goes into a large ceramic mug; *B* is poured out of the mug
- 38 Mafia visualize a Mafia godfather or hit-men in a black car
- 38 Mohave *A* is perishing in the dry Mohave desert
- 38 movie *A* goes to a movie theater; *B* is being shown as the movie
- 38 muff *A* goes into a furry muff or hand warmer; *B* comes out of the muff
- 39 ameba *A* is engulfed by a huge jelly-like ameba
- 39 hump *A* develops a hump, as on a camel; the hump splits opens and *B* emerges
- 39 map a large unfolded paper map covers *A*; it is a map of *B*
- 39 mop *A* is cleaned with a dripping wet mop
- 40 horse *A* rides on a galloping horse
- 40 race *A* joins a marathon race; *B* leads the race
- 40 rice dry white rice is showered on *A*; the rice is removed or eaten by *B*
- 40 rose a large red thorny rose grows on *A*; the rose is picked by *B*
- 41 heart inside *A* is a pulsating heart; the heart is taken by *B*
- 41 radio *A* listens to a portable radio with antenna and headphones
- 41 rat *A* is bitten by an ugly rat; the rat is killed by *B*
- 41 road *A* is sitting on a road; *B* drives down the road instead of a car
- 42 heron *A* is speared by the long bill of a heron (visualize its long legs, neck, and bill)
- 42 horn *A* enters the mouthpiece of a long straight horn; *B* is blown out
- 42 rain *A* is soaked by heavy rainfall
- 42 ring *A* is encircled by a large metal ring
- 43 arm a human arm develops from *A*; the arm hooks itself around *B*
- 43 ram *A* is butted by the curled horns of a large ram
- 43 room *A* enters a large empty room; it is not actually empty, *B* is inside
- 43 worm *A* is being eaten by a maggot-like worm; the worm is eaten by *B*
- 44 aurora the aurora, or Northern Lights, flash like fireworks around *A*
- 44 rower a rower sits on *A* and rows it like a rowboat
- 44 warrior visualize a Warrior basketball player or a soldier in action
- 44 wirer an overly eager electrical wirer runs wires all over *A*

440 Examples of Mental Pictures to be Linked in Pseudonume Phantasmagorias

45 rally	<i>A</i> imitates a car and joins a road-rally; <i>B</i> stops the rally
45 rail	<i>A</i> rides along a single elevated monorail; the rail falls on <i>B</i>
45 reel	<i>A</i> is pulled and wrapped around a large fishing reel
<u>45 roll</u>	<u><i>A</i> eats a breakfast roll or dinner roll (do not visualize the verb roll)</u>
46 arch	a large rainbow-shaped arch stretches from <i>A</i> and over to <i>B</i>
46 orgy	<i>A</i> participates in a rowdy orgy; <i>B</i> is also involved in the orgy
46 rash	<i>A</i> develops a rash, a red spotted pattern; <i>B</i> is rubbed on the rash
<u>46 roach</u>	<u>out from beneath <i>A</i> scampers a large cockroach</u>
47 Ark	<i>A</i> is on Noah's Ark; <i>B</i> is pushed off the crowded ark
47 rag	<i>A</i> is smeared by a large messy rag; the rag covers <i>B</i>
47 rock	<i>A</i> is crushed by a huge falling rock
<u>47 rug</u>	<u><i>A</i> is placed on a thick shag rug; <i>B</i> is hiding in the shag of the rug</u>
48 reef	<i>A</i> is stranded on a white coral reef; <i>B</i> gets off the reef
48 ref	a ref (sports referee) with a black and white striped shirt penalizes <i>A</i>
48 roof	<i>A</i> is covered by a roof; <i>B</i> is balanced on the top to the roof
<u>48 wharf</u>	<u><i>A</i> is moored at a wharf; <i>B</i> is moving on the edge of the wharf</u>
49 Arab	<i>A</i> is led by an Arab wearing a white cloak and turban, on a camel
49 harp	<i>A</i> is shaped into a golden harp; the harp is played by <i>B</i>
49 rib	<i>A</i> pokes or crashes into your rib; the rib is removed by <i>B</i>
<u>49 rope</u>	<u>a thick braided rope is coiled around <i>A</i>, the other end is tied to <i>B</i></u>
50 lace	<i>A</i> is covered by delicate white lace
50 Lassie	<i>A</i> is rescued by Lassie, the multi-talented collie
50 lasso	<i>A</i> is caught by a flying lasso; the lasso is thrown and pulled back by <i>B</i>
<u>50 wheels</u>	<u><i>A</i> rolls along on small wheels mounted to it</u>
51 lady	<i>A</i> is accompanied by a lady wearing white gloves and dress
51 lid	<i>A</i> is covered by a huge metal lid; the lid is lifted by <i>B</i>
51 light	<i>A</i> is illuminated by a strong spotlight; the light is broken by <i>B</i>
<u>51 wallet</u>	<u><i>A</i> is pushed into a leather wallet; the wallet belongs to <i>B</i></u>
52 alien	visualize the alien as a specific science-fiction creature such as ET
52 lawn	<i>A</i> is dragged through a perfectly maintained green grass lawn
52 line	a pencil line is drawn from <i>A</i> through the air to <i>B</i>
<u>52 lion</u>	<u><i>A</i> is attacked by a ferocious lion</u>
53 helium	<i>A</i> is inflated and lifted by helium gas
53 lamb	<i>A</i> is eaten by a white wooly lamb
53 lime	a bright green lime hangs from <i>A</i> ; the sour lime is eaten by <i>B</i>
<u>53 limo</u>	<u><i>A</i> enters a long black limo or limousine; the limo drives to <i>B</i></u>
54 healer	<i>A</i> is cured by the hands of a faith healer; the healer then heals <i>B</i>
54 layer	<i>A</i> is flattened into a layer; the layer on top is a layer of <i>B</i>
54 lorry	<i>A</i> is loaded into a lorry or truck; <i>B</i> is loaded out of the lorry
<u>54 lure</u>	<u><i>A</i> shrinks to miniature size and is used as a fishing lure; the lure attracts <i>B</i></u>
55 hula-hula	<i>A</i> dances the hula-hula with Hawaiians; one of the dancers is <i>B</i>
55 lily	a fresh white lily flower grows on <i>A</i>
55 oil well	the derrick of an oil well is on <i>A</i> ; <i>B</i> gushes from the oil well
<u>55 yellow oil</u>	<u>yellow corn oil is flowing out of <i>A</i>; it pours onto <i>B</i></u>
56 eyelash	<i>A</i> is glued on as a false eyelash; the winking eyelash brushes <i>B</i>
56 leash	<i>A</i> is pulled by a leather leash; the leash is held by <i>B</i>
56 leech	a large bloodsucking worm-like leech attaches itself to <i>A</i>
<u>56 ledge</u>	<u><i>A</i> moves along a high ledge; the ledge is blocked by <i>B</i></u>
57 elk	<i>A</i> is lifted by the antlers of a huge majestic elk
57 lake	<i>A</i> falls into a small lake and sinks; <i>B</i> is floating in the lake
57 log	<i>A</i> is balancing on a rolling wooden log
<u>57 logo</u>	<u><i>A</i> is flattened and turned into a logo sticker; the logo is stuck on <i>B</i></u>
58 elf	<i>A</i> is taken by a thin green elf with pointy ears
58 leaf	a huge green leaf floats down onto <i>A</i>
58 olive	<i>A</i> is stuffed into a pitted green olive; the olive is eaten by <i>B</i>
<u>58 wolf</u>	<u><i>A</i> is attacked and eaten by a wolf</u>

