

The accepted scientific names of native or naturalized members of the East Texas flora (and other nearby Texas plants discussed in detailed notes) are given in [Roman type]. In addition, accepted generic and family names of plants in the flora are in **[bold]**. Taxonomic synonyms and names of plants casually mentioned are in [*italics*]. Common names are in [SMALL CAPS]. In order to help locate specific and infraspecific epithets, they are given in [Roman type] as separate entries followed on the next line by the genus or genera in which they are named. Color photographs are indicated by the symbol , while entries in the Commercially Important Timber Trees Appendix (21) are indicated by the symbol .

A		
Abies, 396	Adiantaceae , 366, 368	<i>palustris</i> , 818
<i>Abildgaardia</i> , 607	Adiantum , 368	<i>perennans</i> , 817
abscondita	capillus-veneris, 368	var. <i>aestivalis</i> , 817