59 elbow	you elbow <i>A</i> with one elbow; then you elbow <i>B</i> with your other elbow
59 lab	<i>A</i> enters Frankenstein's laboratory where <i>B</i> is being created
59 lip	a flying <i>A</i> hits you in the lip; your swollen lip bursts, out comes <i>B</i>
<u>59 wallaby</u>	<u><i>A</i> goes into a wallaby's pouch; the wallaby hops over <i>B</i></u>
60 chase	<i>A</i> starts moving fast, as if chased; <i>B</i> is doing the chasing
60 cheese	<i>A</i> goes into one of the holes of a large Swiss cheese
60 chess	<i>A</i> is a chess piece on a large chess board; <i>B</i> is playing chess
<u>60 jazz</u>	<u><i>A</i> is playing a jazz saxophone; <i>B</i> is blown out of the sax</u>
61 jet	a fighter jet takes off from <i>A</i> ; the jet buzzes <i>B</i>
61 judo	a judo expert in a white judo suit throws <i>A</i> to the ground
61 shadow	<i>A</i> has a long shadow; the shadow changes shape and becomes <i>B</i>
<u>61 sheet</u>	<u><i>A</i> is covered by a large white bedsheet; <i>B</i> emerges from under the sheet</u>
62 chain	a heavy metal chain is wrapped around <i>A</i> ; the chain leads to <i>B</i>
62 chin	a flying <i>A</i> strikes you on your chin; you rub your chin with <i>B</i>
62 genie	<i>A</i> is rubbed and an Aladdin-style genie magically appears
<u>62 ocean</u>	<u><i>A</i> is floating in a vast ocean</u>
63 chamois	visualize a chamois as an antelope, or a soft leather for polishing
63 gem	<i>A</i> guards a brightly colored gemstone; the gem is stolen by <i>B</i>
63 gym	<i>A</i> exercises in a gymnasium; <i>B</i> is also inside the gym
<u>63 jam</u>	<u><i>A</i> is covered with thick red strawberry jam with seeds</u>
64 chair	<i>A</i> sits on a thin wobbly wooden chair; the chair is knocked over by <i>B</i>
64 jar	<i>A</i> is pushed into a large glass jar; the jar is broken by <i>B</i>
64 shower	<i>A</i> takes a shower; out of the showerhead comes <i>B</i>
<u>64 usher</u>	<u><i>A</i> is guided in a dark room by an usher; the usher trips over <i>B</i></u>
65 cello	<i>A</i> plucks the strings of a large standing cello (hear it); out comes <i>B</i>
65 chili	visualize/taste a red hot chili pepper, or a bowl of chili con carne
65 jail	<i>A</i> is locked into jail; <i>B</i> is released from the jail
<u>65 Jell-O</u>	<u><i>A</i> turns into a figure made of Jell-O, a colored gelatin desert</u>
66 choo-choo	<i>A</i> rides a choo-choo train; the choo-choo crashes into <i>B</i>
66 Chow chow	visualize the Chow-chow as a small shaggy dog with a curled-up tail
66 G.I. Joe	G.I. Joe is an American army hero figure in cartoons and toys

- 96 bush a thick bush grows out of *A*; *B* is hiding in the bush
- 96 page *A* is covered by a page torn from a book; the page is folded to form a *B*
- 96 patch a large patch is placed on *A*; the patch is removed and *B* comes out
- 96 peach *A* eats a peach; in the peach is *B* instead of a peach pit
- 97 bike *A* tries to ride a bike; the bike rolls into or over *B*
- 97 book *A* is flattened by a falling book; the book is opened and out comes *B*
- 97 bug *A* is pulled by a huge slow-moving bug; the bug is smashed by *B*
- 97 pig *A* is smeared by a muddy pig
- 98 beef *A* eats and chokes on a piece of beef
- 98 beehive *A* enters a large beehive; the beehive is opened and *B* is inside
- 98 buffet *A* is placed on a lunch buffet; the buffet is tipped over by *B*
- 98 puff *A* puffs up like a puff of rice
- 99 baby *A* holds a crying and kicking baby
- 99 bib a bib is put on *A*
- 99 pipe *A* is smoked in a pipe; *B* comes out as smoke
- 99 pub *A* goes into a crowded pub; *B* comes out of the pub

You might wish to custom-design your Pocket Pseudonumer. Do this by first photocopying it and then using correction fluid (white-out) to remove any particular Pseudonume on your photocopy. You may then write in a Pseudonume that you prefer, and photocopy the Pocket Pseudonumer again.

The Pocket Pseudonumer is designed for quickly making phantasmagorias. However, any nouns can be used in a phantasmagoria, and Pseudonumes from the Ponderous Pseudonumer are also "phantasmagorishable".

Layout of the Ponderous Pseudonumer — 65,000 Pseudonumes

The Ponderous Pseudonumer includes most common English words that may serve as Pseudonumes of up to five Pseudonumerals. For each number, the Pseudonumes are listed alphabetically:

- Blank Pseudonumes, without Pseudonumerals
- Pseudonumes for one-digit numbers (0 - 9)
- Pseudonumes for two-digit numbers (00 - 99)
- Pseudonumes for three-digit numbers (000 - 999)
- Pseudonumes for four-digit numbers (0000 - 9999)
- Pseudonumes for five-digit numbers (00000 - 99999).

Pseudonumes with alternative spellings (e.g. favorite/favourite, modernize/modernise, traveling/travelling) are listed only once, as they have the same Pseudonumerals. An apostrophe has been added to the plural s-ending of many nouns to remind you of the possibility of using the possessive forms of these nouns. Possessive forms may be spelled differently, but have the same Pseudonumerals.

For the one- and two-digit numbers, there are so many choices that adjectives and some other useful Pseudonumes are listed in bold-face print.

For the one-, two-, and three-digit numbers, some Pseudonume Phrases and altered words ending in -ish, and -y are included to provide more handy choices.

Throughout the Ponderous Pseudonumer the Blank Pseudonume (a) has been added after many transitive verbs, and many nouns have been altered to adjectives using the -y ending. Not all such possibilities have been indicated.

Finally, keep in mind that the Pseudonumes are to play with and to serve you. If they don't quite fit your numbers — try to make them fit. Any Pseudonumes that you have altered may be the ones you enjoy the most*ish* and remember'*m* the best!

Allan Krill, Ph.D.

About the author

Allan Krill holds a B.S. degree in geology from the University of California, Santa Cruz and a Ph.D from Yale University. He has an appointment from the King of Norway as professor of geology at the Norwegian University of Science and Technology (NTNU), and has served as editor of the Norwegian Journal of Geology (NGT). He and his wife are both American and live with their four children in Trondheim, Norway.

Prof. Krill's interest in word play began with stories by Dr. Seuss, and his interest in numbers began with his research in the age determination of rocks. With the help of modern isotope technology, some minerals can "remember" their date of birth for a thousand million years. Prof. Krill found that he needed "memory technology" to remember the ages of various rocks. He read several books on the mind and memory techniques, including *The Memory Book*, by Harry Lorayne and Jerry Lucas (Ballantine Books). He has used and taught the phonetic number code for twenty years.
